THERABREATH × THE FLAVOR FACTORY · PRINCETON, NEW JERSEY · NOVEMBER 9, 2026

You're invited.

The Future *of Freshness*

Monday, November 9, 2026 · 10:00 to 12:00 ET · Darwin room

A LETTER FROM THE FLAVOR FACTORY

Hello,

In July you came out to Norco and saw how we make flavor. On November 9 it's our turn to come to Princeton. We'll bring what we know about flavor, what we're seeing in the market, the trends we're watching and the innovation work we've been doing, all of it aimed at the goal in Ross's invitation: *new flavor experiences that strengthen TheraBreath's appeal with loyal users and attract new consumers.*

We've built the morning around your four objectives. We're also bringing four samples from our development bench, made in the TheraBreath bases you sent us. You'll taste them blind and score them on your phone, and we'll all vote from our phones a few more times along the way. By noon, we'd like to agree on what to develop first, who owns it and when the next samples are due. Afterwards we'll write it all up as *The Flavor Playbook* and send it to everyone who was there.

You'll meet four of us from The Flavor Factory: Dan Wixted, President; Alex Wixted, Business Operations; Ryan Wixted, QC/QA Manager; and Matt Wixted, Production Manager.

This page takes about five minutes to read. Near the bottom there are four quick questions, and we'll open the morning with everyone's answers.

The Flavor Factory *The Flavor Factory team*

WHY WE'RE HERE

TheraBreath took the burn out of mouthwash.

The next job is giving more people a reason to want it.

25.3%

TheraBreath's share of US mouthwash in Q2 2026, up 4.5 points. That makes it number 2.

14%

of US households buy TheraBreath, compared with 65% for the category. That leaves 86 of every 100 who don't buy it yet.

54%

of Americans want a milder-tasting mouthwash.

Sources: Church & Dwight Q2 2026 earnings call, July 31, 2026; Kenvue press release, June 2, 2026.

SEVEN TRENDS · ON THE DAY, EVERYONE PICKS THE THREE THAT MATTER MOST

01 **People want milder mouthwash.**

Let people choose how strong they want it.

02 **Warm spices are showing up in fresh flavors.**

There's room for a warm, spiced flavor for adults, as long as it still finishes cool.

03 **Fruit flavors are growing up.**

Fruit-forward mints, made with adults in mind.

04 **Botanicals are showing up in daily routines.**

Flavors made for a particular time of day, like first thing in the morning or right before bed.

05 **Dessert flavors are moving into oral care.**

A sweeter start can work, as long as the finish is clean.

06 **People judge whether it works by how it feels.**

Cooling, tingle and warmth are part of the product, so they deserve as much design as the taste.

07 **More people live with dry mouth or changed taste.**

Flavors made for dry mouth and changed taste could become a line of their own.

ROSS'S FOUR OBJECTIVES

01
What's changing?

PART 1

Identifying emerging flavor, sensory, and consumer trends that could influence the future of oral care.

What's changing

02
Where could flavor go?

PART 2

Exploring new flavor territories and sensory experiences that can differentiate TheraBreath from competitors and create memorable consumer experiences.

Where flavor could go

03
What could we make?

PART 3

Developing innovative flavor concepts that unlock new usage occasions, address new consumer segments, and create opportunities for portfolio expansion.

What we could make

04
What do we do first?

PART 4

Generating a pipeline of innovation platforms, flavor directions, and white-space opportunities that have the potential to drive incremental growth across the portfolio.

What to do first

FOUR DIRECTIONS FOR FLAVOR

01
Plant-Powered Freshness

Citrus, herbs and a touch of floral, always finished with mint.

WHICH OF THE TWO SAMPLES FEELS MORE LIKE THERABREATH?

02
Global Brightness

Citrus people already know, taken somewhere new.

IS THERE A CITRUS THAT COULD SIT COMFORTABLY NEXT TO YOUR MINTS?

03
Modern Clean

Green, gentle freshness for people who find mouthwash too strong.

CAN A GENTLE FLAVOR STILL FEEL FRESH ENOUGH?

04
Next-Generation Kids

Flavors that make kids actually want to rinse.

WOULD A MYSTERY FLAVOR GET KIDS MORE INTERESTED IN RINSING?

THE MORNING

10:00	Welcome, who we are and your four objectives	
10:10	What's changing: your portfolio, the market and seven trends	OBJECTIVE 01
10:25	Flavor School, then four directions	OBJECTIVE 02
10:40	A blind tasting in your bases	OBJECTIVE 02
11:00	From samples to concepts	OBJECTIVE 03
11:20	White space, then Now, Next, Later	OBJECTIVE 04
11:40	What we decided, what happens next, and a short film before lunch	

BEFORE YOU COME: FOUR QUICK QUESTIONS

You'll find the questions on the web version of this page, through your personal invitation link. We'll share the answers at the start of the morning.

THREE THINGS TO THINK ABOUT ON THE WAY IN

1

One flavor a loyal TheraBreath user would love, and one that might win over someone who has never bought it.

2

The flavor note you think would struggle most in an oxidizing base, and why.

3

A moment in the day where TheraBreath isn't showing up yet, and what it would need to taste like to earn a place there.

By noon, we'd like a short list of what to develop, *with owners and dates.*

WHEN

Monday, November 9, 2026
10:00 to 12:00 ET

WHERE

Darwin room, Church & Dwight
469 N Harrison St,
Princeton, NJ 08540

BRING

Your phone. You'll use it to score the samples and vote.

Confidential. The samples are development work made just for this session. They aren't finished products, and nothing on this page is a claim or a commercial formula. Please keep this page and the write-up within the group.
