Run sheet

THE FUTURE OF FRESHNESS · MONDAY, NOVEMBER 9, 2026 · DARWIN ROOM · FOR THE FLAVOR FACTORY TEAM · NOT FOR HANDING OUT

FROM 9:30: SET UP THE ROOM

- [ ] Connect the laptop to the TV as an extended display, not a mirror. Open the team link, then Present on the day (/host), drag that window to the TV and press F for full screen. Then press P: the presenter view opens in its own window. Keep it on the laptop's screen. It has the talking points, the time in Princeton against this sheet, and buttons that move the presentation. Only this laptop should open the presentation on the day, because it moves everyone's phones. (Church & Dwight's password can't open it.) If the TV will only mirror, skip the presenter view and use this sheet.
- [ ] Phones: people join by scanning the code on the first screen. Phones use their own data, so the room Wi-Fi only matters for the laptop. Ross offered to help us get on the network. If it fails, present from the backup PDF and the film file on the laptop, without the voting.
- [ ] Film backup: the day before, download THE FLAVOR RACE from the team page (flavor-race.mp4: 2:24, 2560 × 1440, with sound) and keep it on the laptop's desktop. Open it once to check it plays. If the site won't play it on the day, play the file from there, full screen, with the sound up. The opening film isn't shown in the room: we open with our own welcome.
- [ ] Sound and picture check, before anyone arrives and on the rehearsal session so nobody's phone moves: open /host?code=REHEARSE on the TV, press F for full screen, then Go to THE FLAVOR RACE (slide 13) in the presenter view, or open /host?code=REHEARSE#13. Check it fills the screen, play ten seconds through the speakers and set the volume, and press R to check it starts again. Then close that window and open Present on the day. Keep the film off the TV once people start arriving.
- [ ] Rehearse on /host?code=REHEARSE (the team page links to it), never on /host itself, so rehearsal votes stay out of the live session. Leave the live session FOF1109 alone the night before: it holds everyone's pre-brief answers, and the team page shows how many are in.
- [ ] Samples: A and B in the Kids base and C and D in the Fresh Breath base. During setup, pre-pour them into cups coded A to D on covered trays, out of sight, and bring the trays out as THE FLAVOR RACE ends. Set out water to rinse, cups to spit into and napkins.
- [ ] Set up one loaner phone or tablet for someone who arrives without a phone: at setup, scan the code on the arrival screen and leave it on the name screen, so whoever uses it types their own first name. It stays with that one person all morning. A phone keeps one identity, so if it's passed round, the next person's votes and scores replace the first person's. Anyone else without a phone votes by hand and scores on a paper card. Keep it charged and on the table.
- [ ] Who votes: the Church & Dwight people in the room. The four of us don't vote, on our phones or by hand, so every count on screen is theirs. To check a phone works, use the rehearsal session (Rehearse on the team page), never the live one.
- [ ] If we're running late, see If we run behind below. The presenter view shows how far over the current part is and whether the short version is on.
- [ ] Nothing gets typed on the day. On the vote slides, the presenter view has a button to add a hand vote for each option, and one to take it back. The concept cards and Now, Next, Later are filled in by tapping options.
- [ ] Paper scorecards are for anyone without a phone once the loaner is taken (print a few from /scorecard, with pens). On the tasting, tap +1 paper card in the presenter view for each one handed in, and -1 for a mistake. The cards are typed in after the morning.

