FROM ROSS'S INVITATION

We've built the morning *around your four objectives.*

01

Identifying emerging flavor, sensory, and consumer trends that could influence the future of oral care.

10:10 TO 10:25
WHAT'S CHANGING

02

Exploring new flavor territories and sensory experiences that can differentiate TheraBreath from competitors and create memorable consumer experiences.

10:25 TO 11:00
WHERE FLAVOR COULD GO

03

Developing innovative flavor concepts that unlock new usage occasions, address new consumer segments, and create opportunities for portfolio expansion.

11:00 TO 11:20
WHAT WE COULD MAKE

04

Generating a pipeline of innovation platforms, flavor directions, and white-space opportunities that have the potential to drive incremental growth across the portfolio.

11:20 TO 11:40
WHAT TO DO FIRST

AND THE GOAL BEHIND THEM

"...new flavor experiences that both *strengthen our appeal with existing loyal users* and *create opportunities to attract new consumers to the franchise.*"

What's changing

FROM ROSS'S INVITATION

"Identifying emerging flavor, sensory, and consumer trends that could influence the future of oral care."

TheraBreath took the burn out of mouthwash.

The next job is giving more people a reason to want it.

OUT OF EVERY 100 HOUSEHOLDS

TheraBreath is already number 2 in mouthwash.

14	buy TheraBreath
51	buy another mouthwash
35	don't buy mouthwash at all

Flavor could give more of these households a reason to try it.

WHAT IT COULD MEAN FOR THERABREATH

Let people choose how strong they want it.

