PRESENTER EDITION · 10:00 TO 12:00 · MONDAY, NOVEMBER 9, 2026 · DARWIN ROOM, PRINCETON

The Future *of Freshness*

Every scene as it'll look on the TV, at its last build, with its time and talking points. The morning is meant to be a conversation. Each of Ross's four objectives opens in his words and ends with questions for everyone. People vote from their phones four times, and whatever we decide together gets typed in live and becomes the Playbook at the end. 35 scenes, plus "Your pre-brief answers" once the answers are in. The live presentation is at /host, opened from the team link. Use the right arrow or click to go on,] to jump to the next part, S to skip the slides marked optional, F for full screen and N for the talking points.

TIME	PART	OBJECTIVE	SCENES
10:00 to 10:10	Welcome, who we are and your four objectives		1 to 6
10:10 to 10:25	What's changing: your portfolio, the market and seven trends	01	7 to 12
10:25 to 10:40	Flavor School, then four directions	02	13 to 22
10:40 to 11:00	A blind tasting in your bases	02	23 to 25
11:00 to 11:20	From samples to concepts	03	26 to 28
11:20 to 11:40	White space, then Now, Next, Later	04	29 to 31
11:40 to 12:00	What we decided, what happens next, and a short film before lunch		32 to 35

Confidential. For The Flavor Factory team; not for distribution.

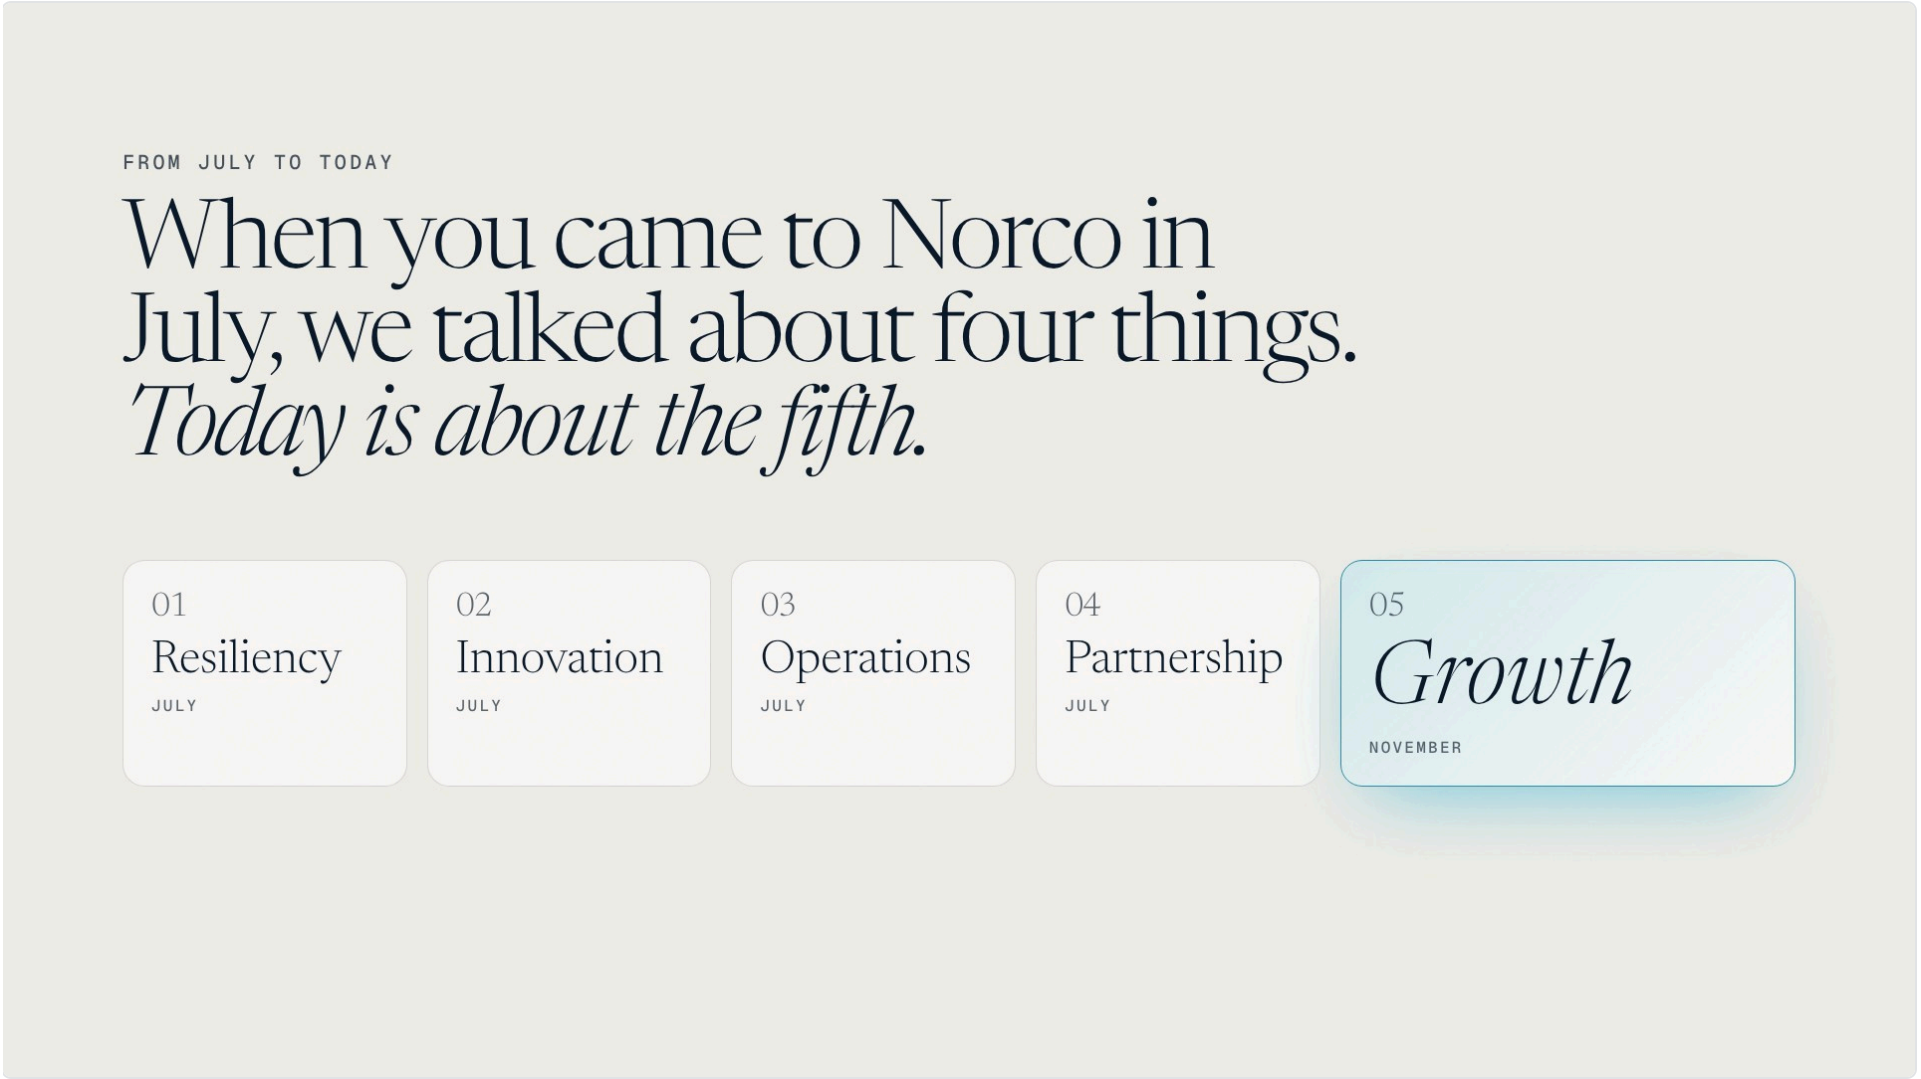

- At 9:30, Ross is meeting us to help with the Wi-Fi and the room.
- Get the laptop on the TV, press F for full screen and test the film sound.
- As people sit down, ask them to scan the code. Their names pop up on screen as they join.

- At 10:00, welcome everyone and thank Ross for inviting us.
- Set up the two hours: the four things Ross asked for, four samples to taste and a plan to leave with.
- Let them know phones will come out a few times, for the votes and the tasting.

- Introduce the four of us and what each of us does day to day.
- Say a word about the range of our work: as a wholesale flavor manufacturer we make liquid and powder flavors for just about anything, with a focus on naturally derived flavors. A lot of it is custom work, developed with clients as their own proprietary flavors, and that range feeds what we bring to TheraBreath.
- Ross asked to see our creativity, technical expertise and innovation capabilities. This morning is our chance to show all three.

- When they came to Norco in July, we talked about resiliency, innovation, operations and partnership.
- Today is about the fifth: growth.

FROM ROSS'S INVITATION

You asked for four things. *Here's when we'll get to each one.*

01

Identifying emerging flavor, sensory, and consumer trends that could influence the future of oral care.

10:10 TO 10:25
WHAT'S CHANGING

02

Exploring new flavor territories and sensory experiences that can differentiate TheraBreath from competitors and create memorable consumer experiences.

10:25 TO 11:00
WHERE FLAVOR COULD GO

03

Developing innovative flavor concepts that unlock new usage occasions, address new consumer segments, and create opportunities for portfolio expansion.

11:00 TO 11:20
WHAT WE COULD MAKE

04

Generating a pipeline of innovation platforms, flavor directions, and white-space opportunities that have the potential to drive incremental growth across the portfolio.

11:20 TO 11:40
WHAT TO DO FIRST

AND THE GOAL BEHIND THEM

"...new flavor experiences that both *strengthen our appeal with existing loyal users* and *create opportunities to attract new consumers to the franchise.*"

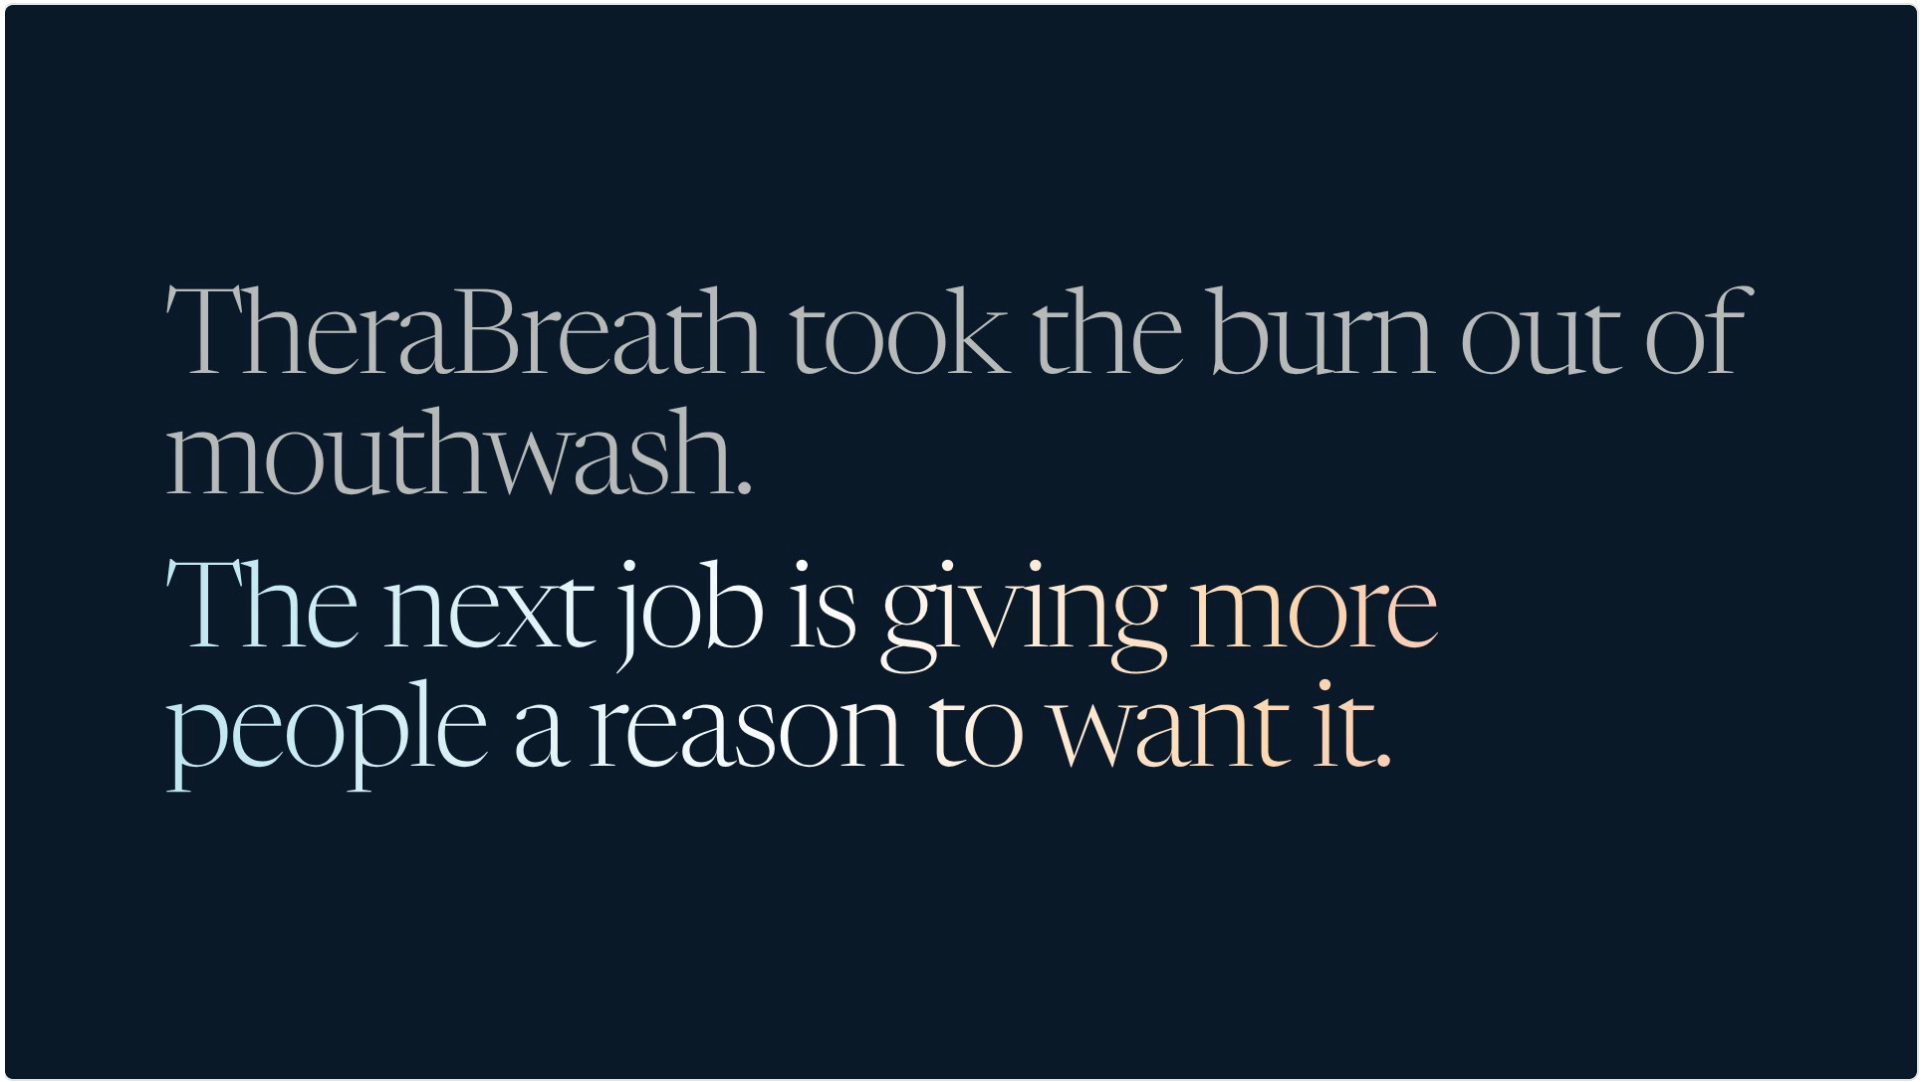

Source: Ross Conroy, Church & Dwight Oral Care R&D, workshop invitation, September 18, 2026

- Read the four objectives just as Ross wrote them. They're the agenda for the morning.
- The last build is his goal: flavors that keep loyal users coming back and bring in new ones.

After 5 · Your pre-brief answers

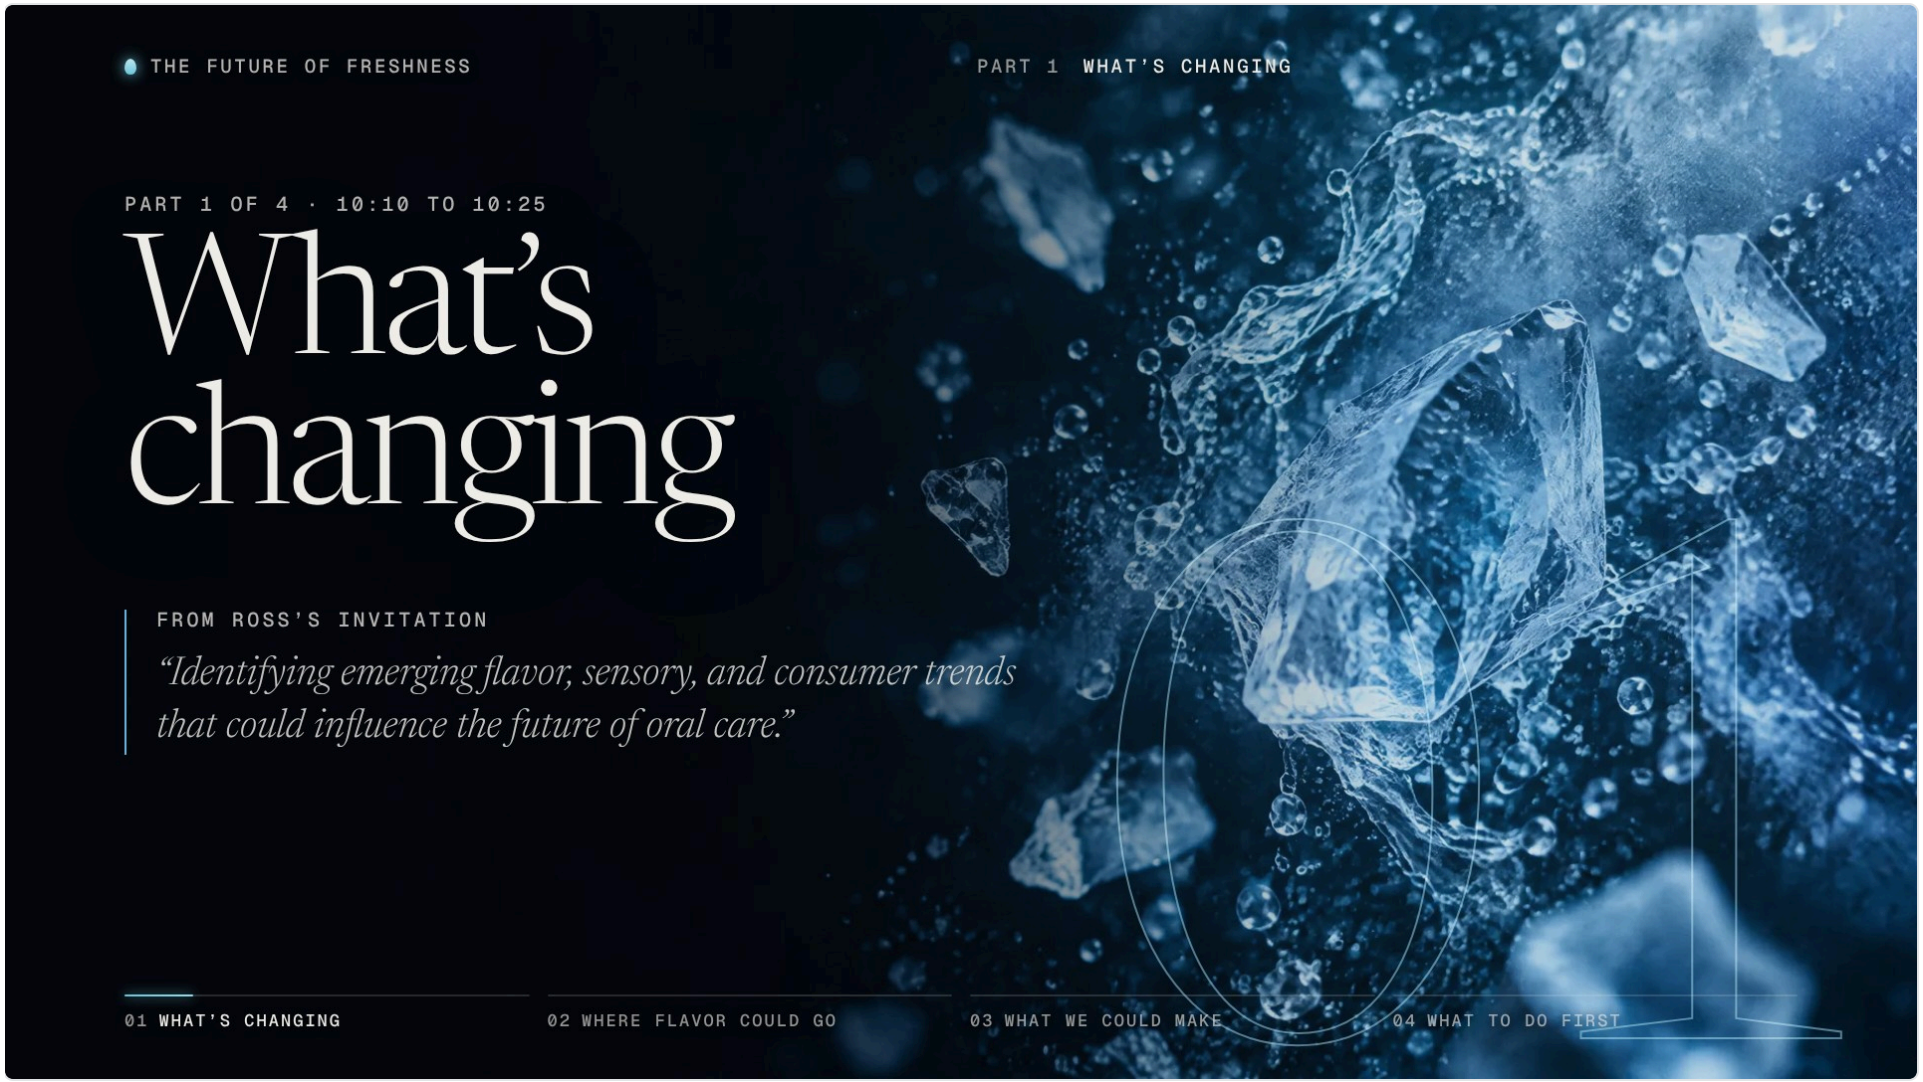

This scene shows up once the pre-brief answers are in (Ross sends the pre-brief on November 3). It covers the consumer they most want TheraBreath to win, the moment TheraBreath is missing, and the flavors they'd never sign off on, without names. Every scene after it is numbered one higher.

