PRESENTER EDITION · 10:00 TO 12:00 · MONDAY, NOVEMBER 9, 2026 · DARWIN ROOM, PRINCETON

The Future *of Freshness*

Every slide as it'll look on the TV, with its time and talking points; the slides that change as they build show each state. The morning is a conversation, not a talk: the first slide of each part carries its objective, and most slides end on a question for the room. Phones vote three times (the trends, the tasting and the chips), and everything we decide is tapped in, not typed, and becomes the Playbook at the end. 21 slides, plus "Your pre-brief answers" once the answers are in. The live presentation is at /host, opened from the team link. Use the right arrow or click to go on,] to jump to the next part, S to skip the optional builds, F for full screen and N for the talking points.

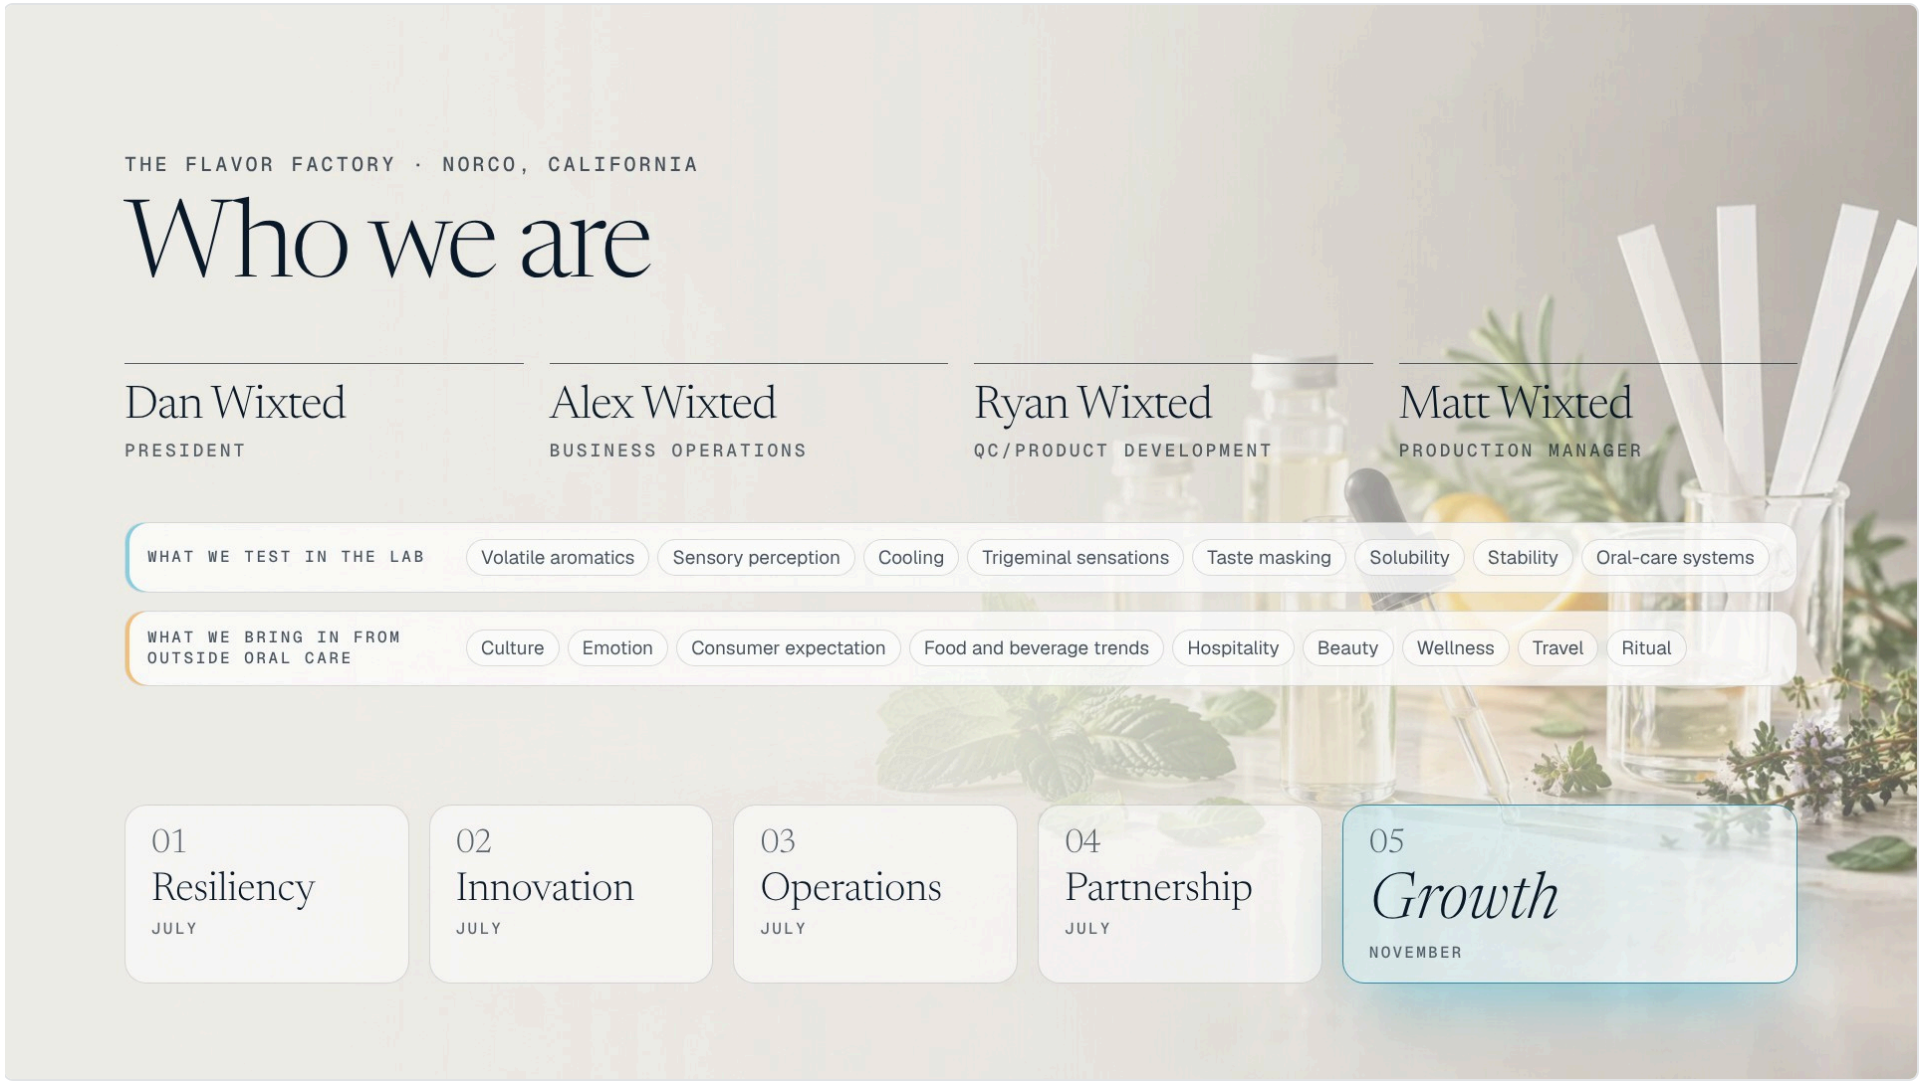

TIME	PART	OBJECTIVE	SLIDES
10:00 to 10:10	Welcome, who we are and your four objectives		1 to 4
10:10 to 10:25	What's changing: your portfolio, the market and seven trends	01	6 to 9
10:25 to 10:40	Flavor School, then four directions	02	10 to 13
10:40 to 11:00	A blind tasting in your bases	02	14 to 15
11:00 to 11:20	From samples to concepts	03	16 to 18
11:20 to 11:40	White space, then Now, Next, Later	04	19 to 20
11:40 to 12:00	What we decided and what happens next		21 to 22

Confidential. For The Flavor Factory team; not for distribution.

- At 9:30, Ross is meeting us to help with the Wi-Fi and the room.
- Get the laptop on the TV and press F for full screen. Do the sound check on the rehearsal session before anyone arrives (see the run sheet).
- As people sit down, ask them to scan the code. Their names pop up on screen as they join.
- At 10:00, welcome everyone and thank Ross for inviting us.
- Set up the two hours: your four objectives, four samples to taste and a plan to leave with.
- Let them know phones will come out a few times, for the votes and the tasting.

10:00 TO 10:10 1 BUILD OPTIONAL BUILD 1

- Introduce the four of us and what each of us does day to day.