FOR THE ROOM

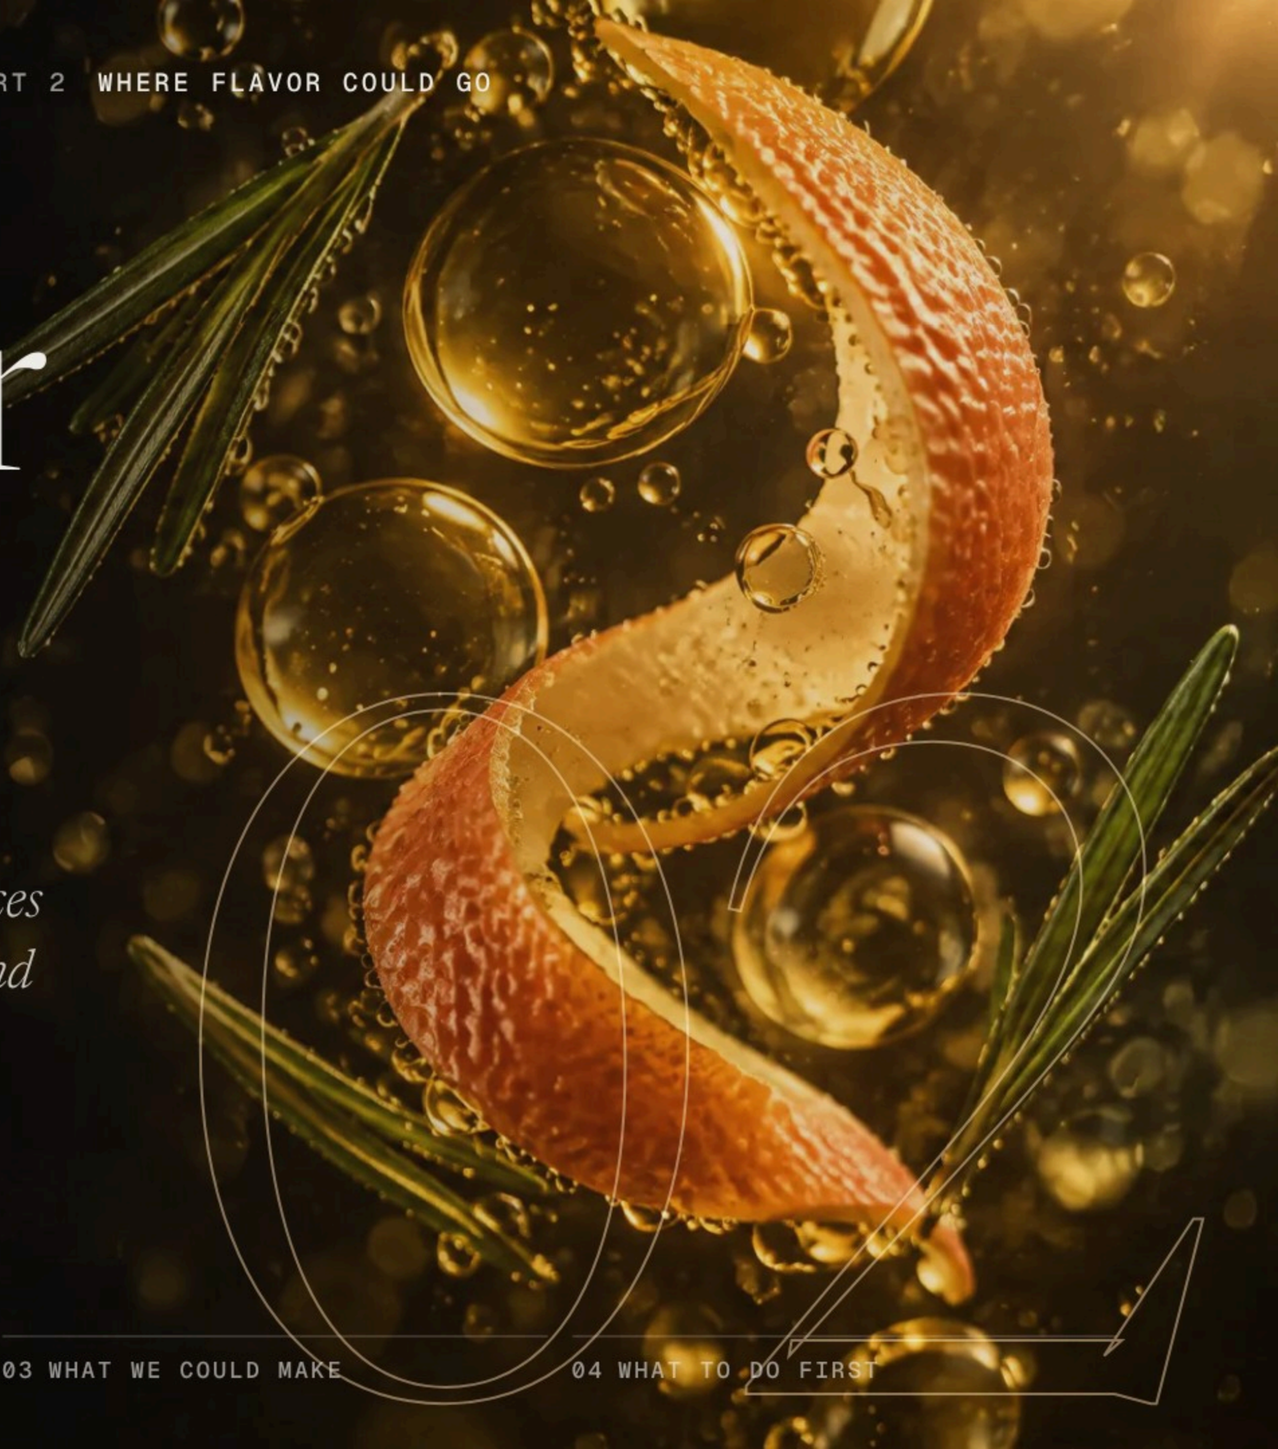

Is "milder" a flavor job, a cooling job, or both?

Where flavor could go

FROM ROSS'S INVITATION

"Exploring new flavor territories and sensory experiences that can differentiate TheraBreath from competitors and create memorable consumer experiences."

