PRESENTER EDITION · 10:00 TO 12:00 · MONDAY, NOVEMBER 9, 2026 · DARWIN ROOM, PRINCETON

The Future *of Freshness*

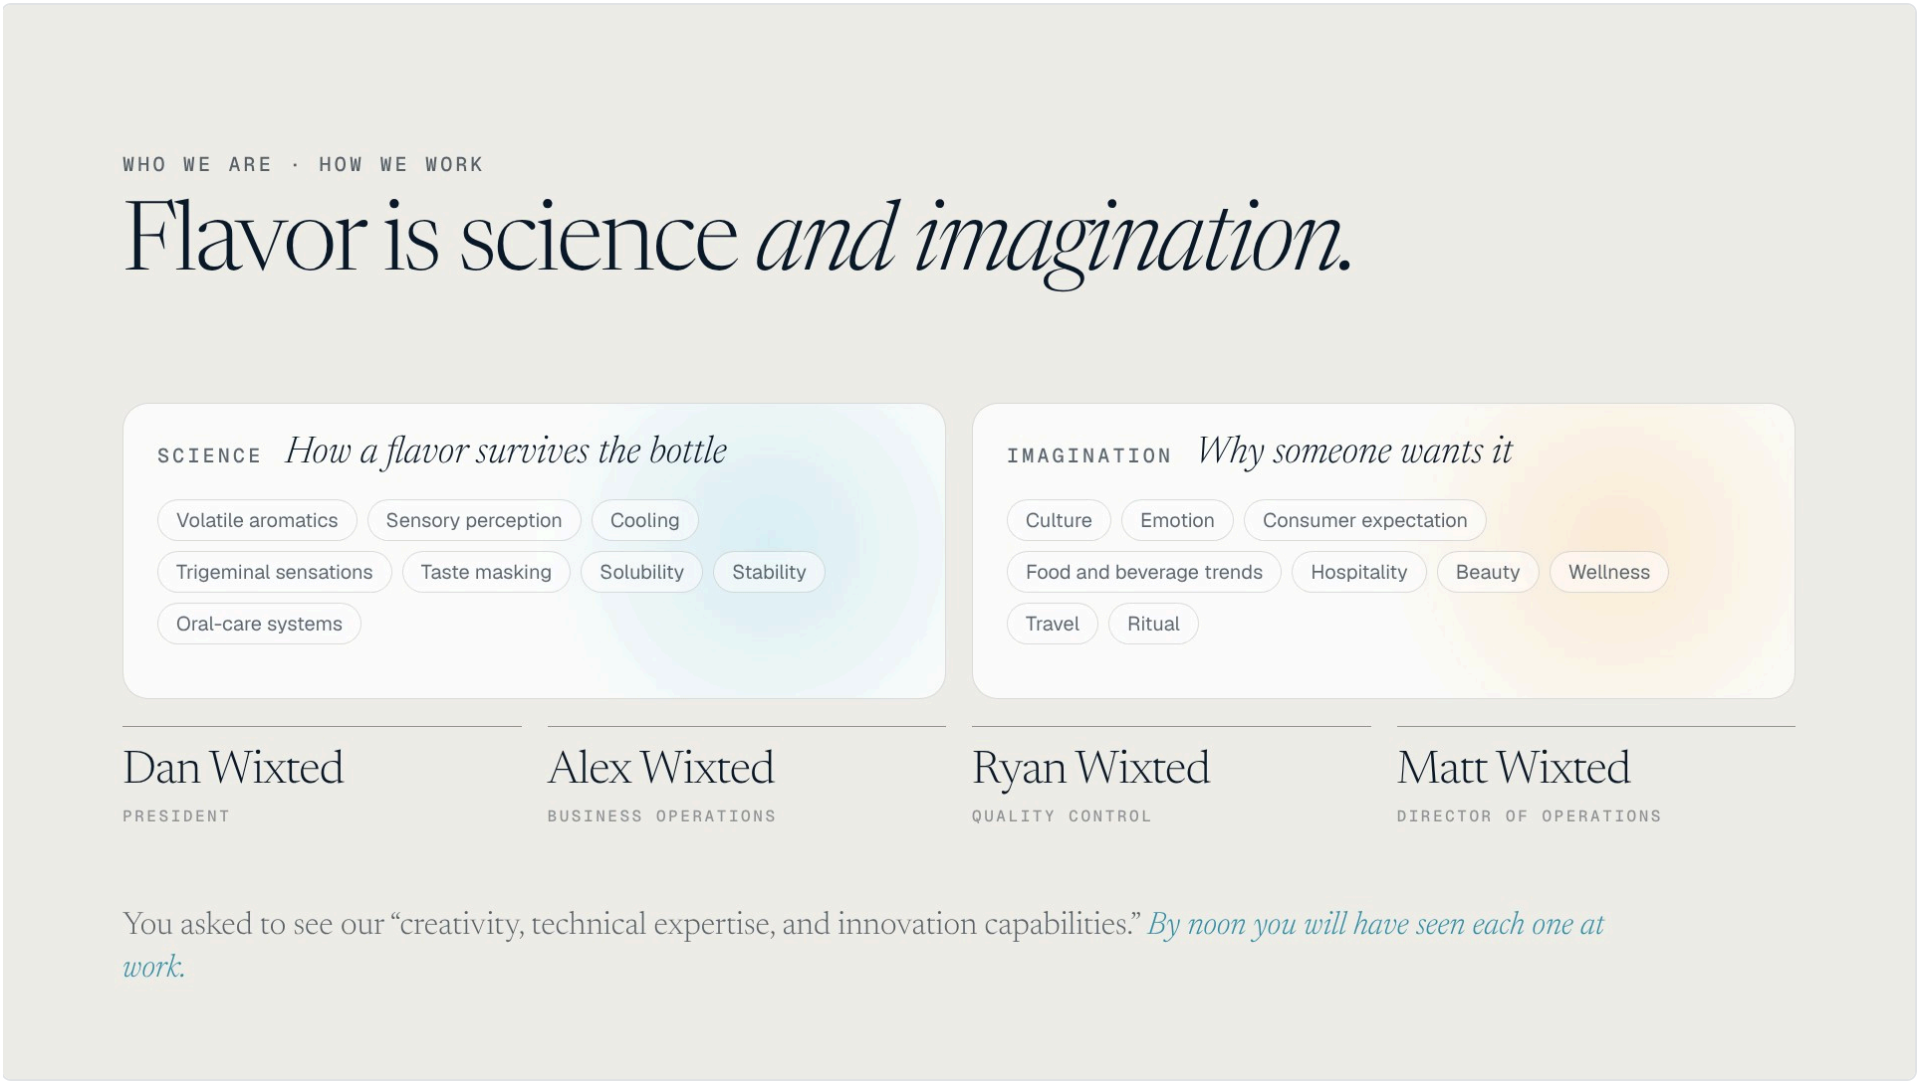

Every scene exactly as the room will see it on the TV, at its last build, with the time and the talking points. It is a discussion: each of Ross's four objectives opens in his words and closes on questions for the room; what the room decides is marked or typed in live and becomes the Playbook at the end. 32 scenes, plus "You told us" once the pre-brief answers are in. The live presentation is at /host: right arrow or click to go on, F for full screen, N for the talking points.

TIME	PART	OBJECTIVE	SCENES
10:00 to 10:10	Welcome: who we are, and your four objectives		1 to 5
10:10 to 10:25	Your portfolio, the market, and what is changing	01	6 to 11
10:25 to 10:40	Flavor School and four opportunity platforms	02	12 to 21
10:40 to 11:00	A blind tasting made in your bases	02	22 to 23
11:00 to 11:20	From samples to concepts: who, when and what role	03	24 to 25
11:20 to 11:40	White space and the pipeline: Now, Next, Later	04	26 to 28
11:40 to 12:00	Our roadmap, owners and next steps, and a short film to send you to lunch		29 to 32

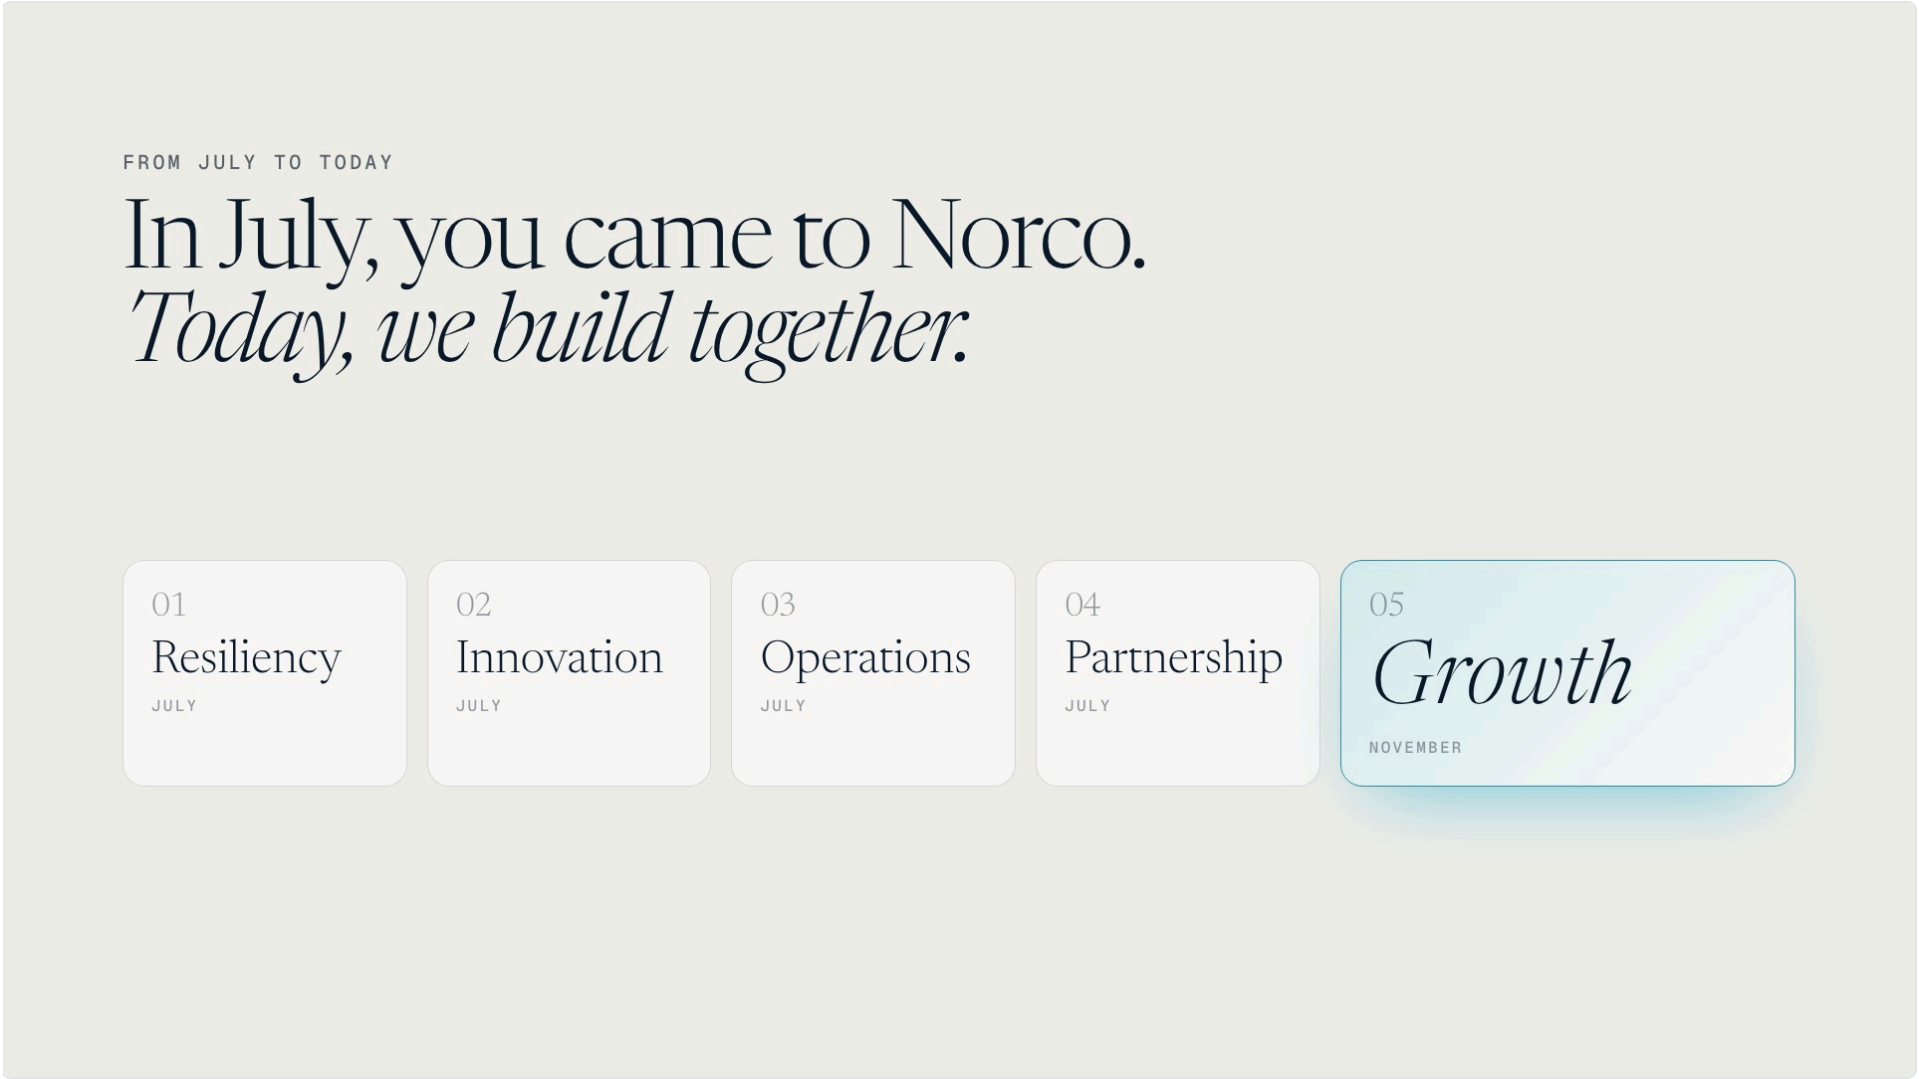

Confidential. For The Flavor Factory team; not for distribution.

- Welcome, and thank you to Ross for the invitation.
- Two hours, built around your four objectives. A conversation, not a presentation: questions welcome throughout.
- By noon: concepts, a roadmap, and owners and dates.

- Ross asked to see our creativity, technical expertise and innovation capabilities in depth. This morning is that, in practice.
- Flavor is science (how a flavor survives the bottle) and imagination (why someone wants it).
- Introduce the four of us.

- In July you came to Norco: resiliency, innovation, operations, partnership.
- Today is the fifth word: growth.

YOUR BRIEF, OUR AGENDA

You asked for four things. *Here is how we will answer them by noon.*

01

Identifying emerging flavor, sensory, and consumer trends that could influence the future of oral care.

10:10 TO 10:25
WHAT IS CHANGING

02

Exploring new flavor territories and sensory experiences that can differentiate TheraBreath from competitors and create memorable consumer experiences.

10:25 TO 11:00
WHERE FLAVOR CAN GO

03

Developing innovative flavor concepts that unlock new usage occasions, address new consumer segments, and create opportunities for portfolio expansion.

11:00 TO 11:20
WHAT WE COULD MAKE

04

Generating a pipeline of innovation platforms, flavor directions, and white-space opportunities that have the potential to drive incremental growth across the portfolio.

11:20 TO 11:40
WHAT GOES FIRST, NEXT AND LATER

AND ONE GOAL, IN YOUR WORDS

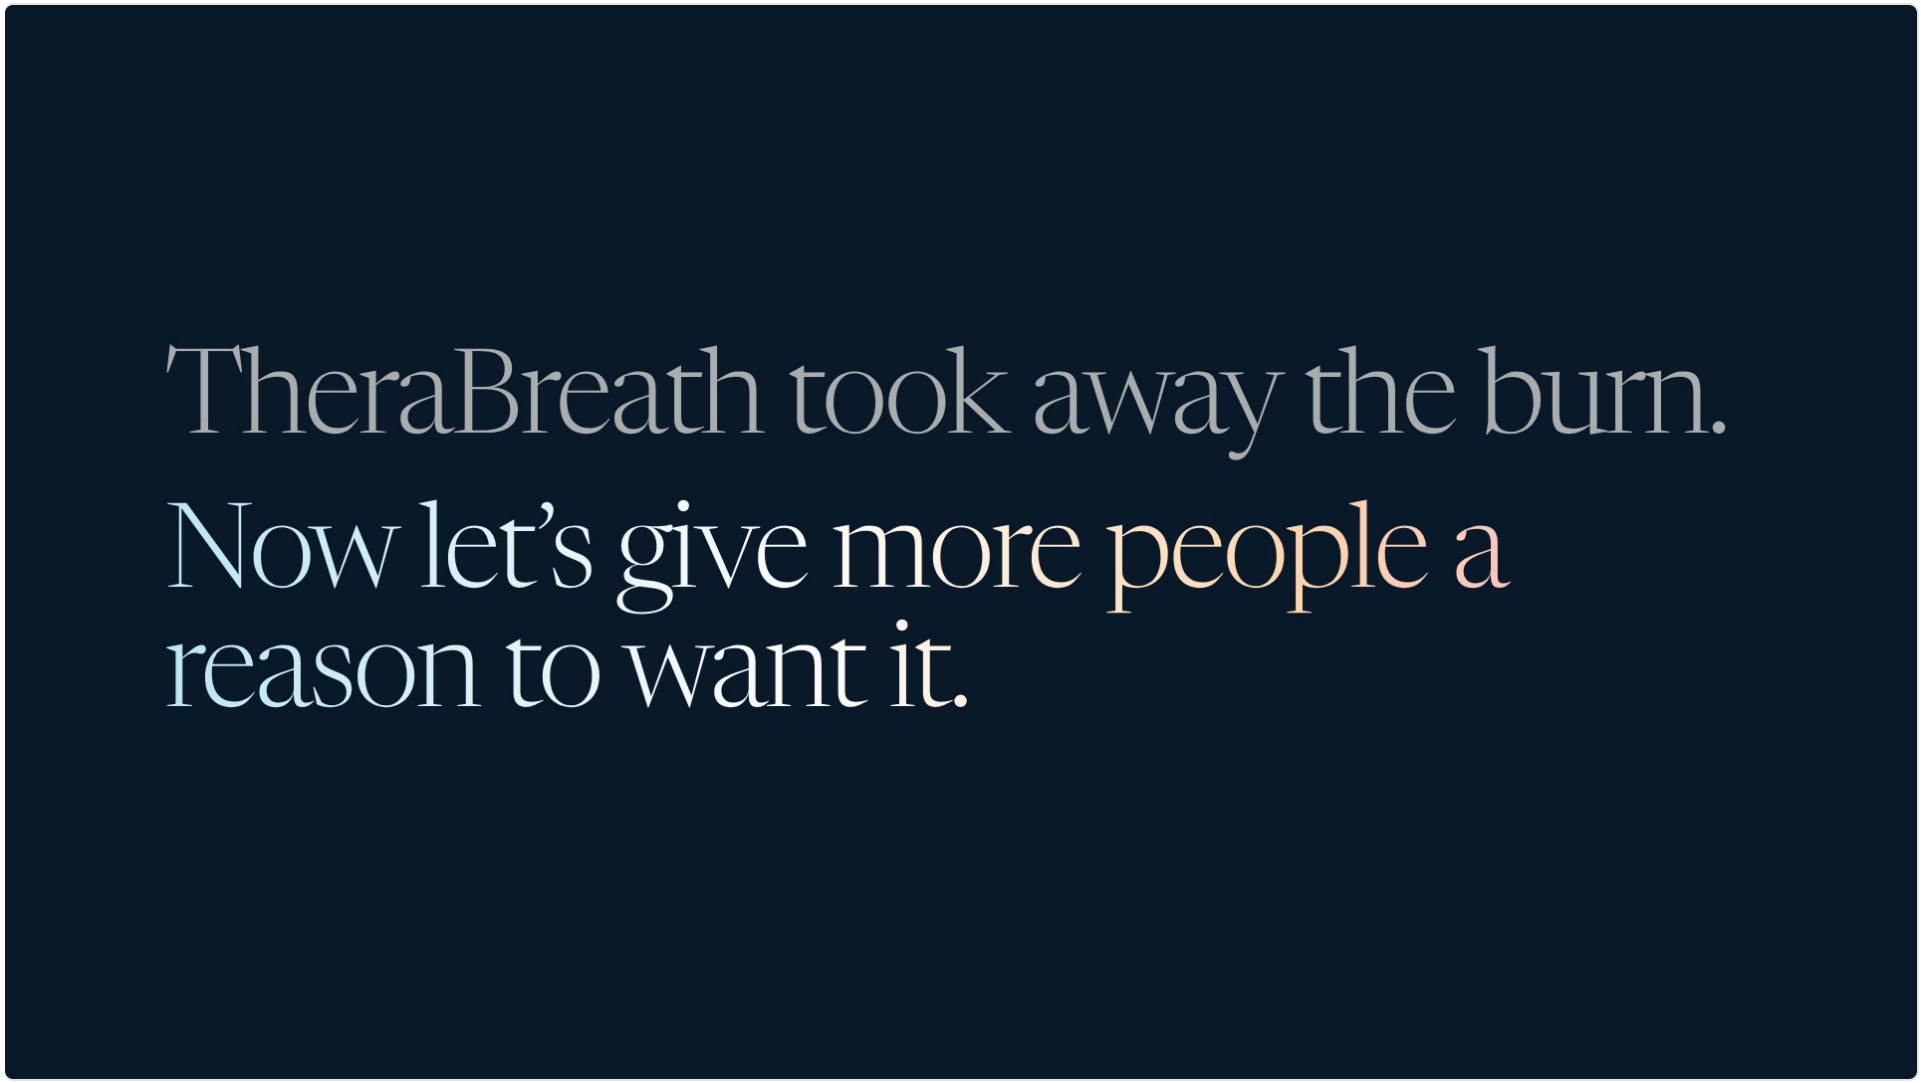

"...new flavor experiences that both *strengthen our appeal with existing loyal users* and *create opportunities to attract new consumers to the franchise*."