- These are their pre-brief answers: the consumer they most want to win and the moment TheraBreath is missing.
- Have some fun with the vetoes. There are no names on screen.

- Give this one a second to land.

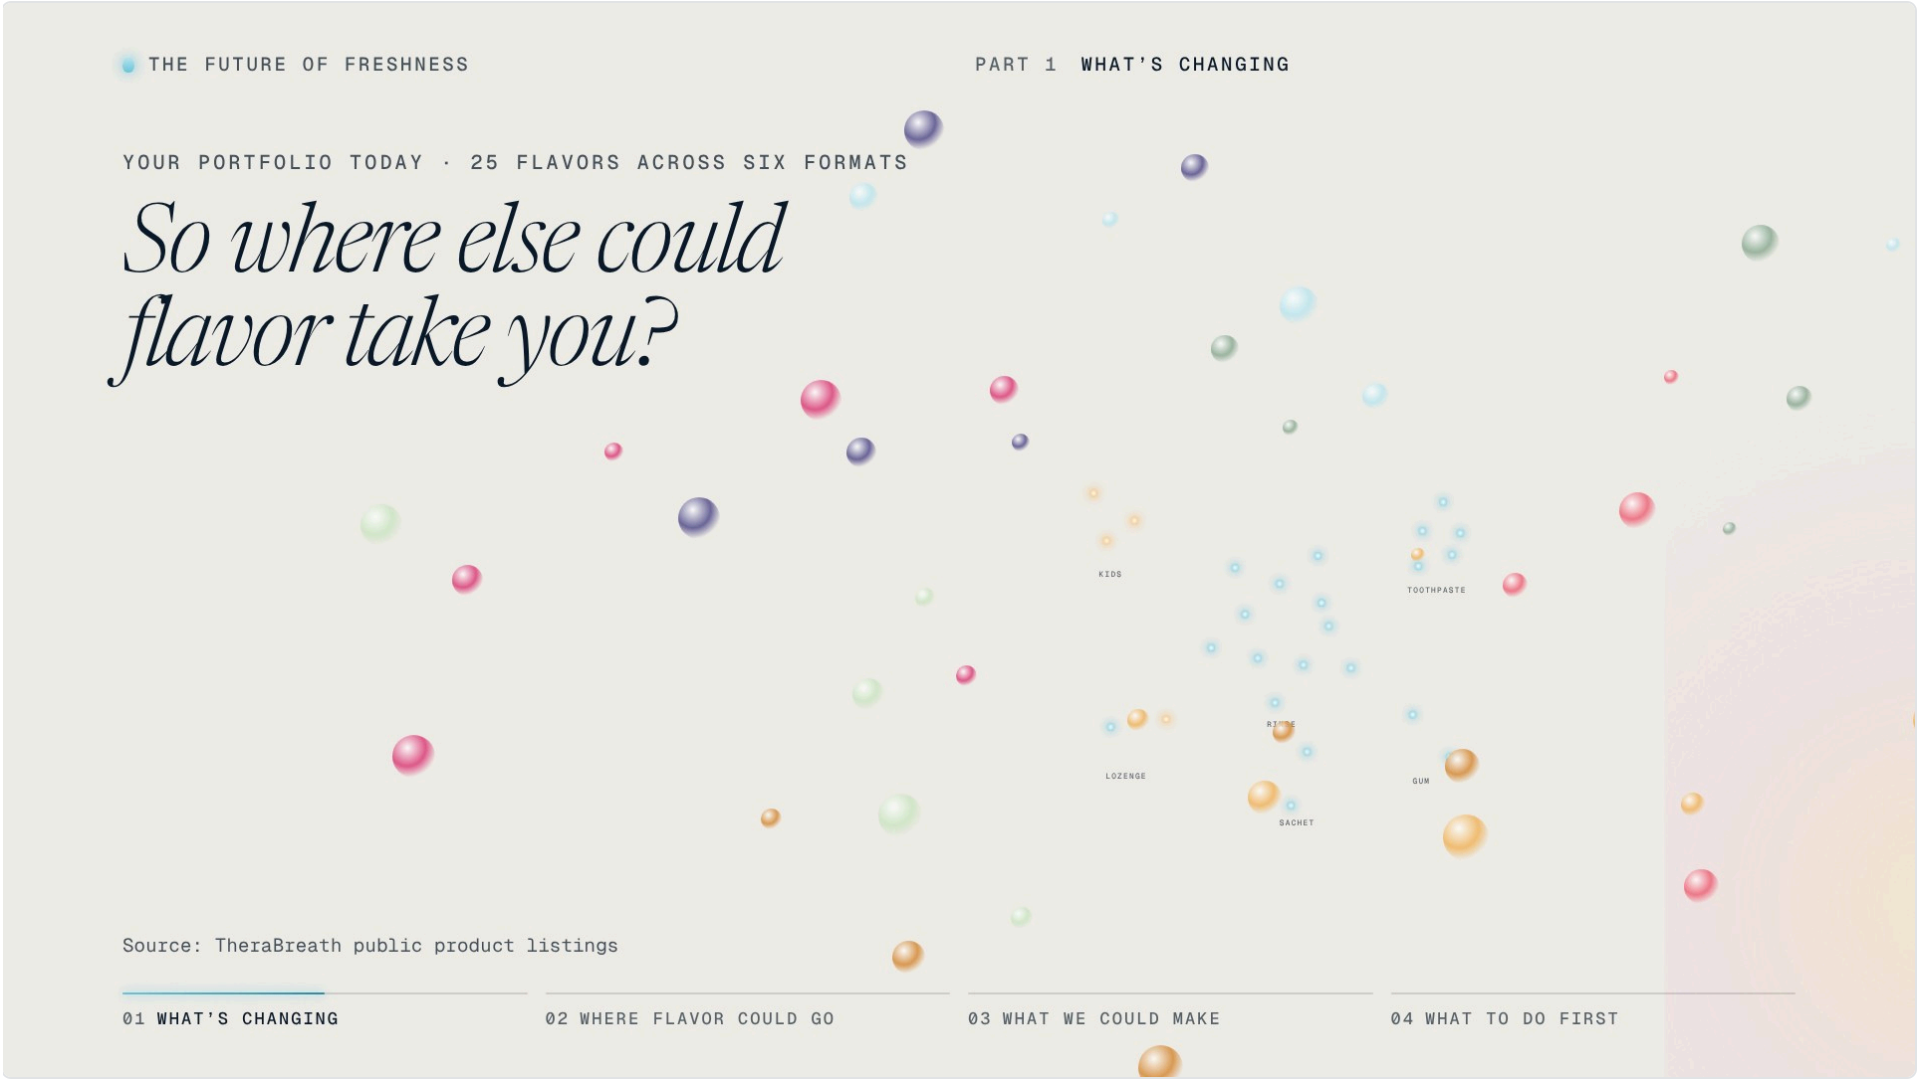

- TheraBreath took the burn out of mouthwash. The next job is giving more people a reason to want it.

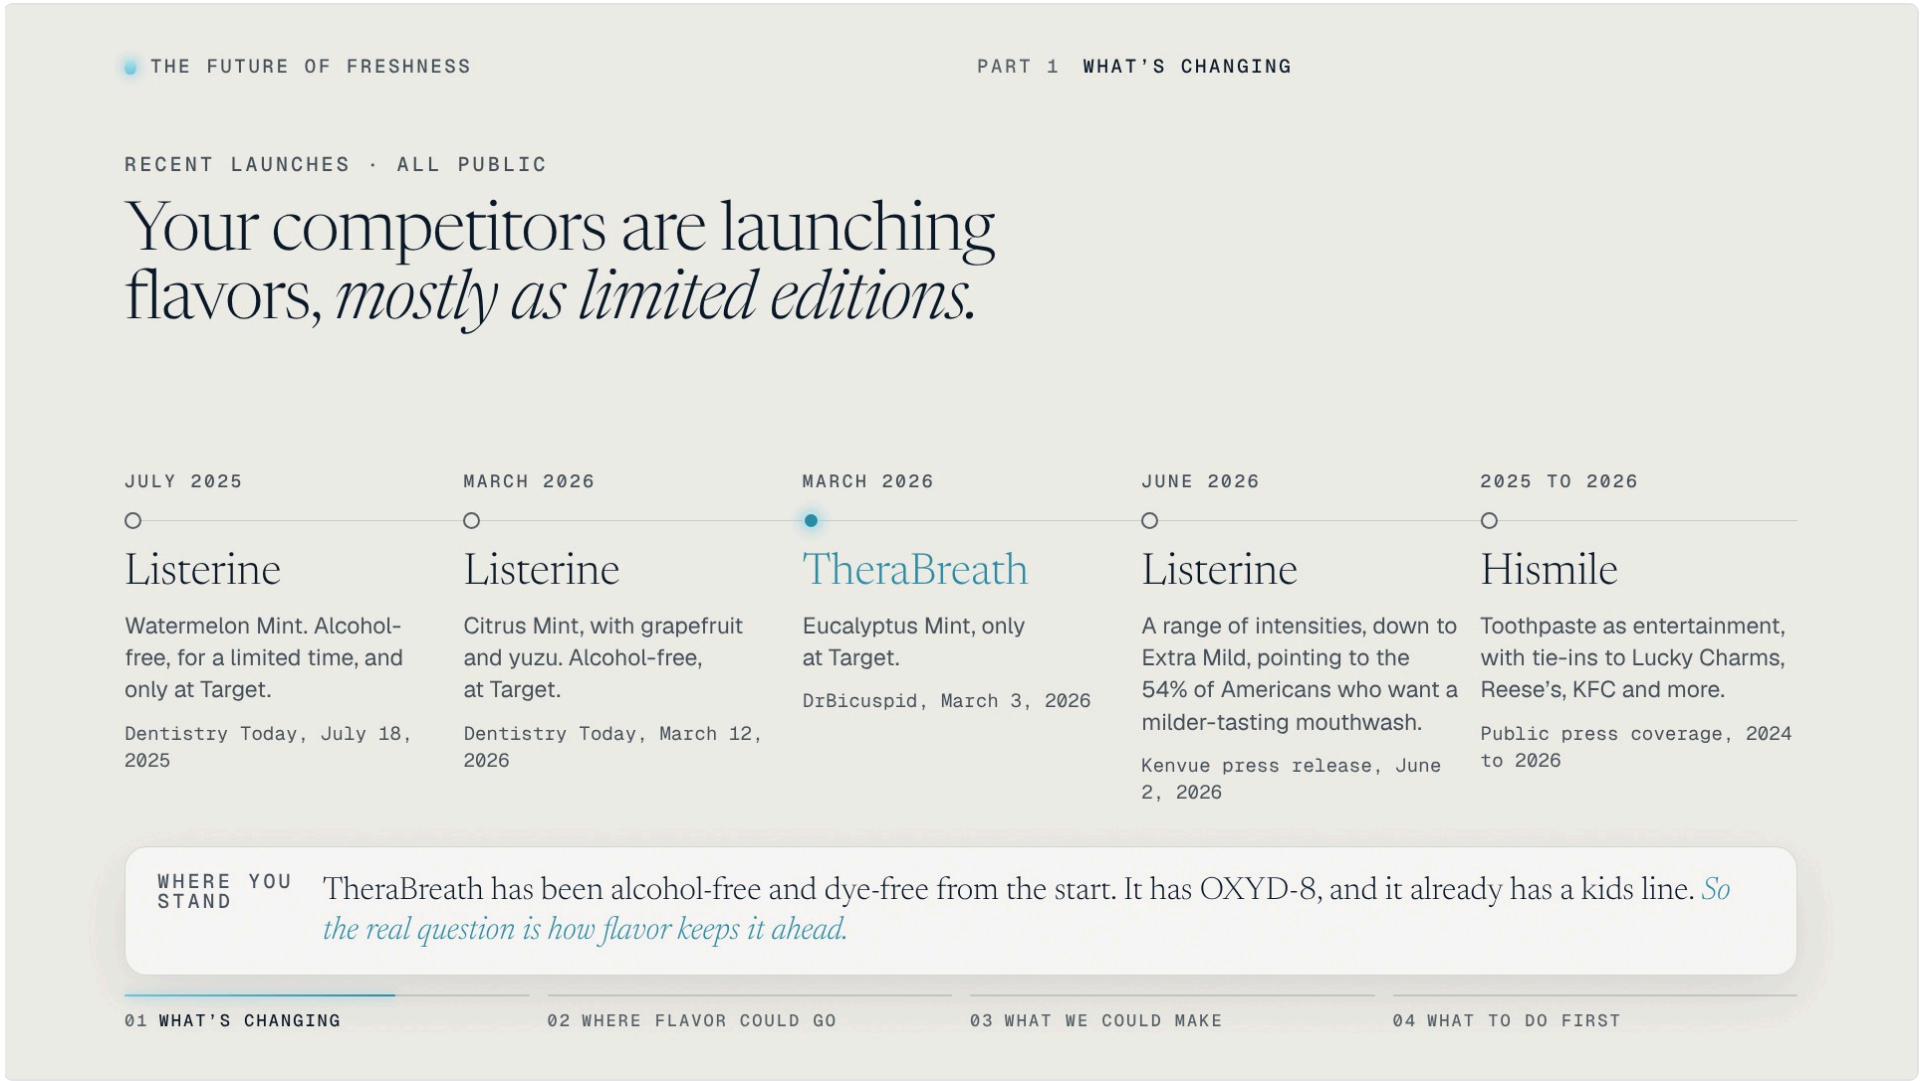

- Read Ross’s words on screen, then talk it through:
- 21 of TheraBreath’s 25 flavors are mint.
- 86 out of 100 US households don’t buy TheraBreath yet.
- Competitors are adding flavors, mostly as limited editions.
- Then seven trends we think matter for oral care.

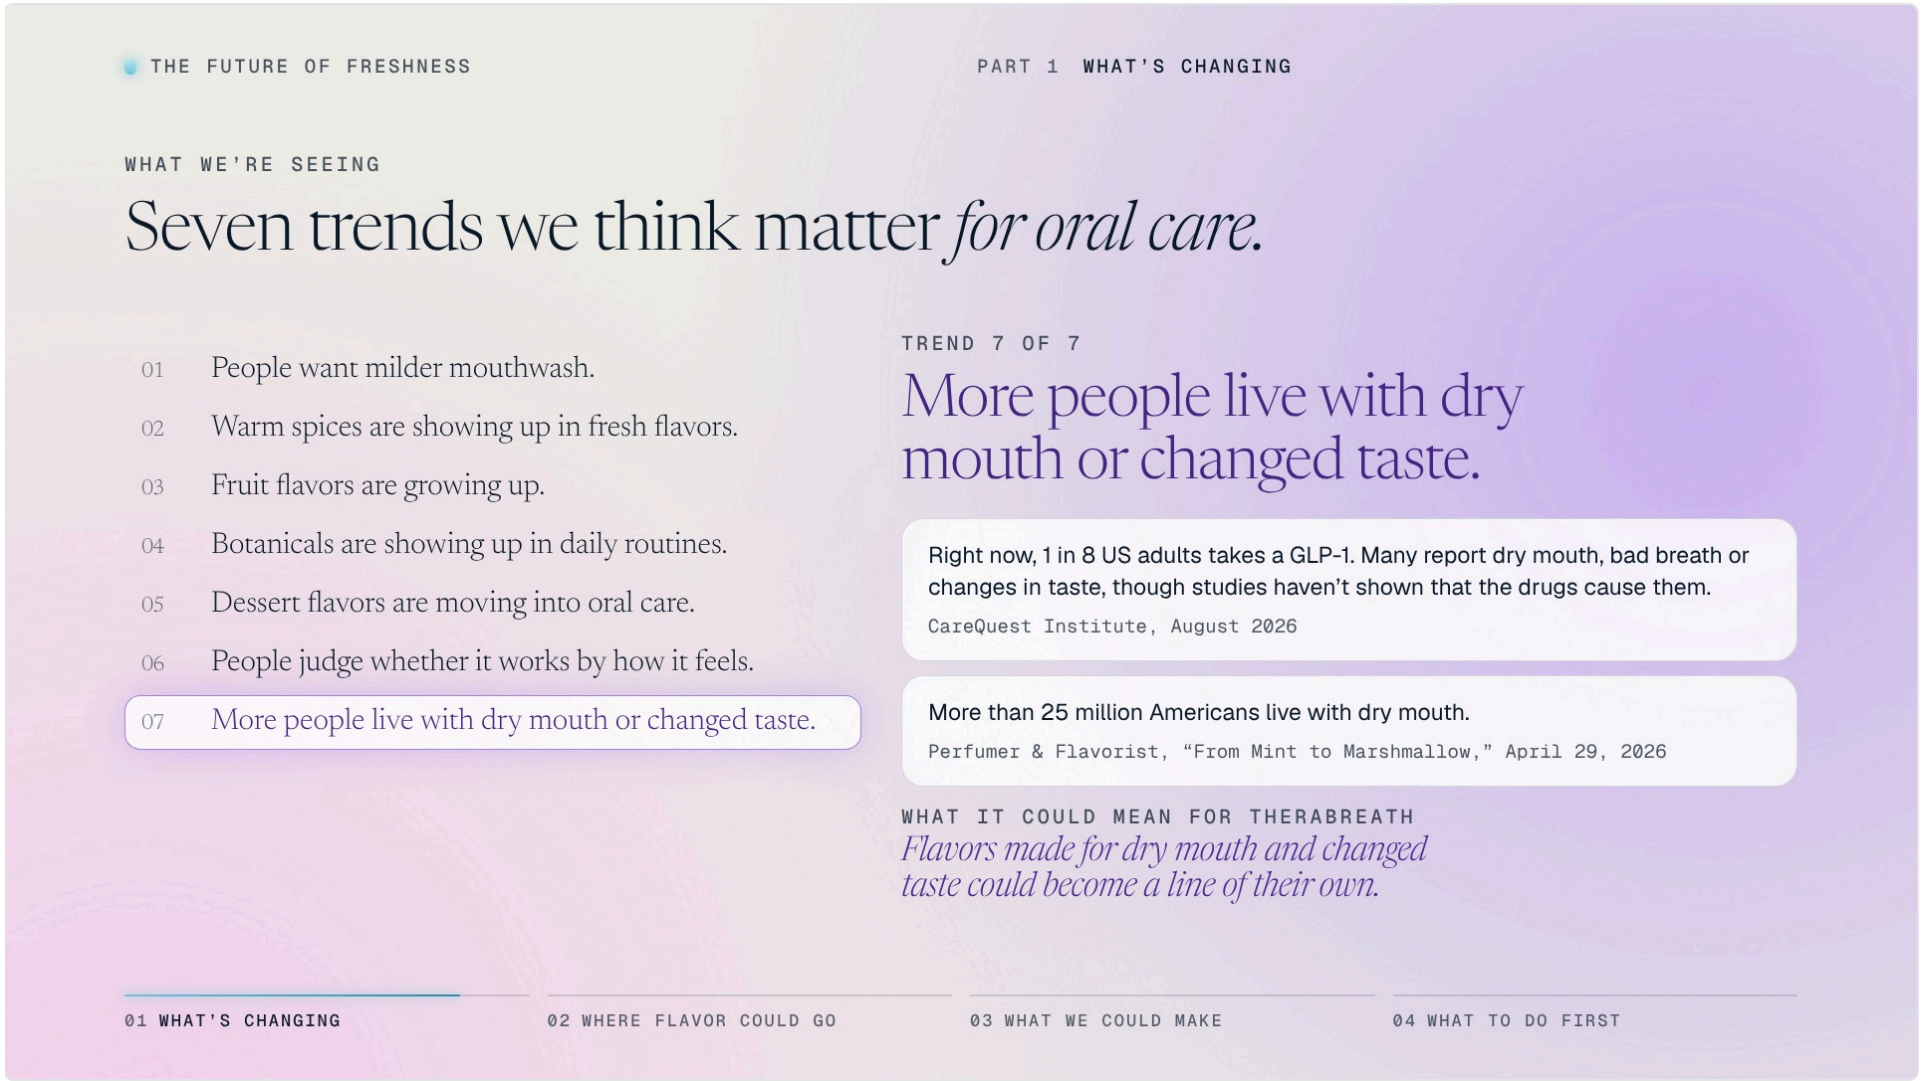

- Some quick context first: 25.3% of US mouthwash in Q2 2026, up 4.5 points, and number 2 in the category.
- Then let the glasses fill. 86 out of 100 US households still don't buy TheraBreath.
- Flavor is one of the best ways we have to reach them.