AT A GLANCE: WHAT WE DO, THE KIT AND WHAT EACH BLOCK SHOULD LEAVE US WITH

TIME	BLOCK	TECHNOLOGY AND MATERIALS	OUTPUT
10:00 to 10:10	Welcome, who we are and your four objectives Welcome, the four of us, our flavors, Ross's objectives and the pre-brief answers.	Laptop on the TV as an extended display, the presenter view (P), the QR code on the arrival screen, Wi-Fi for the laptop, the loaner phone or tablet on its name screen.	Phones joined, and the pre-brief answers on screen if any came in.
10:10 to 10:25	What's changing: your portfolio, the market and seven trends The household gap and the shelf, then the trend vote and the top three.	Phones for the trend vote; hand votes in the presenter view for anyone without one.	The three trends that matter most, and what we missed.
10:25 to 10:40	Flavor School, then four directions Flavor School and the four directions, then THE FLAVOR RACE at 10:37.	The presentation; the tray of smelling strips numbered 1 to 7 (where it goes is Ryan's call: here or after the tasting); speakers loud enough for THE FLAVOR RACE (checked before anyone arrives), the presenter view for its controls and the film saved on the laptop as a backup.	The room's first reactions to the four directions, before anything is tasted, and THE FLAVOR RACE at 10:37 (or skipped if we're late).
10:40 to 11:00	A blind tasting in your bases Score A to D, then the scores, the names, the chart and the chips.	The four samples pre-poured into coded cups (A to D) on covered trays, water, spit cups, napkins, phones and the loaner phone or tablet (one person). A few paper scorecards and pens for anyone else without a phone.	Scores for all four samples, the fruit guesses, the names revealed, and five chips each on what gets a next round.
11:00	*Suggested transition: while the chips go in, clear the cups and pens so the table is free at 11:00.*		
11:00 to 11:20	From samples to concepts The day map, then up to three concept cards, agreed with the room.	The day-map cells on the TV, and the concept cards in the presenter view. All taps. A notes sheet and pen for answers the options don't hold.	One or two well-defined concepts (up to three), each with where it starts, who it's for, when, its role in the range, the format, the intended growth opportunity and the next version or question to test, marked agreed once the room says yes.
11:20 to 11:40	White space, then Now, Next, Later Each idea on Now, Next, Later, with its owner and next step.	The presenter view for Now, Next, Later (all taps), or tap the board on the TV. The same notes sheet.	Each idea under Now, Next or Later, placed when the group agreed, with its consumer or occasion, flavor brief (drafted), next version or question to test, next test, TFF owner, C&D reviewer, base, next sample date and agreed next step, or To confirm with who will confirm it.
11:40 to 12:00	What we decided and what happens next Read back the Playbook and the next steps, then questions until 12:00.	The presenter view for the read-back, the notes sheet to read back, and the results page ready to save as a PDF.	The plan read back with its owners and open items, and the results page saved as a PDF.

THE TASTING TABLE (CHECK BEFORE 10:40)

- [ ] Cups labeled A to D, nothing else on the label: no names, no fruits. Pour them during setup onto covered trays, and bring the trays out as THE FLAVOR RACE ends.
- [ ] Backup samples of each, in case of a spill or a second pour.
- [ ] Tasting cups, spit cups and napkins at every seat.
- [ ] Water to rinse between samples.
- [ ] The QR code on screen for phones, and the loaner phone or tablet for one person, set up on its name screen. A few paper scorecards and pens for anyone else without a phone.
- [ ] Reveal: the names flip on screen at the second build of the tasting. Reveal cards only if you're bringing printed ones.

THE RUN OF SHOW

TIME	BLOCK AND SCENES	WHAT HAPPENS
10:00 to 10:10	Welcome, who we are and your four objectives The Future of Freshness (1), Who we are, since July (2), Our flavors in your range (3), Your four objectives (4), Your pre-brief answers (5, only if answers came in)	As people sit down, the arrival screen shows the title, the QR code and the first names as phones join. At 10:00, thank Ross for having us. Introduce the four of us, with the July row if there's time. Then the TheraBreath products our flavors are in today. Read Ross's four objectives and his goal, and show the pre-brief answers if any came in.
10:10 to 10:25	What's changing: your portfolio, the market and seven trends OBJECTIVE 01 Part 1: What's changing (6), Out of every 100 households (7), The shelf (8), Seven trends: vote, then discuss (9)	The Part 1 slide carries Ross's first objective in his words. Open on why we're here, then the household gap, all in households out of 100: 14 buy TheraBreath, 51 buy mouthwash but not TheraBreath and 35 don't buy mouthwash. Ask which a new flavor should focus on first. The record 26.8% share of sales is said, not shown. Put the portfolio next to what competitors are launching, and ask them to finish the sentence: "I'd choose TheraBreath for its flavor if it…" Then all seven trends go up at once and everyone votes for three on their phone straight away; the presenter view adds a vote by hand for anyone without one. The next click closes the vote and the top three open one at a time for discussion. They go into the Playbook. Ask out loud what we missed.
10:25 to 10:40	Flavor School, then four directions OBJECTIVE 02 Part 2: Where flavor could go (10), Flavor School: flavor and sodium chlorite (11), Four directions (12), THE FLAVOR RACE (13)	The Part 2 slide carries Ross's second objective. Then Flavor School, three things we design for, from our bench: seven molecules on a tray of smelling strips (optional, S skips it), cooling, then how the flavor has to work in the actual base and what we do, ending on the clean finish. Then the four directions on one map: click a direction to open its profile card. Two have samples in the tasting; the other two are optional cards that S skips. At 10:37, THE FLAVOR RACE: a surprise for the room, so don't announce it. Lights down, sound up, 2:24 of film. It starts only when you move onto it, and you can pause, restart or skip it from the presenter view or the keys. The tray of four glasses comes at about 2:09, then the Let's taste what's next card and a short coda on the Moon; it goes to black at about 2:22. Bring the lights up and the covered trays out at black, not at the first tray. Its flavor montage shows the flight's own fruits, the Mystery Flavor's among them, so treat it as a hint. If we're running late, skip it: nothing is decided on it.