- Say a word about the range of our work: as a wholesale flavor manufacturer we make liquid and powder flavors for just about anything, with a focus on naturally derived flavors. A lot of it is custom work, developed with clients as their own proprietary flavors, and that range feeds what we bring to TheraBreath.
- One line each on what we test in the lab and what we bring in from outside oral care.
- Ross asked to see our creativity, technical expertise and innovation capabilities. This morning is our chance to show all three.
- The next build is the July row, and it's optional (S skips it). When they came to Norco in July, we talked about resiliency, innovation, operations and partnership. Today is about growth.

THE FLAVOR FACTORY IN THERABREATH

Our flavors are in 14 TheraBreath rinses on shelf today.

ORAL RINSES

Clean Mint — Healthy Gums
Dazzling Mint — Whitening Fresh Breath
Invigorating Icy Mint — Fresh Breath
Mild Mint — Fresh Breath
Overnight
Peppermint Vanilla — Fresh & Festive
Rainforest Mint — Fresh Breath
Revitalizing Mint — Complete
Sparkle Mint — Anticavity
Tingling Mint — Dry Mouth

KIDS RINSES

Bubble Gum — Kids Anticavity
Grapes Galore — Kids Anticavity
Strawberry Splash — Kids Anticavity
Wacky Watermelon — Kids Anticavity

Source: The Flavor Factory portfolio record, November 4, 2026; TheraBreath product photos (therabreath.com, Walmart and Target)

- One minute. Every TheraBreath product on shelf today with one of our flavors in it: ten rinses, Peppermint Vanilla among them, and the four kids rinses.
- Flavor names only. Usage levels and flavor codes stay off the slide and out of what we say.

FROM ROSS'S INVITATION

We've built the morning *around your four objectives.*

01

Identifying emerging flavor, sensory, and consumer trends that could influence the future of oral care.

10:10 TO 10:25
WHAT'S CHANGING

02

Exploring new flavor territories and sensory experiences that can differentiate TheraBreath from competitors and create memorable consumer experiences.

10:25 TO 11:00
WHERE FLAVOR COULD GO

03

Developing innovative flavor concepts that unlock new usage occasions, address new consumer segments, and create opportunities for portfolio expansion.