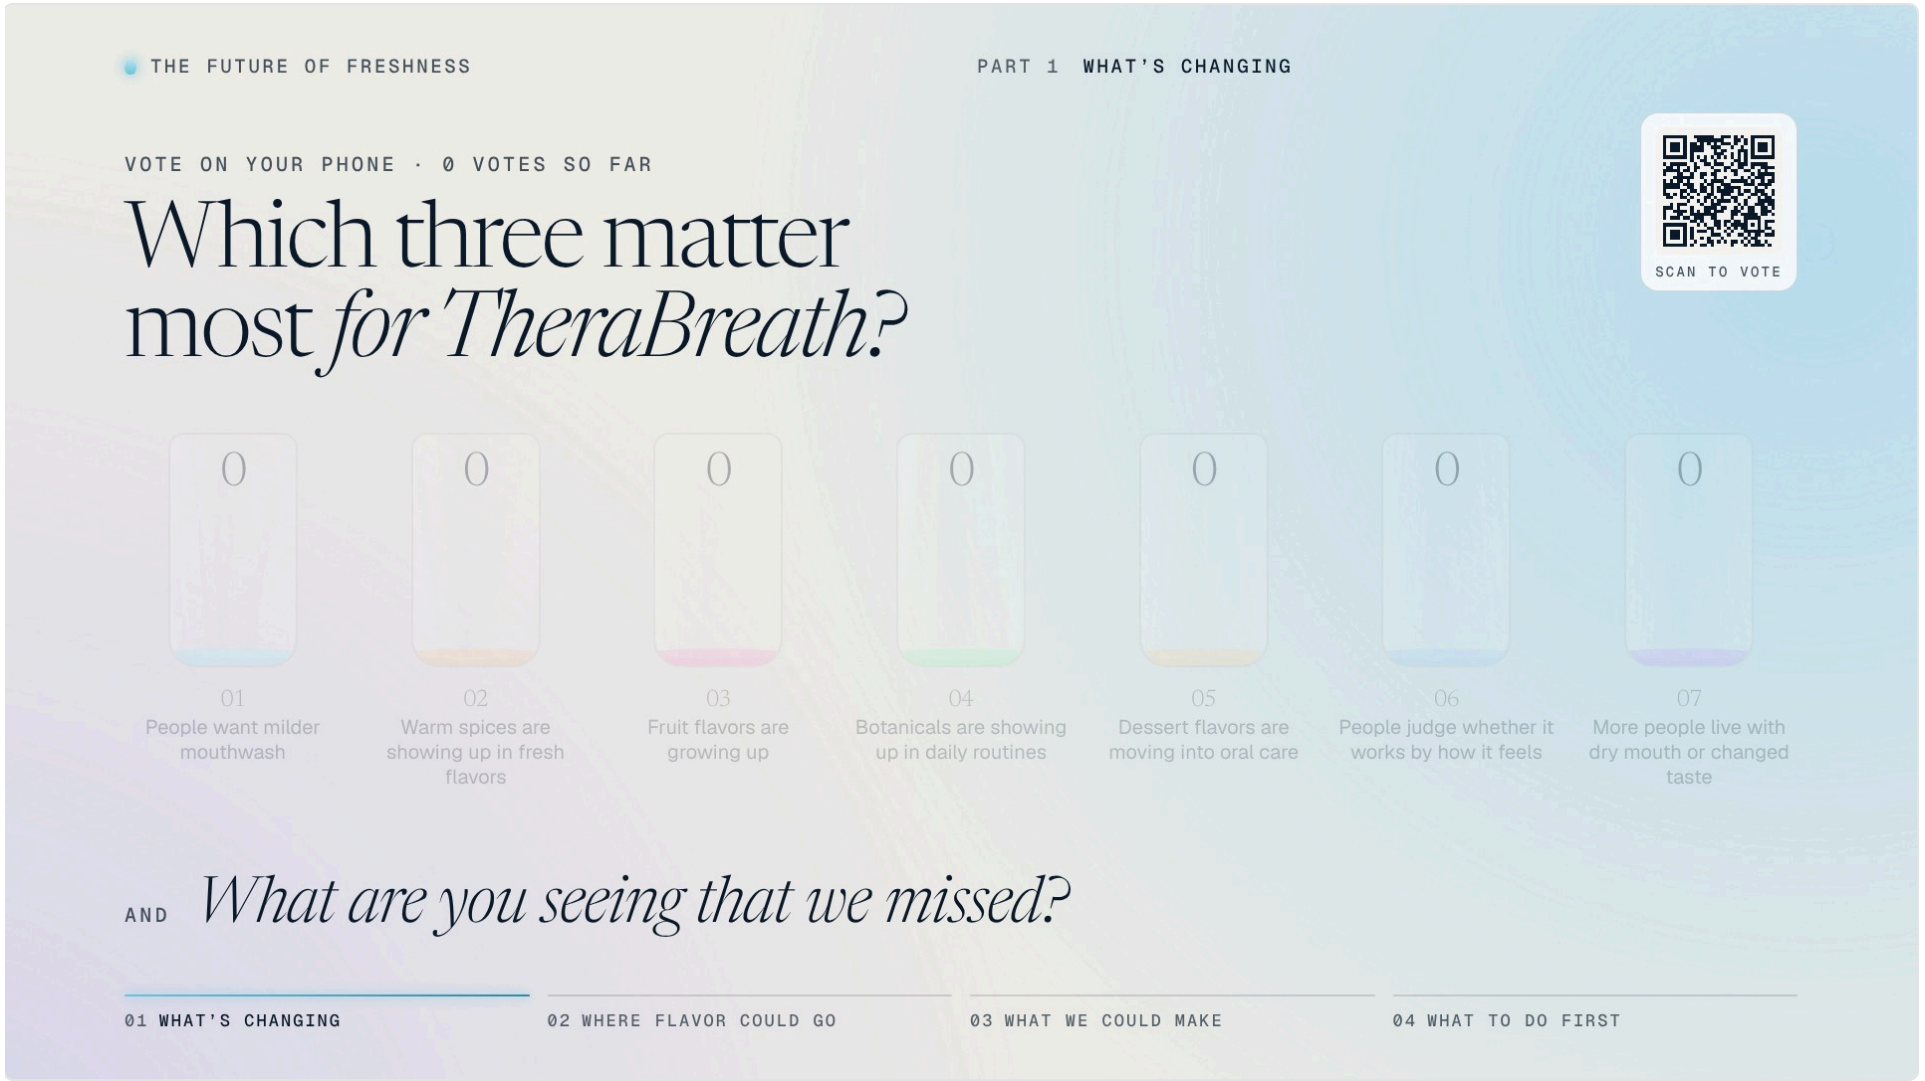

- 21 of the 25 flavors are mint, and that's a strength.
- The next build zooms out to show how much room there is around mint.

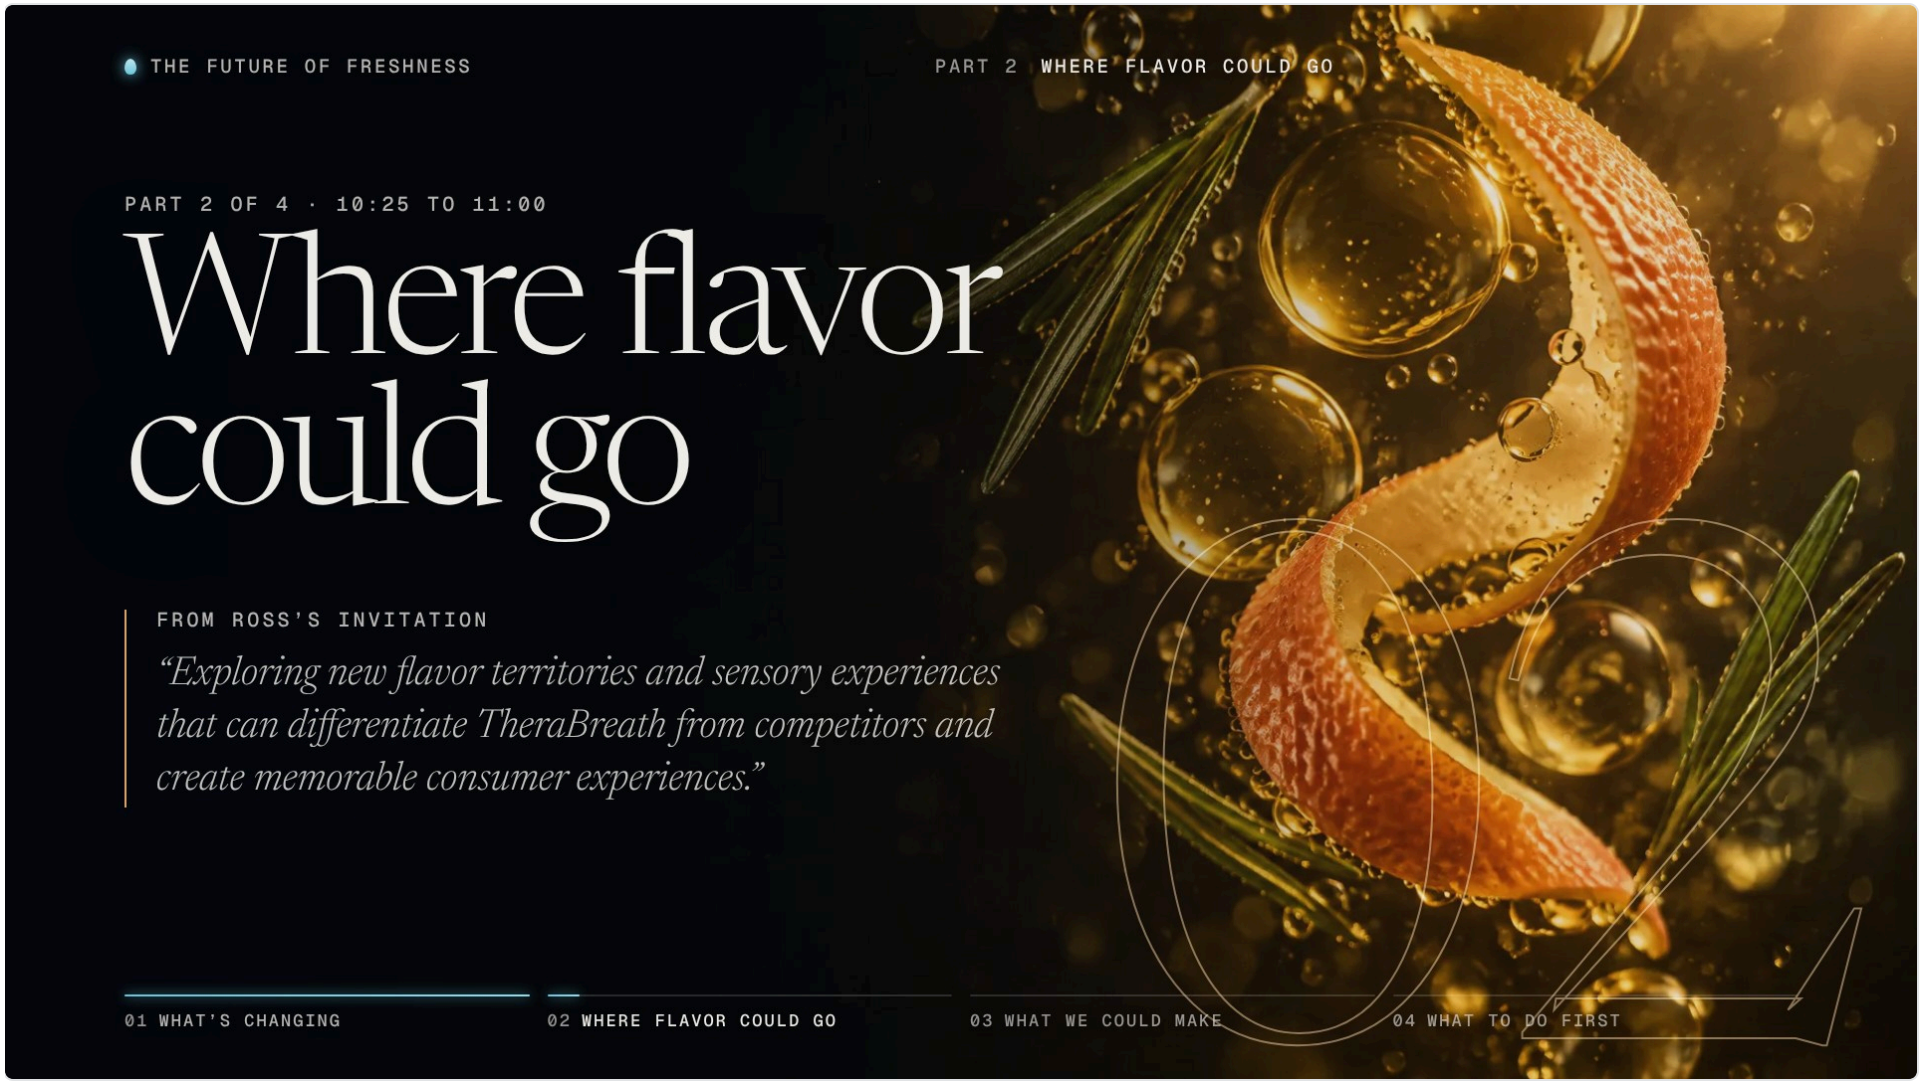

- Keep this one factual. Competitors are adding flavors, mostly as limited editions.
- On the last build, point out that TheraBreath already has what they're chasing: alcohol-free, dye-free, OXYD-8 and a kids line. Then ask what keeps it ahead.

- Each click brings up one trend: the headline, two sources and what we think it means for TheraBreath.
- No need to read every source out loud. Aim for about forty seconds each.
- Ask which one surprised them most.

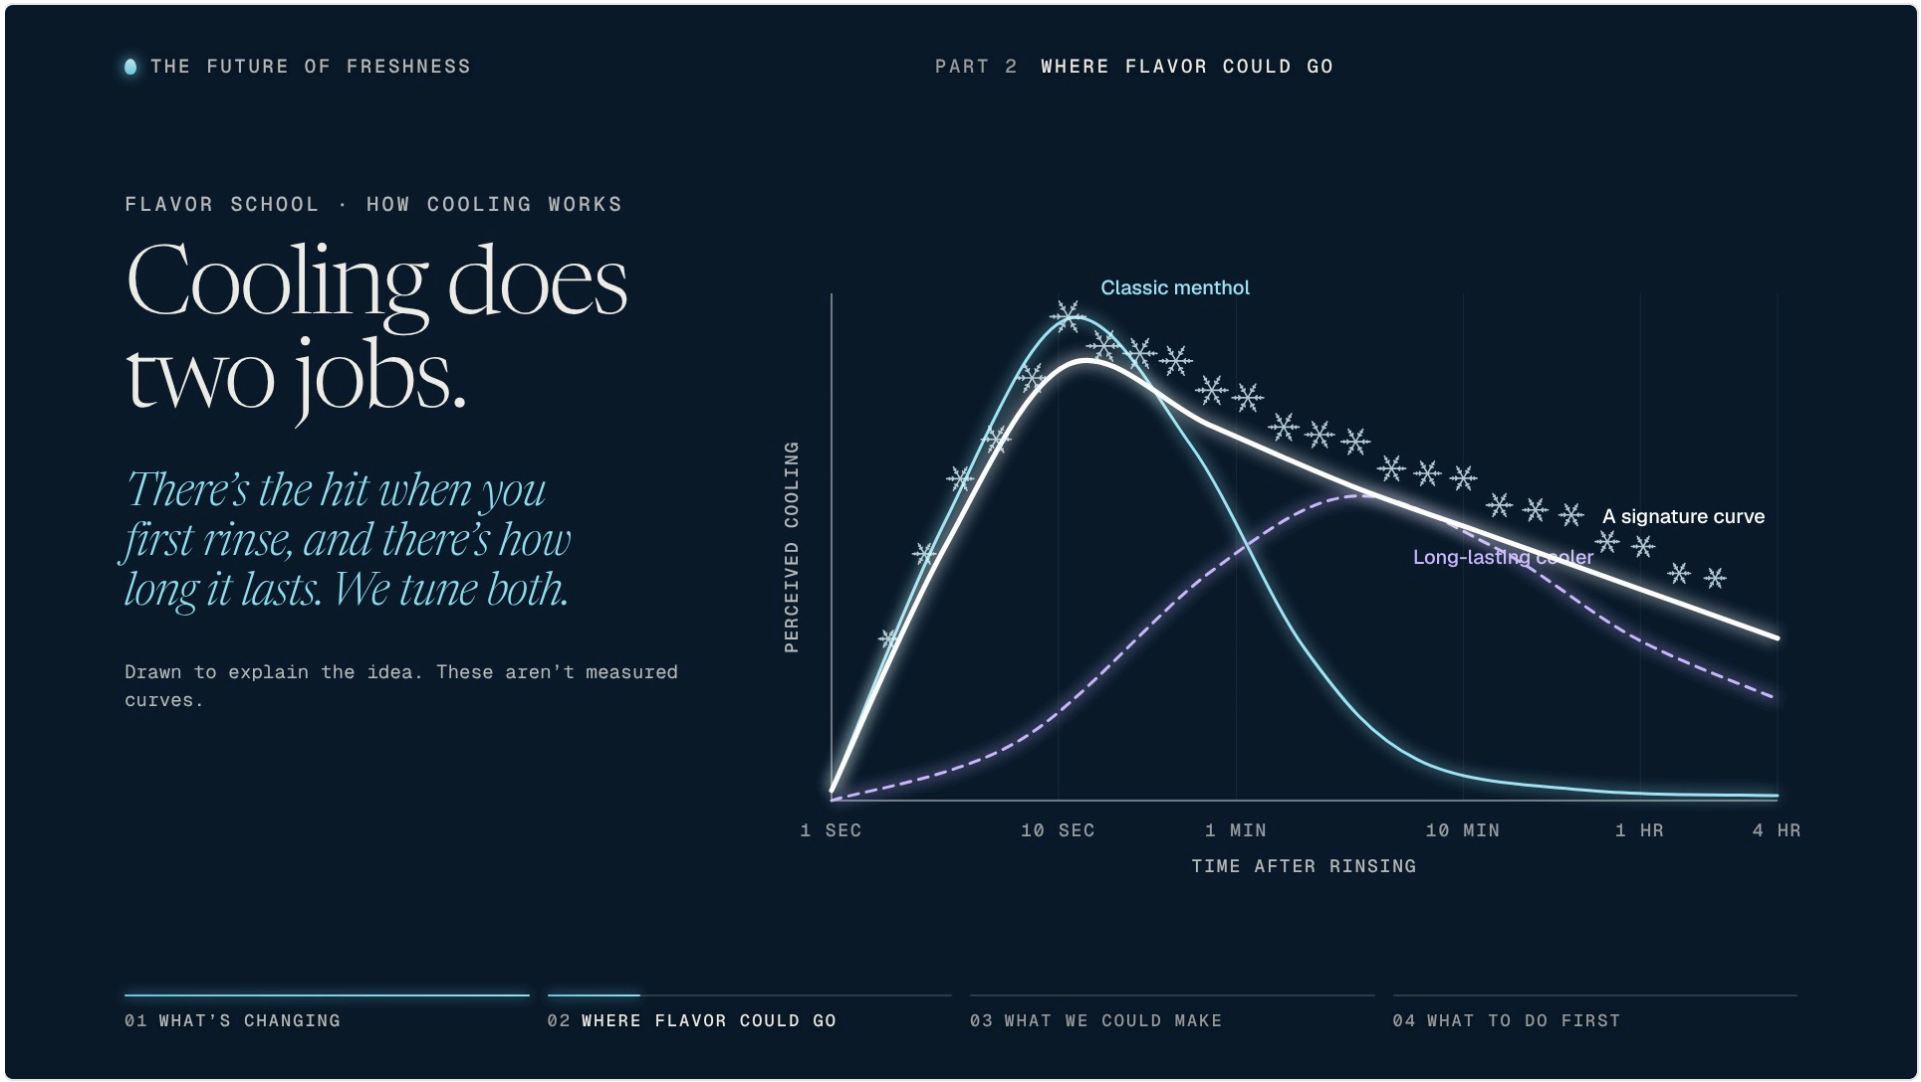

- Phones out. Everyone picks three.
- Watch the bars fill. If someone doesn't have a phone, click a bar to add their vote by hand.
- Build 1 shows the top three, and those go into the Playbook.
- Build 2 asks: What are you seeing that we missed?

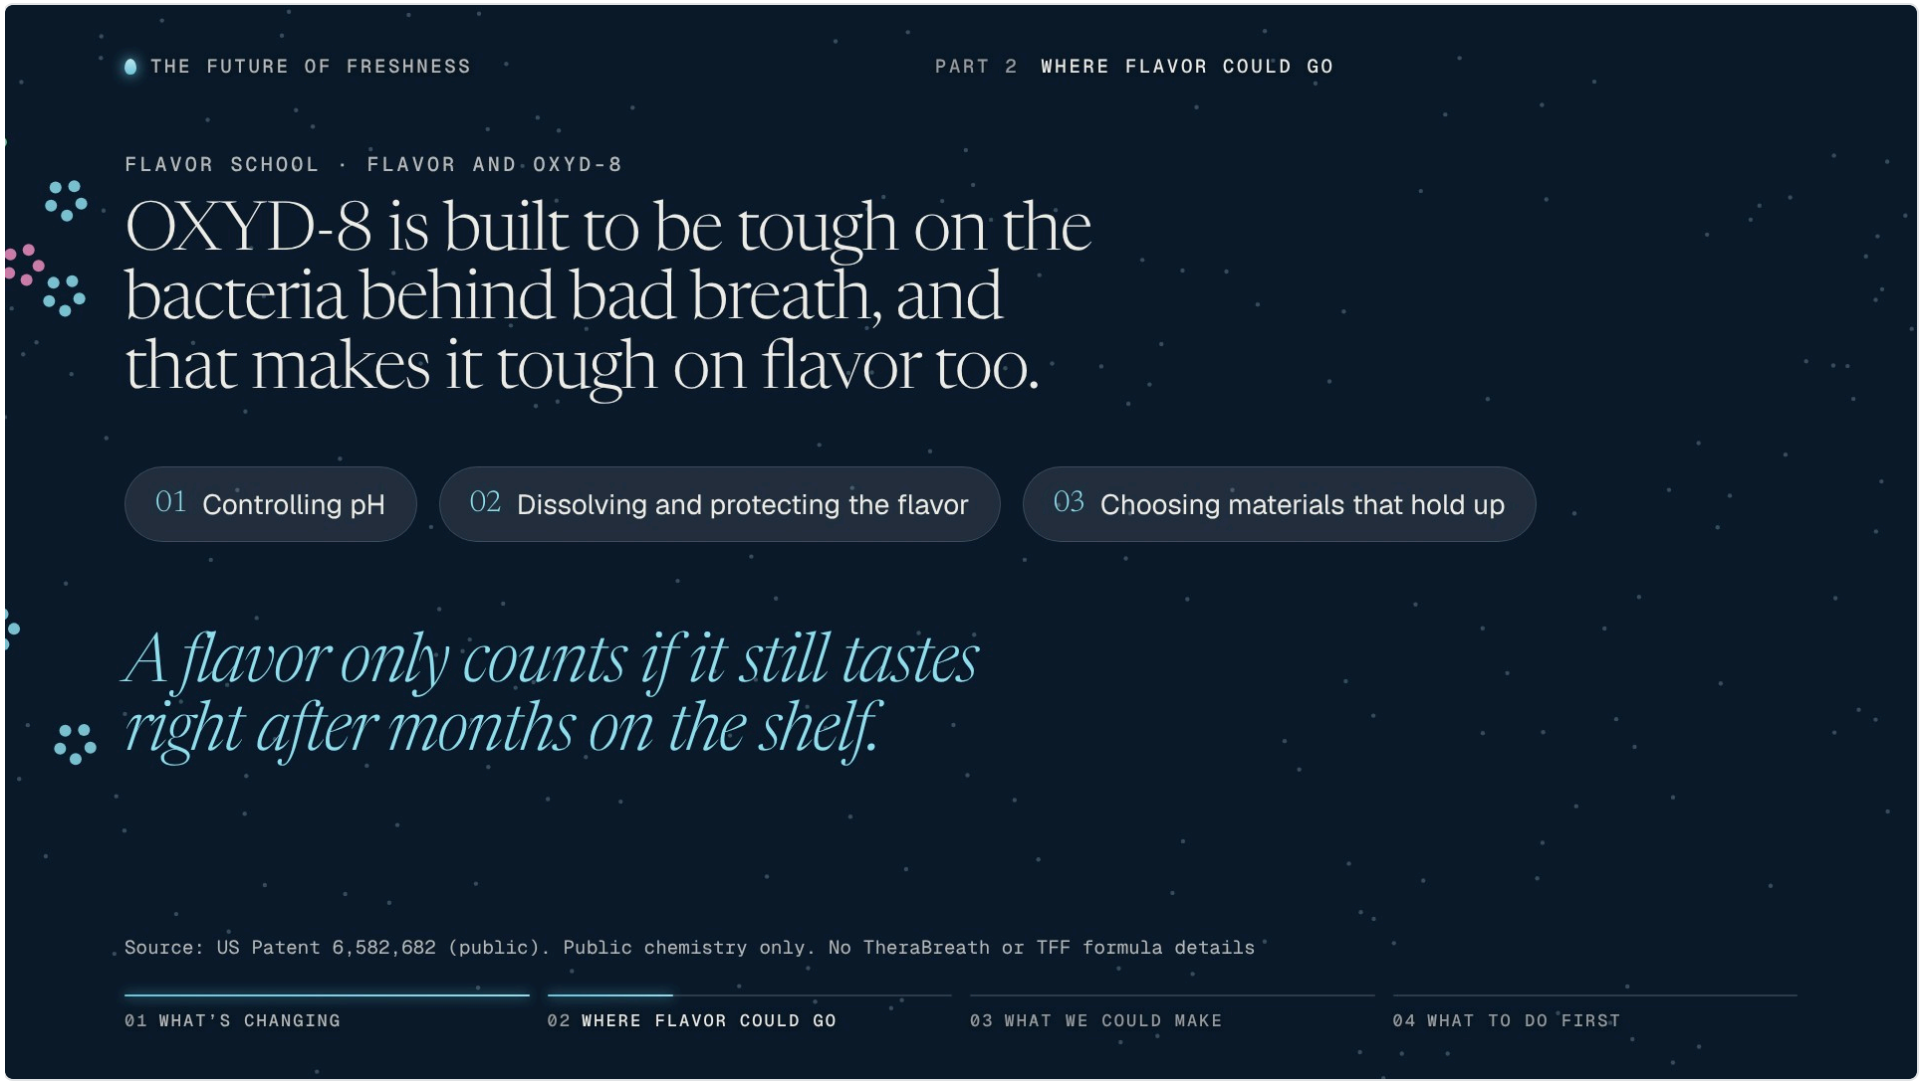

- Read Ross's words on screen, then talk it through:
- Most of what people call flavor is smell. The rest is how it feels.
- OXYD-8 is hard on flavor, so everything we make has to hold up in it.
- We'll show four directions, and two of them are in the tasting.
- Four samples, all made in your Fresh Breath and Kids bases.

