You're invited.

The Future *of Freshness*

Monday, November 9, 2026 · 10:00 to 12:00 ET · Darwin room, Princeton, New Jersey

Hello,

In July your team came out to Norco and saw how we make flavor. On November 9 it's our turn to come to Princeton. We'll bring what we know about flavor, what we're seeing in the market, the trends we're watching and the innovation work we've been doing, all of it aimed at the goal in Ross's invitation: *"new flavor experiences that both strengthen our appeal with existing loyal users and create opportunities to attract new consumers to the franchise."*

We've built the morning around your four objectives. We're also bringing four samples from our development bench, made in the TheraBreath bases you sent us. You'll taste them blind and score them on your phone, and we'll all vote from our phones a few more times along the way. Our goal for noon is to agree, together, on what to develop first, who will take each idea forward and when to look at the next samples. Afterwards we plan to write it up as *The Flavor Playbook* for everyone who was there.

You'll meet four of us from The Flavor Factory: Dan Wixted, President; Alex Wixted, Business Operations; Ryan Wixted, QC/QA Manager; and Matt Wixted, Production Manager.

Just below are four quick questions, and we'll open the morning with everyone's answers. They take about five minutes. The rest of the page is there if you'd like more to read on the way in.

The Flavor Factory *The Flavor Factory team*

Four quick questions

To answer, open the web version of this page through the link in your invitation email. Here are the questions, so you can think them over first. We'll share everyone's answers, without names, at the start of the morning.

1. **Who should TheraBreath's next flavor be for?** Pick one: Loyal TheraBreath users, Mouthwash users who buy another brand, People who don't use mouthwash yet, People who want it milder, Gen Z, Families with kids and tweens, People 55 and over, People living with dry mouth, Shoppers outside the US, Someone else.

2. **Which moment of the day is TheraBreath missing?** Pick one: Wake-up, After coffee, After lunch, Afternoon meeting, After the gym, Before going out, Wind-down, On the go.
3. **Is there a flavor or direction that would feel off-brand for TheraBreath? Tell us which, and why.** Optional.
4. **How do you like your freshness?** Five sliders: more familiar or more adventurous; cooling or soft; classic mint or botanical; just does the job or something to enjoy; every day or for a moment.

If you'd like more to read

For the way in, or for later. None of it needs an answer.

Why we're here

TheraBreath took the burn out of mouthwash, and it now holds a record 26.8% of the category, number 2 in mouthwash. The next job is giving more people a reason to want it. Church & Dwight puts TheraBreath's household penetration at 14%, against 65% for mouthwash as a whole. So 86 in 100 households don't buy TheraBreath yet: some buy another mouthwash, and some don't buy mouthwash at all.

The morning

10:00	Welcome, who we are and your four objectives
10:10	What's changing: your portfolio, the market and seven trends *"Identifying emerging flavor, sensory, and consumer trends that could influence the future of oral care."*
10:25	Flavor School, then four directions *"Exploring new flavor territories and sensory experiences that can differentiate TheraBreath from competitors and create memorable consumer experiences."*
10:40	A blind tasting in your bases
11:00	From samples to concepts *"Developing innovative flavor concepts that unlock new usage occasions, address new consumer segments, and create opportunities for portfolio expansion."*
11:20	White space, then Now, Next, Later *"Generating a pipeline of innovation platforms, flavor directions, and white-space opportunities that have the potential to drive incremental growth across the portfolio."*
11:40	What we decided and what happens next

Seven trends

Discussion starters, not conclusions. Some come from oral care and some from food and flavor more widely, so part of the job is deciding which ones matter for TheraBreath. On the day, everyone picks the three that matter most.

1. People want milder mouthwash.
   Let people choose how strong they want it. Seen in oral care.
2. Warm spices are showing up in fresh flavors.
   There could be room for a warm, spiced flavor for adults, as long as it still finishes cool. Seen in food and flavor.
3. Fruit flavors are growing up.
   Fruit-forward mints, made with adults in mind. Seen in food and flavor.
4. Botanicals are showing up in daily routines.
   Flavors made for a particular time of day, like first thing in the morning or right before bed. Seen in oral care.
5. Sweeter, more playful flavors are reaching oral care.
   A sweeter start can work, as long as the finish is clean. Seen in oral care.
6. How it feels is part of the product.
   Cooling, tingle and warmth deserve as much design as the taste. Seen in oral care.
7. Many people live with dry mouth or changed taste.
   A flavor that stays pleasant for people with a dry mouth or changed taste could be worth exploring, without any health claim. Seen in oral care.

Three things to think about on the way in

1. One flavor a loyal TheraBreath user would love, and one that might win over someone who has never bought it.
2. The flavor note you think would struggle most in an oxidizing base, and why.
3. A moment in the day where TheraBreath isn’t showing up yet, and what it would need to taste like to earn a place there.

Our goal for noon: a short list of what to develop next, with who will take each one forward and when to check in, agreed together.

Monday, November 9, 2026 · 10:00 to 12:00 ET. Darwin room, Church & Dwight, 469 N Harrison St, Princeton, NJ 08540. Bring your phone: you’ll use it to score the samples and vote.

Confidential. The samples are development work made just for this session. They aren’t finished products, and nothing on this page is a claim or a commercial formula. Please keep this page and the write-up within the group.