11:00 TO 11:20
WHAT WE COULD MAKE

04

Generating a pipeline of innovation platforms, flavor directions, and white-space opportunities that have the potential to drive incremental growth across the portfolio.

11:20 TO 11:40
WHAT TO DO FIRST

AND THE GOAL BEHIND THEM

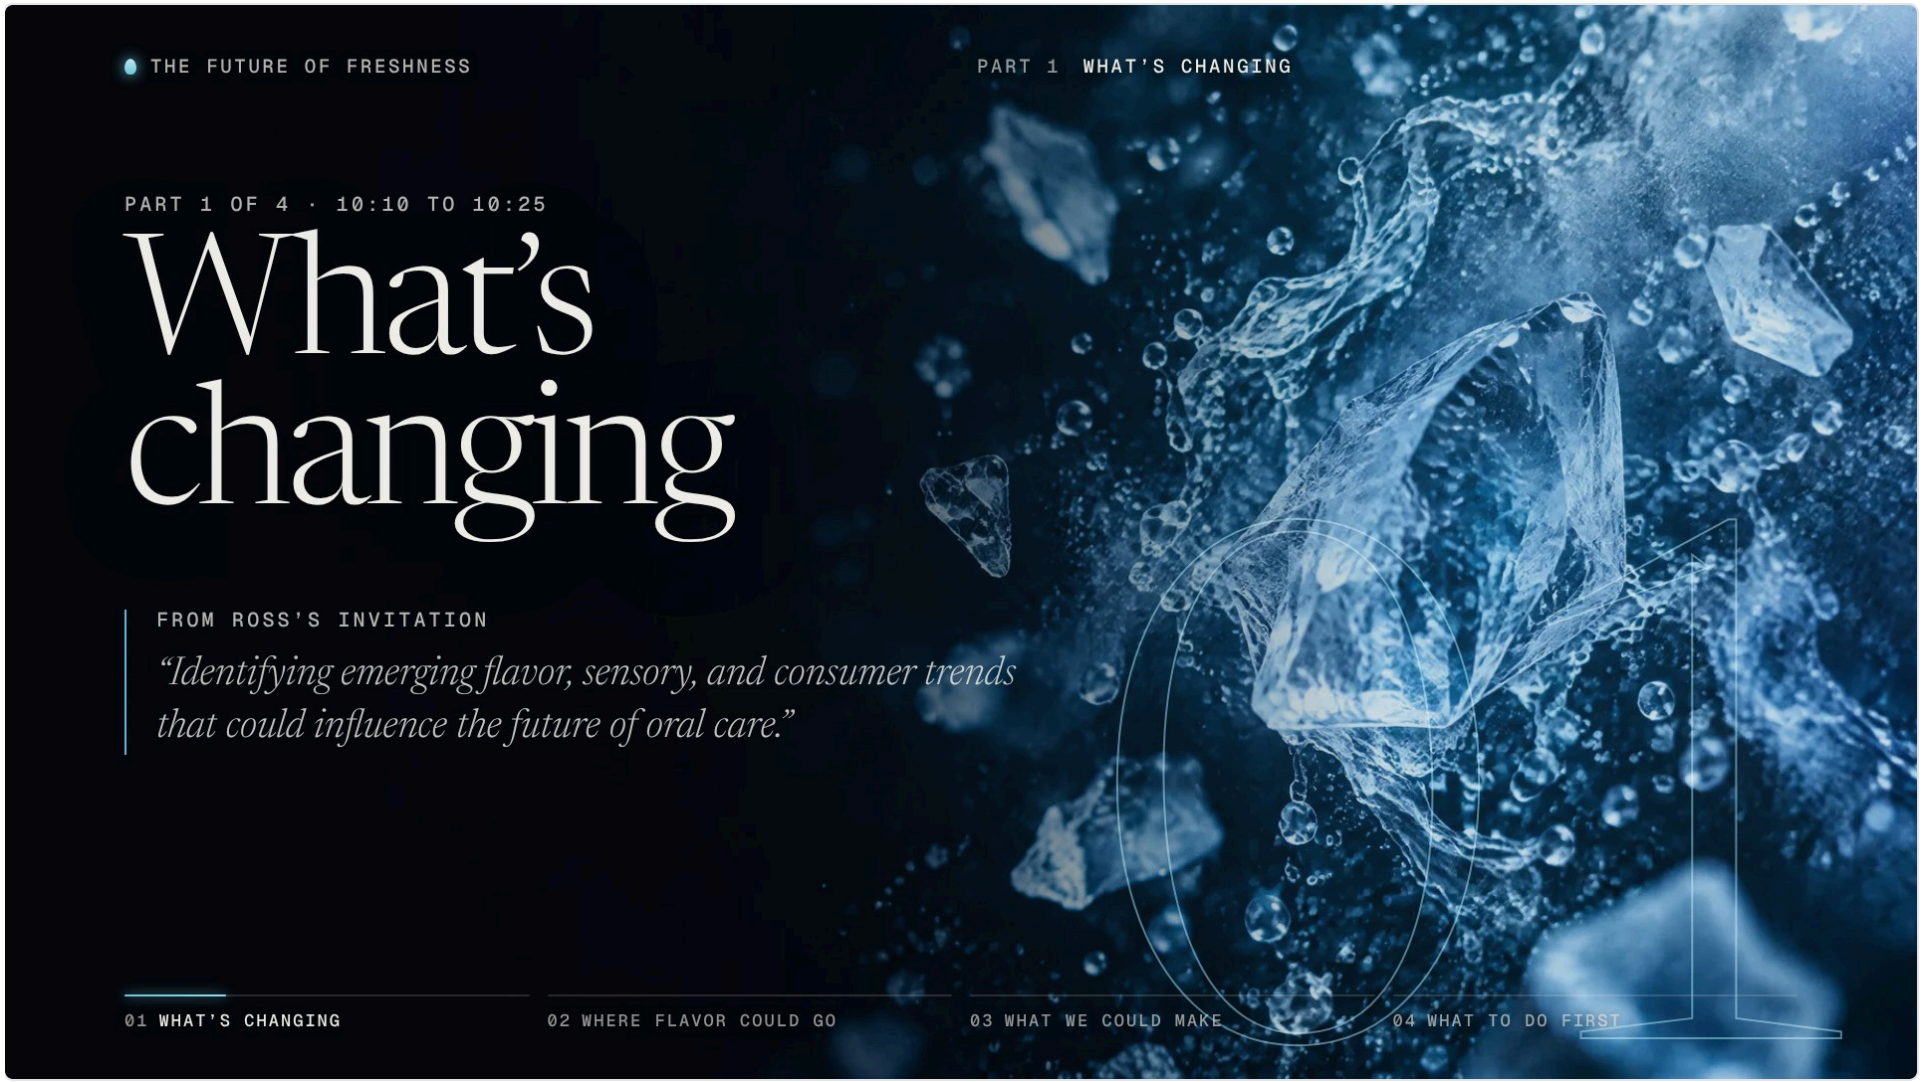

"...new flavor experiences that both *strengthen our appeal with existing loyal users* and *create opportunities to attract new consumers to the franchise.*"

Source: Ross Conroy, Church & Dwight Oral Care R&D, workshop invitation, September 18, 2026

- Read the four objectives just as Ross wrote them. They're the agenda for the morning.
- The last build is his goal: flavors that keep loyal users coming back and bring in new ones.

This slide shows up once at least one pre-brief answer is in (the pre-brief went out on November 3). It opens on who they think TheraBreath's next flavor should be for, then the moment TheraBreath is missing with the group's freshness profile, then what would feel off-brand, all without names. Until then the presentation goes straight from 4 to 6.

- These are their pre-brief answers: who they think TheraBreath's next flavor should be for, and the moment TheraBreath is missing. Treat them as a starting point for the conversation, not consumer research.
- Ask about the off-brand answers: what makes each one feel wrong for the brand? There are no names on screen.