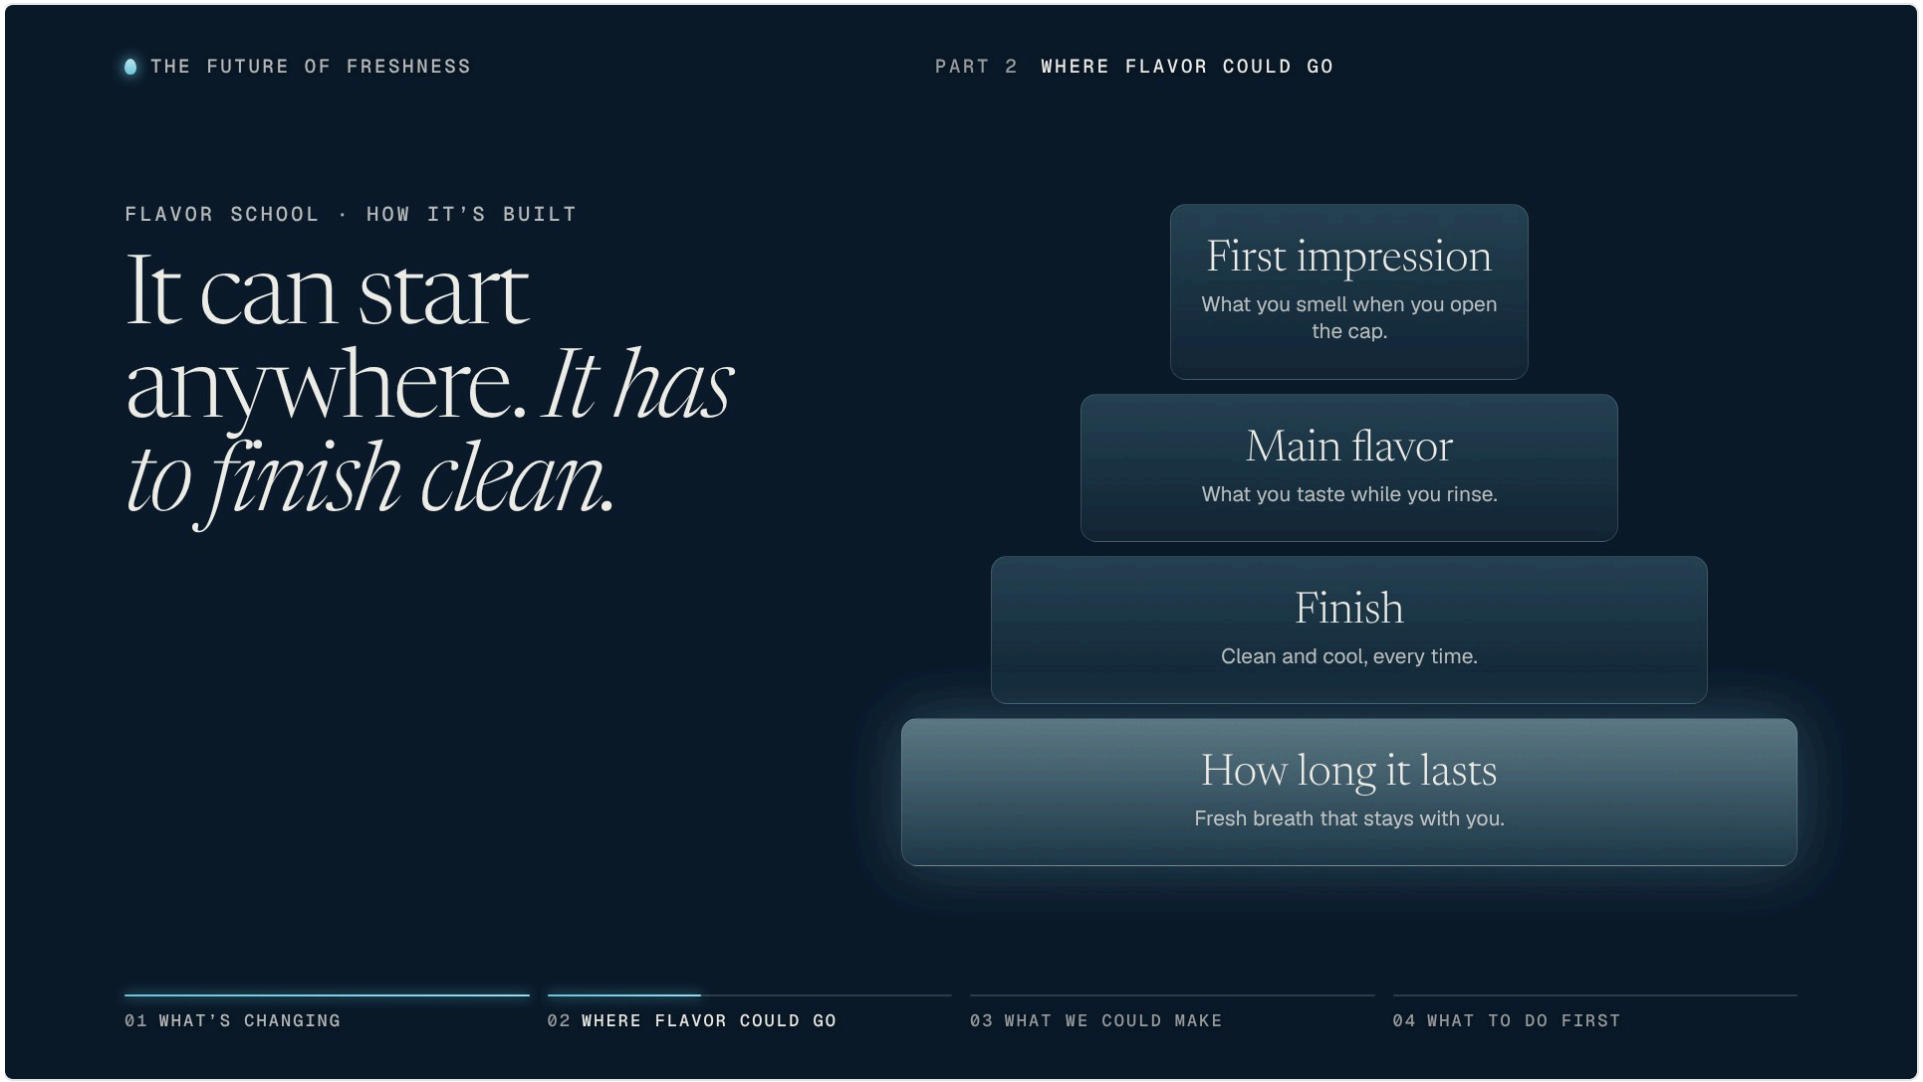

- Taste is the tongue: sweet, sour, salty, bitter, umami.
- Aroma is the nose, including what rises from the back of the mouth when you swallow.
- Feel is the trigeminal nerve. That's where cooling, tingle and warmth come from.

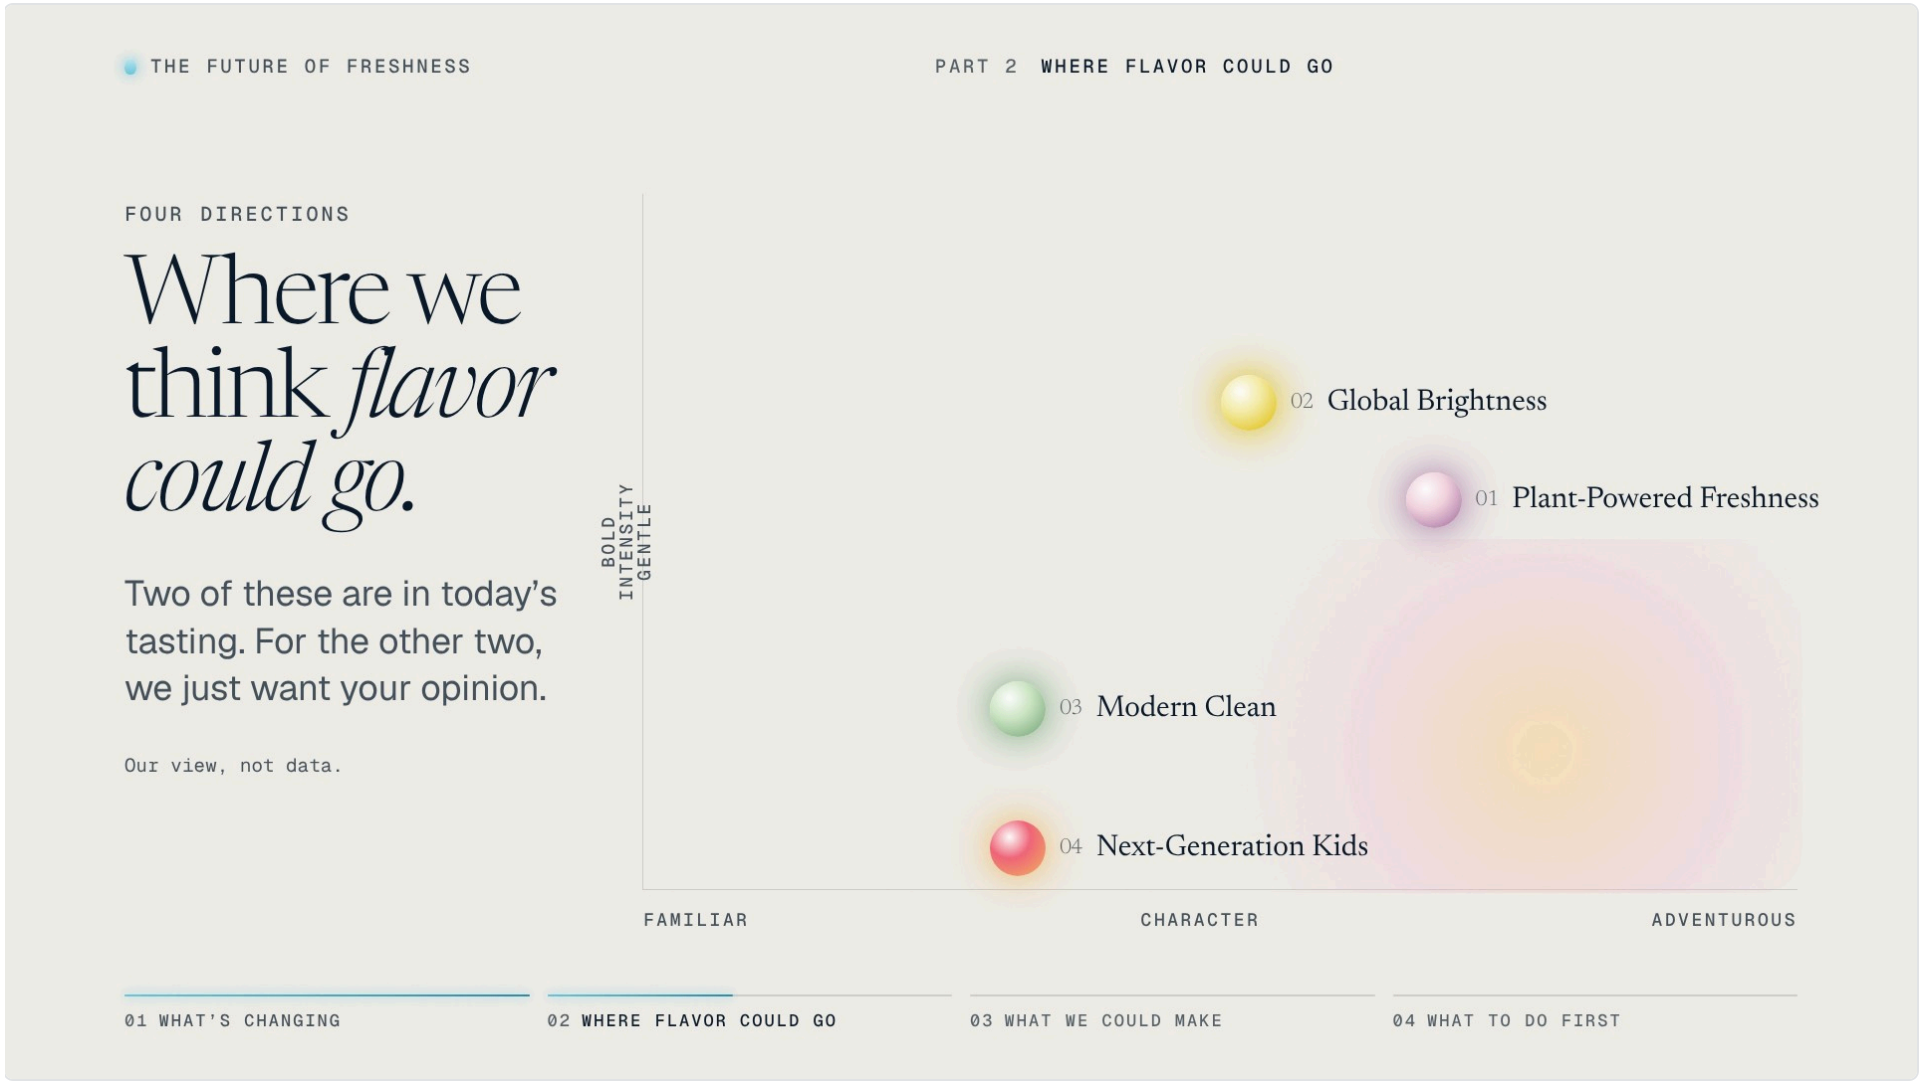

- Cooling does two jobs: the hit when you first rinse, and how long it lasts.
- These curves are drawn to explain the idea. They aren't measured data.
- This one's optional. If we're running late, press S to skip every optional slide, or] to jump to the next part.

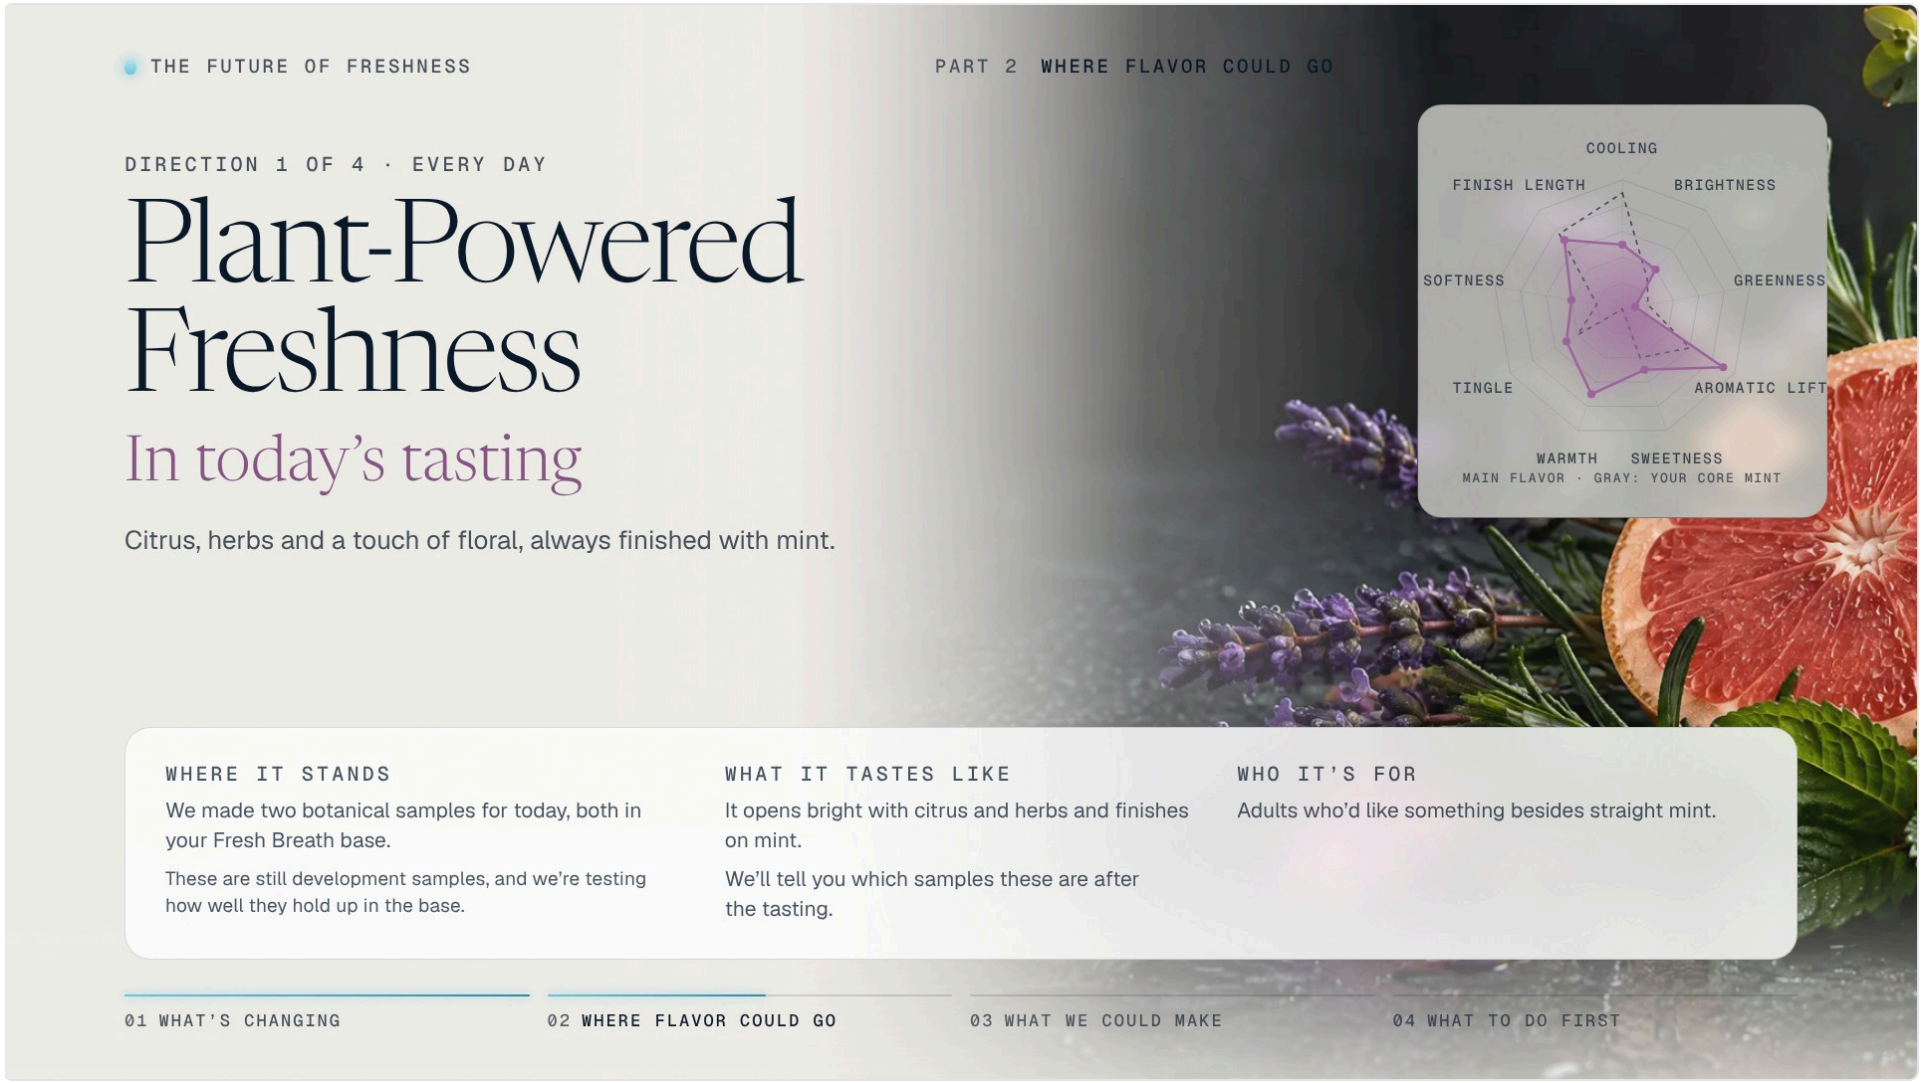

- OXYD-8 is tough on the bacteria behind bad breath, and that makes it hard on flavor.
- We have three things to work with: pH, how we dissolve and protect the flavor, and choosing materials that hold up.
- Stick to public chemistry. No formula details.
- This one's optional. If we're running late, press S to skip every optional slide, or] to jump to the next part.