Source: Ross Conroy, Church & Dwight Oral Care R&D, workshop invitation, September 18, 2026

- Ross's four objectives, word for word, one per build. Each part of the morning answers one of them, in order.
- Last build, his goal: new flavor experiences that strengthen appeal with loyal users and attract new consumers.

Appears here once the pre-brief answers are in (Ross sends the pre-brief on November 3): the consumer the room most wants to win, the moment TheraBreath is missing, and the flavors they would never approve, without names. Every scene after it is numbered one higher.

- The pre-brief homework: the consumer the room most wants to win, and the moment TheraBreath is missing.
- Have some fun with the vetoes. No names on screen.

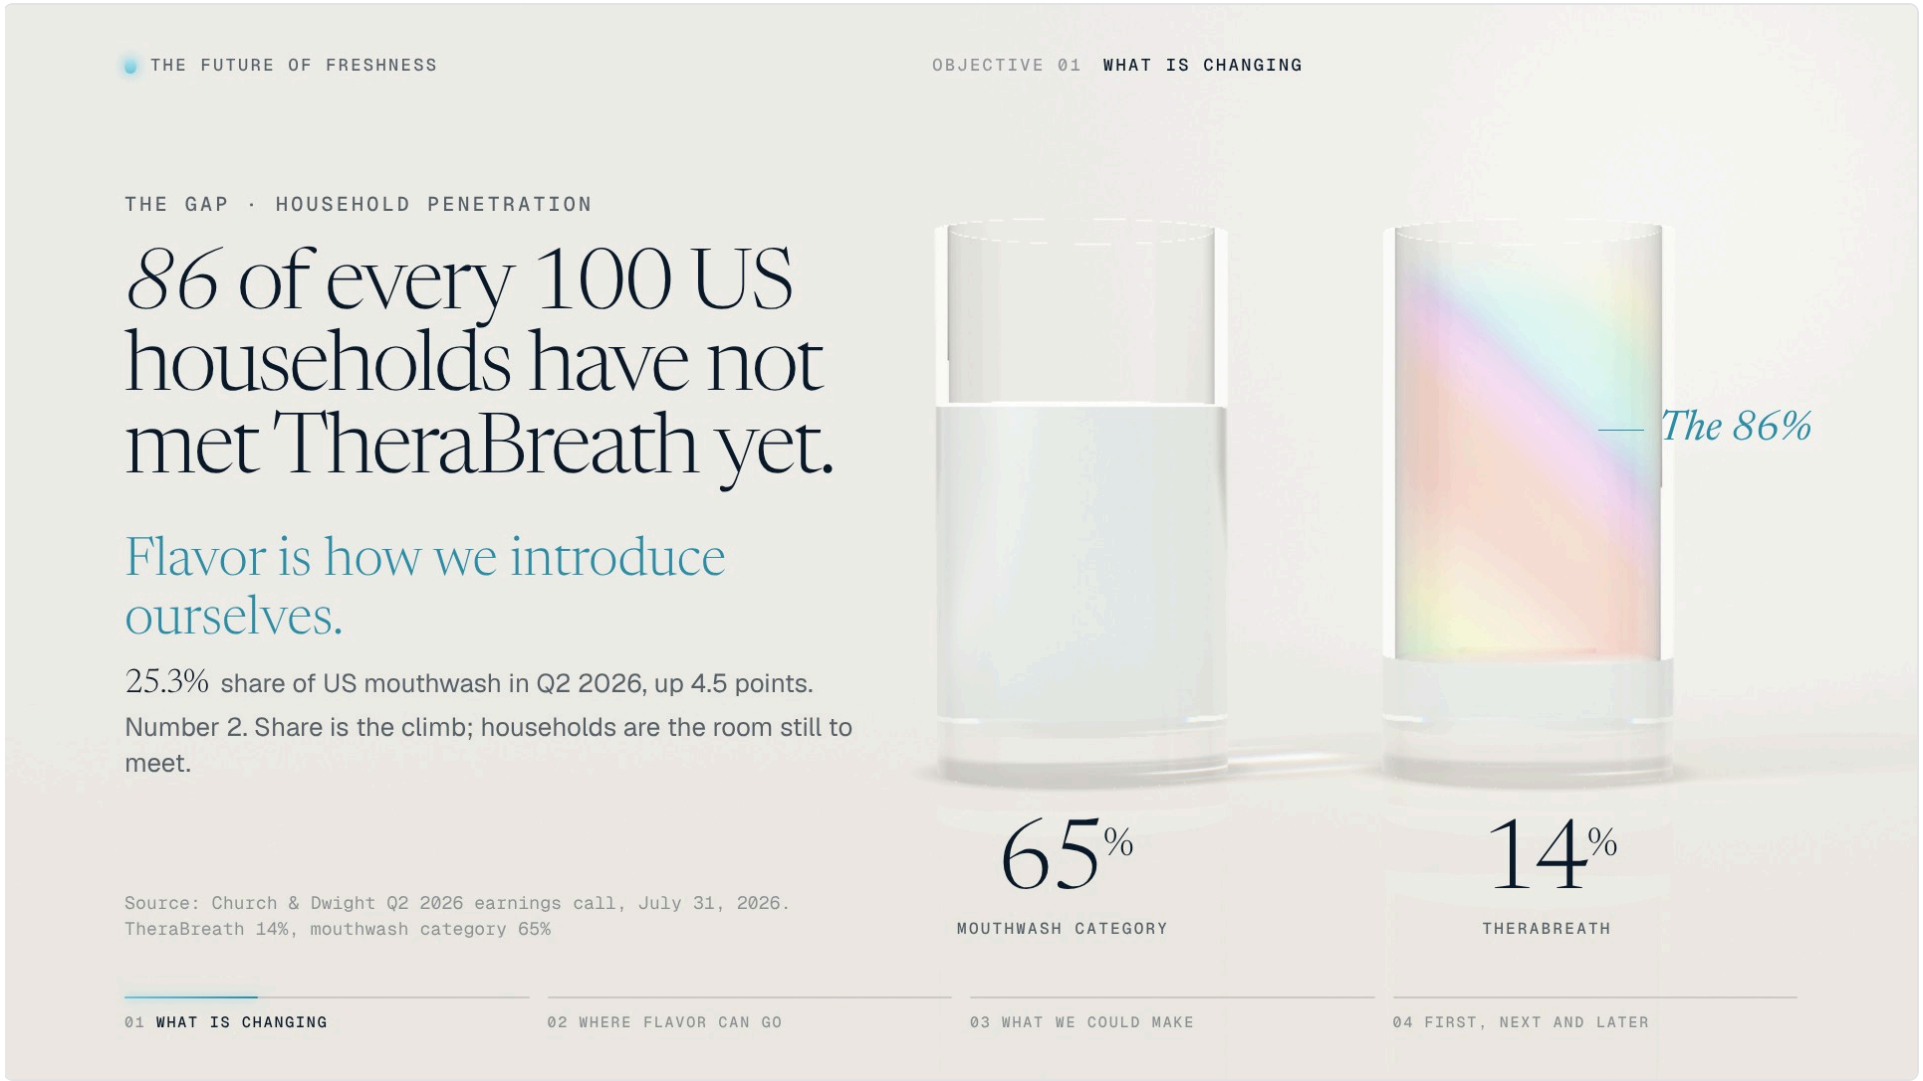

- Pause between the lines.

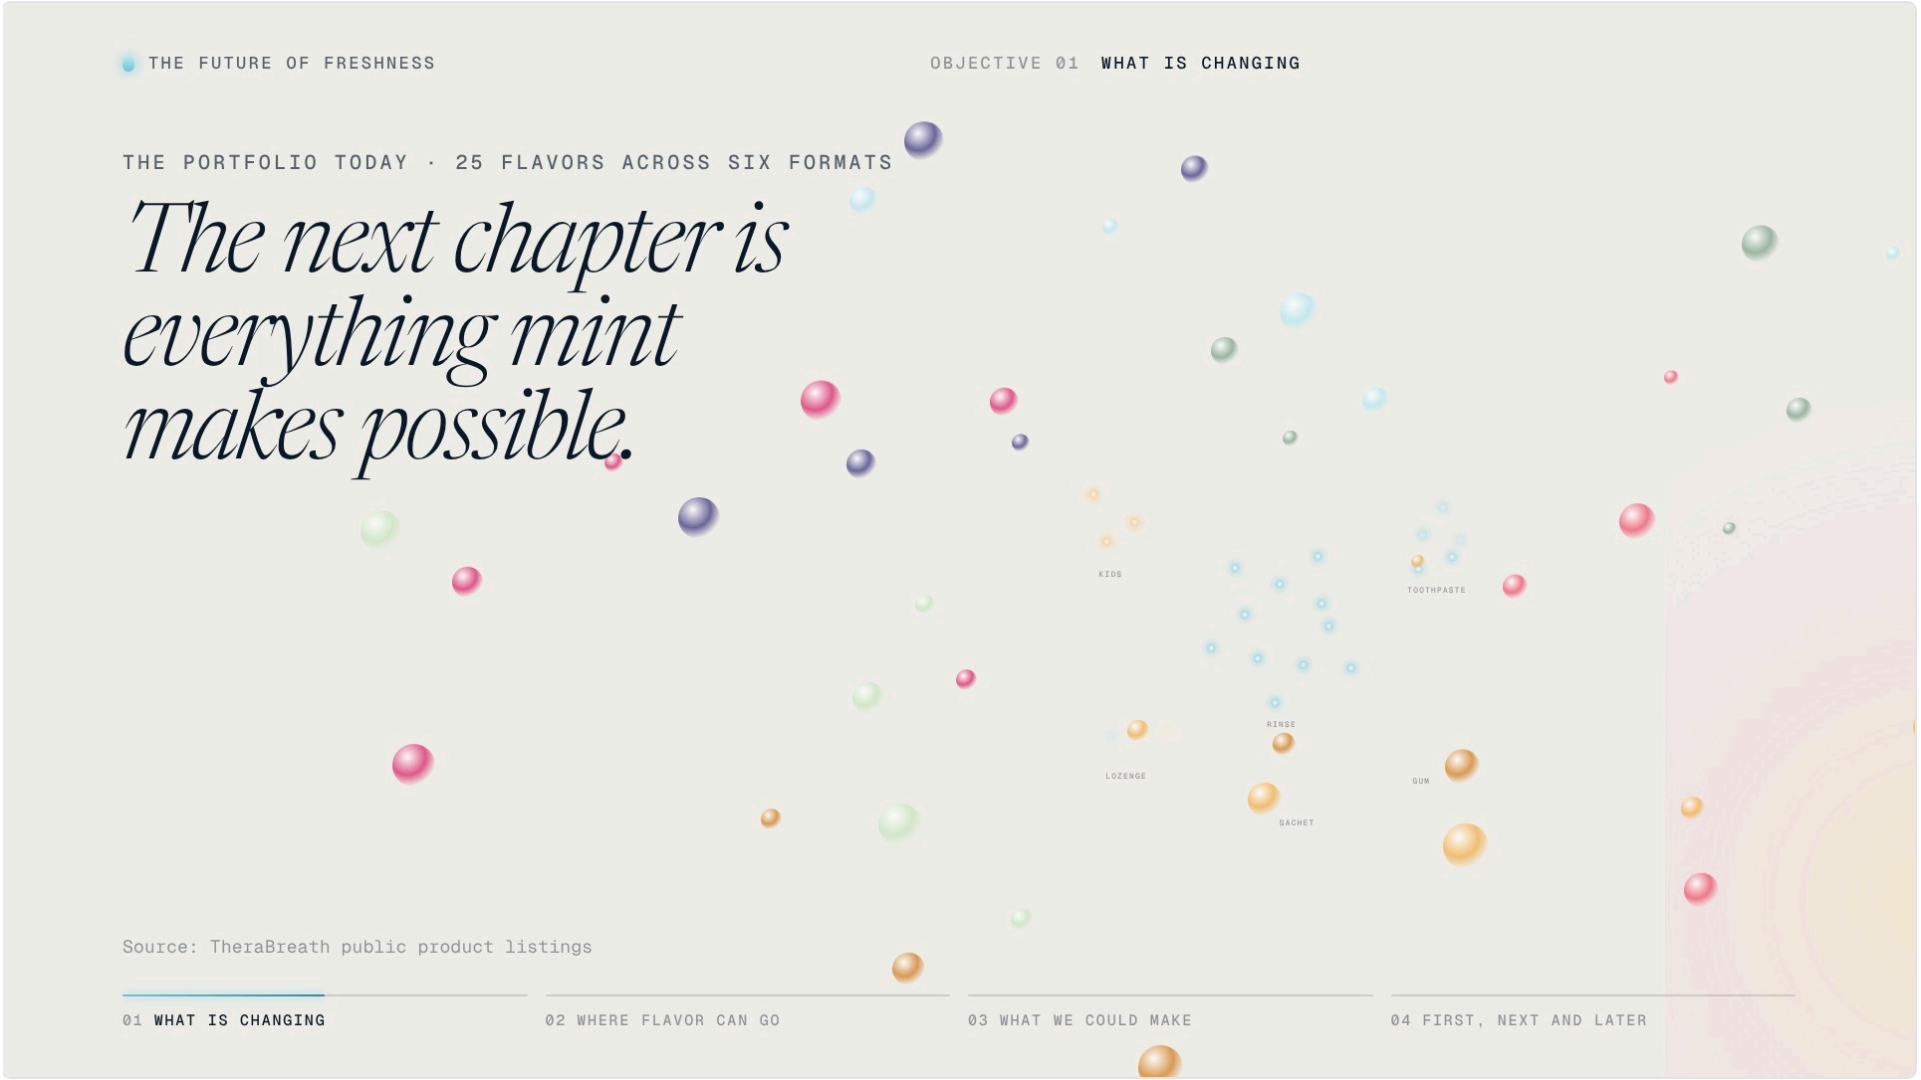

- TheraBreath took away the burn. Now let’s give more people a reason to want it.

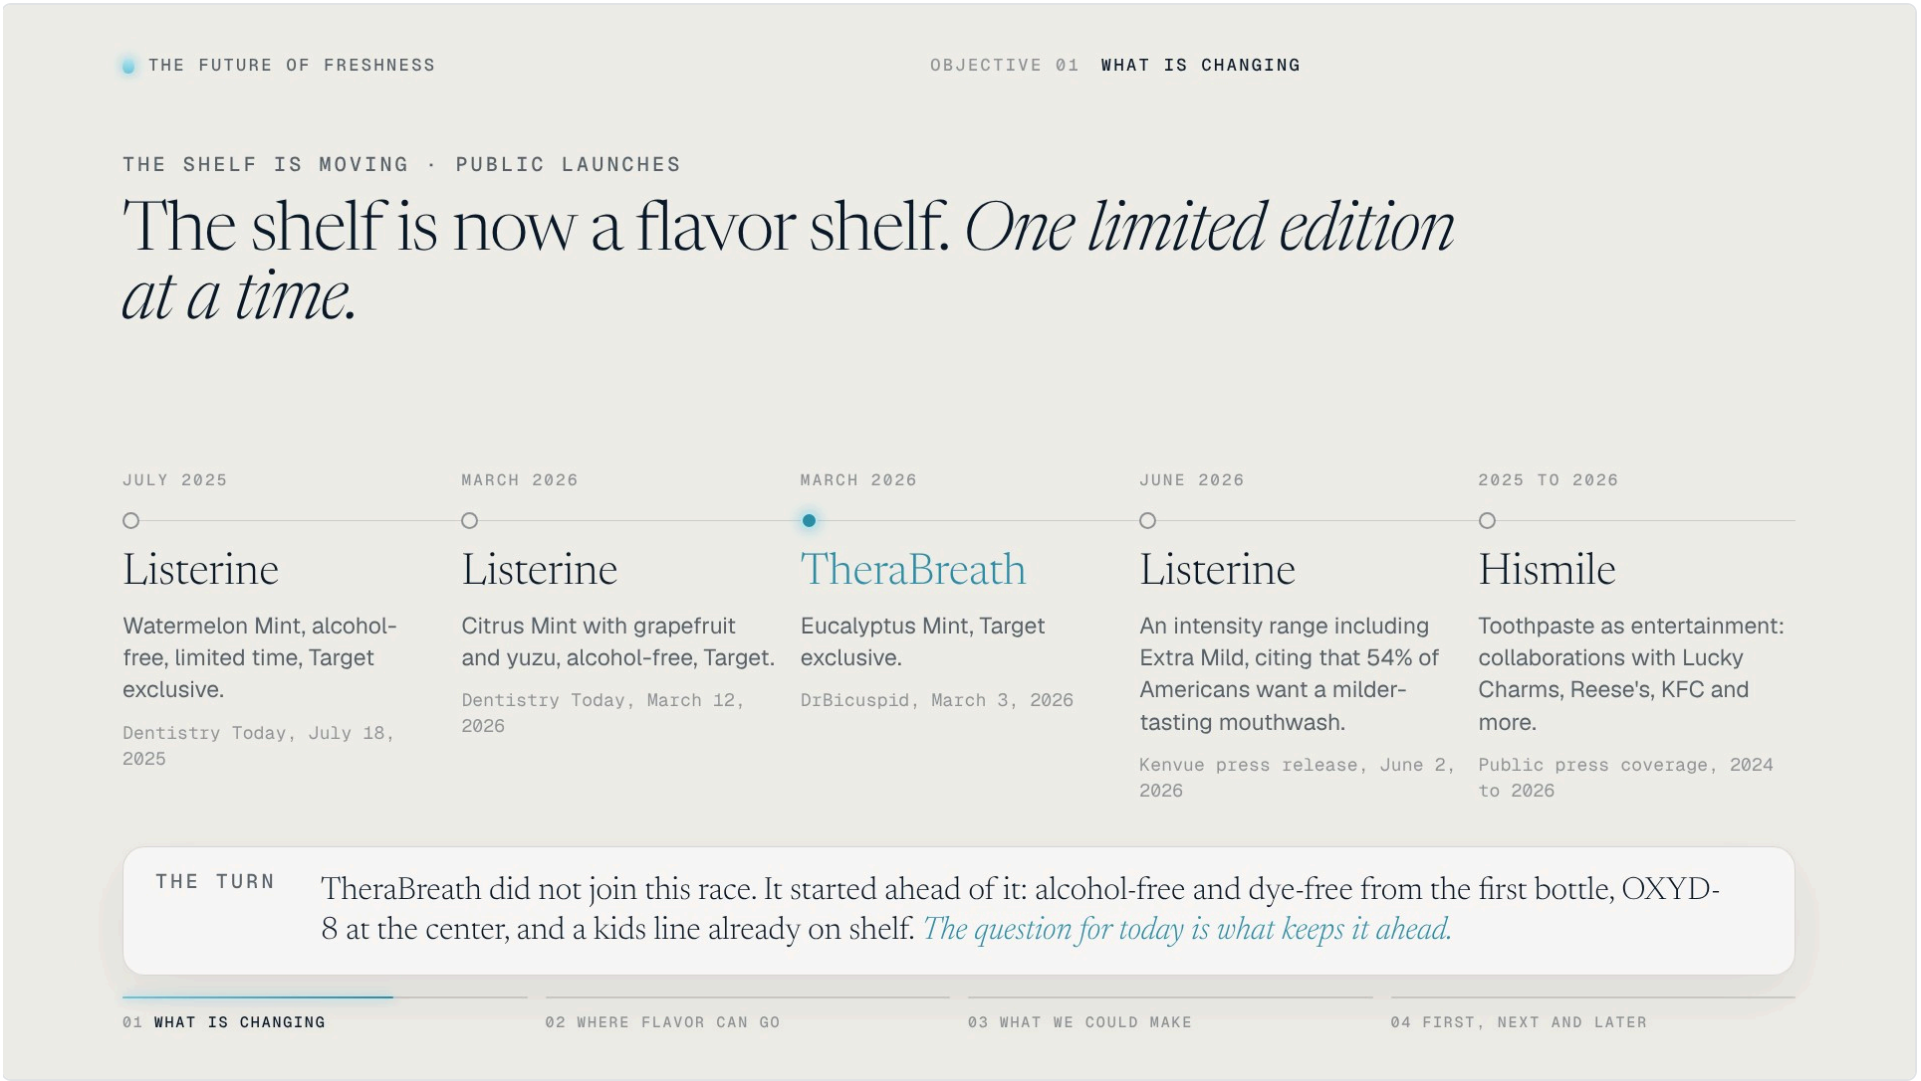

- Ross's words on screen. Talking points:
- Mint is mastered: 21 of TheraBreath's 25 flavors today are mint.
- 86 of every 100 US households have not met TheraBreath yet.
- The shelf is turning into a flavor shelf, one limited edition at a time.
- Seven signals shaping flavor in oral care.