- Part 1 of 4, 10:10 to 10:25. Read Ross’s first objective as it’s written: Identifying emerging flavor, sensory, and consumer trends that could influence the future of oral care.
- A beat, then click on. Each part opens on a slide like this one, so the room always knows which objective we’re on.

- It opens on one line. Give it a second to land: TheraBreath took the burn out of mouthwash. The next job is giving more people a reason to want it.
- Next build: the glasses fill. Out of every 100 households, 65 buy mouthwash and 14 buy TheraBreath. Every number on this slide is households out of 100.
- Say it, it isn't on screen: TheraBreath reached a record 26.8% of mouthwash sales in Q3 2026, number 2 in the category (Church & Dwight's Q3 call, October 30). That's share of sales, a different measure from households, so keep it off the screen.
- Next: the 100 split into three groups. 14 buy TheraBreath, 51 buy another mouthwash and 35 don't buy mouthwash at all.
- Last build: flavor could give more of these households a reason to try it. Then ask which group a new flavor is for: the 51 or the 35

THE FUTURE OF FRESHNESS

PART 1 WHAT'S CHANGING

OUT OF EVERY 100 HOUSEHOLDS

TheraBreath is already number 2 in mouthwash.

14	buy TheraBreath
51	buy another mouthwash
35	don't buy mouthwash at all

Flavor could give more of these households a reason to try it.