TIME	BLOCK AND SCENES	WHAT HAPPENS
10:40 to 11:00	A blind tasting in your bases OBJECTIVE 02 The blind tasting (14), What deserves the next round (15)	At 10:40, uncover the trays poured during setup: A and B in the Kids base, C and D in the Fresh Breath base. Everyone scores each sample on their phone (how much they like the flavor, how well it fits TheraBreath, how different it is from current mouthwash flavors, and whether the sweetness and cooling are right). While they score, the screen shows only how many have finished all four, never the averages. The next build puts the scores up and closes scoring on the phones; if anyone is still scoring, the first press says how many and a second press goes on. The loaner phone or tablet stays with one person all morning; anyone else without a phone scores on a paper card. For each paper card handed in, tap +1 paper card in the presenter view; we type them in after the morning. B is the Mystery Flavor, so get everyone's fruit guesses before the names go up. Then the bubble chart from the scores: talk about it first, with the chips still closed. The next build opens the chips, and everyone places five on the flavors or directions we should develop next (the four they tasted, plus the two directions not tasted today). Then the top three go up.
11:00 to 11:20	From samples to concepts OBJECTIVE 03 Part 3: What we could make (16), Where TheraBreath fits in a day (17), Concepts (18)	The Part 3 slide carries Ross's third objective. Then walk through the day, moment by moment: where TheraBreath is today, the occasions the pre-brief would most like to explore, and which occasions TheraBreath could serve better. The top three from the chips sit in a tray: tap one, then a moment on the arc, to place it. Then the concept cards start themselves from those three, with When from the marks. Every card is a starting point for discussion: change any field by tapping in the presenter view, or swap a card for one from our library (the two example concepts are in it), and tap Mark as agreed when the room says yes. One or two well-defined cards are enough; a third is optional. Nothing to type: an answer the options don't hold goes on the notes sheet, tapped as Other, in the notes.
11:20 to 11:40	White space, then Now, Next, Later OBJECTIVE 04 Part 4: What to do first (19), Now, Next, Later (20)	The Part 4 slide carries Ross's fourth objective. Then place each idea when the group agrees: tap a concept or direction in the tray (More ideas holds the rest), then tap Now, Next or Later. Tap a line to move it or take it back. In the presenter view, tap its fields: the consumer or occasion, the next version or question to test, the next test, a TFF owner, a C&D reviewer (confirm the person in the room), the base, the date the next sample is due (To confirm until the room agrees one) and the agreed next step. The flavor brief drafts itself, from the tasting for a sample or the map for a direction, and stays a draft until the write-up. Tap To confirm where nobody can say yet.
11:40 to 12:00	What we decided and what happens next What we decided and what happens next (21), Thank you (22)	The Playbook fills in from the votes and the board and opens one chapter at a time so it can be read back in two to four minutes: the concepts marked agreed or proposed, the plan with its owners last and anything still open. Then the three next steps, and thank you. The last slide is a thank-you card, and the time until 12:00 is for questions. Then lunch, hosted by Church & Dwight.