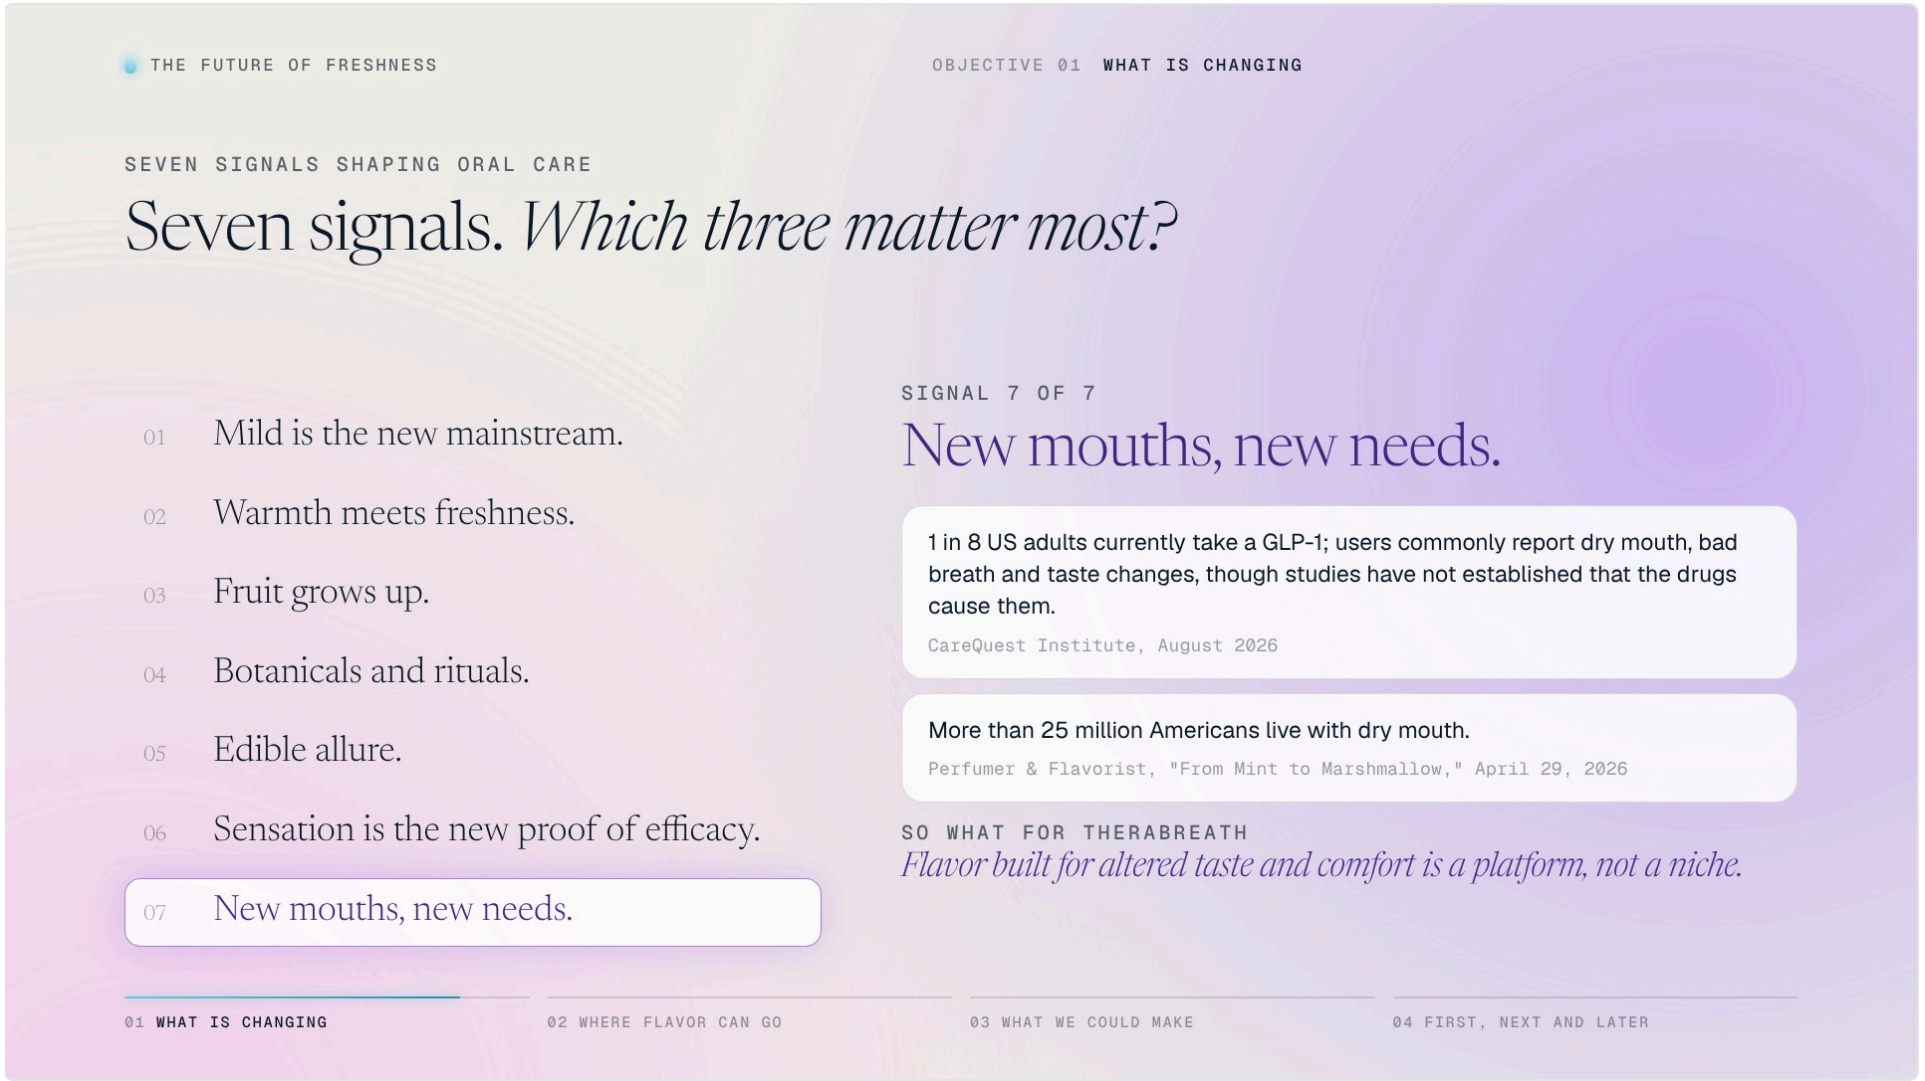

- One line of context: 25.3% share of US mouthwash in Q2 2026, up 4.5 points. Number 2.
- Let the glasses fill in silence. 86 of every 100 US households have not met TheraBreath yet.
- Pause. Flavor is how we introduce ourselves.

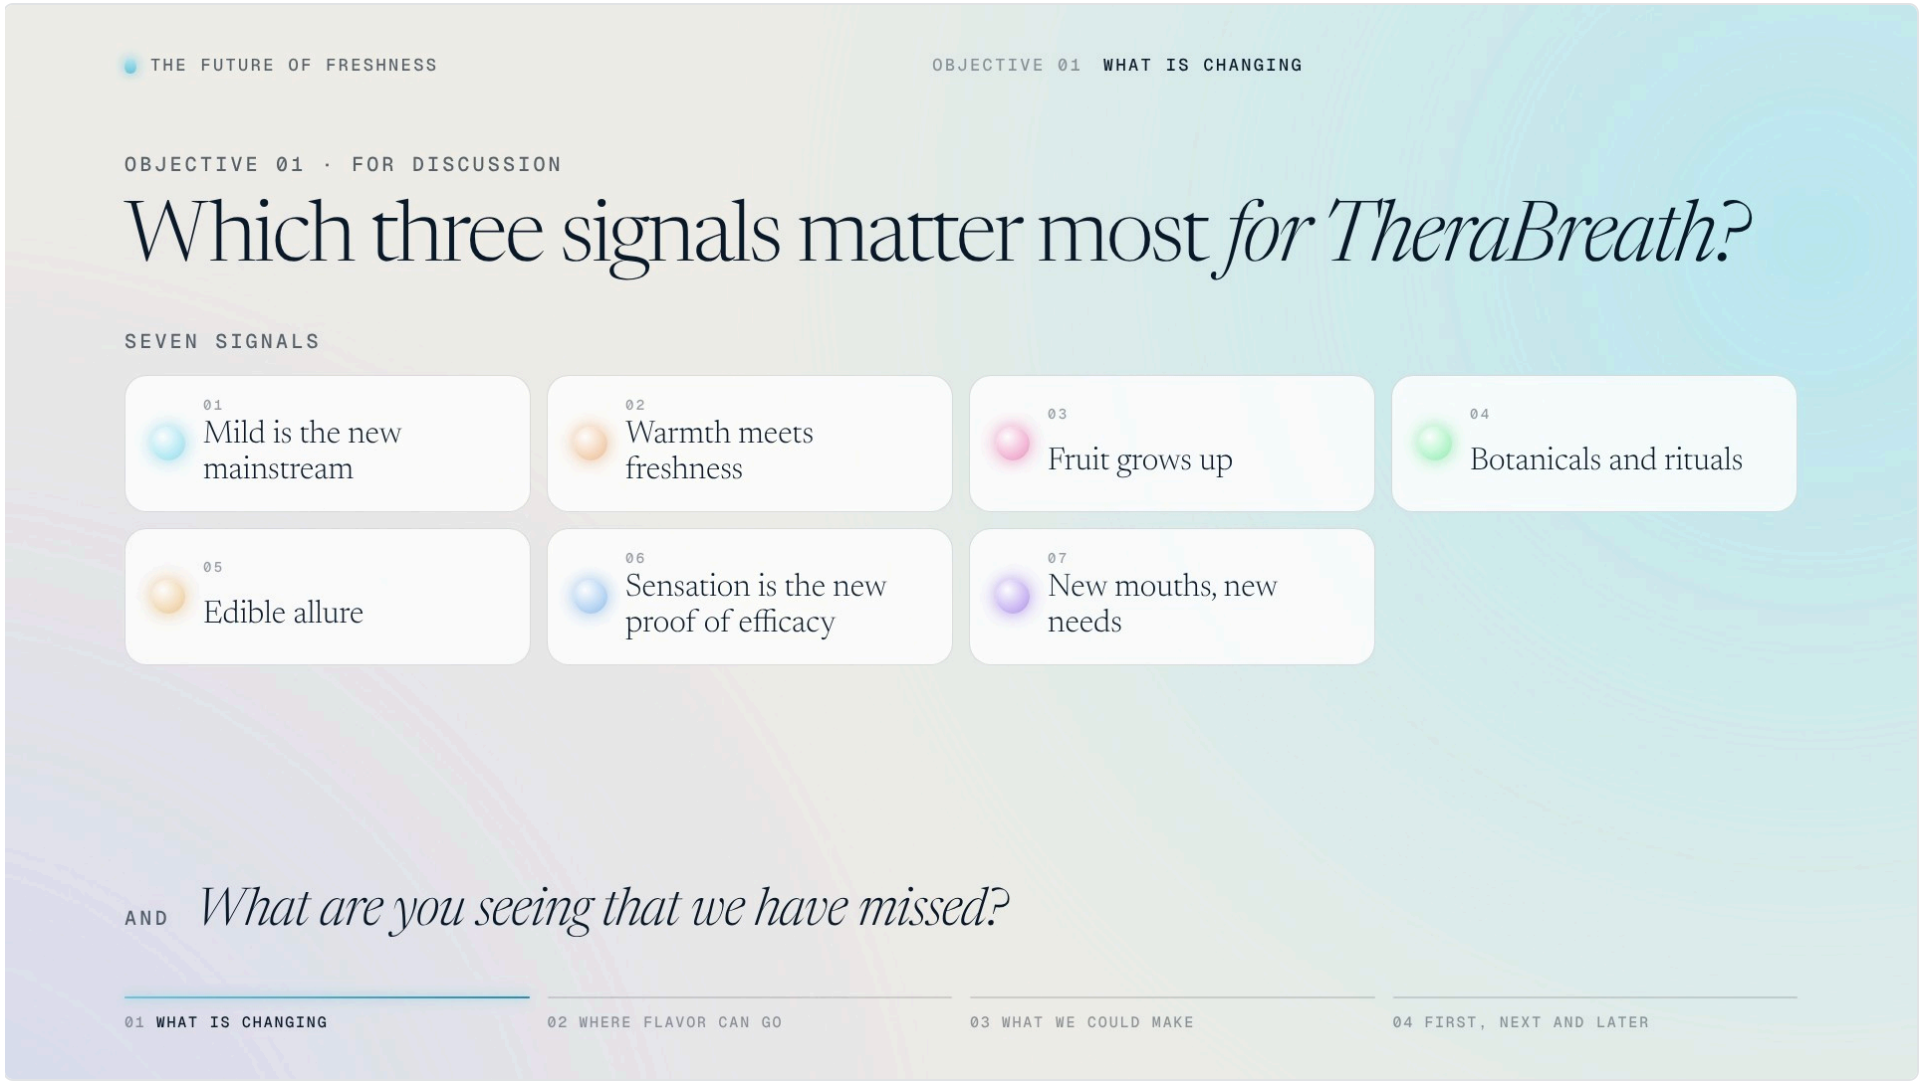

- 25 flavors across six formats; 21 of them are mint. Mint is mastered.
- Next build: zoom out. The next chapter is everything mint makes possible.

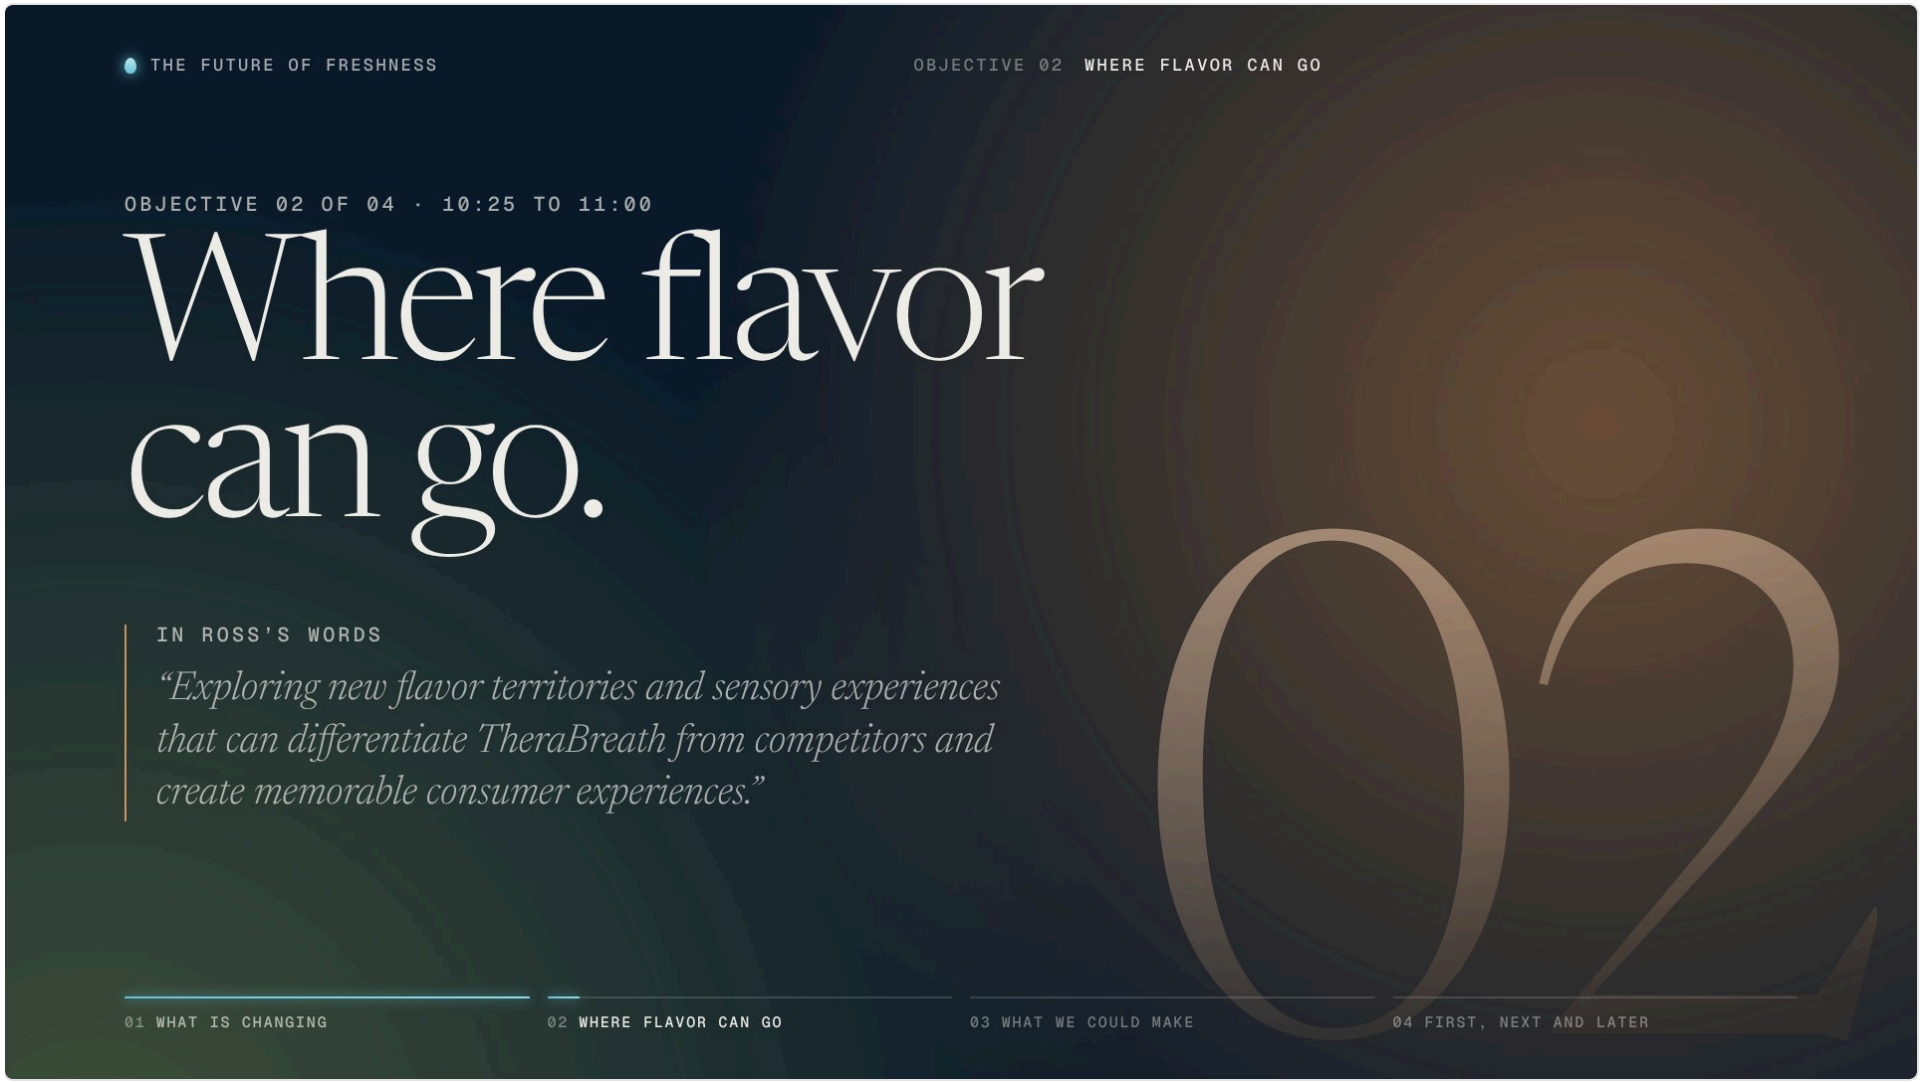

- Factual and neutral: the shelf is now a flavor shelf, one limited edition at a time.
- Last build: TheraBreath started ahead of this race (alcohol-free, dye-free, OXYD-8, a kids line on shelf).
- For the room: what keeps it ahead?

- One build per signal: the headline, two public proofs, the so what. About forty seconds each.
- Do not read every proof aloud. Ask which one surprises the R&D team.