FOR THE ROOM

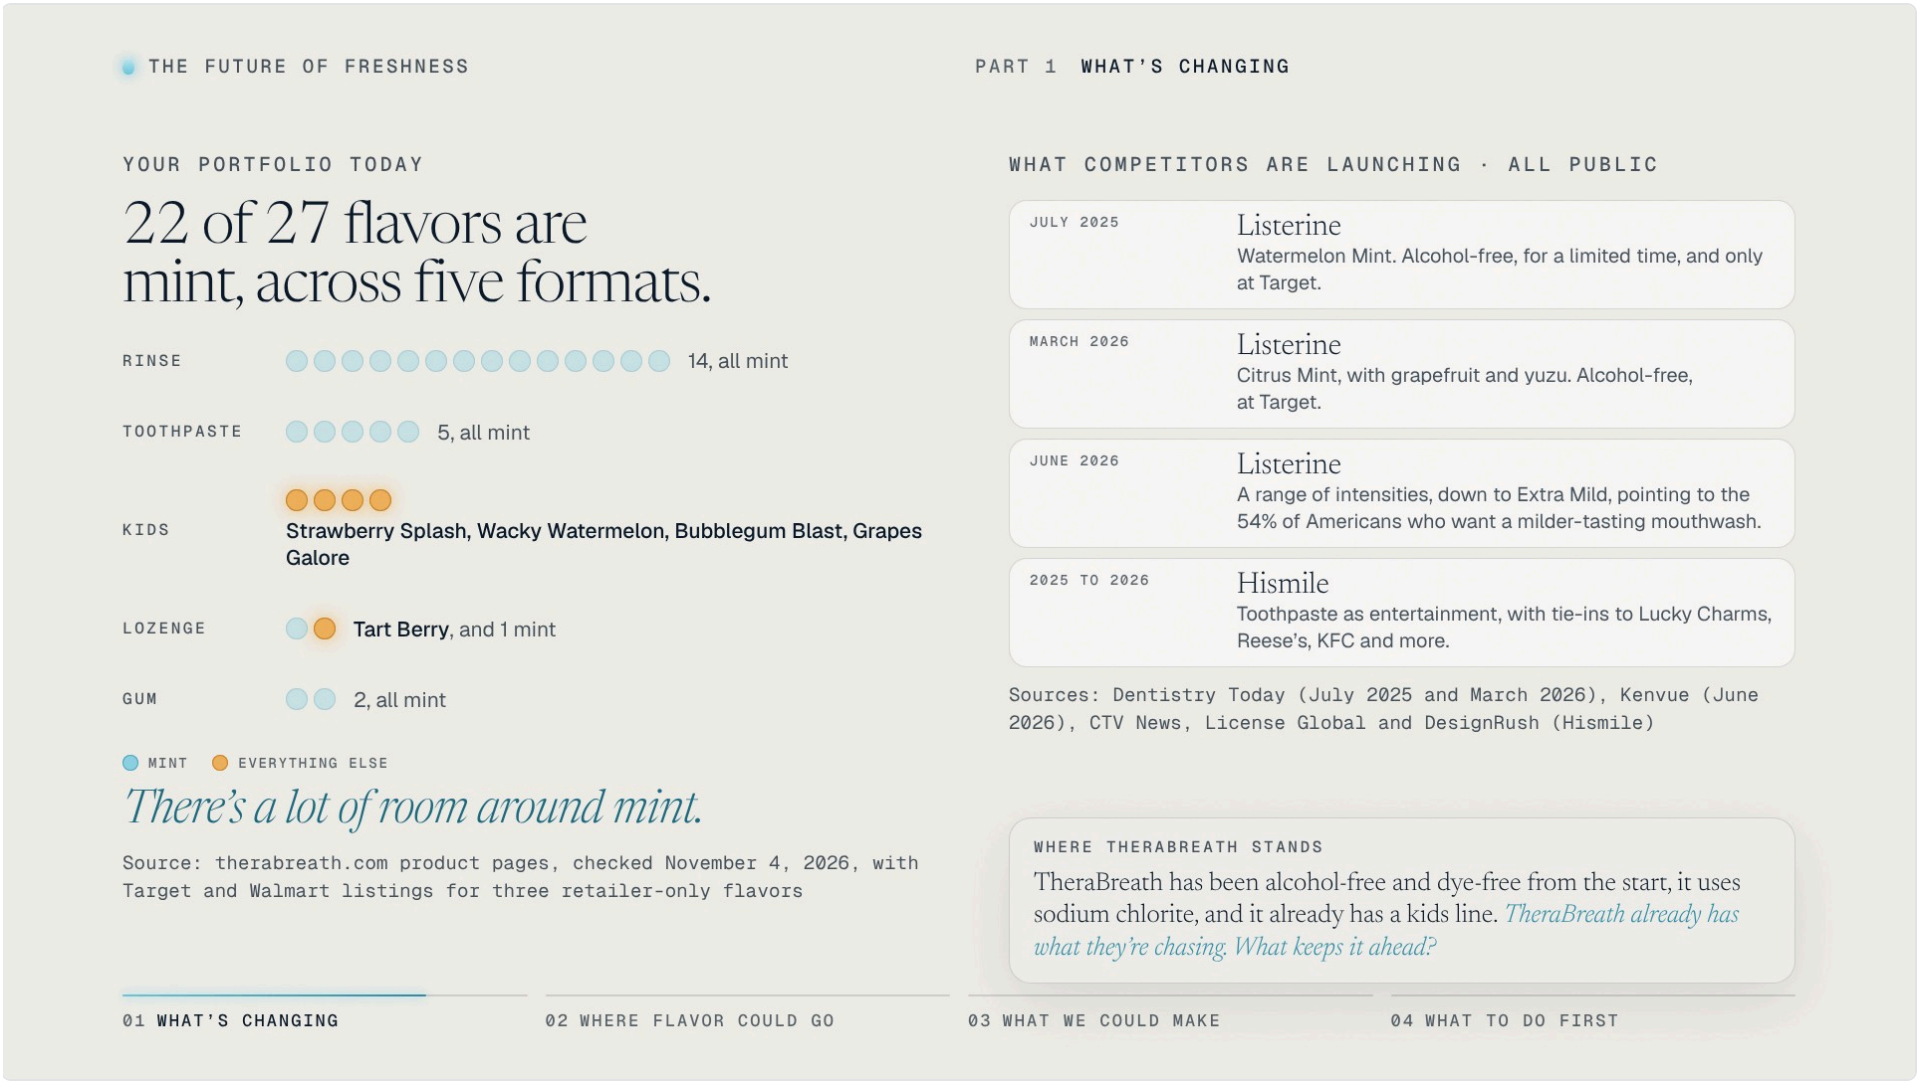

Which group is a new flavor for: the 51 or the 35?