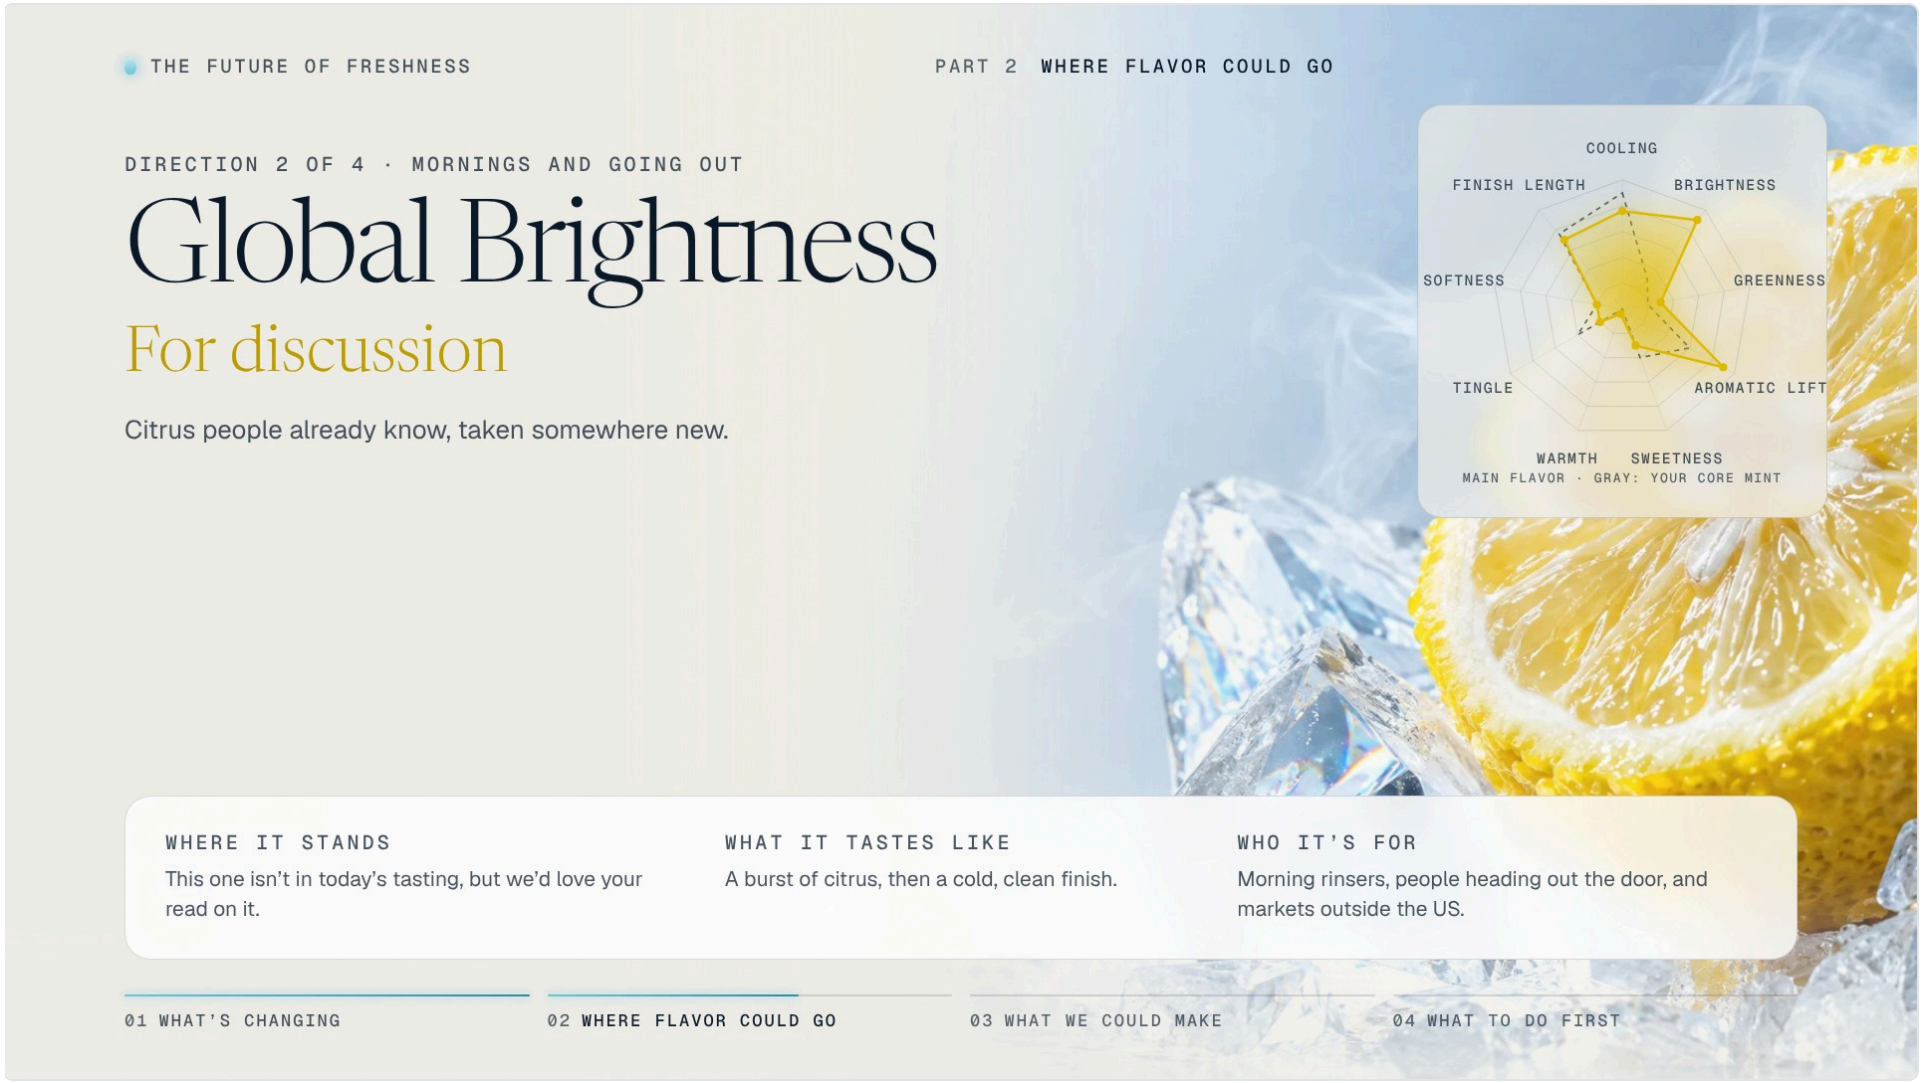

- Walk through the layers: first impression, main flavor, finish and how long it lasts.
- Whatever it starts with, a TheraBreath flavor has to finish clean.
- This one's optional. If we're running late, press S to skip every optional slide, or] to jump to the next part.

- Four directions on one map, from familiar to adventurous and from gentle to bold. It's our view, not data.
- The gentle, adventurous corner is where we think new users could come from.
- Two of these are in today's tasting.

- Plant-Powered Freshness: Citrus, herbs and a touch of floral, always finished with mint.
- Two of today's samples come from here. Don't name them yet.
- Ask: Which of the two samples feels more like TheraBreath?

- Global Brightness: Citrus people already know, taken somewhere new.
- This one isn't in the tasting. We just want their opinion.
- Ask: Is there a citrus that could sit comfortably next to your mints?
- This one's optional. If we're running late, press S to skip every optional slide, or] to jump to the next part.

THE FUTURE OF FRESHNESS

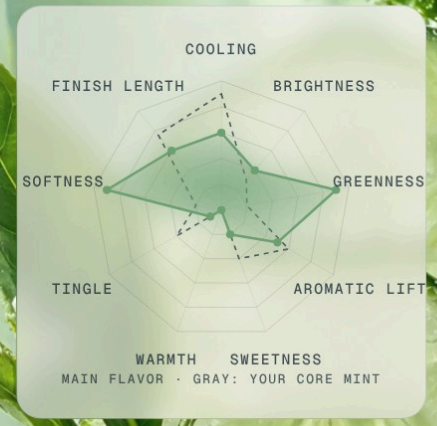

PART 2 WHERE FLAVOR COULD GO

DIRECTION 3 OF 4 · MIDDAY

Modern Clean

For discussion

Green, gentle freshness for people who find mouthwash too strong.

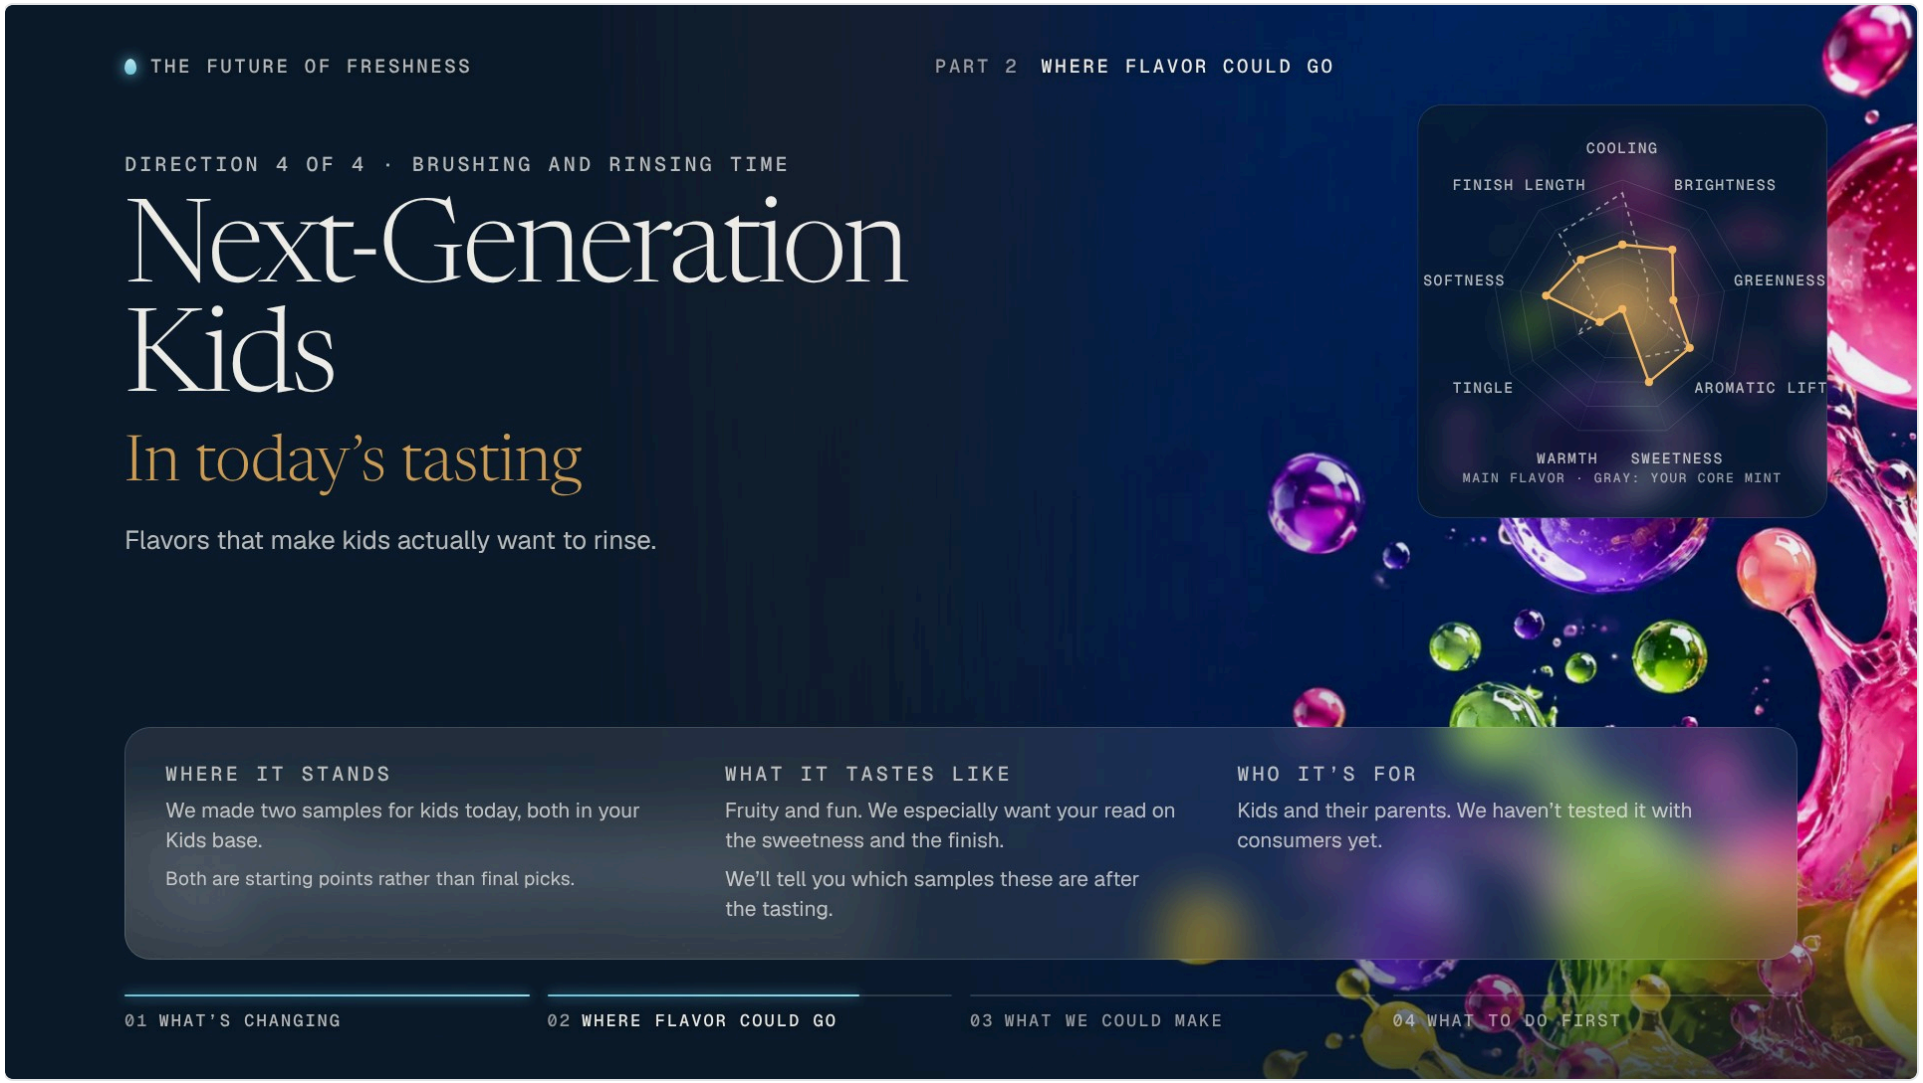

WHERE IT STANDS
It isn't in today's tasting, and it would need consumer testing in your base first.

WHAT IT TASTES LIKE
Soft cooling, a few green notes and a calm finish.

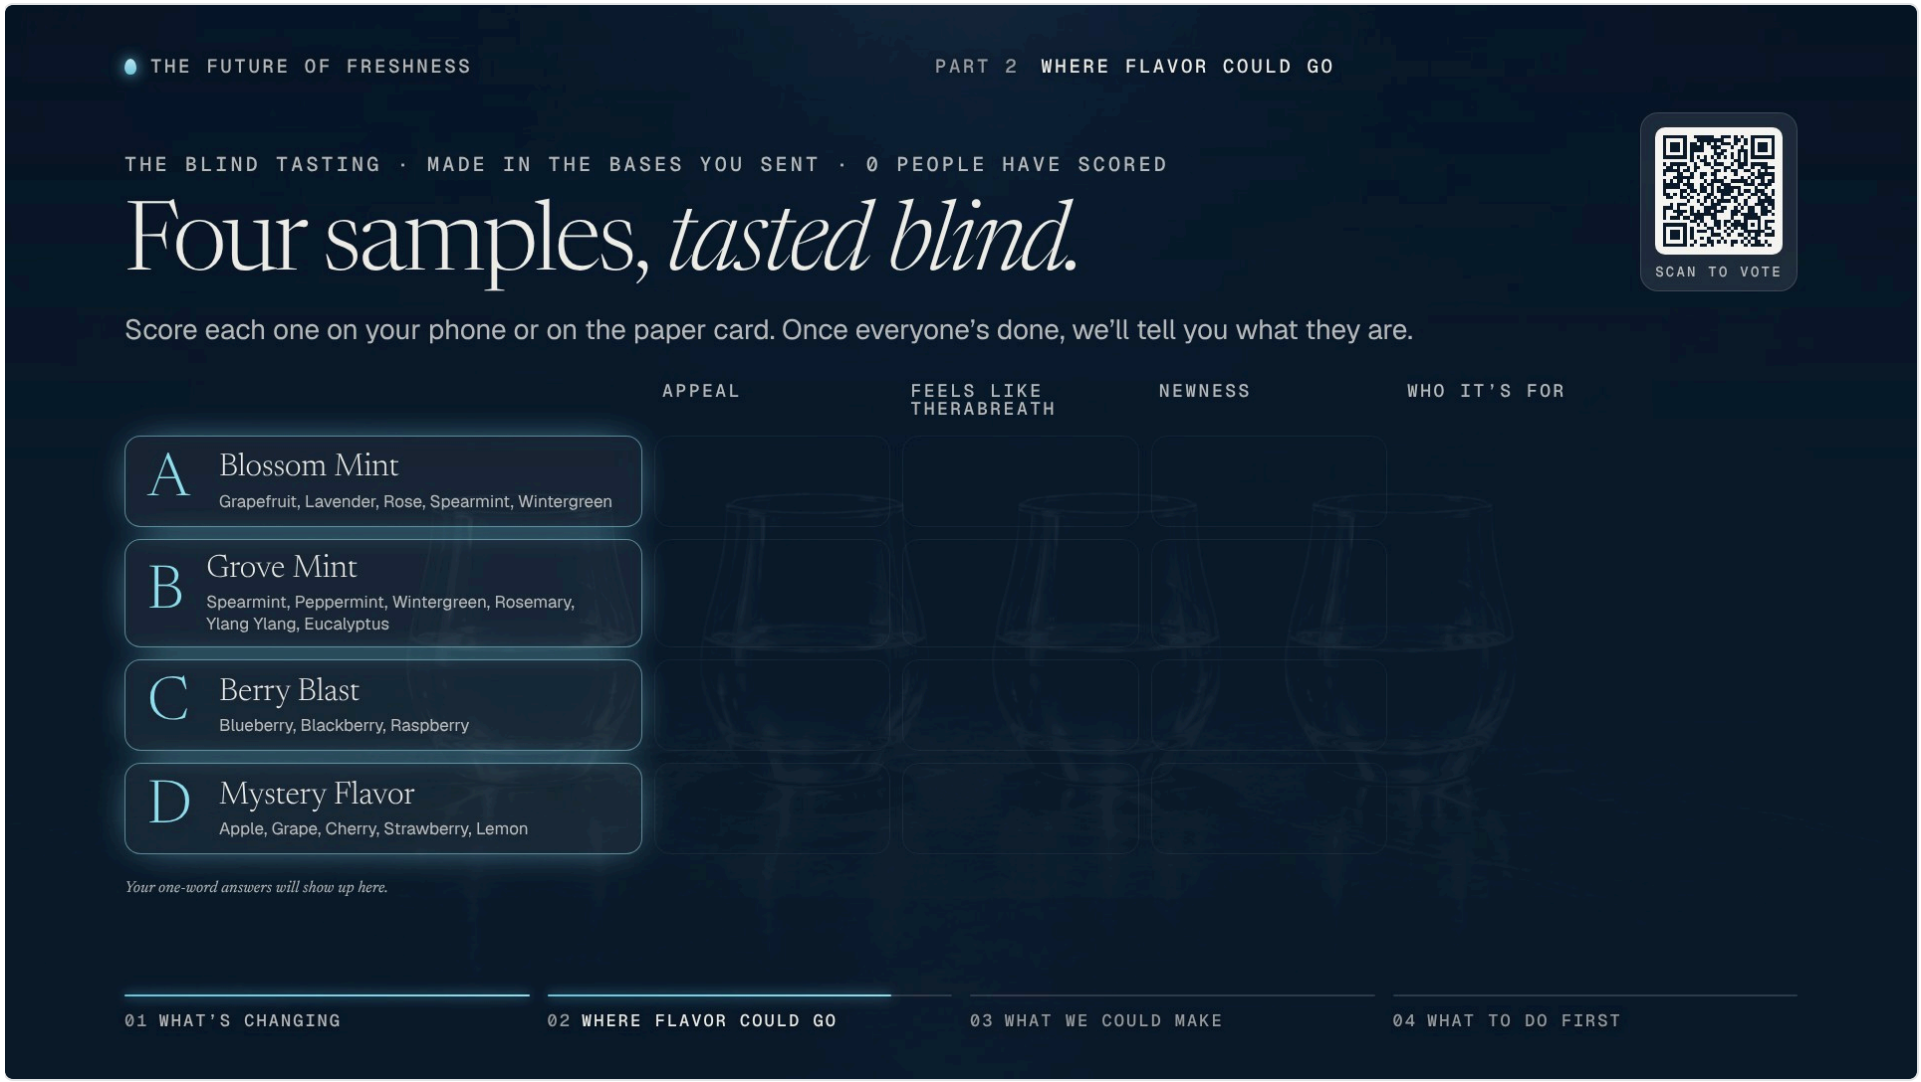

WHO IT'S FOR
People who skip mouthwash because they find it too harsh.