SLIDE BY SLIDE

Planned minutes, so each part ends on time; the presenter view shows each slide's planned window. Numbers match the presenter view's Go to list. Builds marked optional are the ones S skips. Your pre-brief answers (5) shows only once someone has answered; if nobody has, its four minutes are spare.

PLANNED	#	SLIDE	ON SCREEN, CLICK BY CLICK	ASK THE ROOM, AND THE PHONES
10:00 TO 10:10 · WELCOME, WHO WE ARE AND YOUR FOUR OBJECTIVES				
10:00 1 min	1	The Future of Freshness	The title and the QR code. Once phones join, how many and their first names.	At 10:00: welcome, thank Ross, and say what the morning is for: what deserves another round, what you'd change and the next step. *Phones: Scan the code and type a first name, then one optional warm-up: a flavor that surprised them this year. The answers show on the TV with first names; the presenter view can hide any by tap.*
10:01 2 min	2	Who we are, since July OPTIONAL BUILD	The four of us, then three columns in Ross's words: technical expertise (the lab, and our flavors in 14 of their rinses), creativity (four new samples made in their bases, tasted at 10:40) and innovation (what we bring in from outside oral care). "Today you get to judge all three." 1 Optional (S skips it): the four July themes, and Growth, November, lights up.	
10:03 1 min	3	Our flavors in your range	The 14 TheraBreath rinses on shelf today with our flavors in them, each bottle with its flavor and product line. Peppermint Vanilla and Tingling Mint carry a quiet highlight.	Peppermint Vanilla is the festive one here. What did it teach you about seasonal flavors?
10:04 2 min	4	Your four objectives	"We've built the morning around your four objectives," all four at once, each with its time and part, and the question beside the heading. 1 Ross's goal, in his words.	If Ross agreed on the pre-call, he gives the one-minute version of why he wrote these four. On screen: which one matters most to you this year? Then: is there anything critical we should add?
10:06 4 min	5	Your pre-brief answers IF ANSWERED	The headline from their answers ("6 of 7 of you want to win people who buy another brand" with today's answers; the usual heading on a tie), and which audience a new flavor should focus on first, with any "Someone else" answers. 1 The occasion most useful to explore together, with any "Another occasion" answers, and their own taste in freshness. 2 What would feel off-brand, without names. 3 The answer featured in the presenter view, at full size: "We'll come back to this." Skipped with nothing featured.	On screen: you lean toward … Is your consumer the same, or are you the exception? Then: anything here you'd argue with? And: what makes each off-brand answer feel wrong for the brand?
10:10 TO 10:25 · WHAT'S CHANGING: YOUR PORTFOLIO, THE MARKET AND SEVEN TRENDS · OBJECTIVE 01				
10:10 1 min	6	What's changing	Part 1 of 4, 10:10 to 10:25: What's changing, with Ross's first objective in his words and the three shifts under it: generic mint to layered flavor, maximum intensity to chosen intensity, a daily chore to an enjoyable routine.	Which of these three is already showing up in your consumer data? One answer, then move on (about a minute).