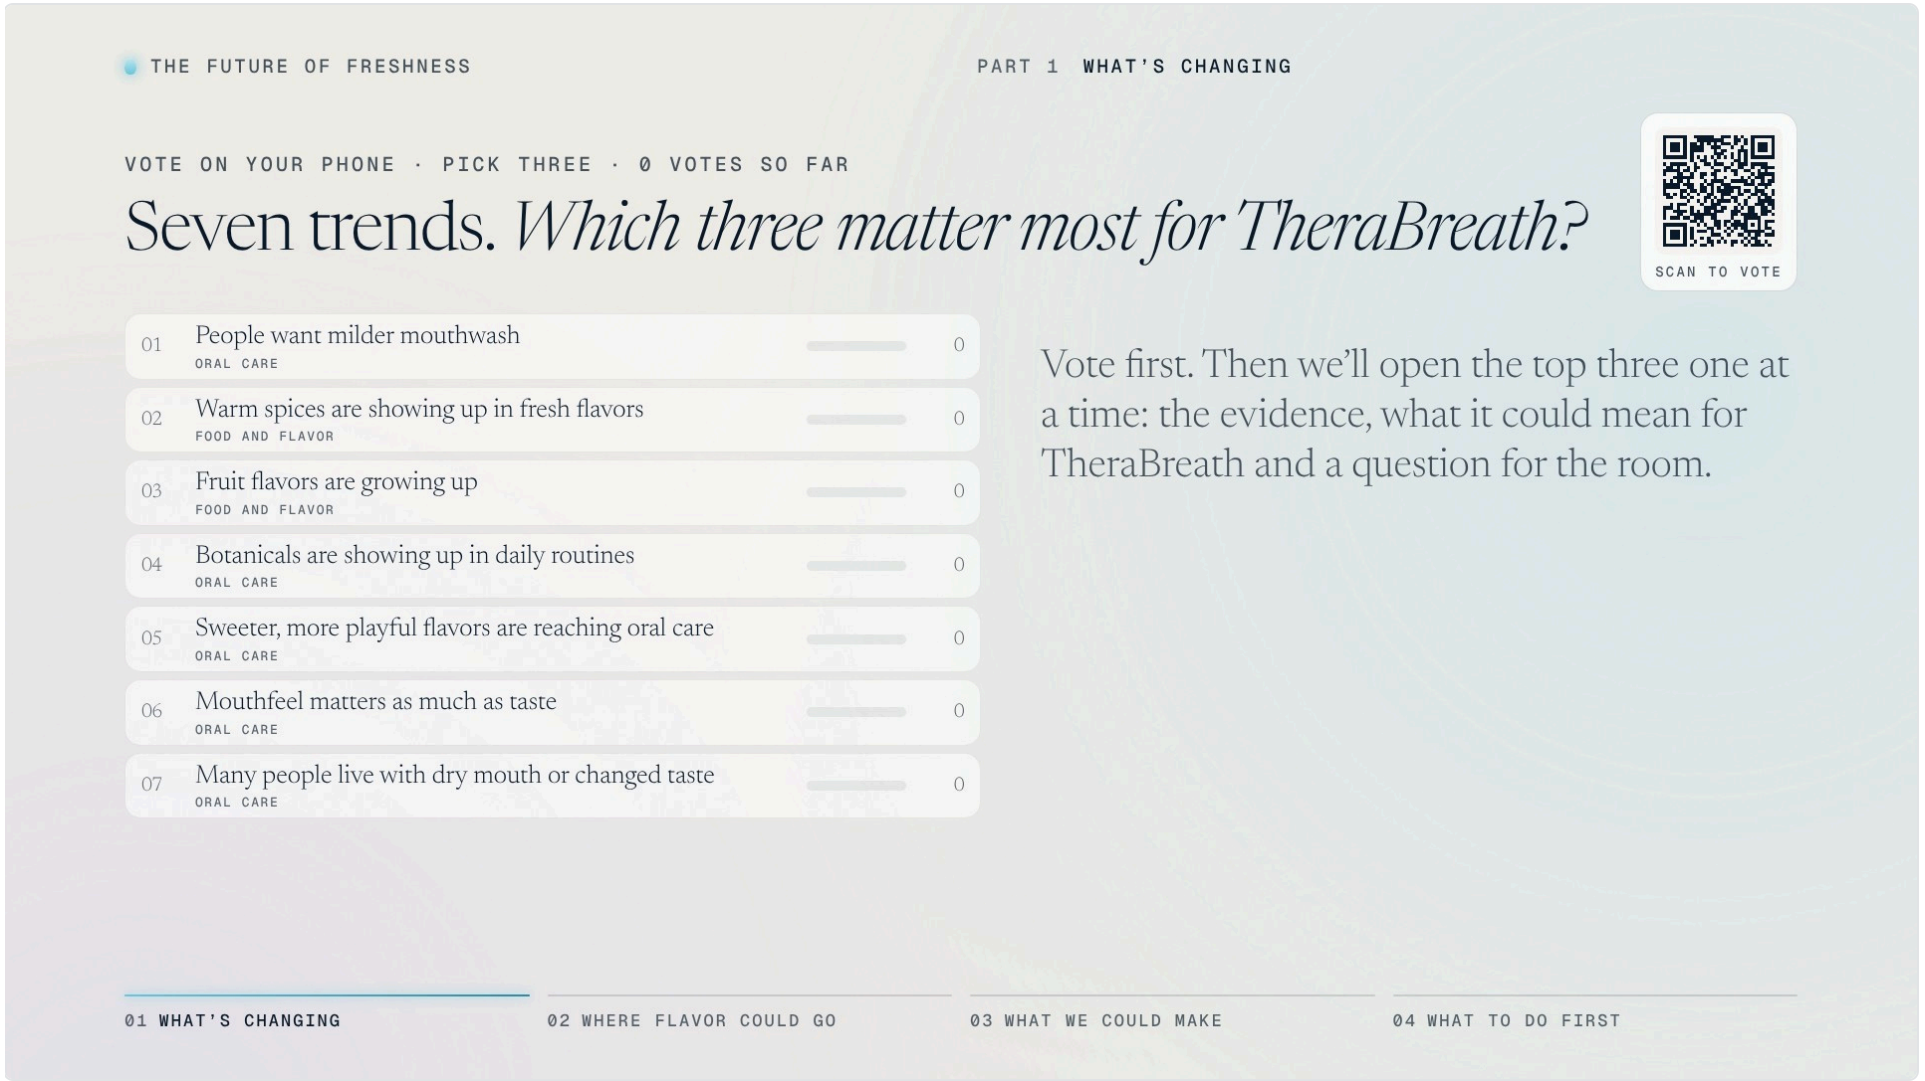

65
OF 100 BUY MOUTHWASH

14
OF 100 BUY THERABREATH

Source: Church & Dwight Q3 2026 earnings call, October 30, 2026.
Household penetration: TheraBreath 14%, mouthwash 65%

- 22 of the 27 flavors are mint, across five formats, and that's a strength. Each dot is one flavor; only the 5 that aren't mint are named: Strawberry Splash, Wacky Watermelon, Bubblegum Blast, Grapes Galore, Tart Berry. From therabreath.com, checked November 4, plus three retailer-only flavors.
- Next to them is what competitors have launched: mostly new flavors, mostly limited editions. Keep it factual. TheraBreath does this too: Eucalyptus Mint, only at Target since March 2026, and Peppermint Vanilla at Target.
- Next build: there's a lot of room around mint.
- Last build: where TheraBreath stands. It already has what they're chasing: alcohol-free, dye-free, sodium chlorite and a kids line. Then ask what keeps it ahead.

- Phones out straight away. Everyone picks three. Hand votes go in from the presenter view.
- The bars fill as votes land. Give it about two minutes, then click: the vote closes and the top three open one at a time. Going back to the first build opens the vote again.
- For each of the three: the evidence, what it could mean for TheraBreath and its question. The label says whether the evidence comes from oral care itself or from food and flavor more widely: a food trend is a cue to discuss