01 WHAT'S CHANGING | 02 WHERE FLAVOR COULD GO | 03 WHAT WE COULD MAKE | 04 WHAT TO DO FIRST

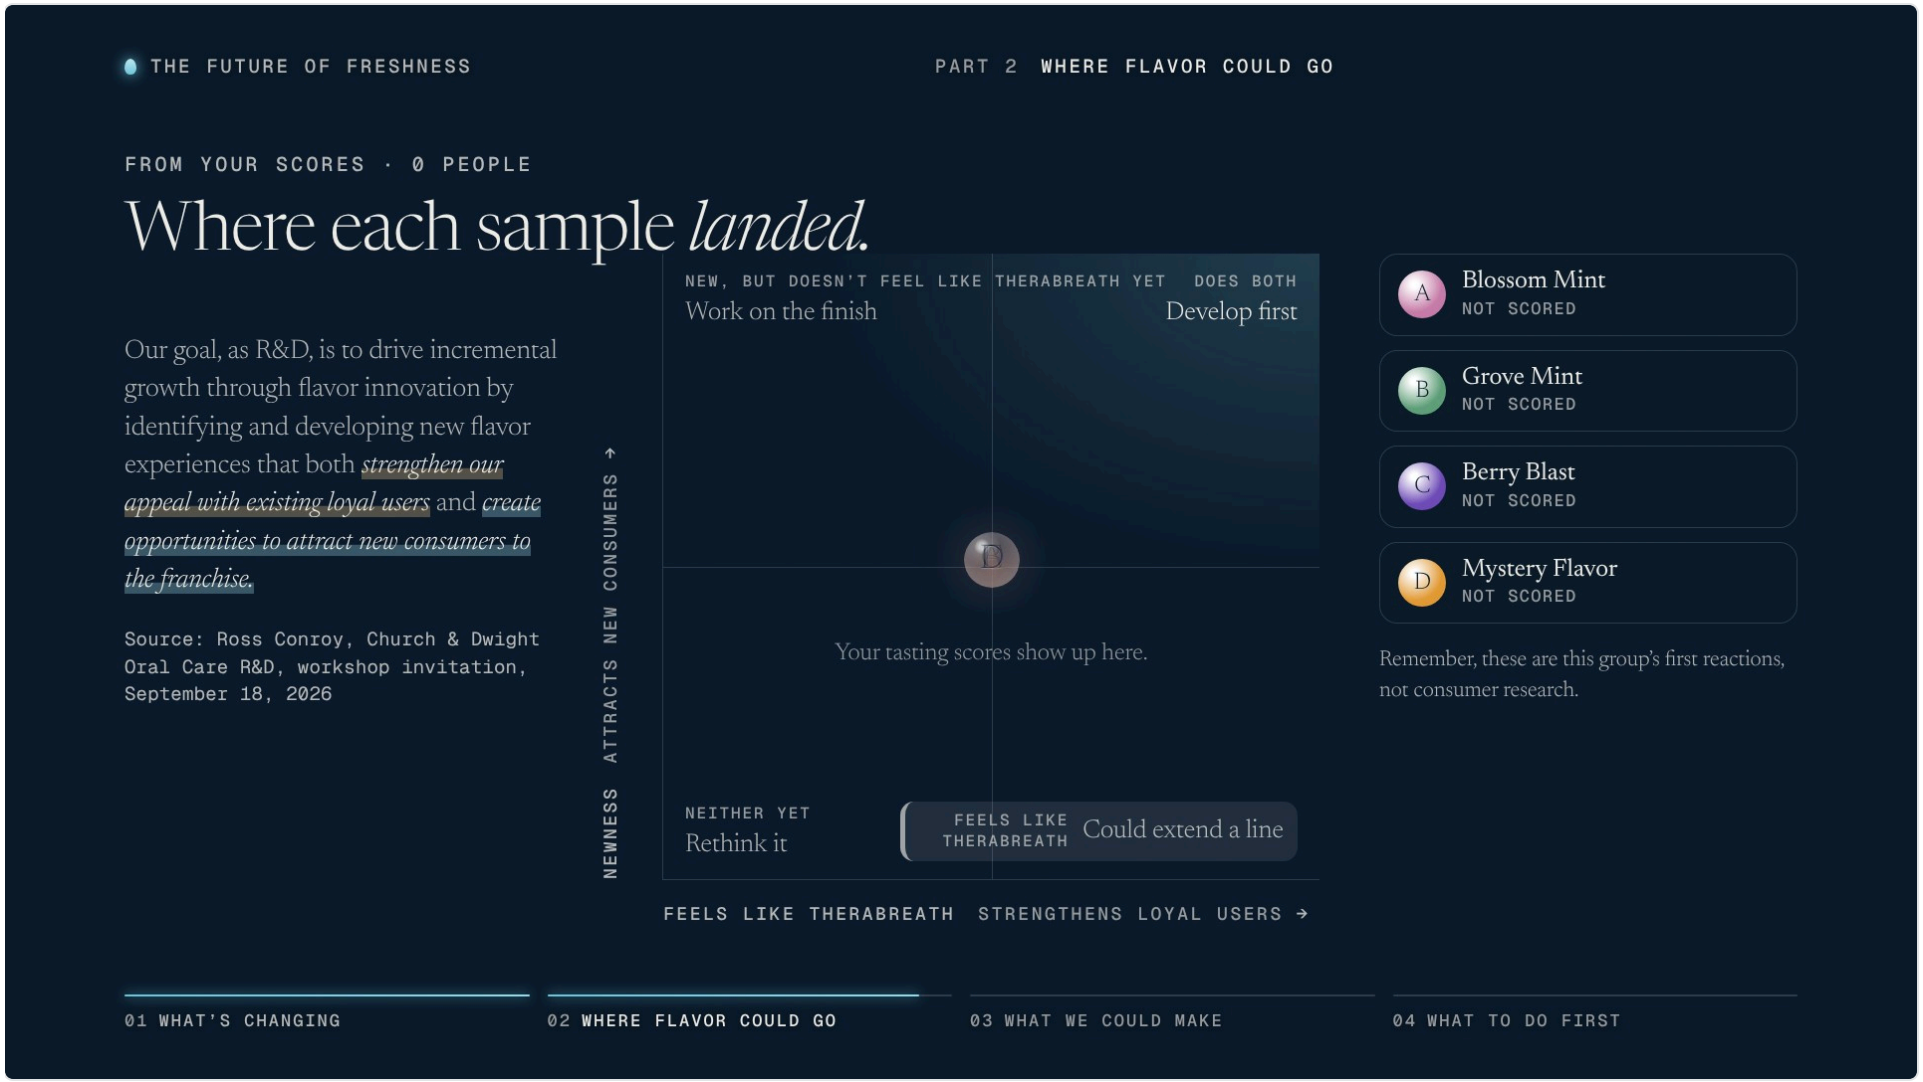

- Modern Clean: Green, gentle freshness for people who find mouthwash too strong.
- This one isn't in the tasting. We just want their opinion.
- Ask: Can a gentle flavor still feel fresh enough?
- This one's optional. If we're running late, press S to skip every optional slide, or] to jump to the next part.

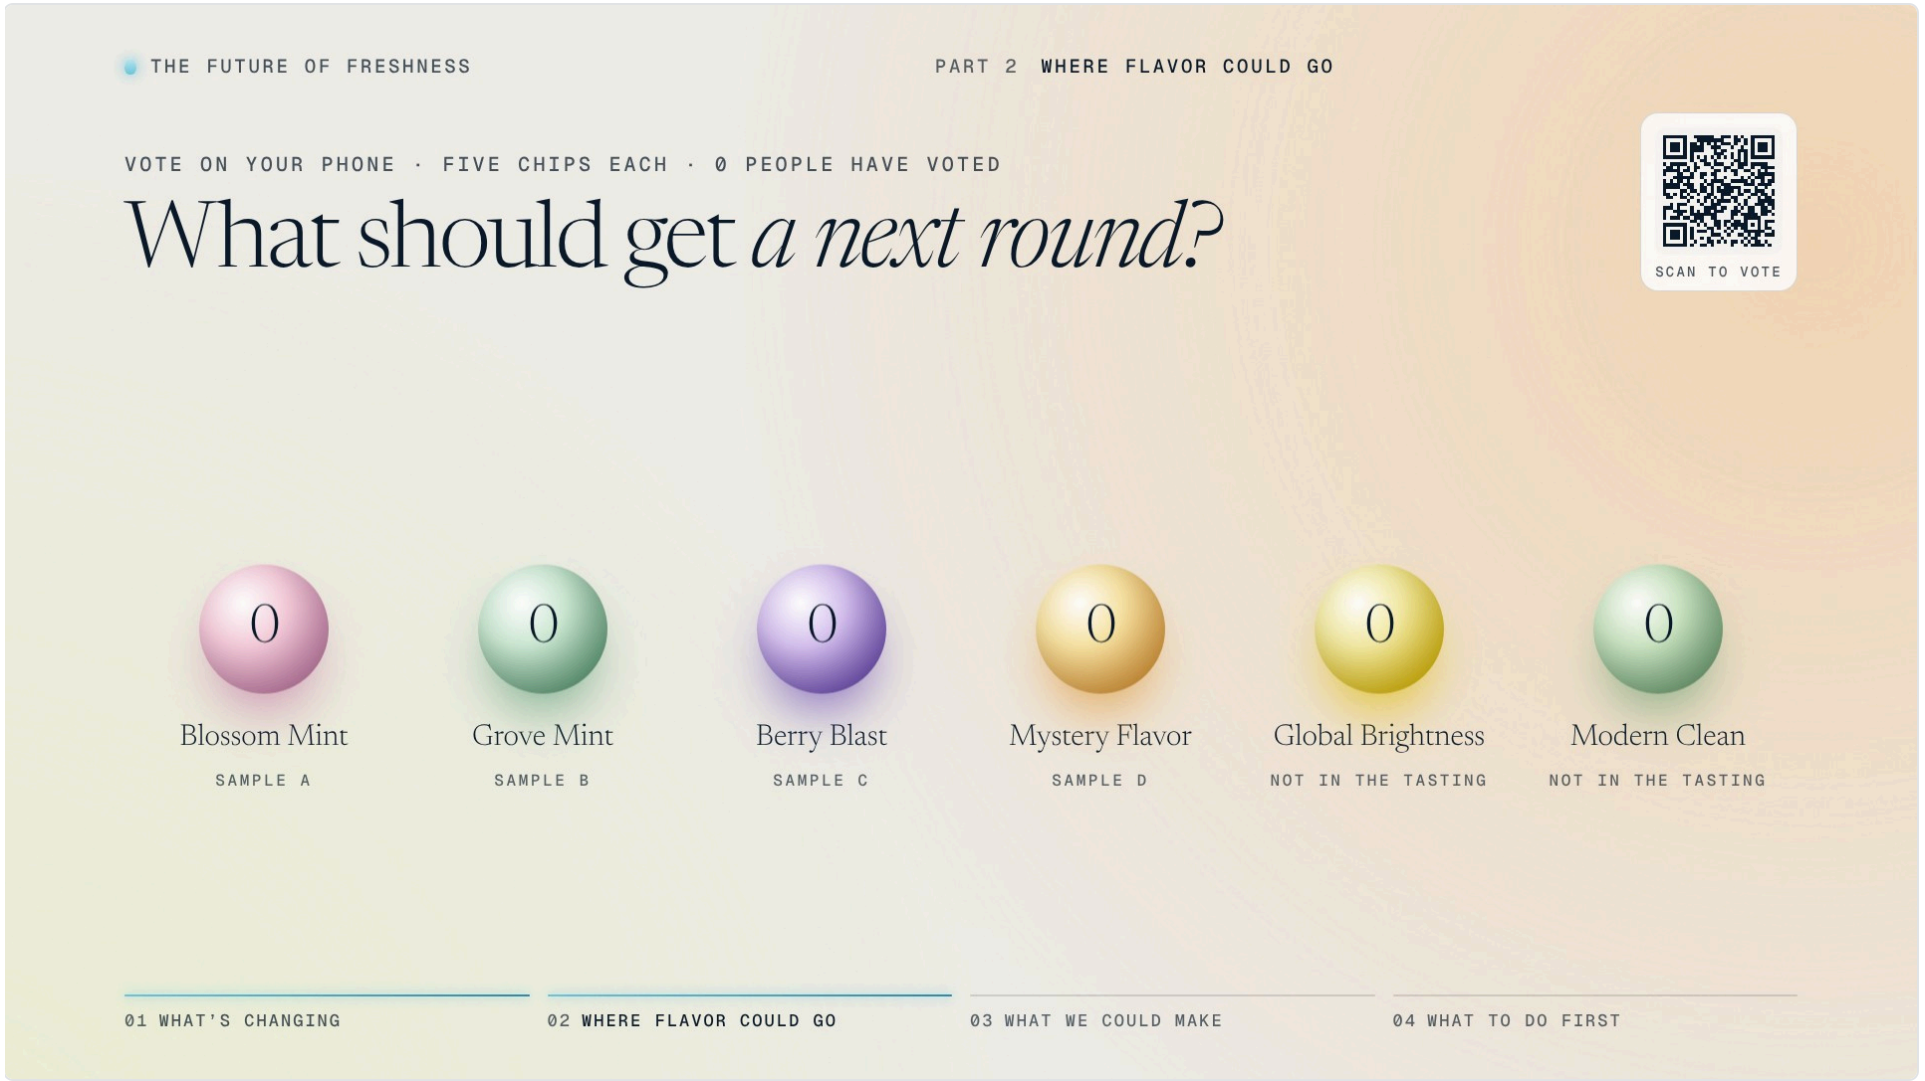

- Next-Generation Kids: Flavors that make kids actually want to rinse.
- Two of today's samples come from here. Don't name them yet.
- Ask: Would a mystery flavor get kids more interested in rinsing?

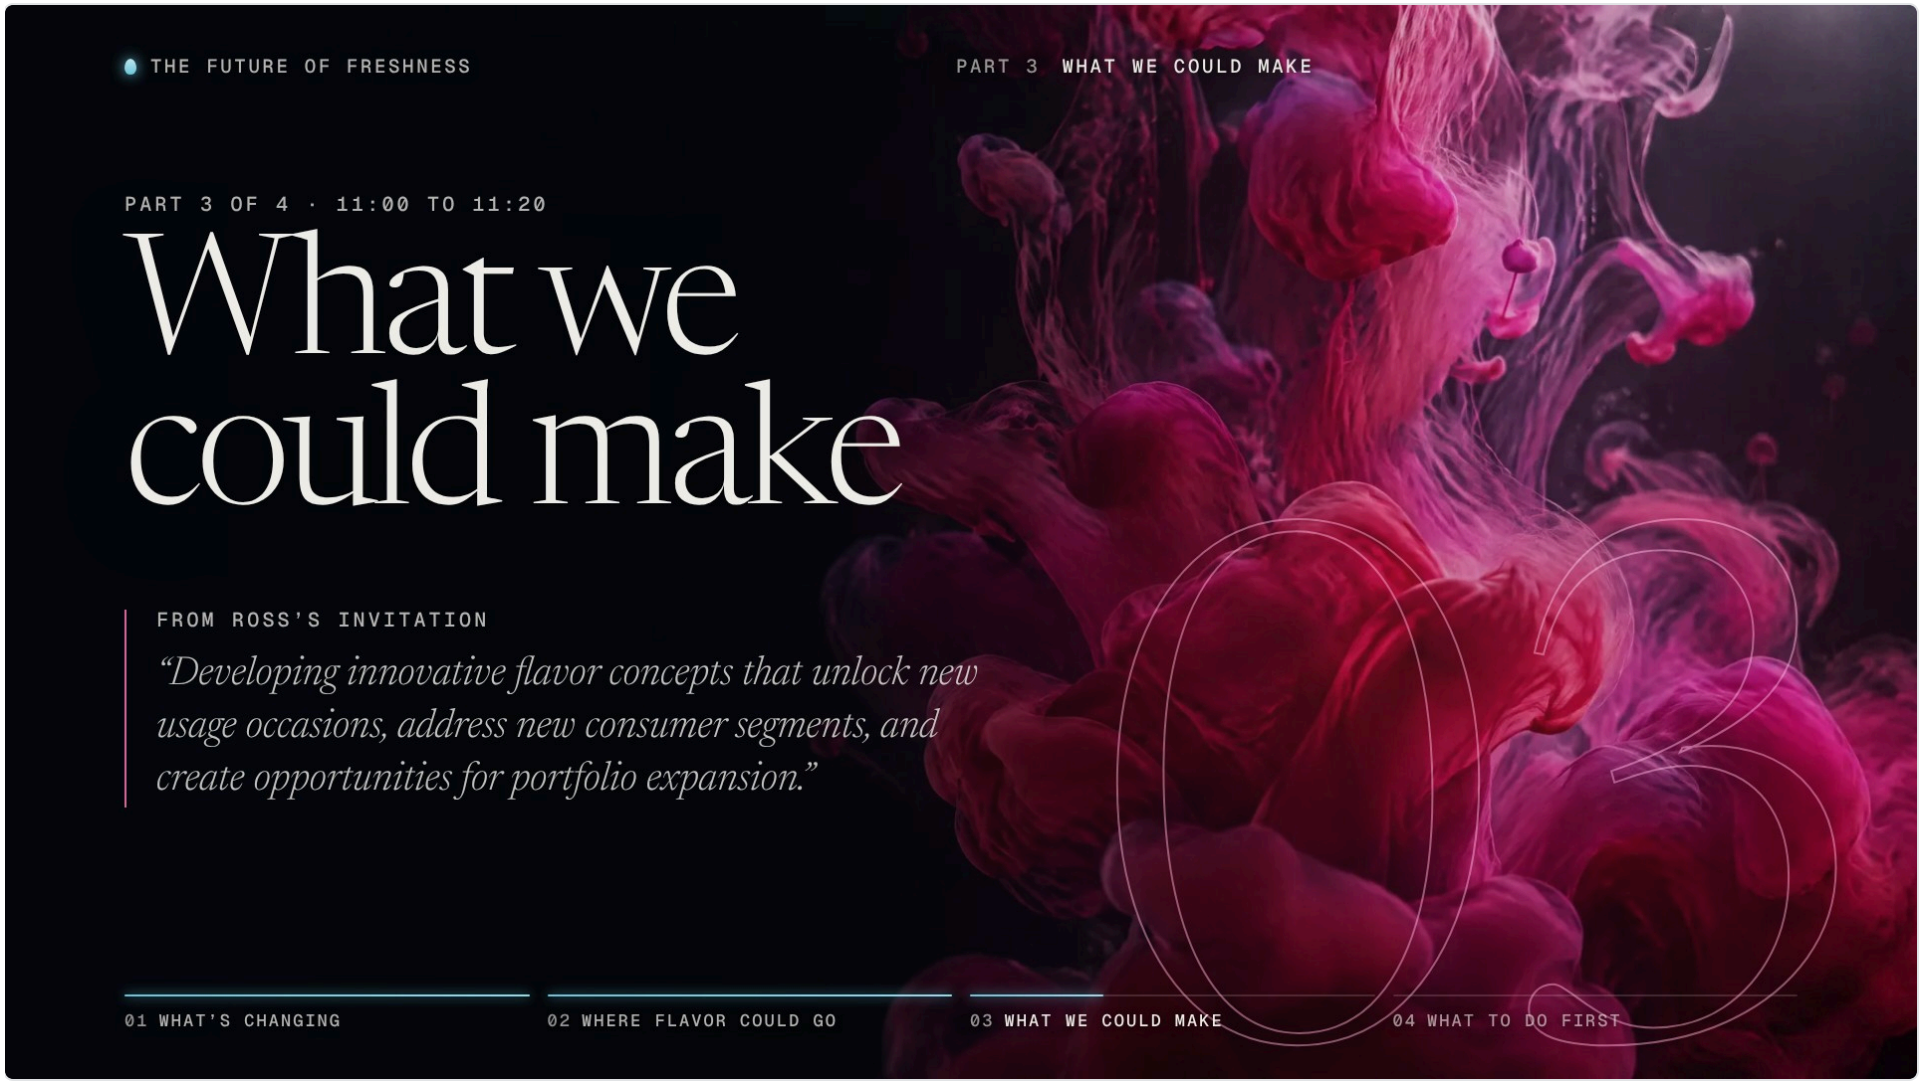

- Phones out, or paper cards for anyone who prefers them. Score each sample as you go.
- A and B are in the Fresh Breath base, and C and D are in the Kids base.
- D is the Mystery Flavor. Taste it last and have everyone write down the fruits they get.
- Leave time for water and a pause between samples. Remind everyone these are first reactions, not consumer research.
- Build 1 shows their words and fruit guesses, and build 2 reveals the names.