PLANNED	#	SLIDE	ON SCREEN, CLICK BY CLICK	ASK THE ROOM, AND THE PHONES
10:11 3 min	7	Out of every 100 households	"TheraBreath built a strong position on a rinse without the burn. The next job is giving more people a reason to want it." 1 Out of every 100 households: two glasses fill, 65 buy mouthwash and 14 buy TheraBreath. "TheraBreath is already number 2 in mouthwash." Say the record 26.8% share of sales out loud; it isn't on screen. 2 Three groups that add up to 100: 14 buy TheraBreath, 51 buy mouthwash but not TheraBreath, 35 don't buy mouthwash. 3 "Flavor could give more of these households a reason to try it." The group the pre-brief named most is marked "You told us: start here" (the 51, with today's answers).	When the pre-brief points at the 51: what would make someone who buys another brand switch, and is flavor the reason or just the excuse? Follow-up: what do we owe the 14 so loyal users don't feel left behind? Otherwise: who should the next flavor win over first, the 14, the 51 or the 35? A show of hands, then why.
10:14 3 min	8	The shelf	"Mint is home base": 24 of 29 products, across six formats, a dot for each product, mint in blue, and only the others named. Beside it, "Competitors are moving onto your ground": four competitor launches. Say that TheraBreath has its own Target exclusive too (Eucalyptus Mint). 1 "Gentle is TheraBreath's ground, and Listerine is moving onto it. What's the next thing only TheraBreath can own?" 2 What's already theirs, and a sentence to finish.	Finish the sentence: "I'd choose TheraBreath for its flavor if it…"
10:17 8 min	9	Seven trends: vote, then discuss	All seven trends, one line each with where the evidence comes from. The bars fill as phones vote. 1 The vote closes. Number 1 opens: its evidence, what it could mean and its question. Equal votes share a place (Tied for first), and a tie that puts more than three in the top places is flagged: the room picks which three to open. No votes: the first three are shown as topics to discuss. 2 Number 2. 3 Number 3. The top three go into the Playbook. At any build, the keys 1 to 7 open that trend for more discussion; the same key again, or 0, goes back.	Each trend's own question on screen. Then, out loud only: what are you seeing that we missed? *Phones: Pick three trends straight away. Hand votes in the presenter view for anyone without a phone.*
10:25 TO 10:40 · FLAVOR SCHOOL, THEN FOUR DIRECTIONS · OBJECTIVE 02				
10:25 1 min	10	Where flavor could go	Part 2 of 4, 10:25 to 11:00: Where flavor could go, with Ross's second objective.	Name a flavor you love anywhere else that's never been in a mouthwash. One answer each, fast.
10:26 4 min	11	Flavor School: flavor and sodium chlorite OPTIONAL BUILD	Optional (S skips it): from our bench, seven molecules of freshness, numbered 1 to 7 to match the tray of smelling strips. Pass the tray: strips only, not for tasting. Ask: which one says clean to you? Which one says medicine? 1 "Cool has a shape": three curves over onset, peak and linger, an illustration with no times, not data from these samples. Ask: quick blast or slow build, which feels more like TheraBreath? 2 "A flavor isn't done until it works in your base," from the first rinse to the last day of shelf life. How we get there: materials that suit the base, blending the flavor in and protecting what's fragile, checking it holds up in the base we agree on. "And whatever we make has to finish clean."	What's the toughest flavor you've tried to keep alive in a sodium chlorite base?

PLANNED	#	SLIDE	ON SCREEN, CLICK BY CLICK	ASK THE ROOM, AND THE PHONES
10:30 7 min	12	Four directions	The map: familiar to adventurous, gentle to bold, all four directions. Our view, not data. The empty gentle, adventurous corner reads “Nothing here yet. What goes here?” 1 Plant-Powered Freshness: its profile card. 2 Global Brightness, not tasted: a short, fair explanation, since it’s on the chips. Listerine Citrus Mint (March 2026) already pairs grapefruit and yuzu; ask what a TheraBreath version would do that Listerine’s can’t. 3 Modern Clean, not tasted: the same. Mild Mint is already on their shelf; ask what would make Modern Clean more than milder. 4 Next-Generation Kids.	When the pre-brief leans adventurous (it does today): you told us you lean adventurous. Nothing on our map is. Where should we push? Otherwise: nothing on our map sits here yet. What would? Then: which one would you put on the shelf first, and which would you argue against? Click a direction to open its card.
10:37 3 min	13	THE FLAVOR RACE	THE FLAVOR RACE, 2:24, lights down and sound up. Don’t announce it. The tray of four glasses comes at about 2:09, then the Let’s taste what’s next card and a short coda on the Moon. At black (about 2:22), lights up and bring out the samples.	Nothing: let it play. Its montage shows the flight’s fruits, so it doubles as a hint for the Mystery Flavor. *Phones: Phones show “Phones down for a couple of minutes.”*
10:40 TO 11:00 · A BLIND TASTING IN YOUR BASES · OBJECTIVE 02				
10:40 13 min	14	The blind tasting	Four coded samples and how many phones have scored each one, with how many have finished all four. No averages yet. A and B first, then C and D, with water between. B is tagged “Guess the fruit”: before B, say “This one is a game. Guess the fruit.” 1 The scores (averages, the number of scores per sample, and every sweetness and cooling answer as low, right, high), their one-word answers and fruit guesses. Scoring closes on the phones. If anyone is still scoring, the first press says so; press again to go on. 2 The names. B shows its name only. Once the scores have been up, going back doesn’t reopen scoring (Reopen scoring in the presenter view does).	After the names: which one surprised you, and was it a good surprise? *Phones: Score each sample: how much you like the flavor, how well it fits TheraBreath and how different it is from current mouthwash flavors, each from 1 to 5, with both ends named. Then sweetness and cooling: not enough, just right or too much. All five are needed to save a sample; one word, if they want. Fruit guesses for the Mystery Flavor. Paper cards counted with +1 in the presenter view and typed in after the morning.*
10:53 7 min	15	What deserves the next round	“What gets a second round?” Each sample placed by fits TheraBreath, what loyal users expect (across), and different, a reason for someone new to try (up), 1 to 5 as scored, sized by how much they liked it, with the number of scores per sample. The top right corner reads “Both: what Ross asked for.” Under it: a lens on Ross’s goal, not a measure of it; first reactions, not consumer research. The chips are still closed: the phones say they open in a moment. 1 The chip question takes the place of the two questions, and the chips open on the phones. 2 The top three from the chips, ties shown as ties. The chips close on the phones.	On screen: C or D, which one tastes more like TheraBreath? Top right is both at once: what would it take to move the others there? Then out loud: if only one went back to the lab tomorrow, which one, and what would you fix first? If there’s time: what would make a TheraBreath flavor impossible to mistake for anyone else’s? *Phones: “Five chips each. Spend them on what we should develop next.” Five chips each, stacking allowed: the four samples under Tasted today, and Global Brightness and Modern Clean under New directions, not tasted today. Hand chips in the presenter view: anyone without a phone has five too, so ask where their five go and tap once per chip.*
11:00 TO 11:20 · FROM SAMPLES TO CONCEPTS · OBJECTIVE 03				
11:00 1 min	16	What we could make	Part 3 of 4, 11:00 to 11:20: What we could make, with Ross’s third objective.	Who is the one person you’d most like TheraBreath to win next? Their answers become the Who on the concept cards.