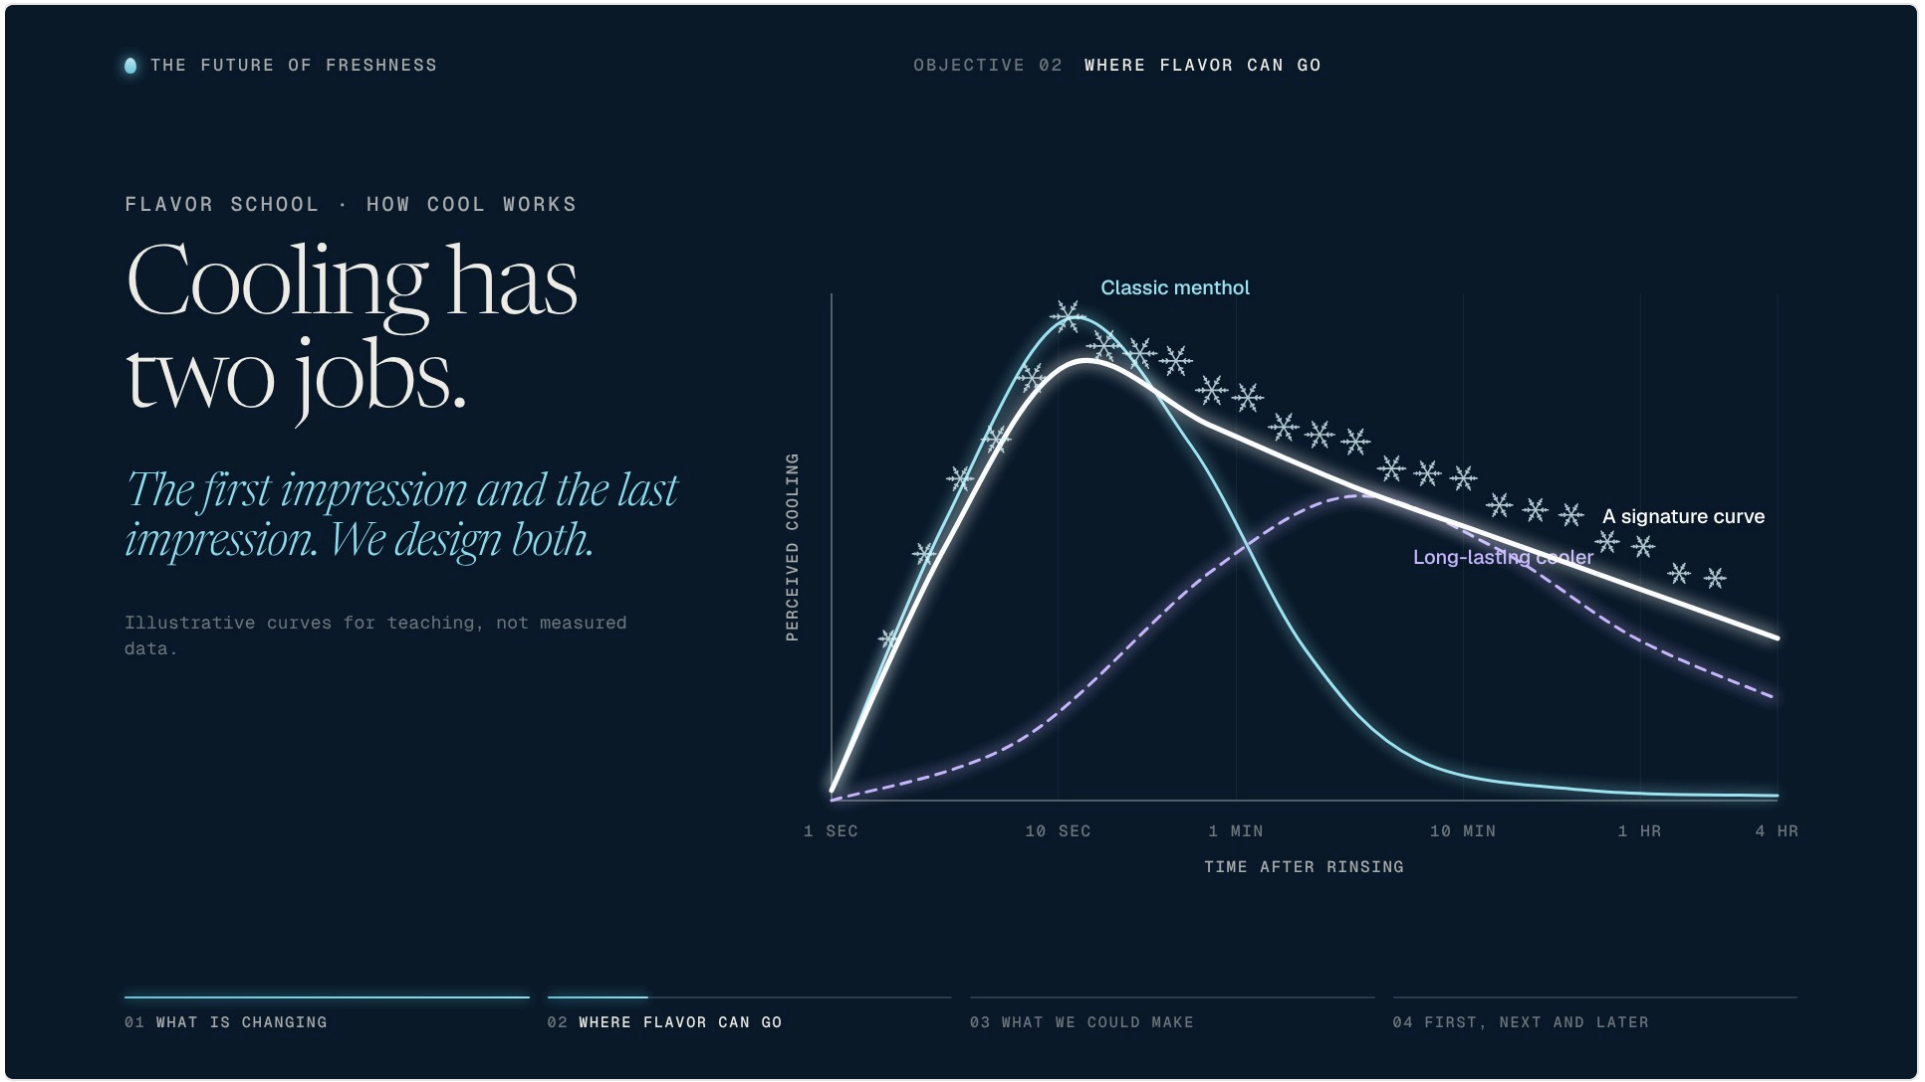

- Which three matter most for TheraBreath? Click a signal to mark it as the room agrees (three at most).
- Next build: What are you seeing that we have missed?
- The marked signals become Chapter 1 of the Playbook at the end.

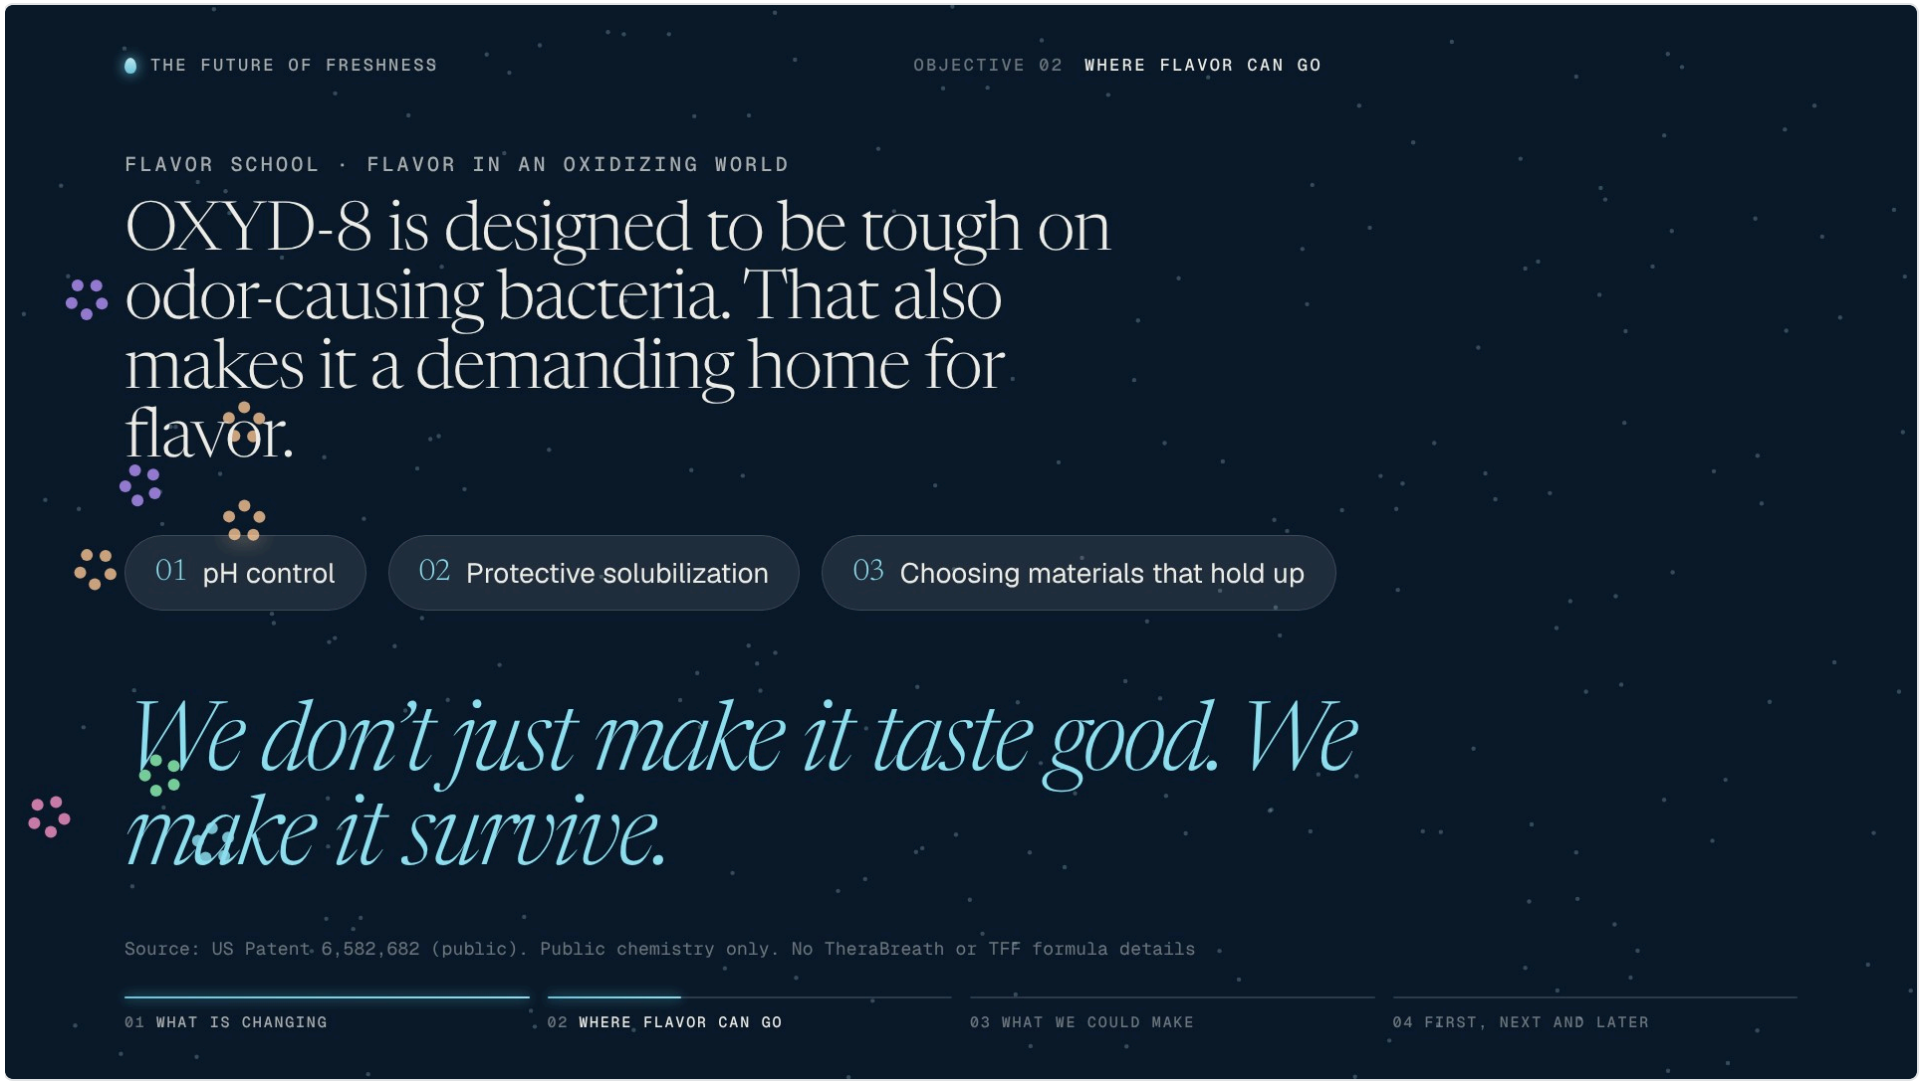

- Ross's words on screen. Talking points:
- Most of what we call flavor is smell; the rest is feeling.
- OXYD-8 makes TheraBreath a demanding home for flavor.
- Four opportunity platforms, two of them in the blind tasting.
- Four samples, made in your Fresh Breath and Kids bases.

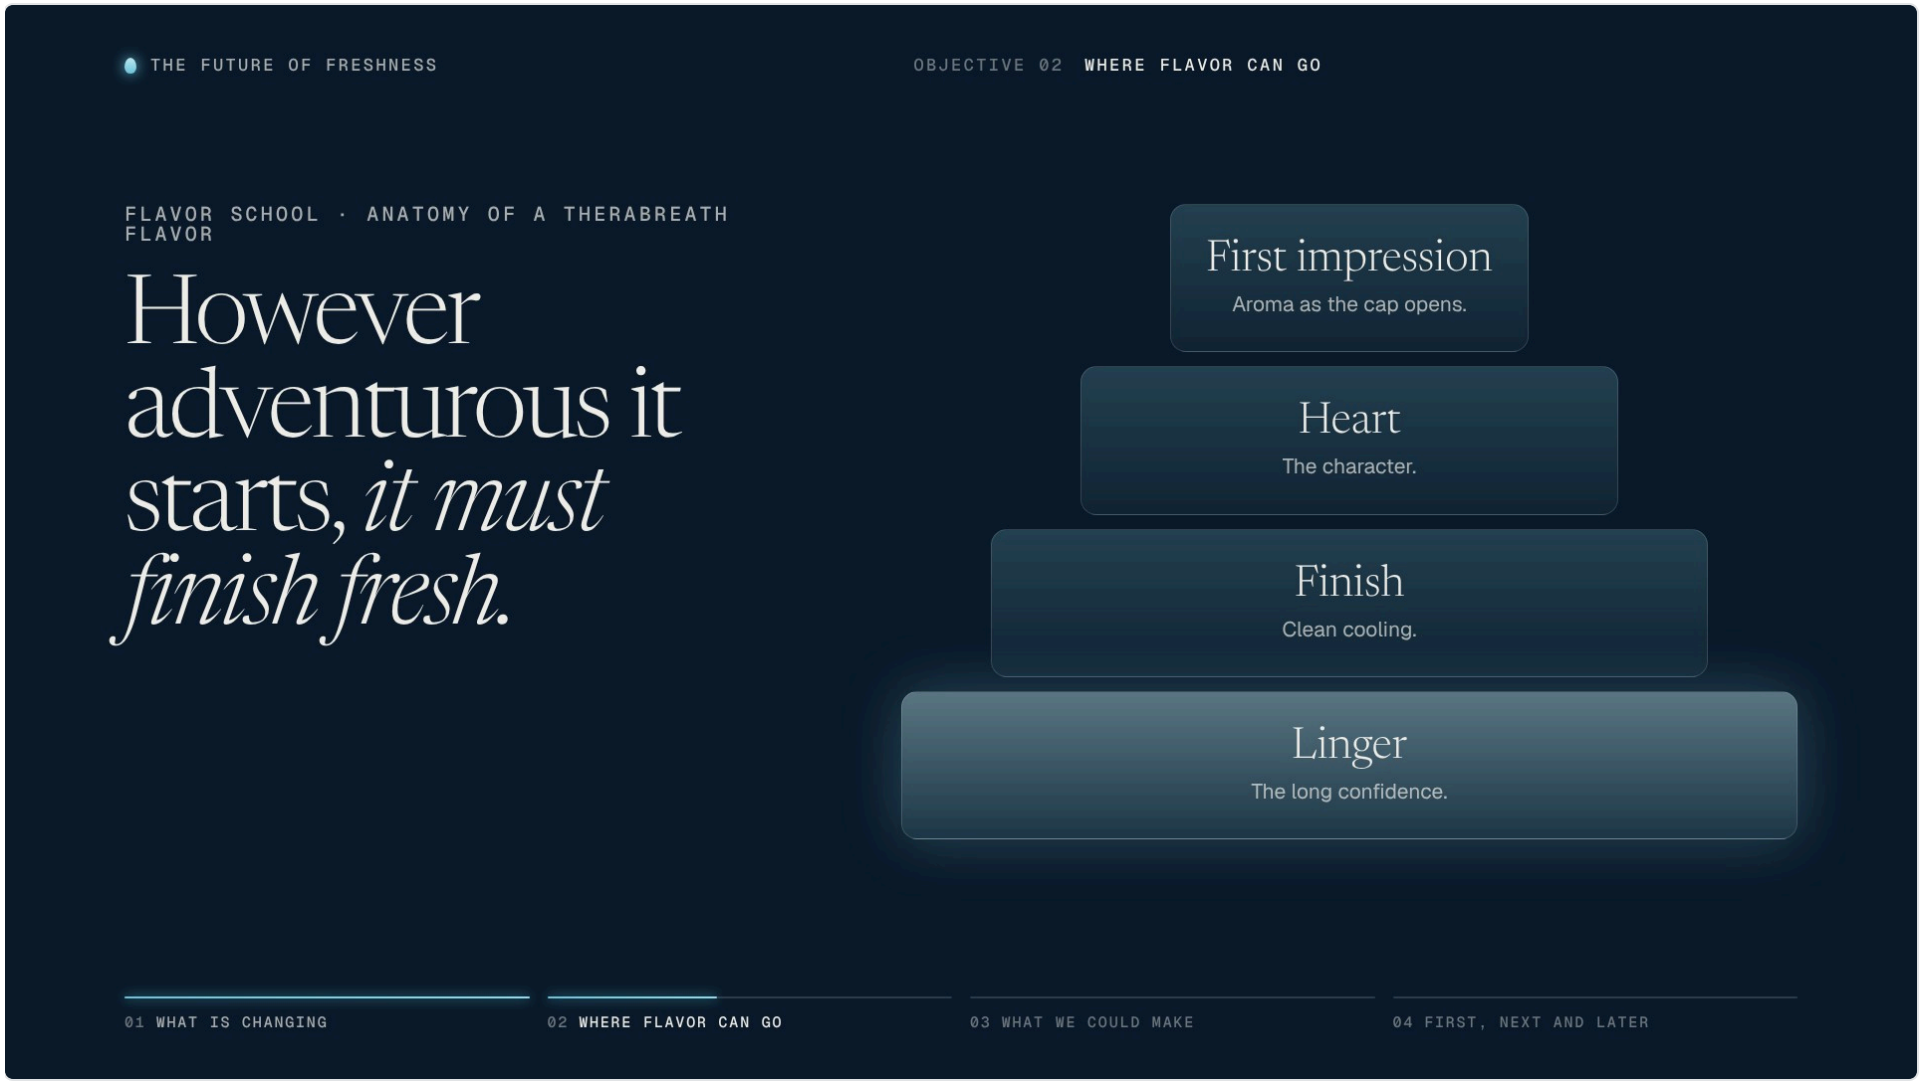

- Taste on the tongue, aroma through the nose (including from the back of the mouth), feel through the trigeminal nerve.
- Most of what we call flavor is smell; the rest is feeling.