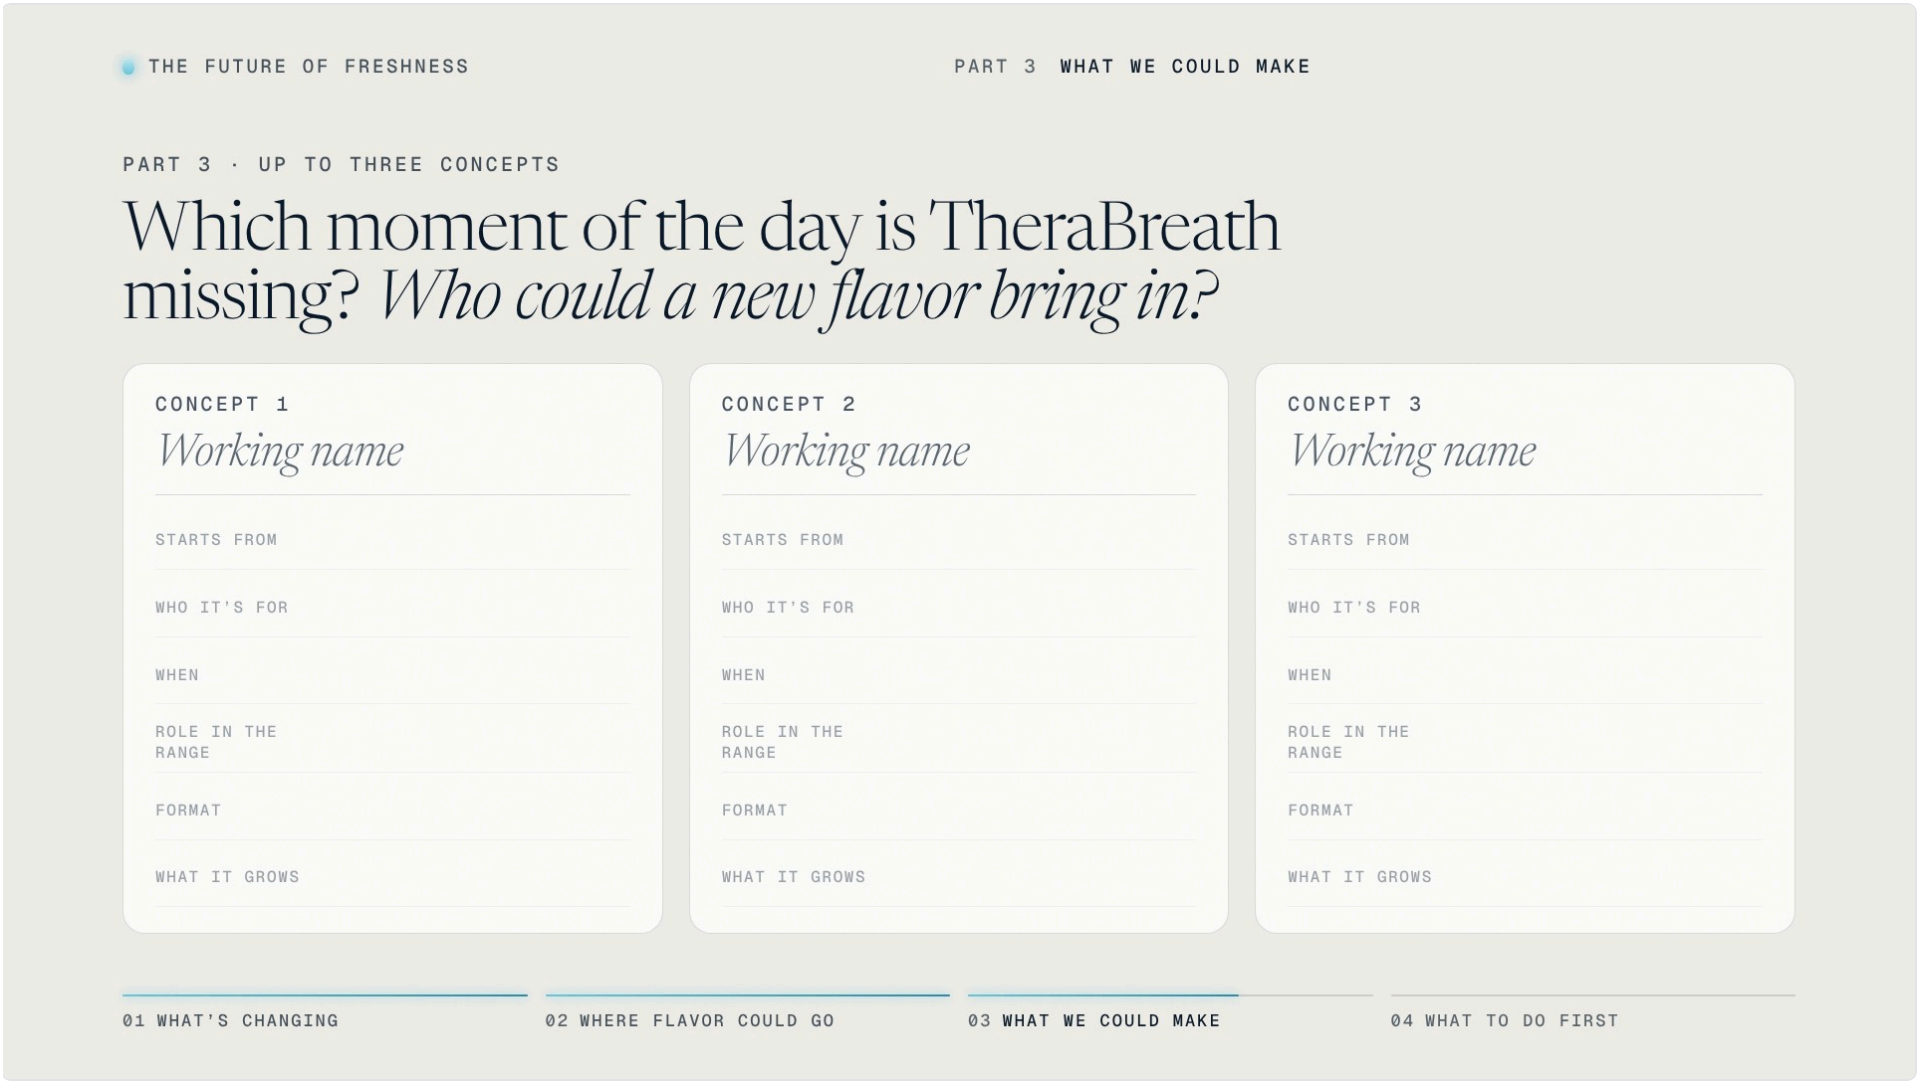

- This chart comes straight from their scores. Across is feels like TheraBreath (loyal users), up is newness (new consumers), and the size of each bubble is appeal.
- Top right is what Ross asked for: both at once.

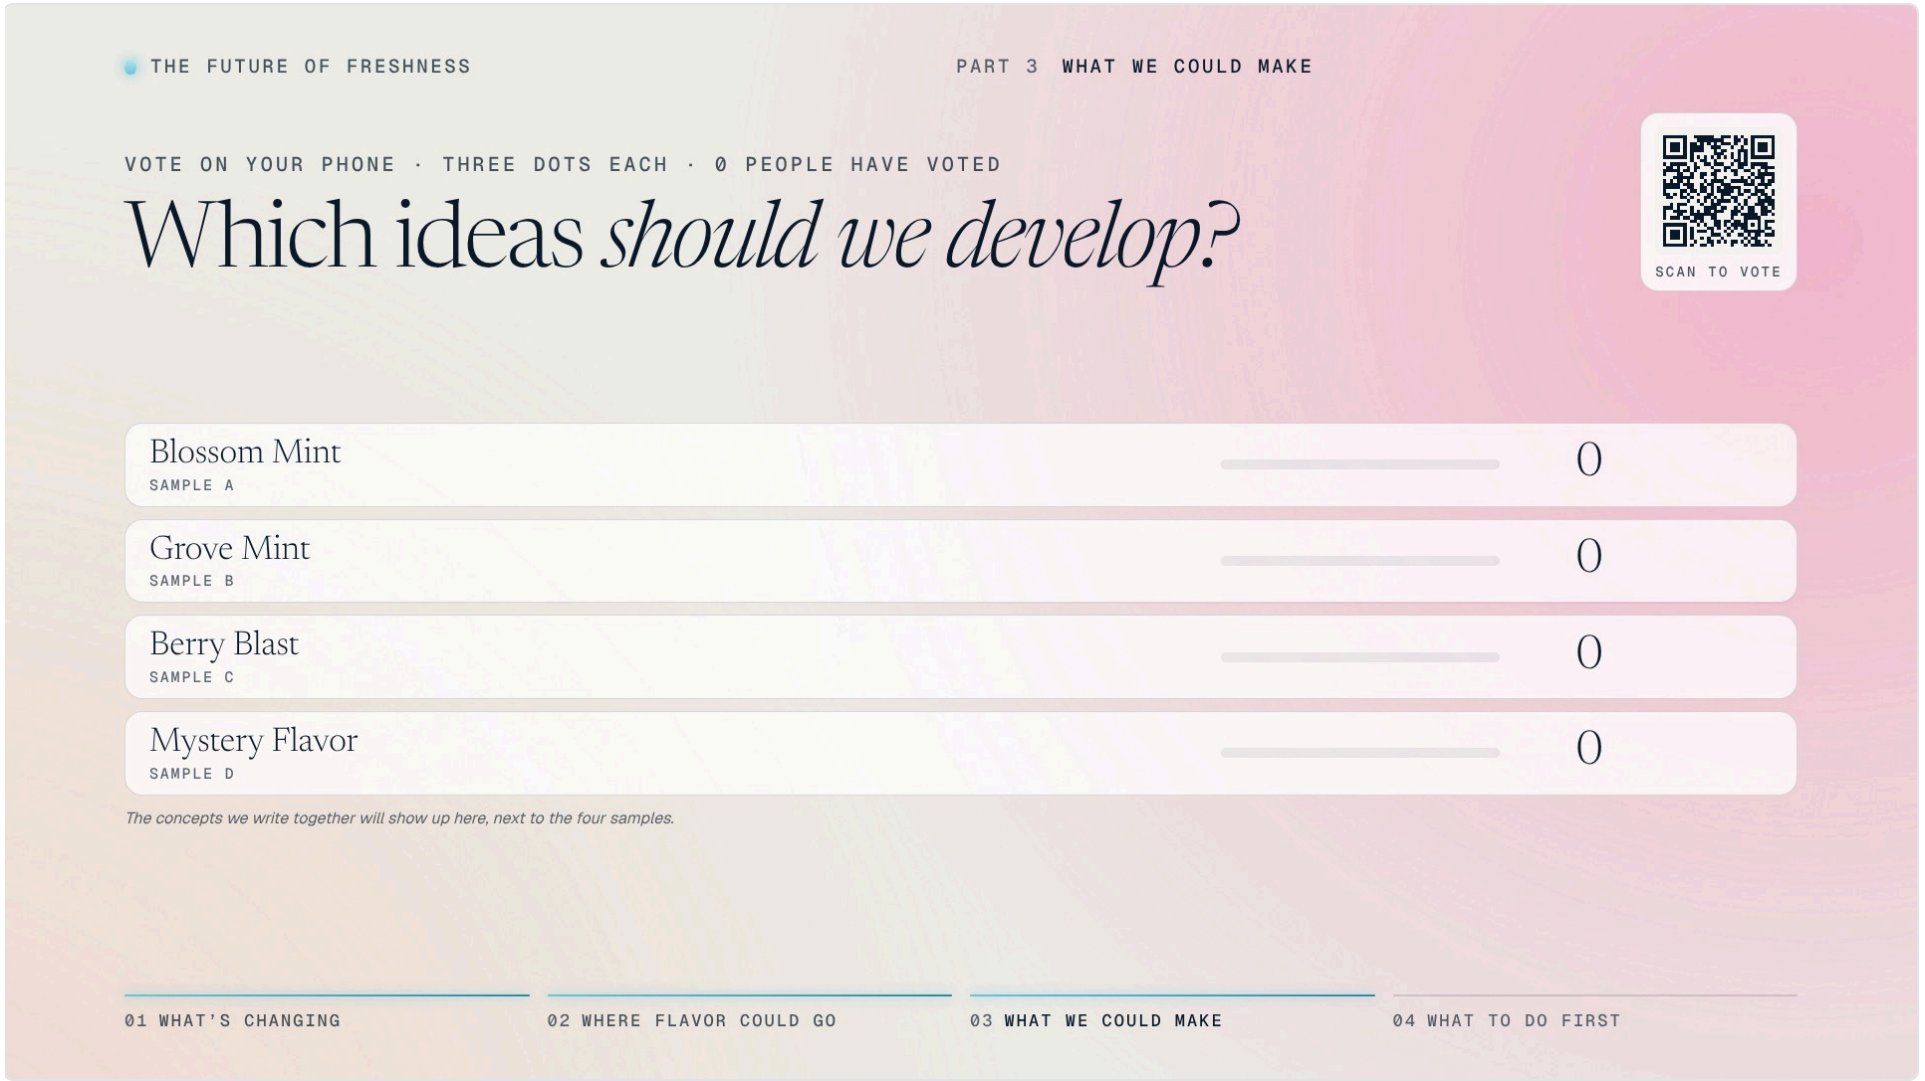

- Everyone gets five chips for the samples and directions they'd develop next. Stacking is fine.
- Click a direction to add a vote by hand for anyone without a phone.
- Build 1 shows the top three.
- Then ask: What would set TheraBreath's flavors apart from what competitors are launching?

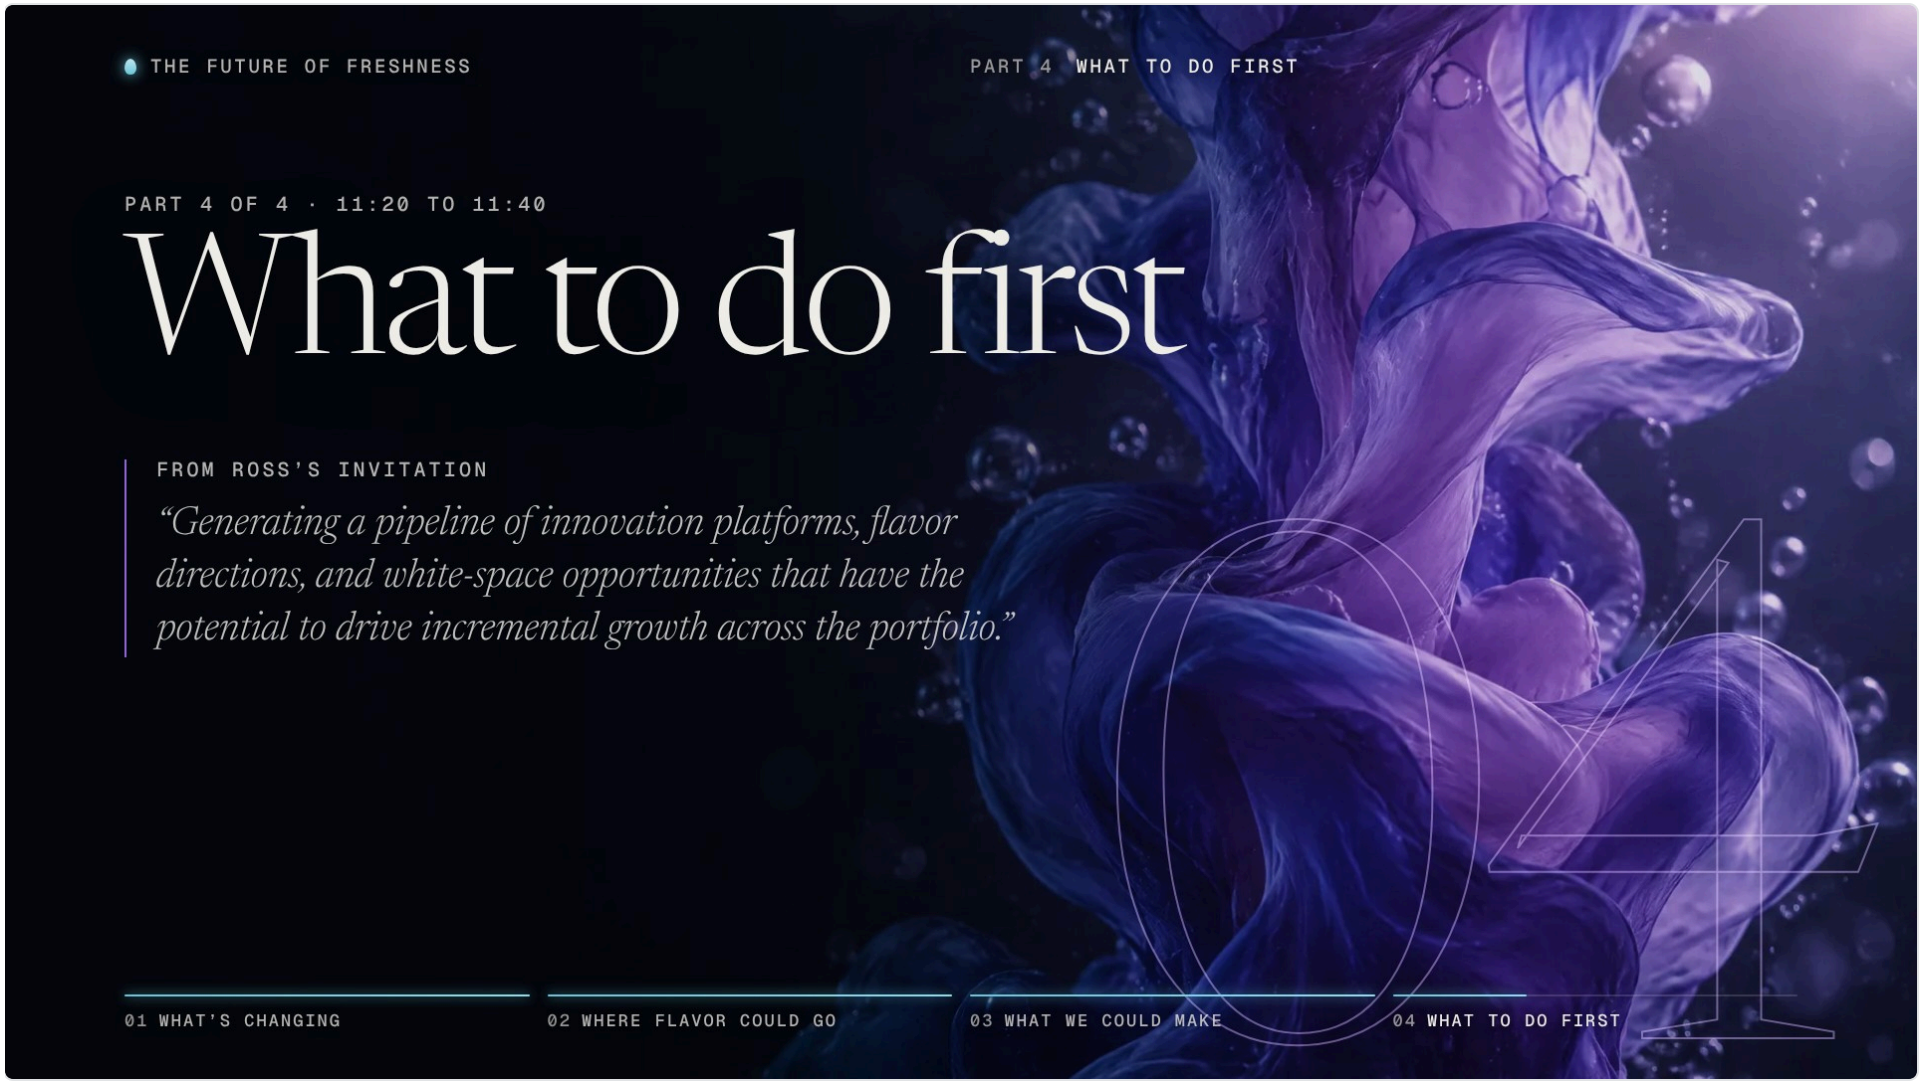

- Read Ross's words on screen, then talk it through:
- Start from the samples and directions that did well.
- For each concept, agree who it's for, when they'd use it, its role in the range, the format and what it grows.
- Aim for up to three.

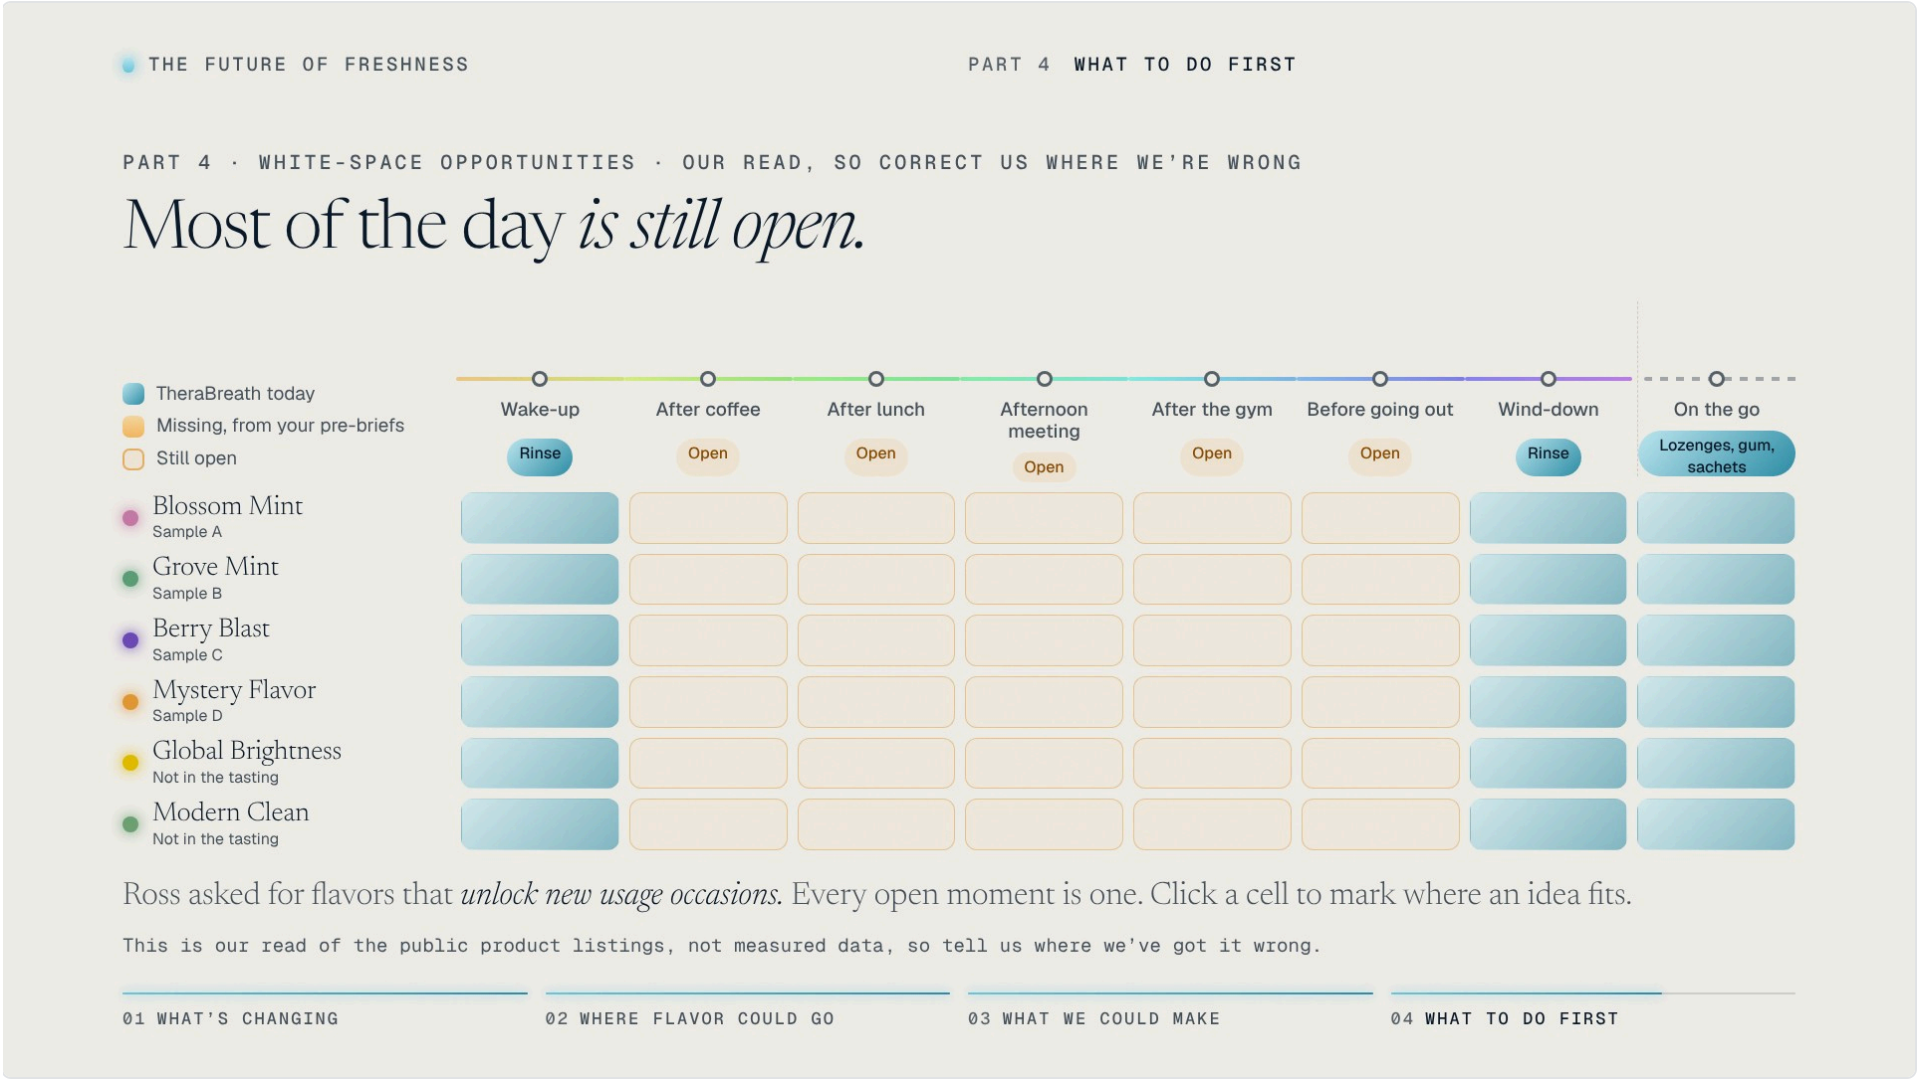

- Start from what scored well and what got chips.
- Aim for up to three. For each one, cover where it starts, who it’s for, when they’d use it, its role in the range, the format and what it grows.
- Type while they talk. The boxes suggest options from this morning, and everything saves to the session as you go.