PLANNED	#	SLIDE	ON SCREEN, CLICK BY CLICK	ASK THE ROOM, AND THE PHONES
11:01 5 min	17	Where TheraBreath fits in a day	One arc from wake-up to wind-down, with on the go in the middle, and the top three from the chips in a tray below. 1 “The rinse bookends the day: morning and night.” Rinse lights up at both ends, lozenges, gum and sachets on the go. 2 How many pre-briefs named each moment; the most named one glows (ties all glow). 3 “You named “After coffee” most. What should it taste like?” when the pre-brief has a clear most named moment; on a tie, “Pick a moment. What should it taste like?” The other moments say To explore. Tap a flavor, then a moment, to place it: the first place for each becomes its concept’s When, in the pre-brief’s own words.	Where have we got today wrong? Then: after coffee, before going out, after the gym, where would a flavor earn its place? And what does it come in: rinse, sachet, spray or lozenge? For each idea, what need would it serve better than what’s already there?
11:06 14 min	18	Concepts	“Let’s make them real.” The questions beside it: picture one person who’d buy this, who are they and when do they reach for it? And what would make you say no to this at your next gate review? Up to three starter cards from the top three chips, each marked Starting point for discussion, under a label that says what’s filled in is a proposal until we agree it: where it starts, who it’s for, when, role in the range, format, intended growth opportunity, next version or question to test. Change any field by tapping in the presenter view, swap a card from the library, and mark it agreed when the room says yes. When is always a moment on the day arc. Two cards that would be the same apart from their name (both kids samples) become one card naming both, and the freed card starts from the white space, When and Who from the pre-brief. Role in the range is one of the four portfolio roles. A tie in the chips at the cutoff leaves a card open for the room’s pick, and a change to an agreed card takes the agreement off until it’s read back.	“These are starter cards. None of the filled-in fields is a decision until we agree it. For this first idea, who is it for, what would it add and what should the next sample do differently?” If the room is stuck, swap in one of the two example concepts.
11:20 TO 11:40 · WHITE SPACE, THEN NOW, NEXT, LATER · OBJECTIVE 04				
11:20 1 min	19	What to do first	Part 4 of 4, 11:20 to 11:40: What to do first, with Ross’s fourth objective.	If we could only make one thing by January, what is it?
11:21 19 min	20	Now, Next, Later	Now, Next, Later, with the concepts and the top chips in a tray and More ideas for the rest. Place an idea when the group agrees: tap it, then tap Now, Next or Later. Above the board, the four portfolio roles with a count each; an empty role stands out.	On screen: what has to be true for this to move from Next to Now? Then: “Is this the next piece of work we want to do? What must it show, who takes it forward and when should we review it?” For each line, tap in the presenter view: consumer or occasion, next version or question to test, next test, TFF owner, C&D reviewer, base, next sample date (To confirm until agreed), agreed next step. The flavor brief drafts itself and is finished in the write-up.
11:40 TO 12:00 · WHAT WE DECIDED AND WHAT HAPPENS NEXT				
11:40 4 min	21	What we decided and what happens next	The Playbook assembles from the morning. 1 Chapter 1, the trends. 2 Chapter 2, directions and samples: each sample with its direction, and the tasting. 3 Chapter 3, the concepts, each marked agreed or proposed. 4 Chapter 4, the plan: read it back, owners and all, and ask what doesn’t match what we agreed. 5 Next step 1: an owner for each direction. 6 Next step 2: the write-up within 8 business days. 7 Next step 3: the next round of samples, in January 2027, with the question beside it.	What would January’s samples need to do for you to say yes? Jot the answer on the notes sheet: it goes into the write-up as the success criteria.