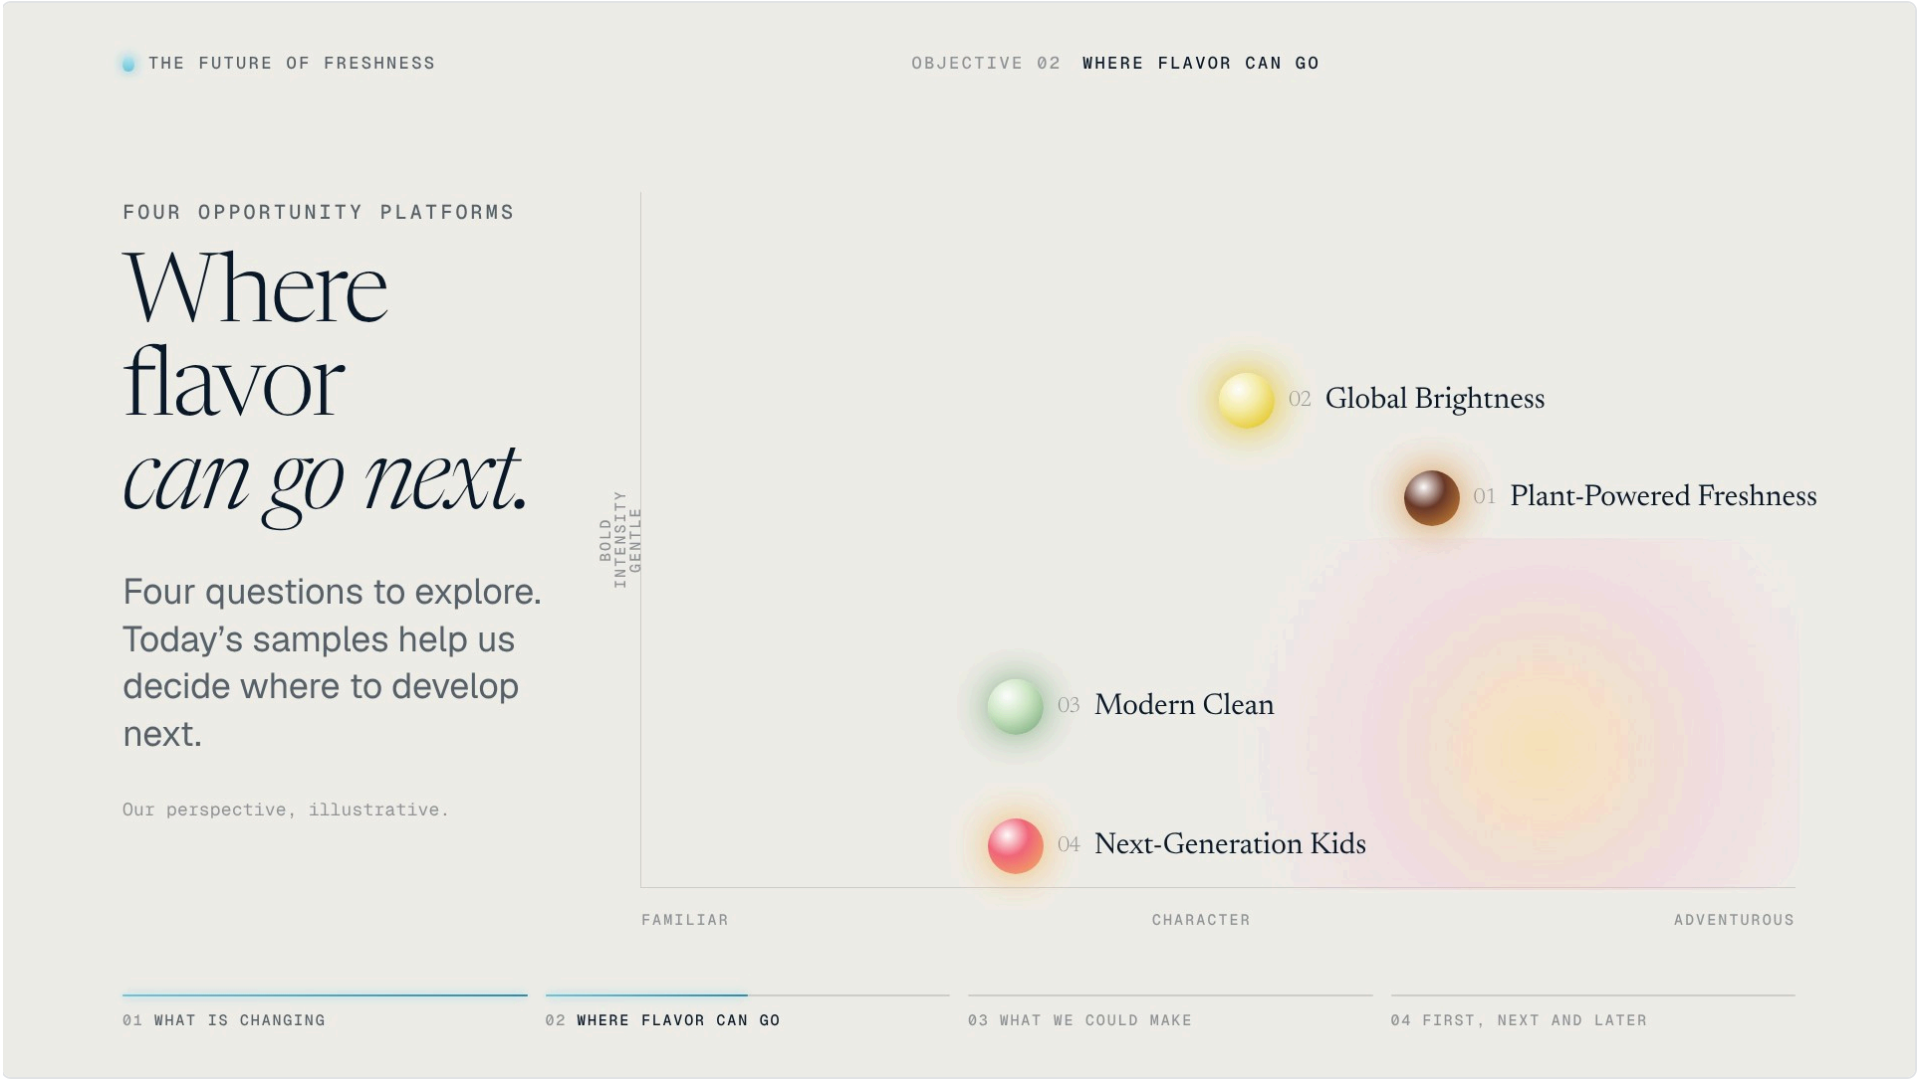

- Cooling has two jobs: the first impression and the last. We design both.
- The curves are illustrative, for teaching, not measured data.

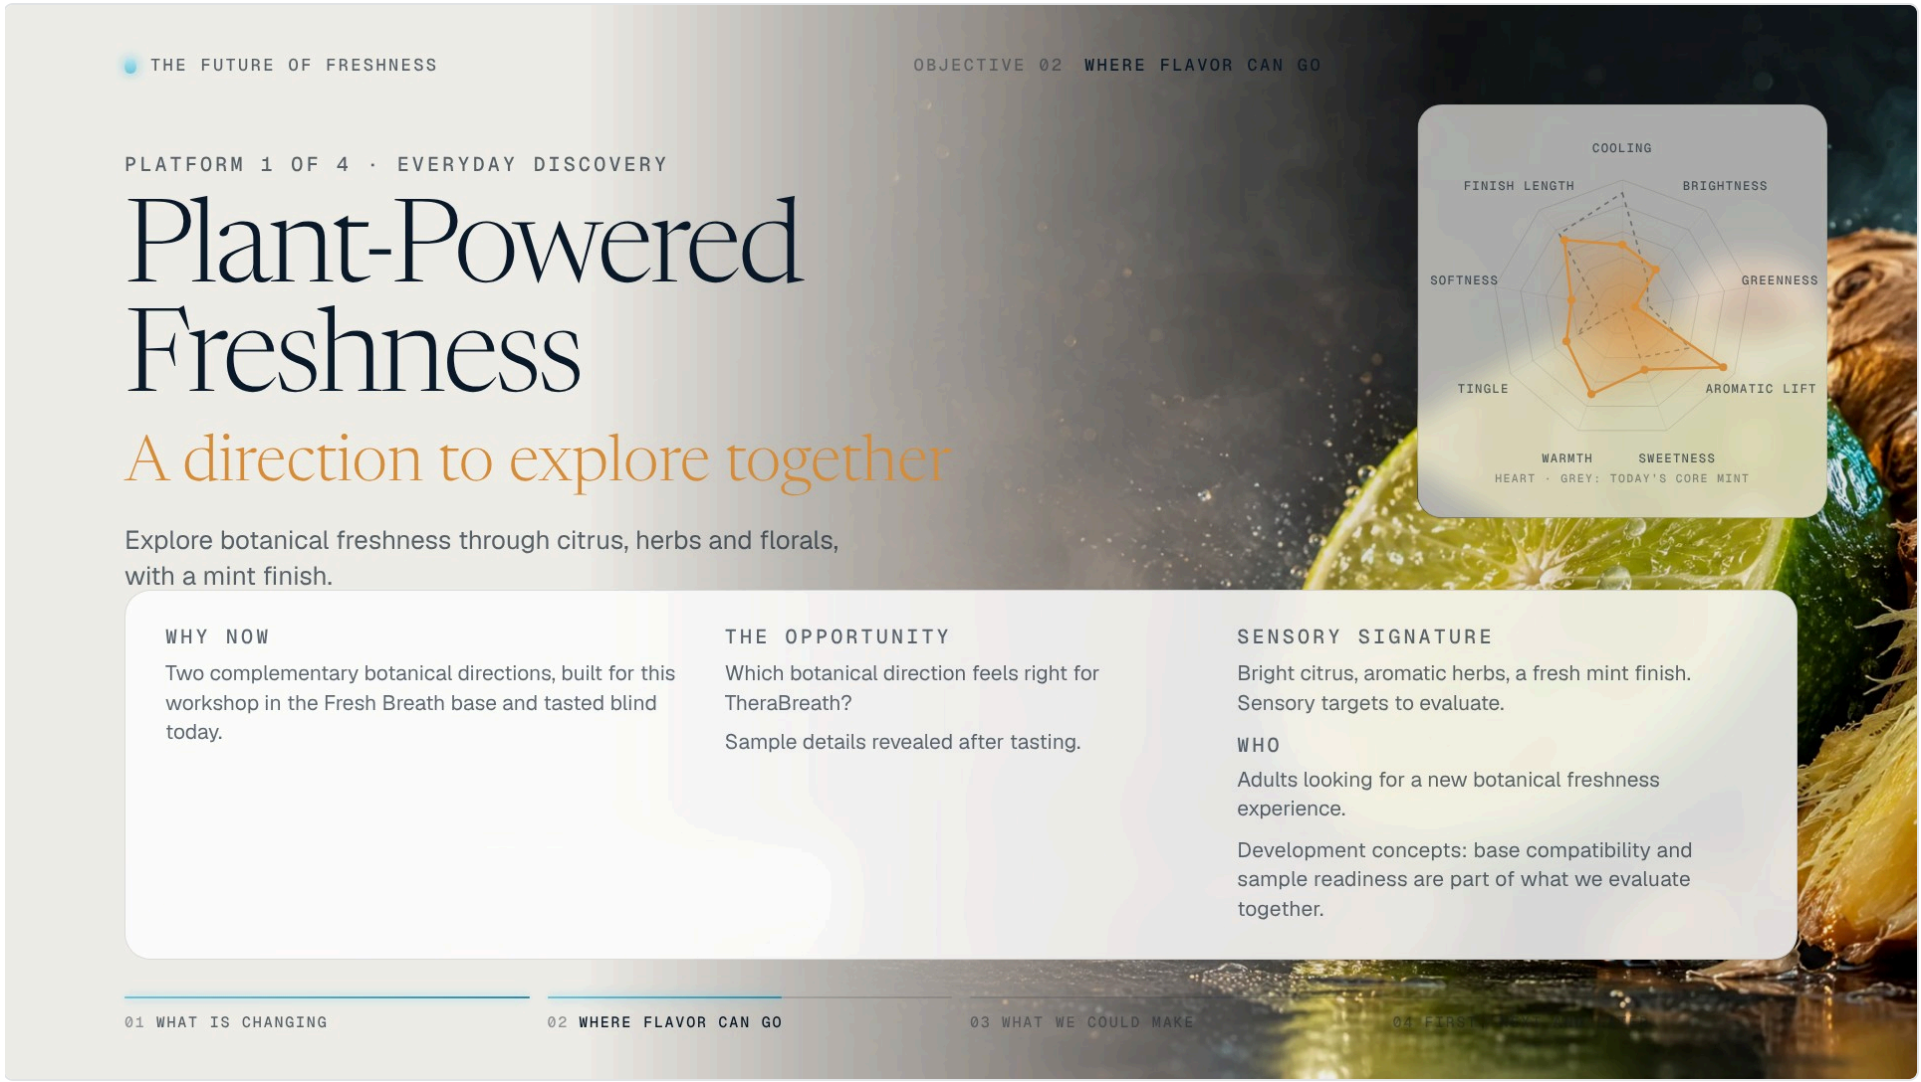

- OXYD-8 is designed to be tough on odor-causing bacteria, which makes it a demanding home for flavor.
- Three levers: pH control, protective solubilization, materials that hold up.
- Public chemistry only, no formula details.

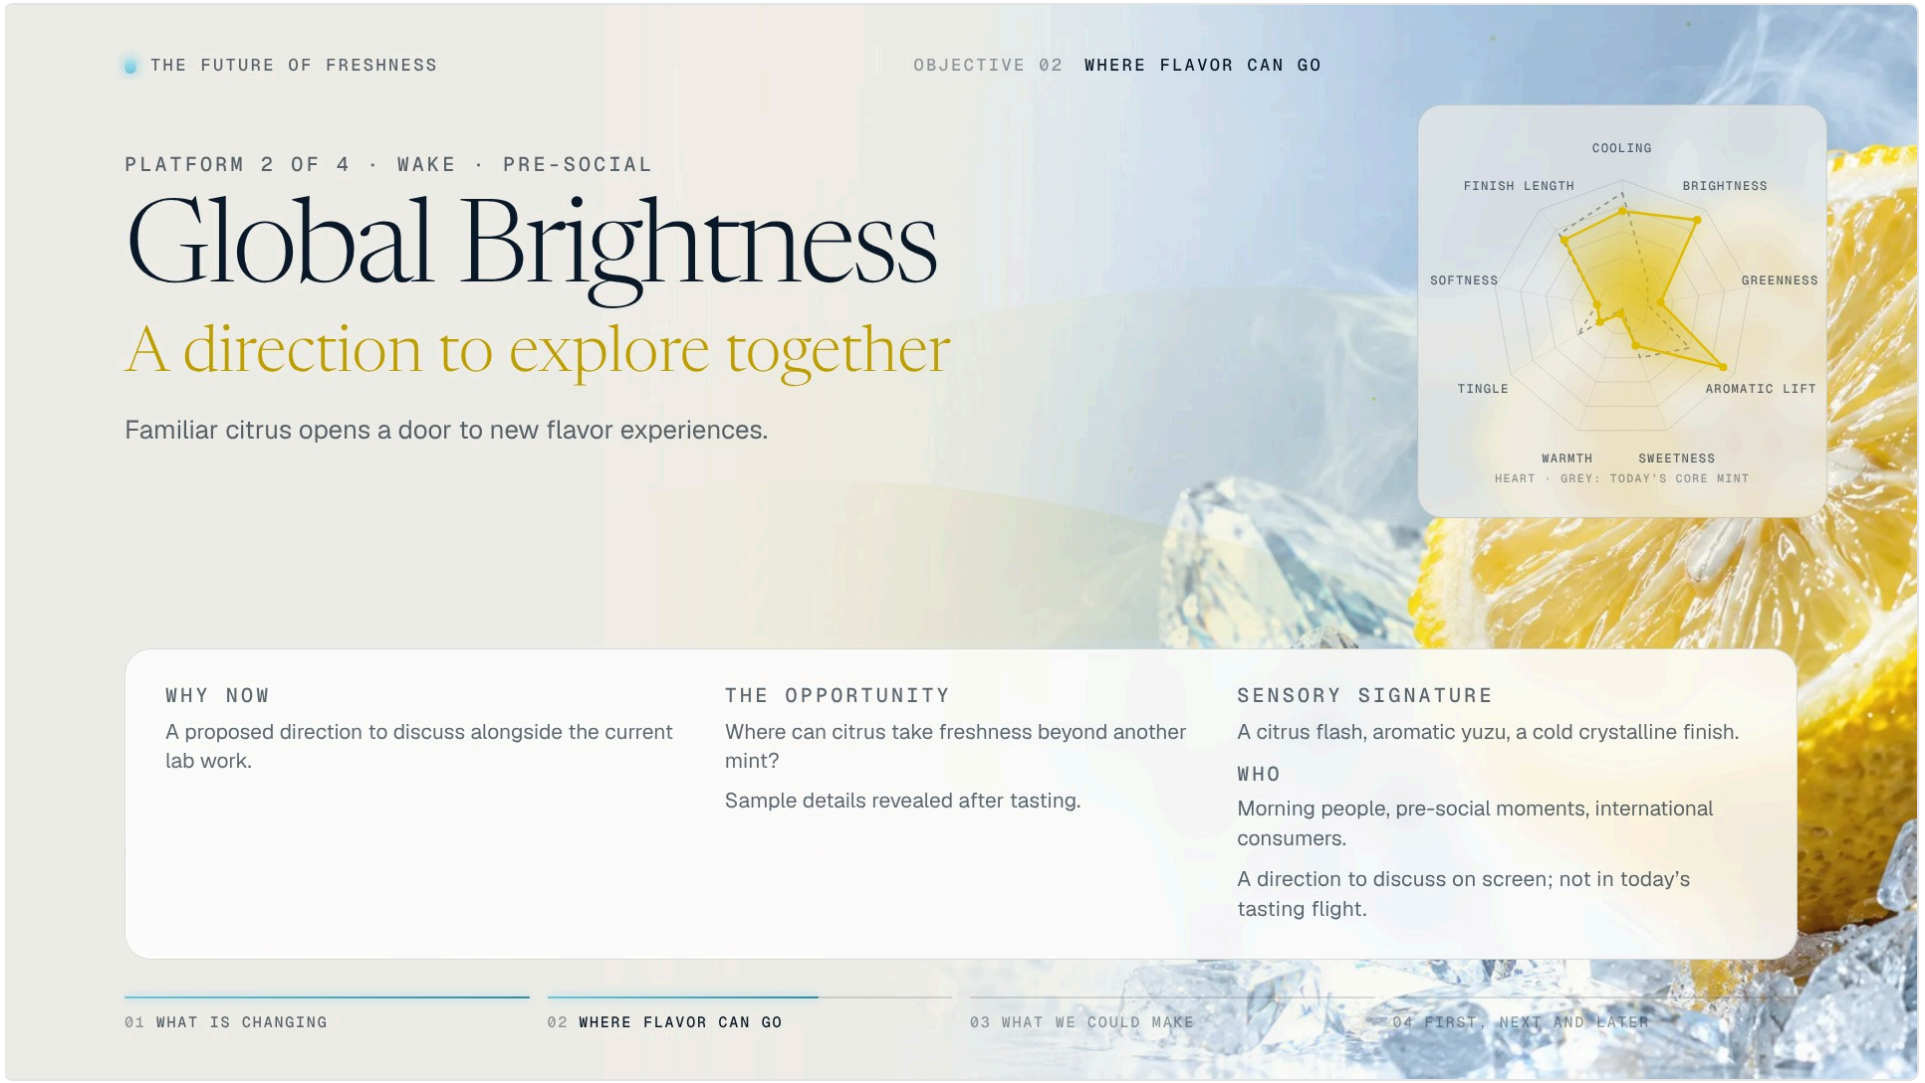

- First impression, heart, finish, linger.
- However adventurous it starts, it must finish fresh.

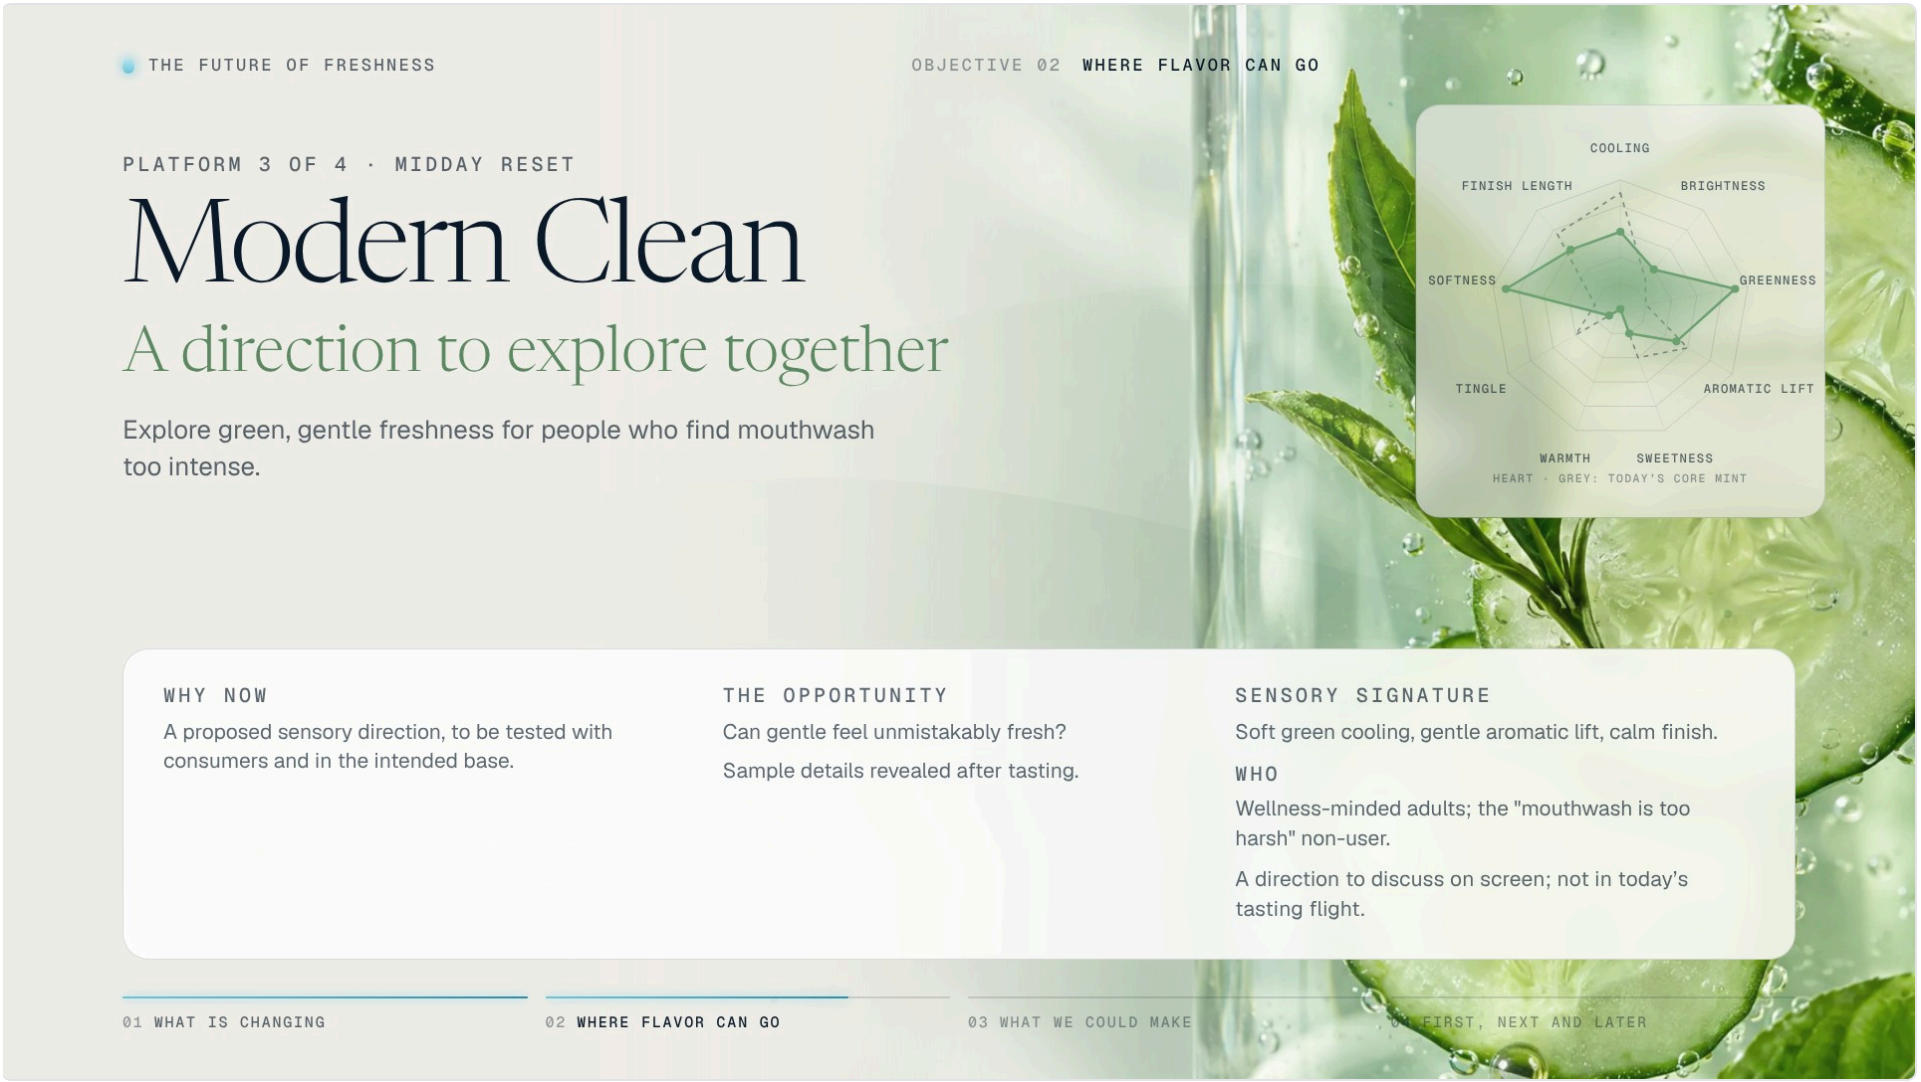

- Four platforms on one map: character across, intensity up. Our perspective, illustrative.
- The gentle, adventurous corner is our hypothesis for where new consumers come in.
- Two platforms carry today's samples; two are for discussion.