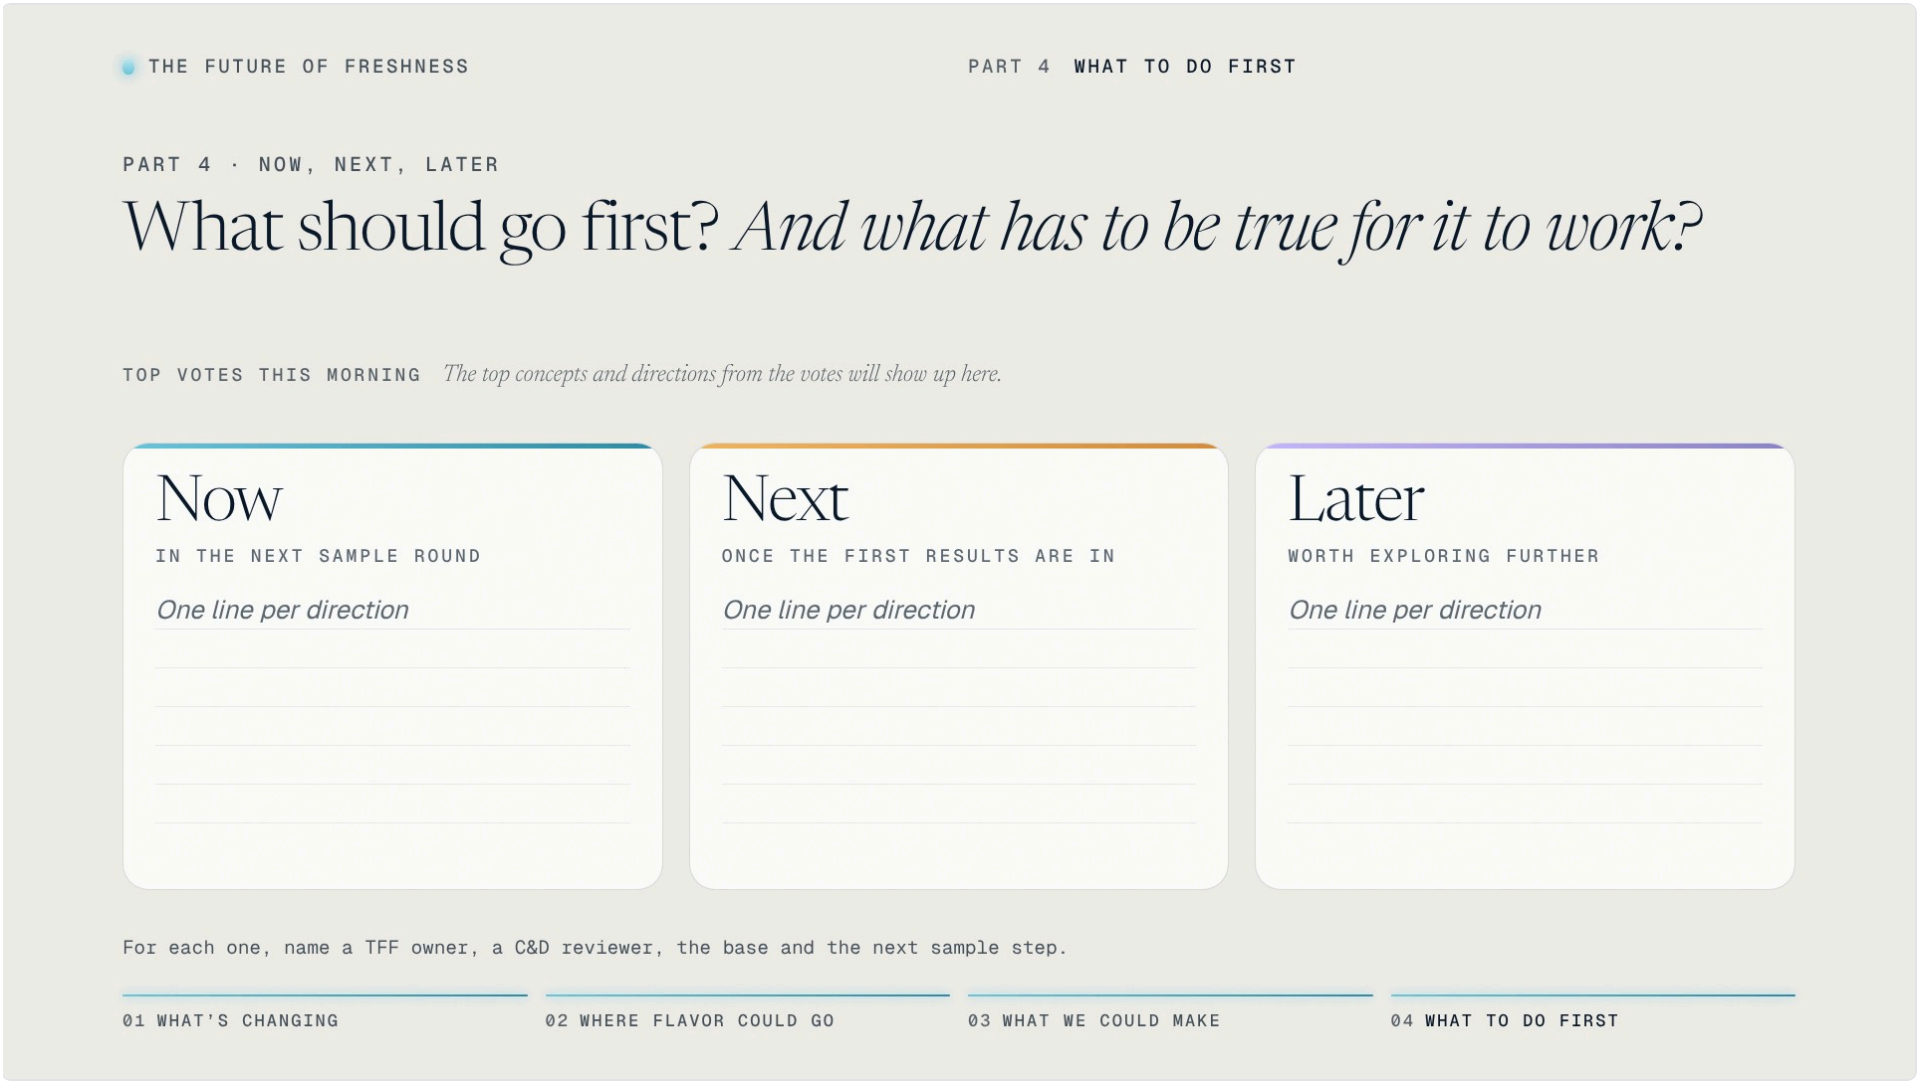

- Everyone gets three dots for the concepts or samples they'd develop. Stacking is fine.
- Build 1 shows the top three.

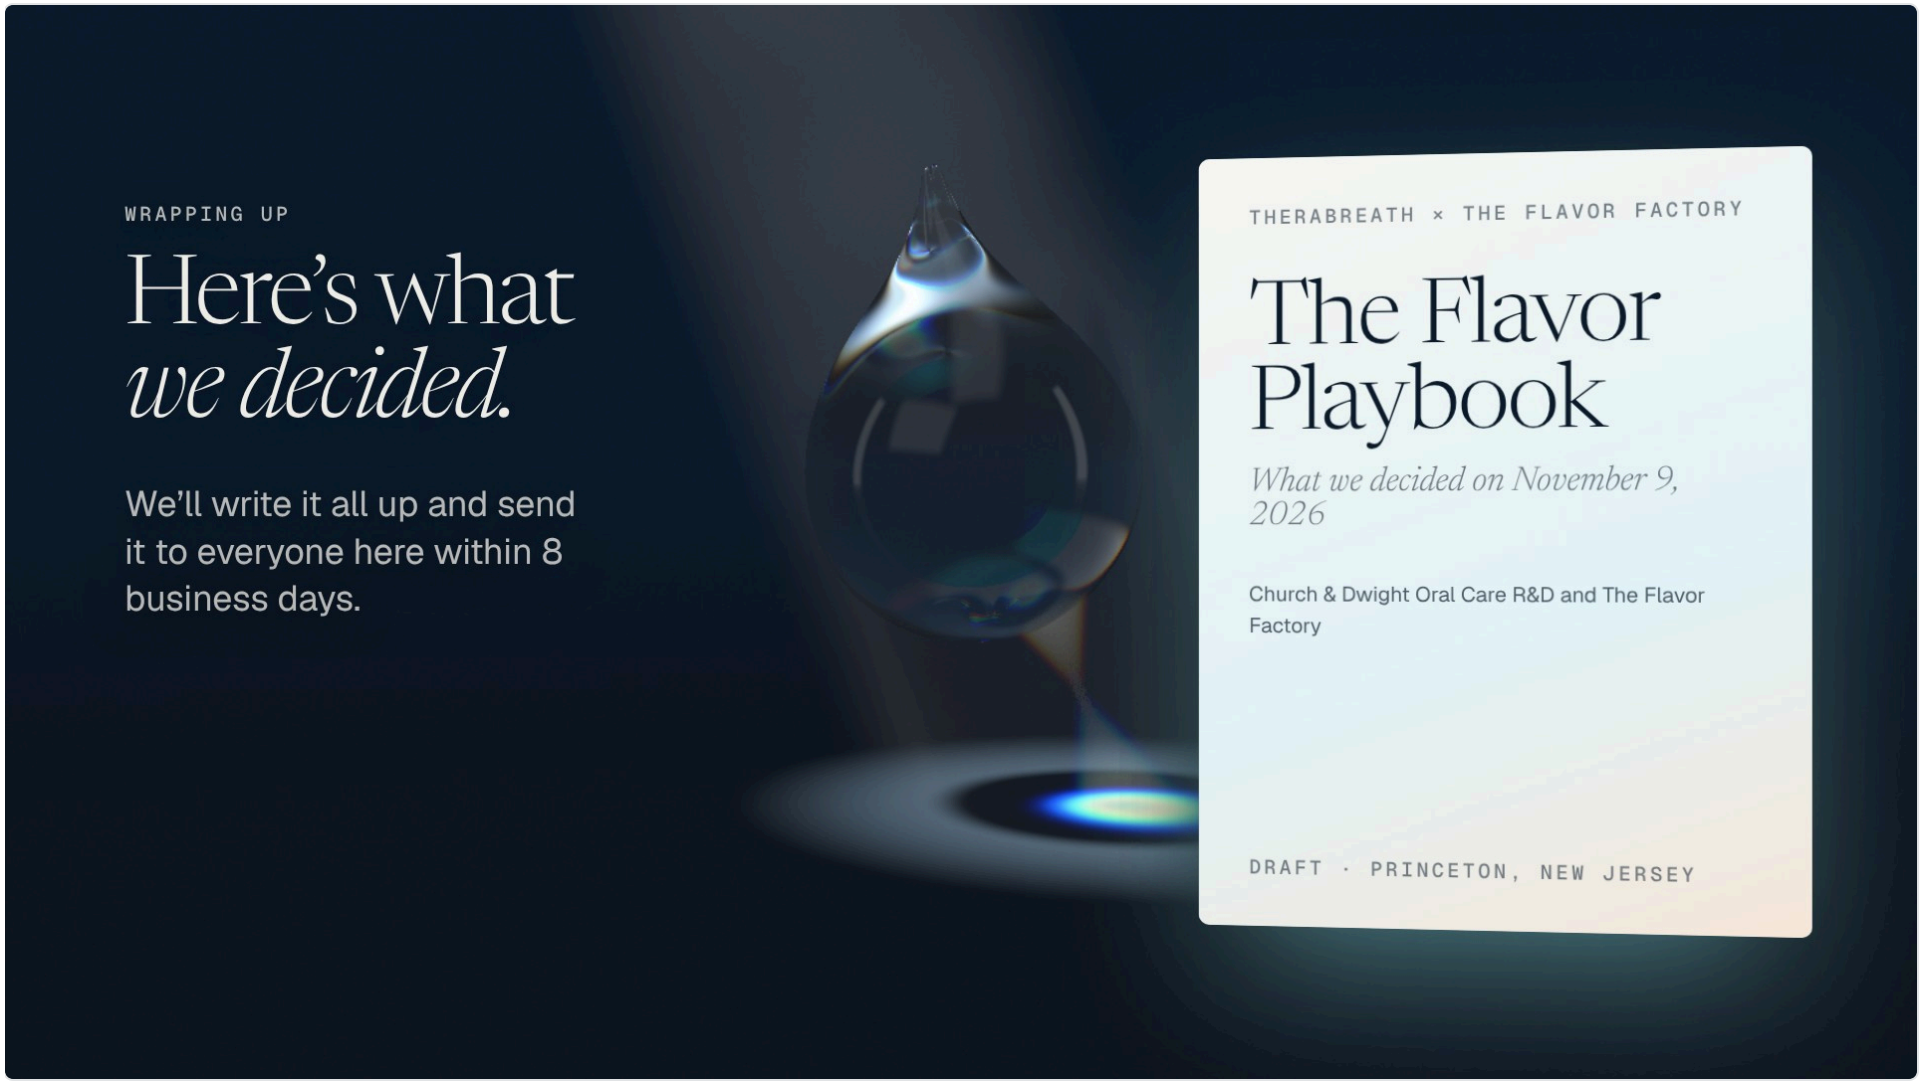

- Read Ross's words on screen, then talk it through:
- Where TheraBreath shows up in a day now, and where the concepts could fit.
- Then Now, Next and Later: the next sample round, what follows the first results, and what's worth exploring further.
- Every direction leaves with a TFF owner, a C&D reviewer, a base and a next step.

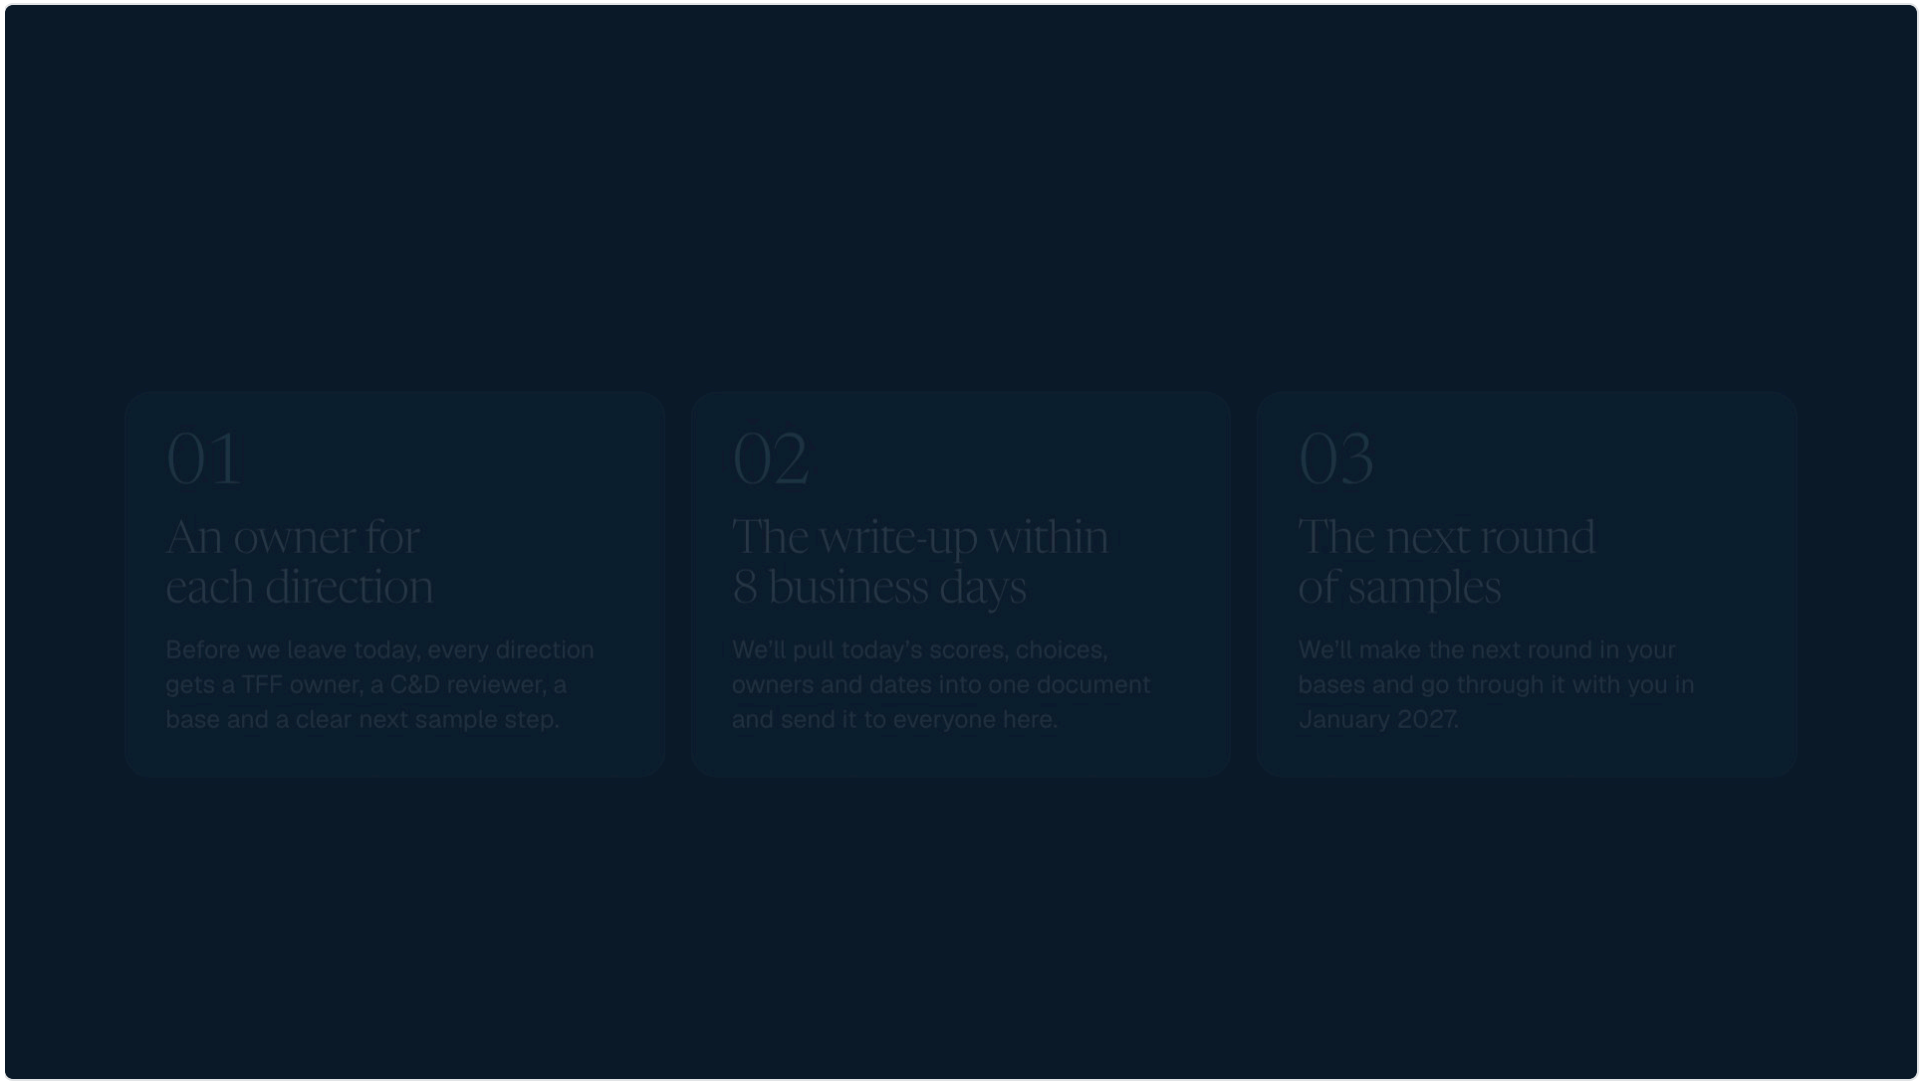

- This is a day from morning to night, with on the go set off to one side.
- Build 1 shows where we think TheraBreath is today: rinse in the morning and at night, plus lozenges, gum and sachets on the go. Ask them to correct us.
- Build 2 adds the moment their pre-brief answers say is missing, and build 3 shows everything that's still open.
- The rows are this morning's concepts, or the samples and directions if none are written yet. Click a cell to mark where each one could fit.

- Put each concept and direction under Now, Next or Later, one line each.
- Give each one a TFF owner, a C&D reviewer, the base and the next sample step.
- What would you need to see in the next round of samples?

- This pulls together everything we decided this morning: the trends, the directions, the concepts and the plan.
- Read the plan back, owners and all.
- The next build closes it into the cover. Let them know the write-up comes within 8 business days.

- Walk through the three next steps. The dates still need confirming before November 9.
- Then thank everyone for their time.

- At 11:48, lights down and sound up. THE FLAVOR RACE runs 2:26.
- Don’t talk over it. When it ends, send everyone off to lunch.

- Lunch at 12:00, hosted by Church & Dwight.