PLANNED	#	SLIDE	ON SCREEN, CLICK BY CLICK	ASK THE ROOM, AND THE PHONES
11:44 16 min	22	Thank you	The thank-you card, over the room's one-word tasting answers (three or more; hide any in the presenter view). 1 Only if Ryan supplies the line: "One last thing. The Mystery Flavor was …" Otherwise skipped.	"Thank you for the time and the feedback. Before we finish: what surprised you this morning? And what have we missed?" Questions until 12:00, then lunch, hosted by Church & Dwight.

IF WE RUN BEHIND

1. A few minutes behind: press S. It skips the optional build (the July row on Who we are), and the presenter view shows the short version is on. Global Brightness and Modern Clean still get their cards, briefly: the room can put chips on them.
2. Further behind: skip THE FLAVOR RACE (the right arrow or] on it goes straight to the tasting, and the map's presenter view has a button for it), discuss two of the top three trends instead of three, and keep one concept card instead of three. Press] to jump to the next part.
3. Out of time: read back Now, Next, Later with its owners, then End goes straight to the thank-you card.
4. Never cut: the blind tasting, the chips on what gets a next round, and the owners and next steps on Now, Next, Later.

IF THE ROOM NEEDS A STARTING POINT: TWO EXAMPLE CONCEPTS

Both are cards in the concept library: swap one in from the presenter view only if the room is stuck, and let them change it. The assumptions are ours, not facts.

A calmer last rinse of the day

FOR	Loyal TheraBreath users
WHEN	Wind-down, the last rinse before bed
FLAVOR DIRECTION	A softer botanical mint, in the Fresh Breath base, next to what Overnight Chamomile Mint already does
HOW IT FEELS	Gentle cooling that fades rather than lingers, no sting, a calm aromatic finish
WHAT WE'D TEST	Does softer cooling still read as clean to a loyal user? Do the botanical notes hold up in the base over time?

- *Assumption: loyal users want a different feel at night than in the morning.*
- *Assumption: the botanical notes stay stable in the base. That needs a bench check.*

A guessing game at the sink

FOR	Families with kids and tweens
WHEN	The evening routine with the kids
FLAVOR DIRECTION	A fruit flavor sold as a mystery, in the Kids base, in the spirit of the Mystery Flavor sample
HOW IT FEELS	A fruit-forward start, mild cooling, a clean finish
WHAT WE'D TEST	Do kids enjoy guessing more than a named fruit? Do parents still see it as a real oral care product? How much cooling do kids accept?