- 4. Botanicals are showing up in daily routines. TheraBreath's Eucalyptus Mint and Overnight Chamomile Mint are already on shelf. Both lead with a botanical, and one is named for a time of day. "Swishy Time" turned rinsing into a small self-care ritual, and share went up with it. What it could mean: Flavors made for a particular time of day, like first thing in the morning or right before bed. Its question: Which moment of the day could a botanical own?
- 5. Sweeter, more playful flavors are reaching oral care. Perfumer &

THE FUTURE OF FRESHNESS

PART 1 WHAT'S CHANGING

THE VOTE IS IN · 0 VOTES

Seven trends. *Which three matter most for TheraBreath?*

SCAN TO VOTE

NUMBER 1
01 People want milder mouthwash — ORAL CARE — 0

NUMBER 2
02 Warm spices are showing up in fresh flavors — FOOD AND FLAVOR — 0

NUMBER 3
03 Fruit flavors are growing up — FOOD AND FLAVOR — 0

04 Botanicals are showing up in daily routines — ORAL CARE — 0

05 Sweeter, more playful flavors are reaching oral care — ORAL CARE — 0

06 Mouthfeel matters as much as taste — ORAL CARE — 0

07 Many people live with dry mouth or changed taste — ORAL CARE — 0

TREND 1 OF 7 · SEEN IN ORAL CARE

People want milder mouthwash.

54% of Americans say they want a milder-tasting mouthwash, in a survey Kenvue cites.

Kenvue press release, June 2, 2026 (the 54% figure: Kenvue / Suzy survey, 2024, n = 1,019)

Listerine now sells a range of intensities, down to Extra Mild.