FLAVOR SCHOOL · THREE THINGS TO KNOW

Most of what we call flavor is really smell. *The rest is how it feels.*

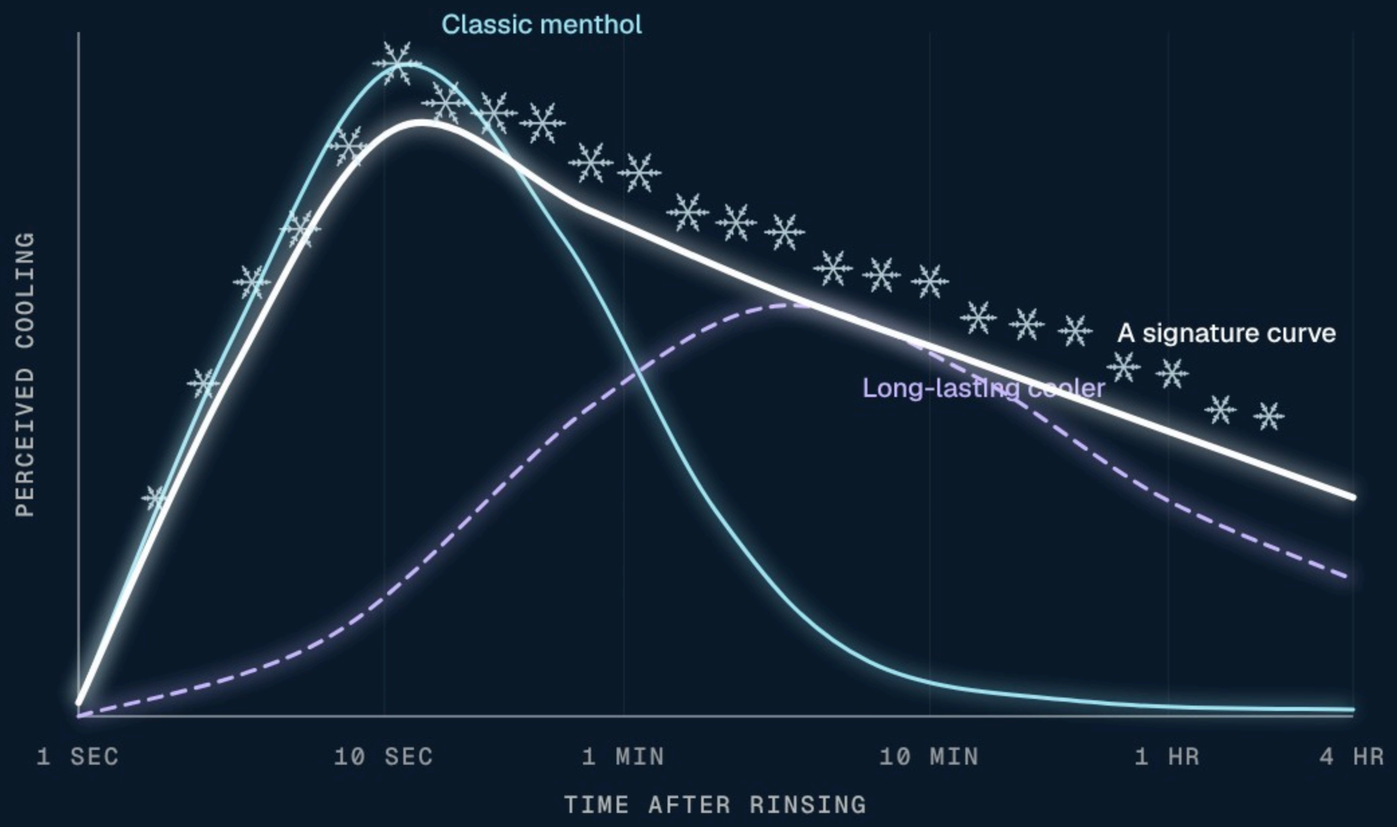

Source: Perfumer & Flavorist, “From Mint to Marshmallow: The Sensory Revolution in Modern Oral Hygiene,” April 29, 2026

FLAVOR SCHOOL · THREE THINGS TO KNOW

Cooling does two jobs.

There's the hit when you first rinse, and there's how long it lasts. We tune both.

Drawn to explain, not measured.

FLAVOR SCHOOL · THREE THINGS TO KNOW

Sodium chlorite is tough on the bacteria behind bad breath, and that makes it tough on flavor too.

WHAT WE CONTROL

01 Controlling pH

02 Incorporating and protecting the flavor

03 Choosing materials that hold up

A TheraBreath flavor can start anywhere, *but it has to finish clean.*

FOR THE ROOM

Where has flavor been hardest to get right with sodium chlorite for you?