- *Assumption: the guessing makes kids want to rinse.*
- *Assumption: a mystery name works for parents in store. Both need testing with families.*

AFTER THE MORNING

- [ ] Before you close the laptop, open /host?results=1 and print it to PDF: the votes, the scores, the concepts, the white-space marks and Now, Next, Later as we left them. The Playbook write-up (/host/writeup) fills in from the same session.
- [ ] Collect the paper scorecards and type them in on /host/cards (the team page links to it). Their scores join the results page and the write-up as each one is saved.
- [ ] In the write-up, press Edit what's to confirm: finish the drafted flavor briefs and fill in anything still To confirm. Both are highlighted until they're done.
- [ ] An owner for each direction: Before we leave today, every direction gets its consumer or occasion, a flavor brief, the next test, a TFF owner, a C&D reviewer, a base, a date for the next sample and an agreed next step.
- [ ] The write-up within 8 business days: We'll pull today's scores, choices, owners and dates into one document and send it to everyone here.
- [ ] The next round of samples: We'll make the next round in your bases and go through it with you in January 2027.

BEFORE NOVEMBER 9: STILL TO CONFIRM

- [ ] Ryan to review the Flavor School slide (slide 11): his wording, merged onto one slide in three builds, now naming sodium chlorite rather than OXYD-8, with incorporating and protecting the flavor.
- [ ] Check the bottles and flavor names on Our flavors in your range (slide 3) against our portfolio record. Names only: no usage levels or flavor codes.
- [ ] Review the drafted concept cards and the option lists in src/lib/conceptLibrary.ts. Every starter card is marked DRAFT until we've checked it.
- [ ] Ryan to confirm each sample: its name, its base (Berry Blast and the Mystery Flavor in the Kids base, Blossom Mint and Grove Mint in the Fresh Breath base) and what's in it, as the phones show it after the reveal.
- [ ] The two commitments on What happens next (slide 21): the write-up within 8 business days and the next samples in January 2027. Kept for now; confirm both before we say them.
- [ ] The shelf (slide 8): the range as listed on therabreath.com and three retailer listings on November 4, so the US range. Check it's still current, and say so if someone asks about other markets.
- [ ] Shelf life, stability and sensory performance: we say only what Ryan can back with data, on screen or out loud.
- [ ] Owners: which of us takes each kind of direction forward, so the TFF owner on Now, Next, Later is a real choice. The C&D reviewers are confirmed in the room, by name.
- [ ] The room, with Ross: how many people and where they sit for the tasting, who pours and serves, how many phones join at once, the mobile signal in the Darwin room, whether the TV reads from the back row, and the speaker volume for THE FLAVOR RACE.
- [ ] A video call with Ross before the day. He asked to connect once or twice ahead of time.
- [ ] Whether to tell the room what's in the Mystery Flavor once the names go up. The presentation, the phones and the write-up show its name but not its contents, so the room can keep guessing.
- [ ] That the samples were made in the unflavored bases Church & Dwight sent, as the front door says.
- [ ] The shelf (slide 8): the Listerine Citrus Mint launch (March 2026, Dentistry Today), with grapefruit and yuzu. Check the product and the date before we show it.
- [ ] Four directions (slide 12): the Global Brightness card says Listerine Citrus Mint (March 2026, Dentistry Today) already pairs grapefruit and yuzu. Check the product and the date before we show it.
- [ ] Ryan to check the seven molecules of freshness on Flavor School (slide 11) and what each one says, and to decide where the tray of smelling strips sits and who passes it round. The slide and the notes don't say which samples carry which note.
- [ ] Trend 4 now reads "Flavors are being made for a moment of the day." Both proofs are TheraBreath's own. Find one example from outside the brand before the day, or say it as our read.
- [ ] The Mystery Flavor reveal line on Thank you (slide 22): Ryan to supply it, or leave it blank and the slide skips it. It goes in the server-only sealed file with the sample names, so it shows on the TV and never on the phones.
- [ ] On the call with Ross before the day, ask whether he'd like to open his four objectives (slide 4) himself, in his own words.

Confidential. Keys in the presentation: right arrow, space or click to go on; left arrow to go back;] for the next part and [for the previous one; S for the short version, which skips the optional builds; Home for the start; End for the thank-you card; F for full screen; P for the presenter view; N for the talking points on the TV itself; B to blank the screen. On THE FLAVOR RACE, space or K pauses and plays and R starts it again. The same keys work in the presenter view. If the page reloads, it picks up where the session left off.