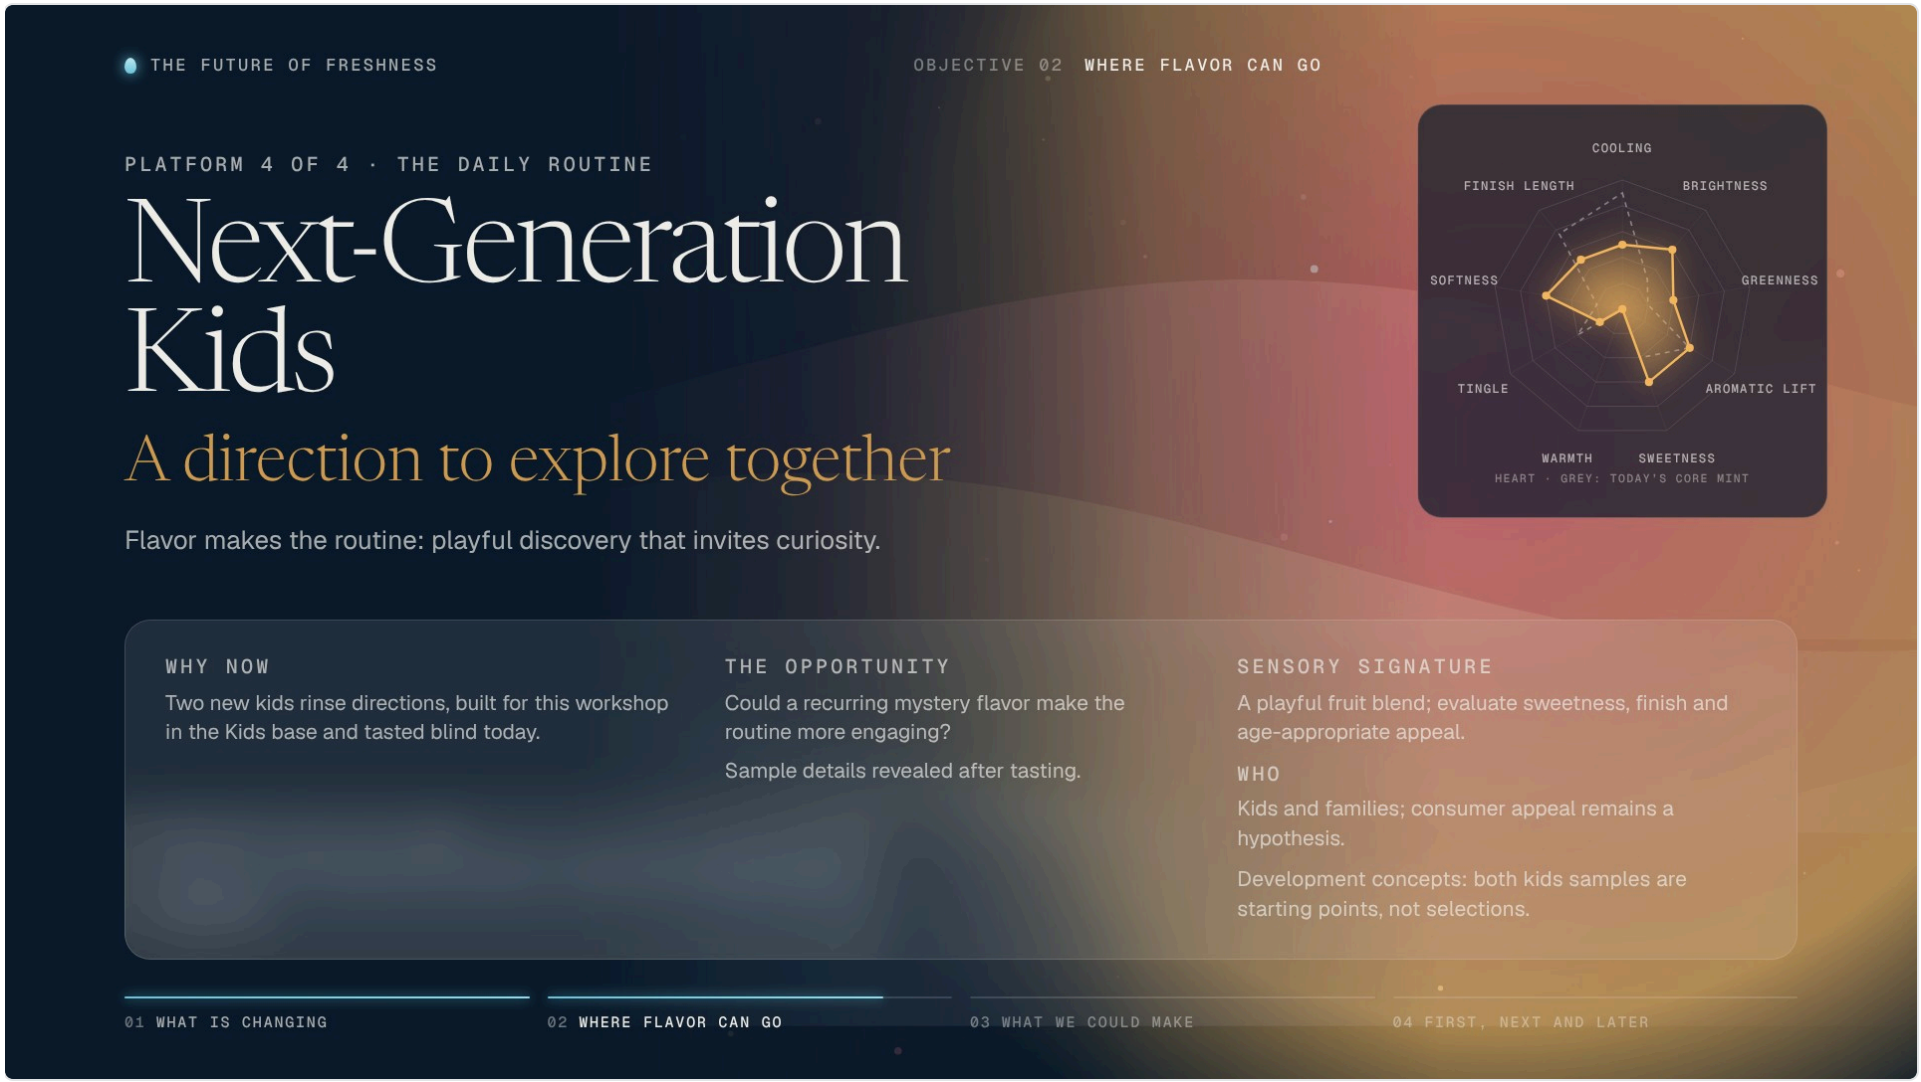

- Plant-Powered Freshness: Explore botanical freshness through citrus, herbs and florals, with a mint finish.
- Two of today's samples come from this platform. Keep the names for the reveal.
- For the room: Which botanical direction feels right for TheraBreath?

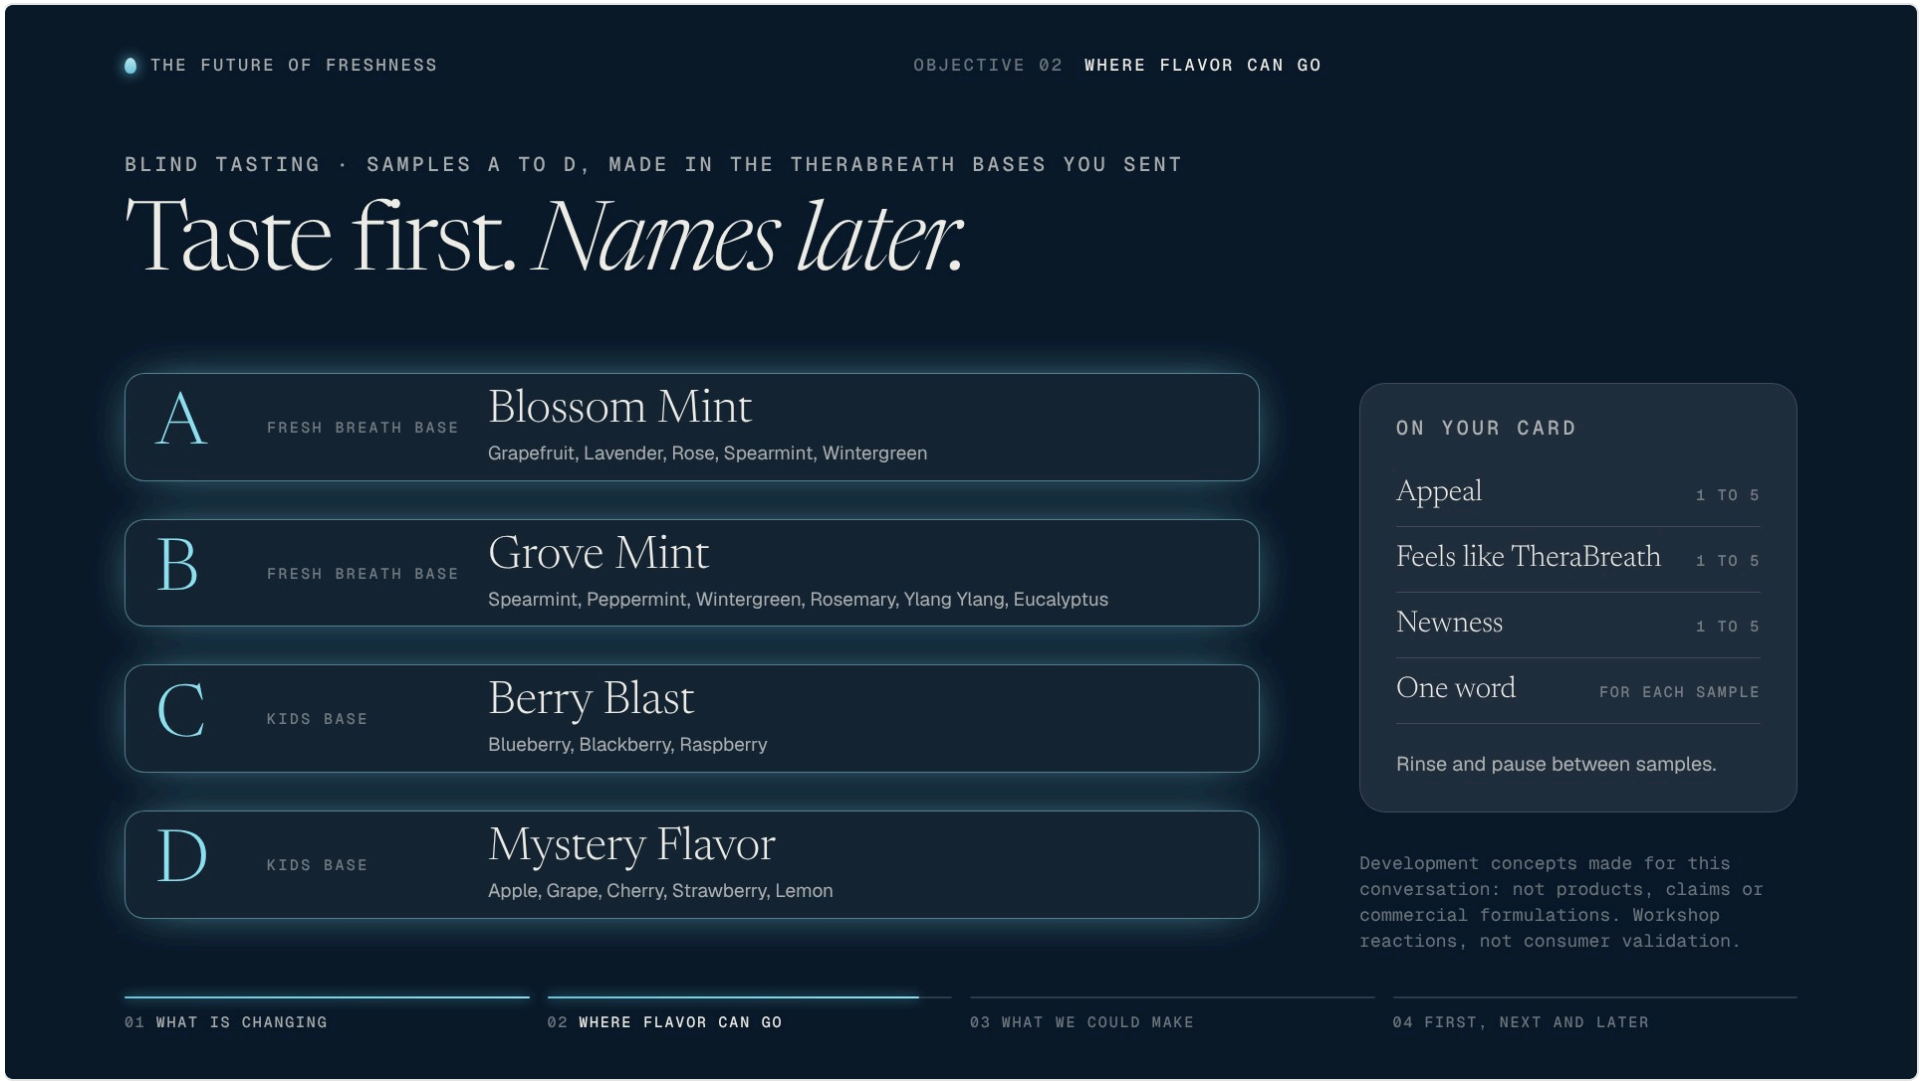

- Global Brightness: Familiar citrus opens a door to new flavor experiences.
- Not in today's tasting: a direction to discuss on screen.
- For the room: Where can citrus take freshness beyond another mint?

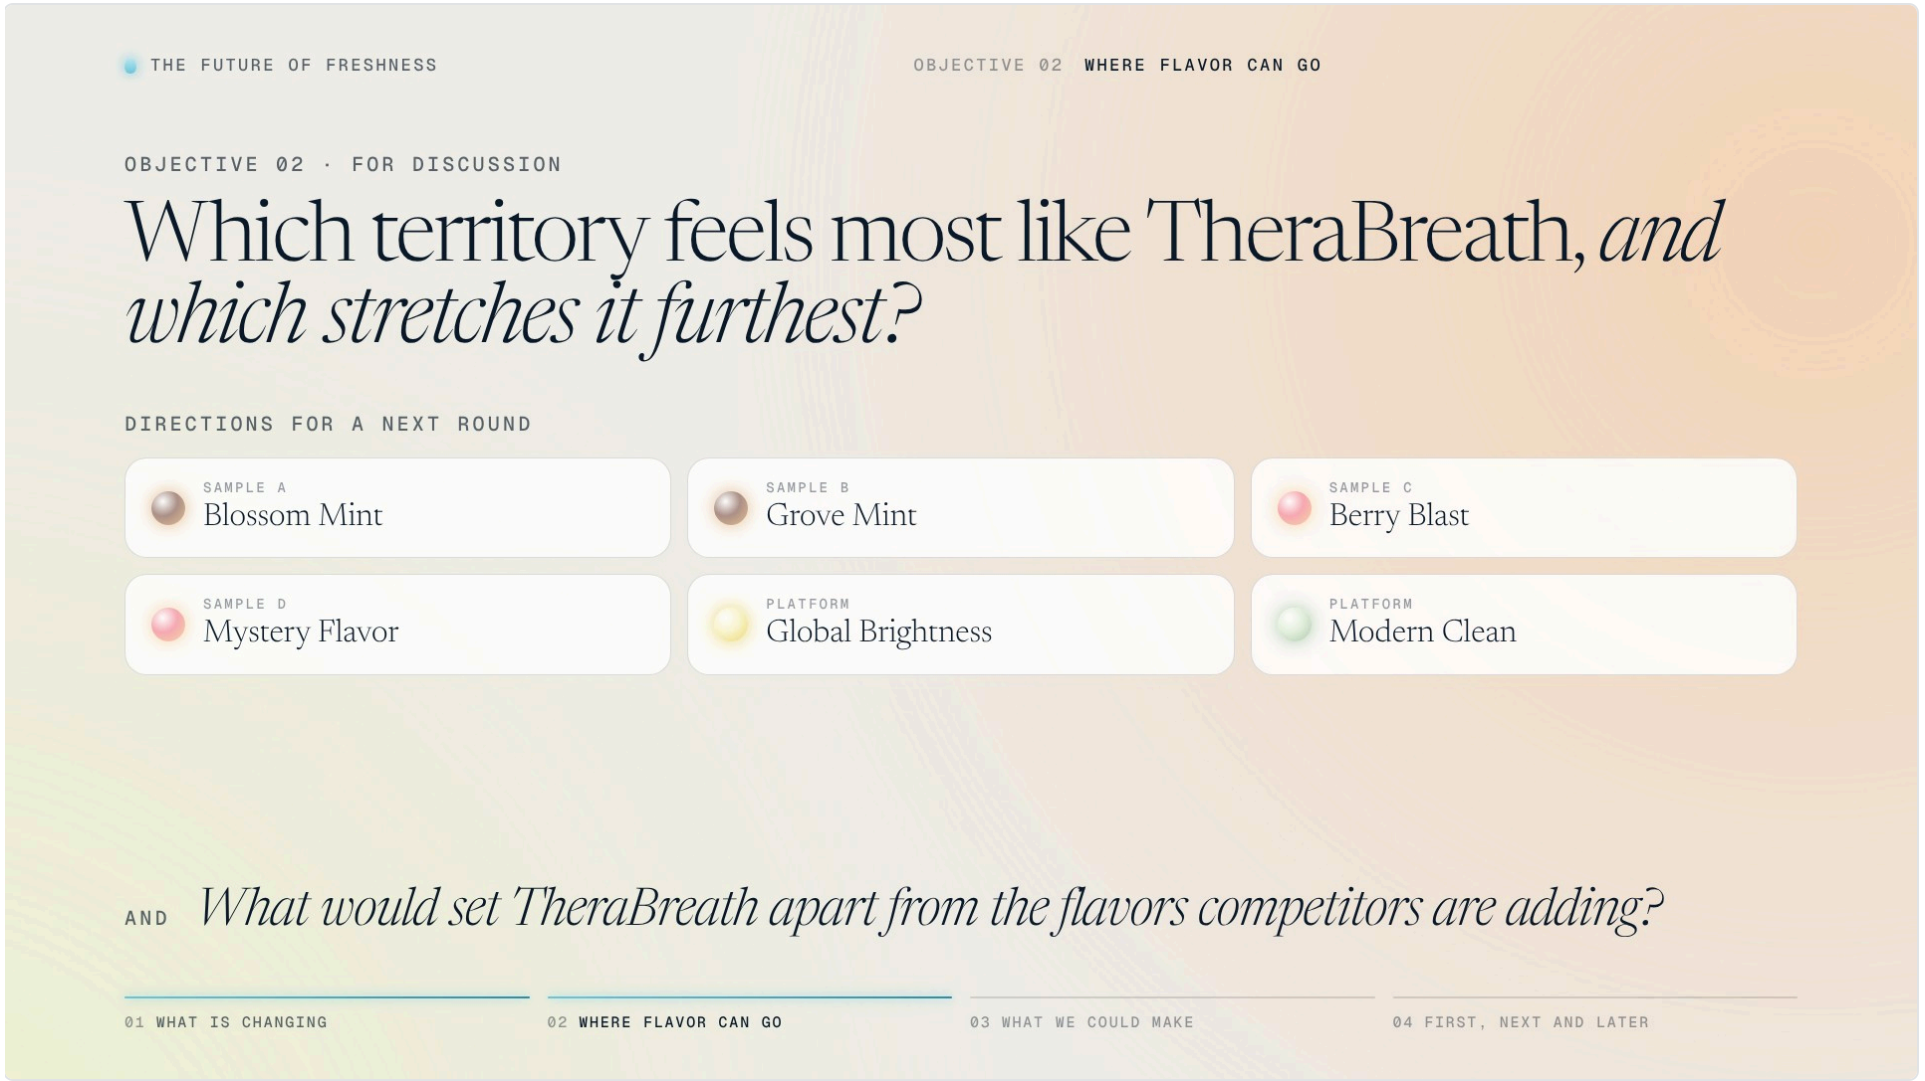

- Modern Clean: Explore green, gentle freshness for people who find mouthwash too intense.
- Not in today's tasting: a direction to discuss on screen.
- For the room: Can gentle feel unmistakably fresh?

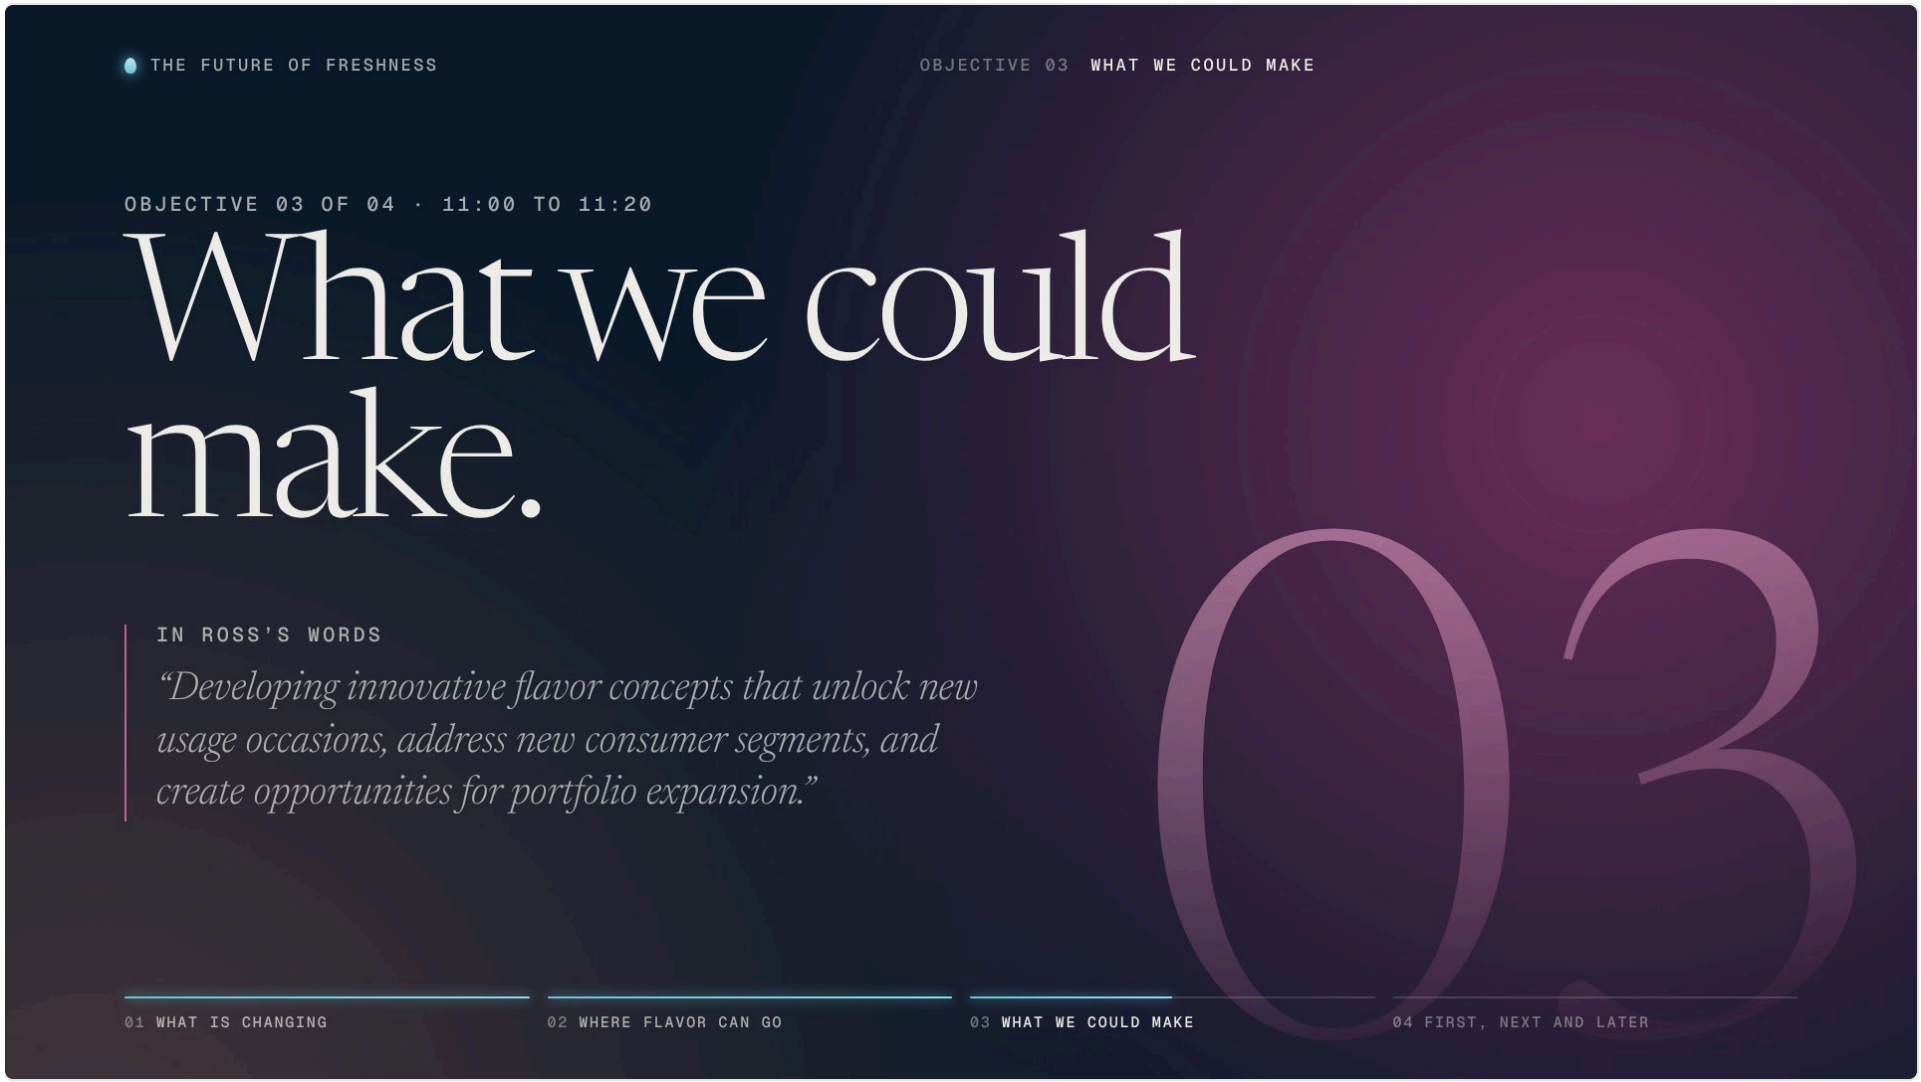

- Next-Generation Kids: Flavor makes the routine: playful discovery that invites curiosity.
- Two of today's samples come from this platform. Keep the names for the reveal.
- For the room: Could a recurring mystery flavor make the routine more engaging?

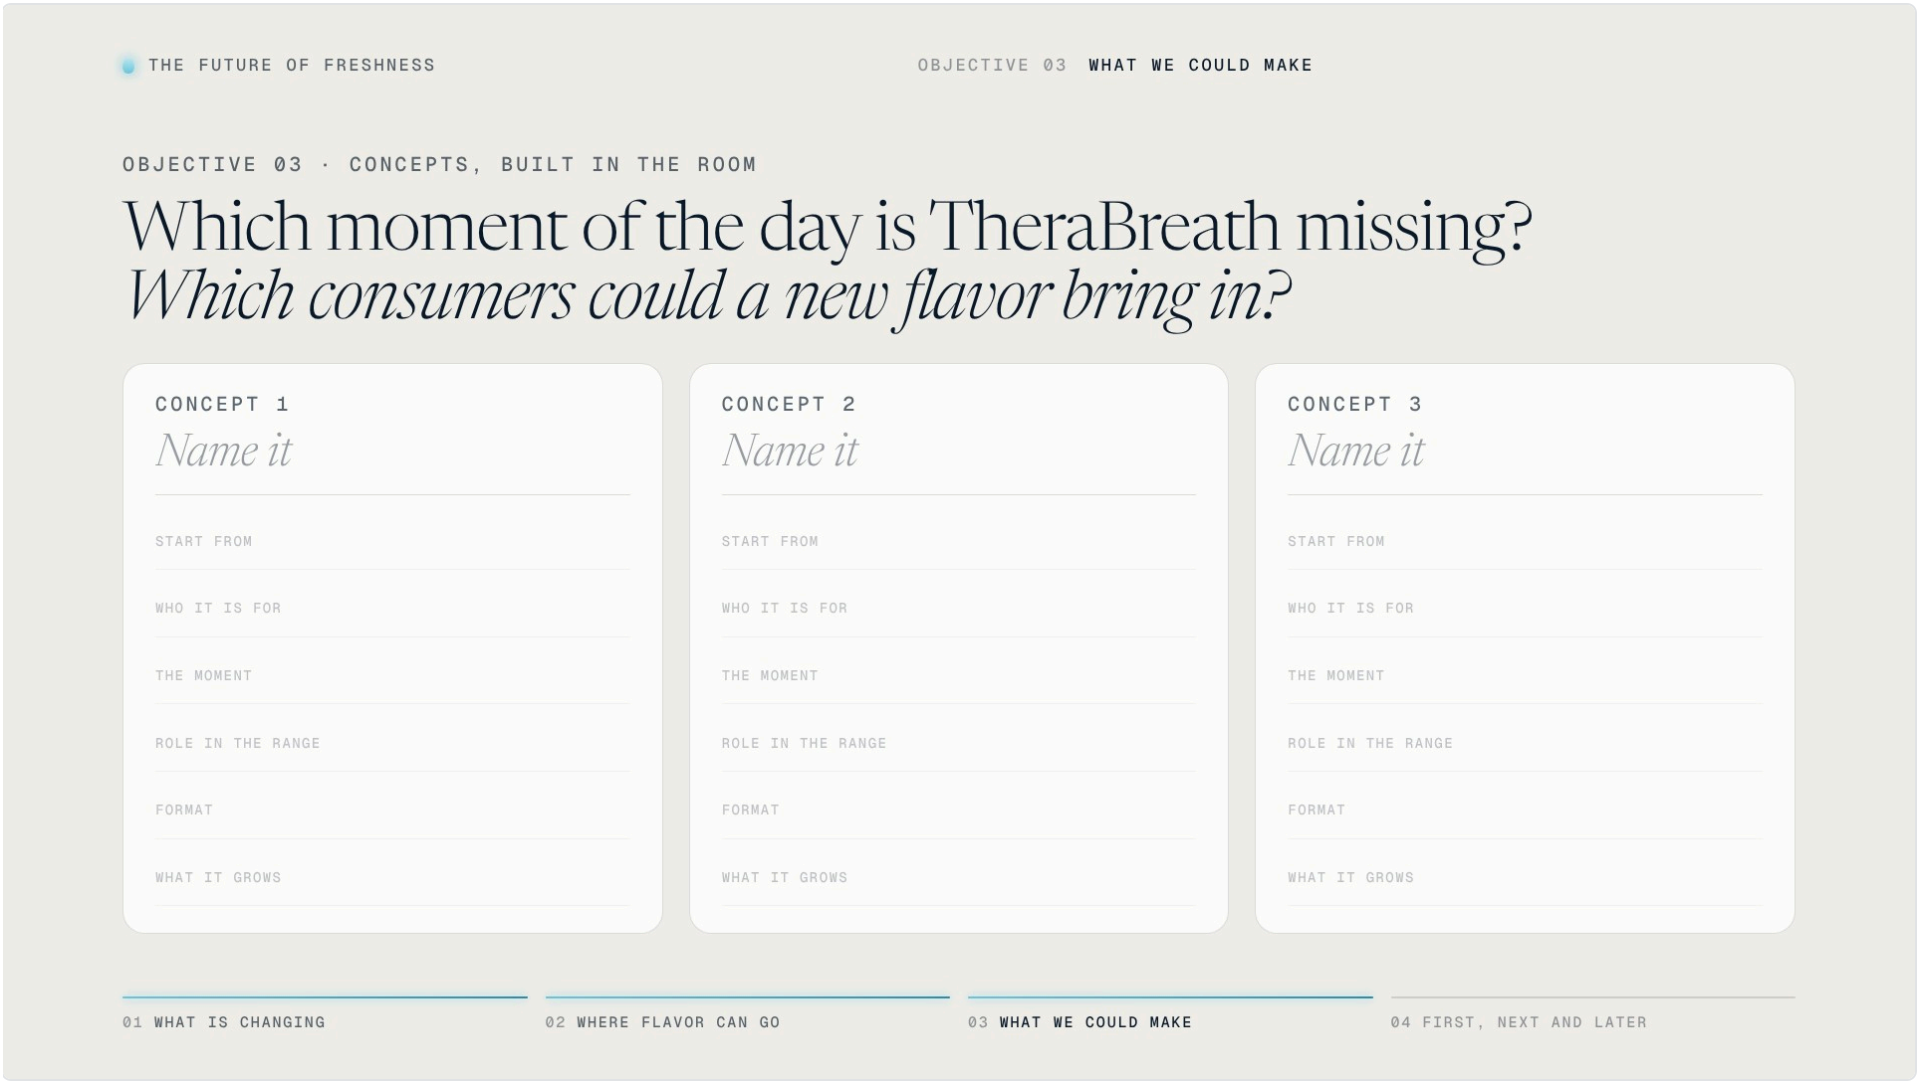

- Scorecards out, one per person.
- A and B in the Fresh Breath base, C and D in the Kids base.
- D is the Mystery Flavor, tasted last: fruit guesses before the reveal.
- Rinse and pause between samples. Workshop reactions, not consumer validation.
- Next build: the names, then one word for each from the room.

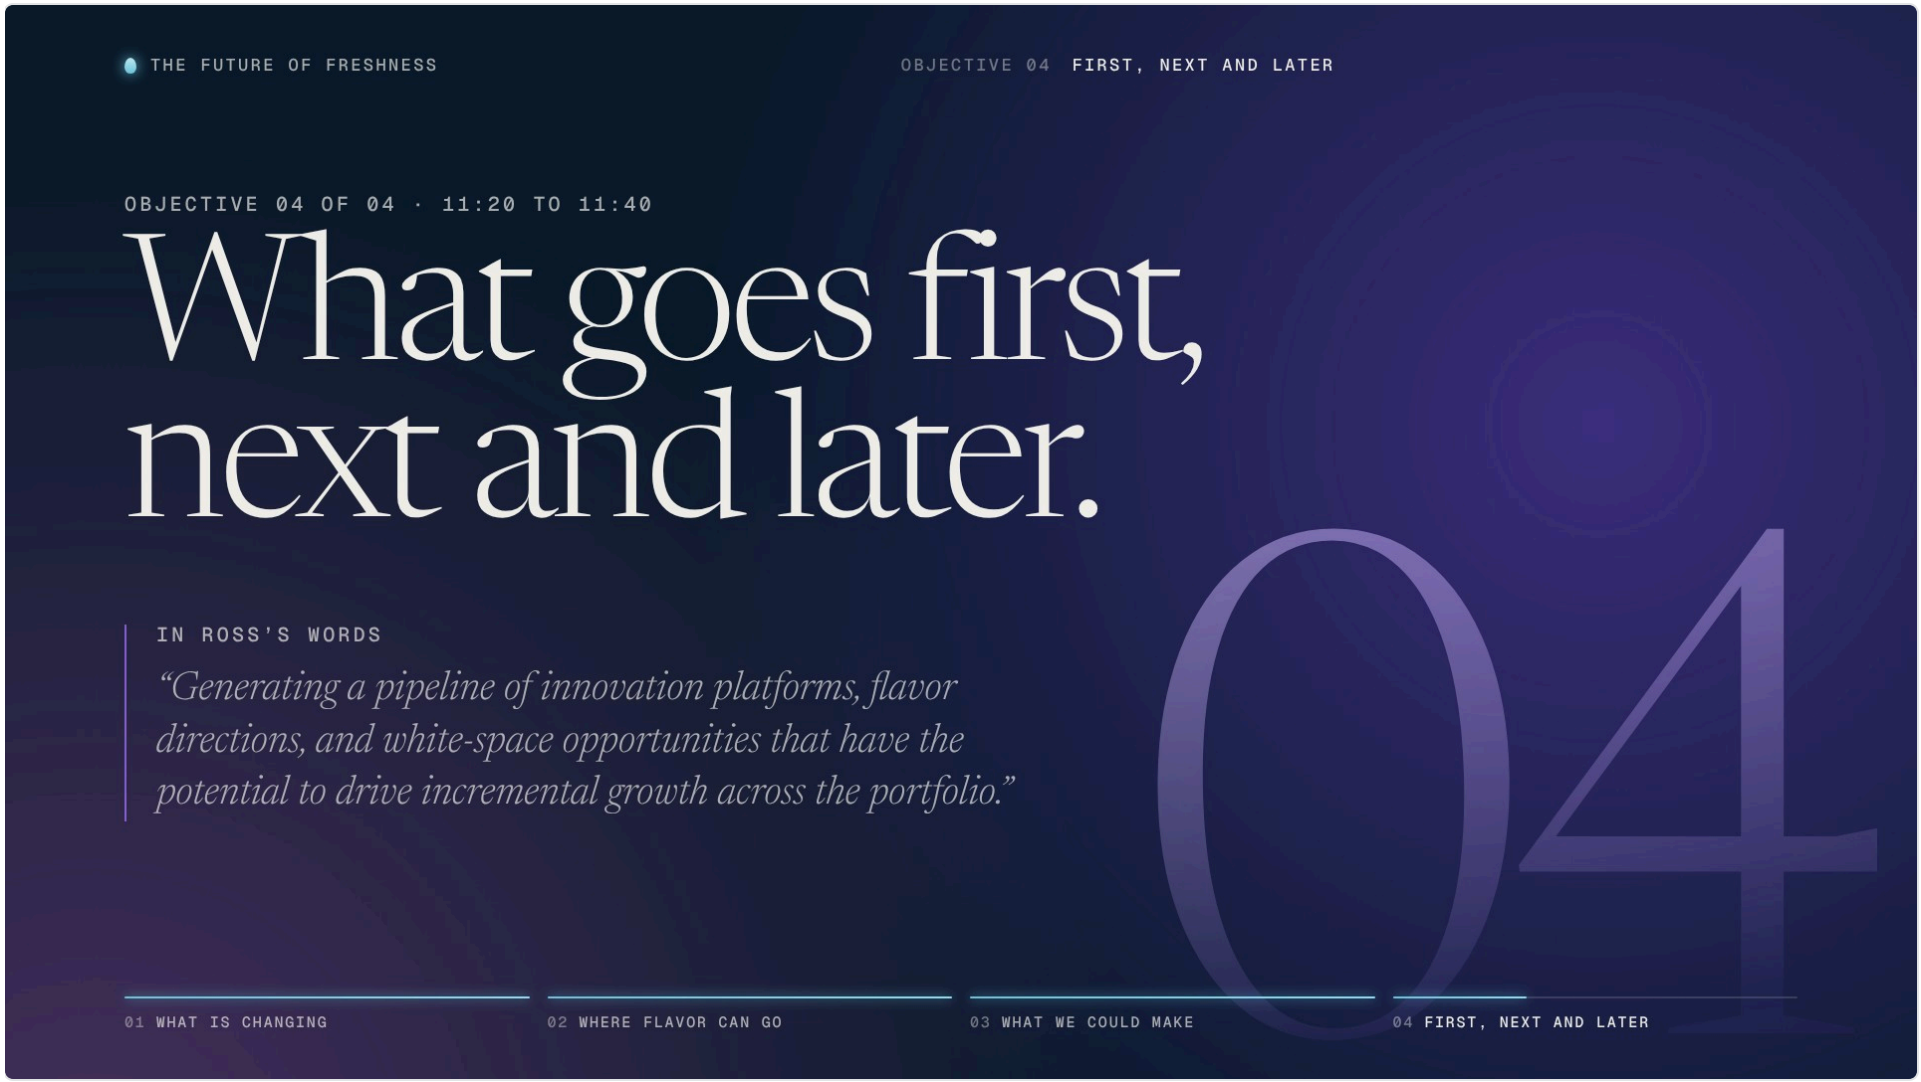

- Which territory feels most like TheraBreath, and which stretches it furthest?
- Click each sample or platform the room wants in a next round.
- Next build: What would set TheraBreath apart from the flavors competitors are adding?
- The marked directions become Chapter 2 of the Playbook.

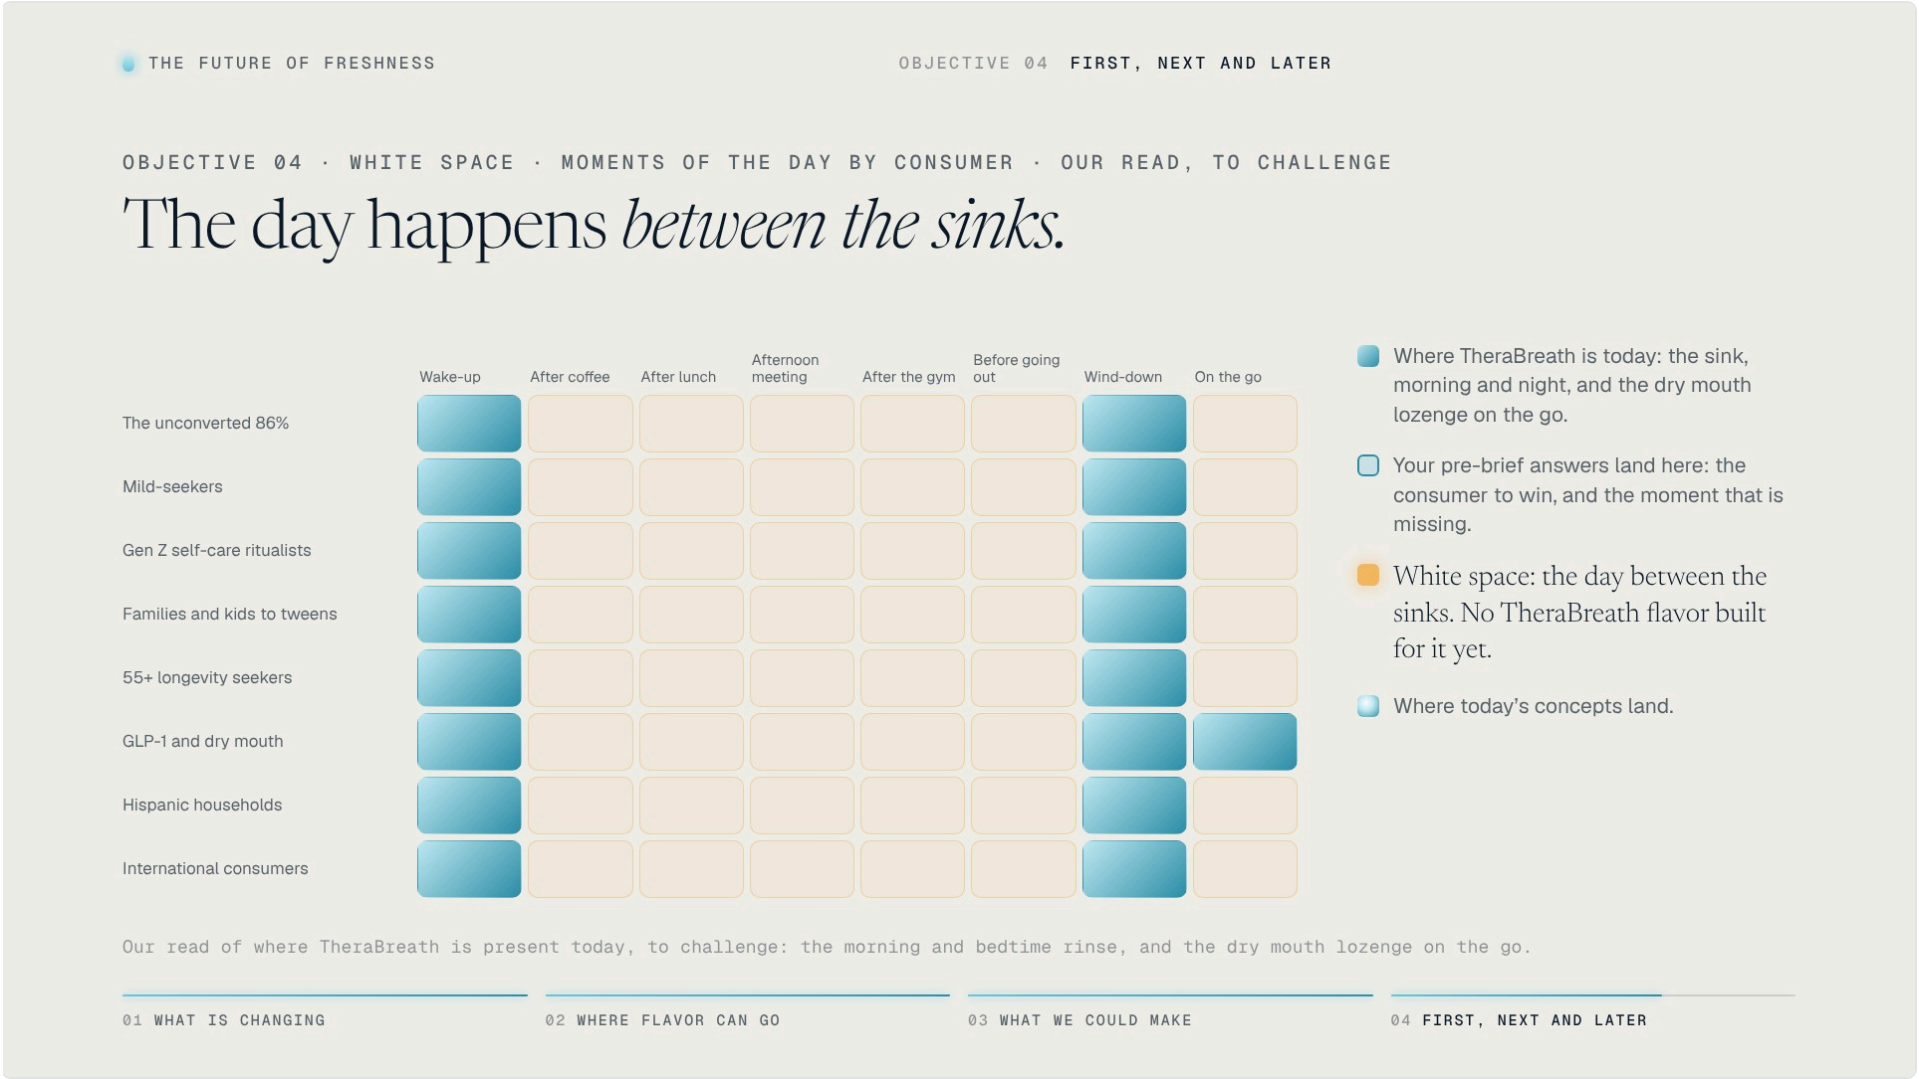

- Ross's words on screen. Talking points:
- Start from a sample or a platform that earned a next round.
- Five questions: who it is for, when, its role in the range, its format and what it grows.
- Up to three concepts, built in the room.

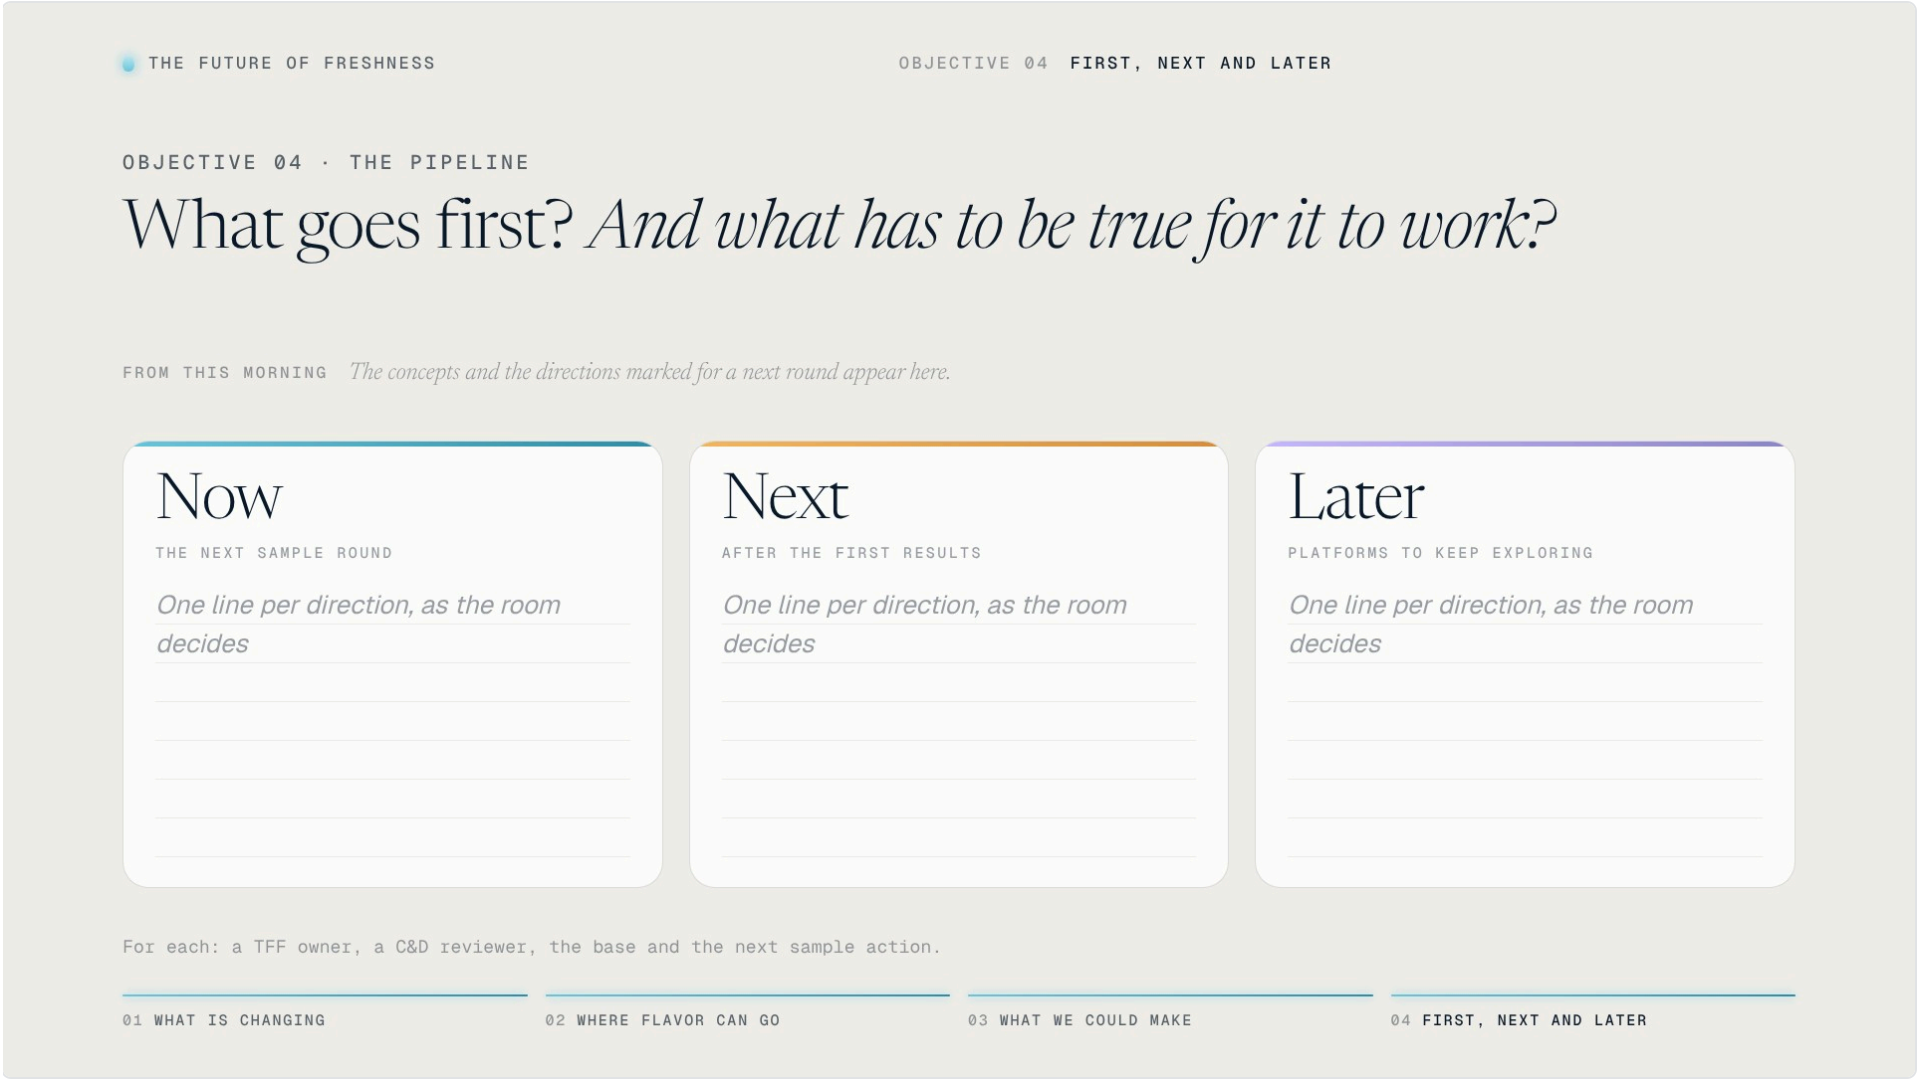

- From the scorecards and the marked directions: up to three concepts. Three is the ceiling, not the target.
- For each: where it starts, who it is for, the moment, its role in the range, the format, and whether it grows loyal users, new consumers or both.
- Type as the room decides. The boxes suggest the morning's own options and save as you type.

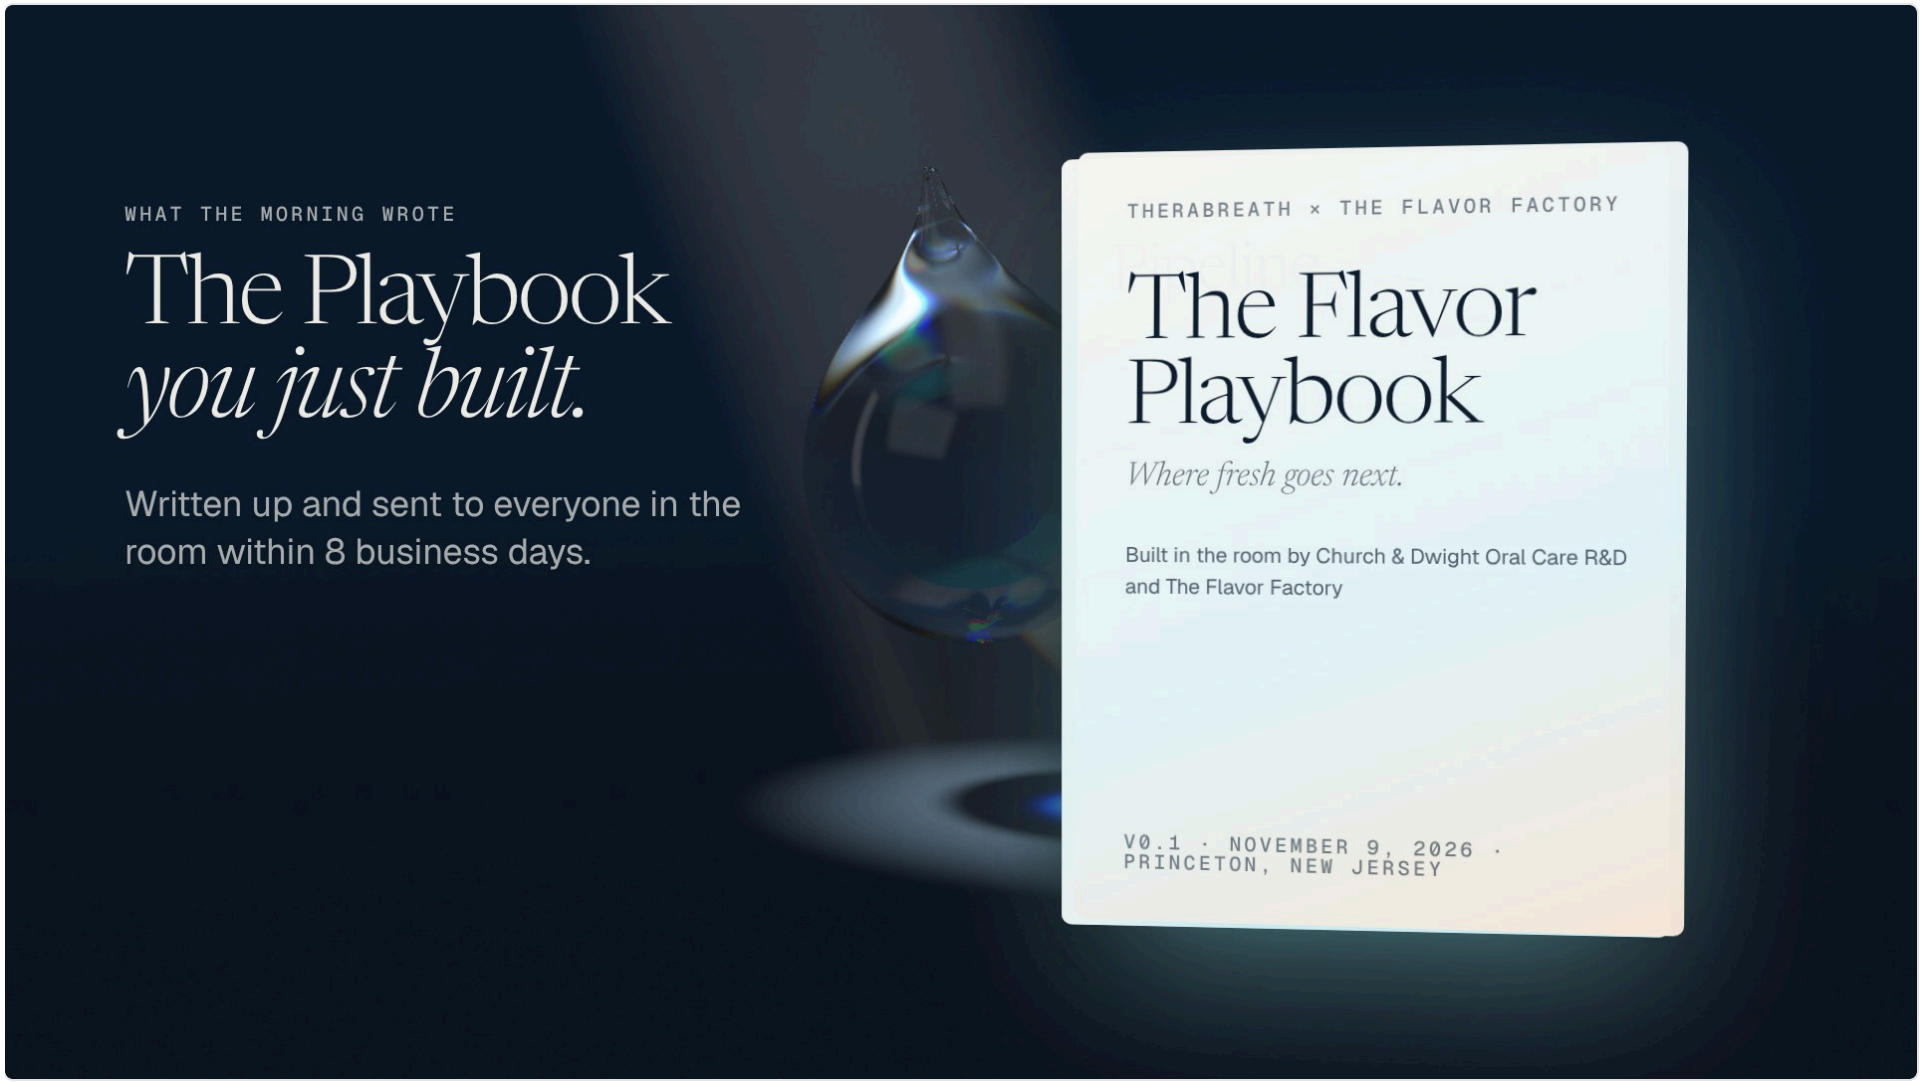

- Ross's words on screen. Talking points:
- White space: where TheraBreath is today, and where each concept could land.
- Now, Next, Later: the next sample round, after the first results, platforms to keep exploring.
- Each direction leaves with a TFF owner, a C&D reviewer, a base and a next sample action.

- Eight moments of the day across, the consumers from the pre-brief down.
- Build 1: our read of where TheraBreath is today, there to be challenged: the sink, morning and night, and the dry mouth lozenge on the go.
- Build 2: the room's pre-brief answers. Build 3: the white space.
- Click a cell to mark where each concept lands.

- Each concept and direction goes into Now, Next or Later as the room decides: one line each.
- For each: a TFF owner, a C&D reviewer, the base and the next sample action.
- What would you need to see from the next sample round?

- The morning, in four chapters: the signals, the directions, the concepts and the pipeline the room chose.
- Read the roadmap back, Now, Next and Later, with owners.
- Next build: the cover.

- The three next steps (dates to confirm before November 9).
- Thank you for building this with us.

- The send-off: lights down, sound up. Two minutes twenty-six.
- Nobody speaks until the rival has landed; then: see you at lunch.

- 12:00. Lunch, hosted by Church & Dwight.