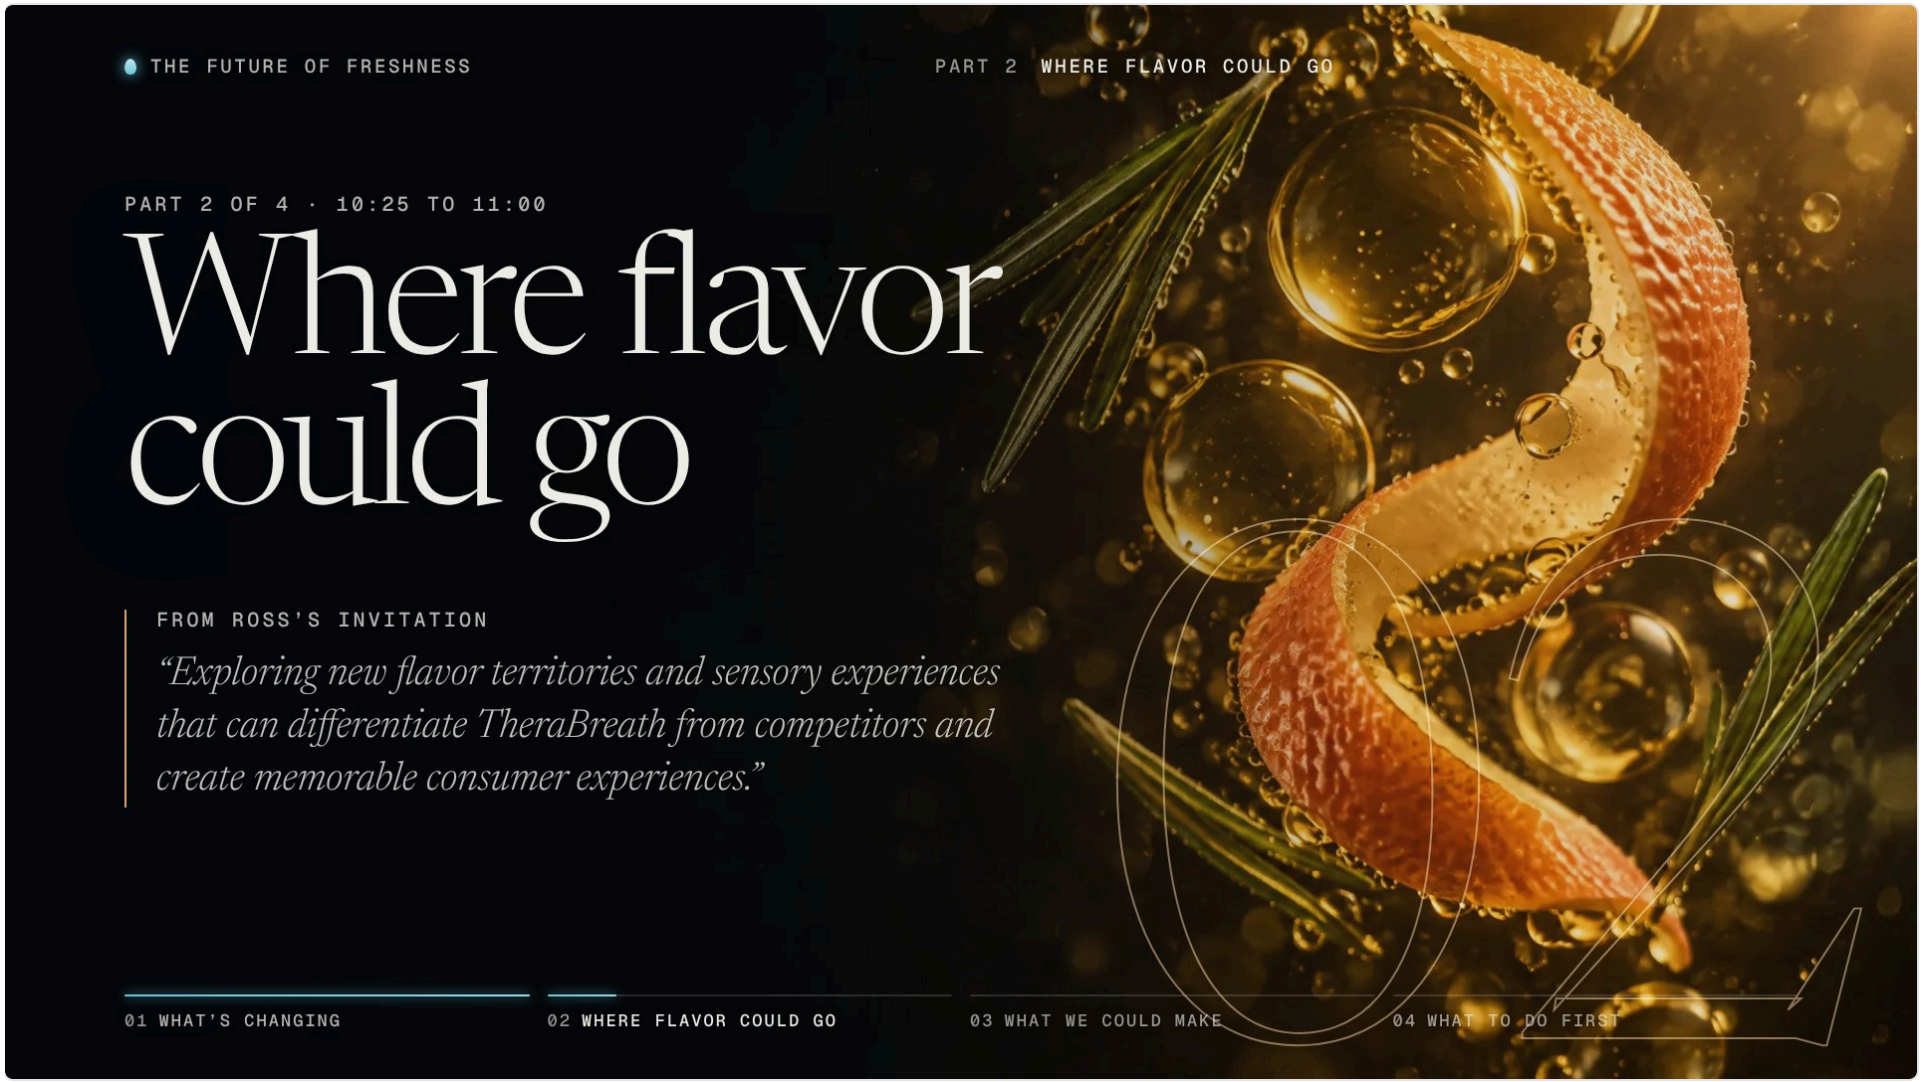

Kenvue press release, June 2, 2026 (the 54% figure: Kenvue / Suzy survey, 2024, n = 1,019)

WHAT IT COULD MEAN FOR THERABREATH

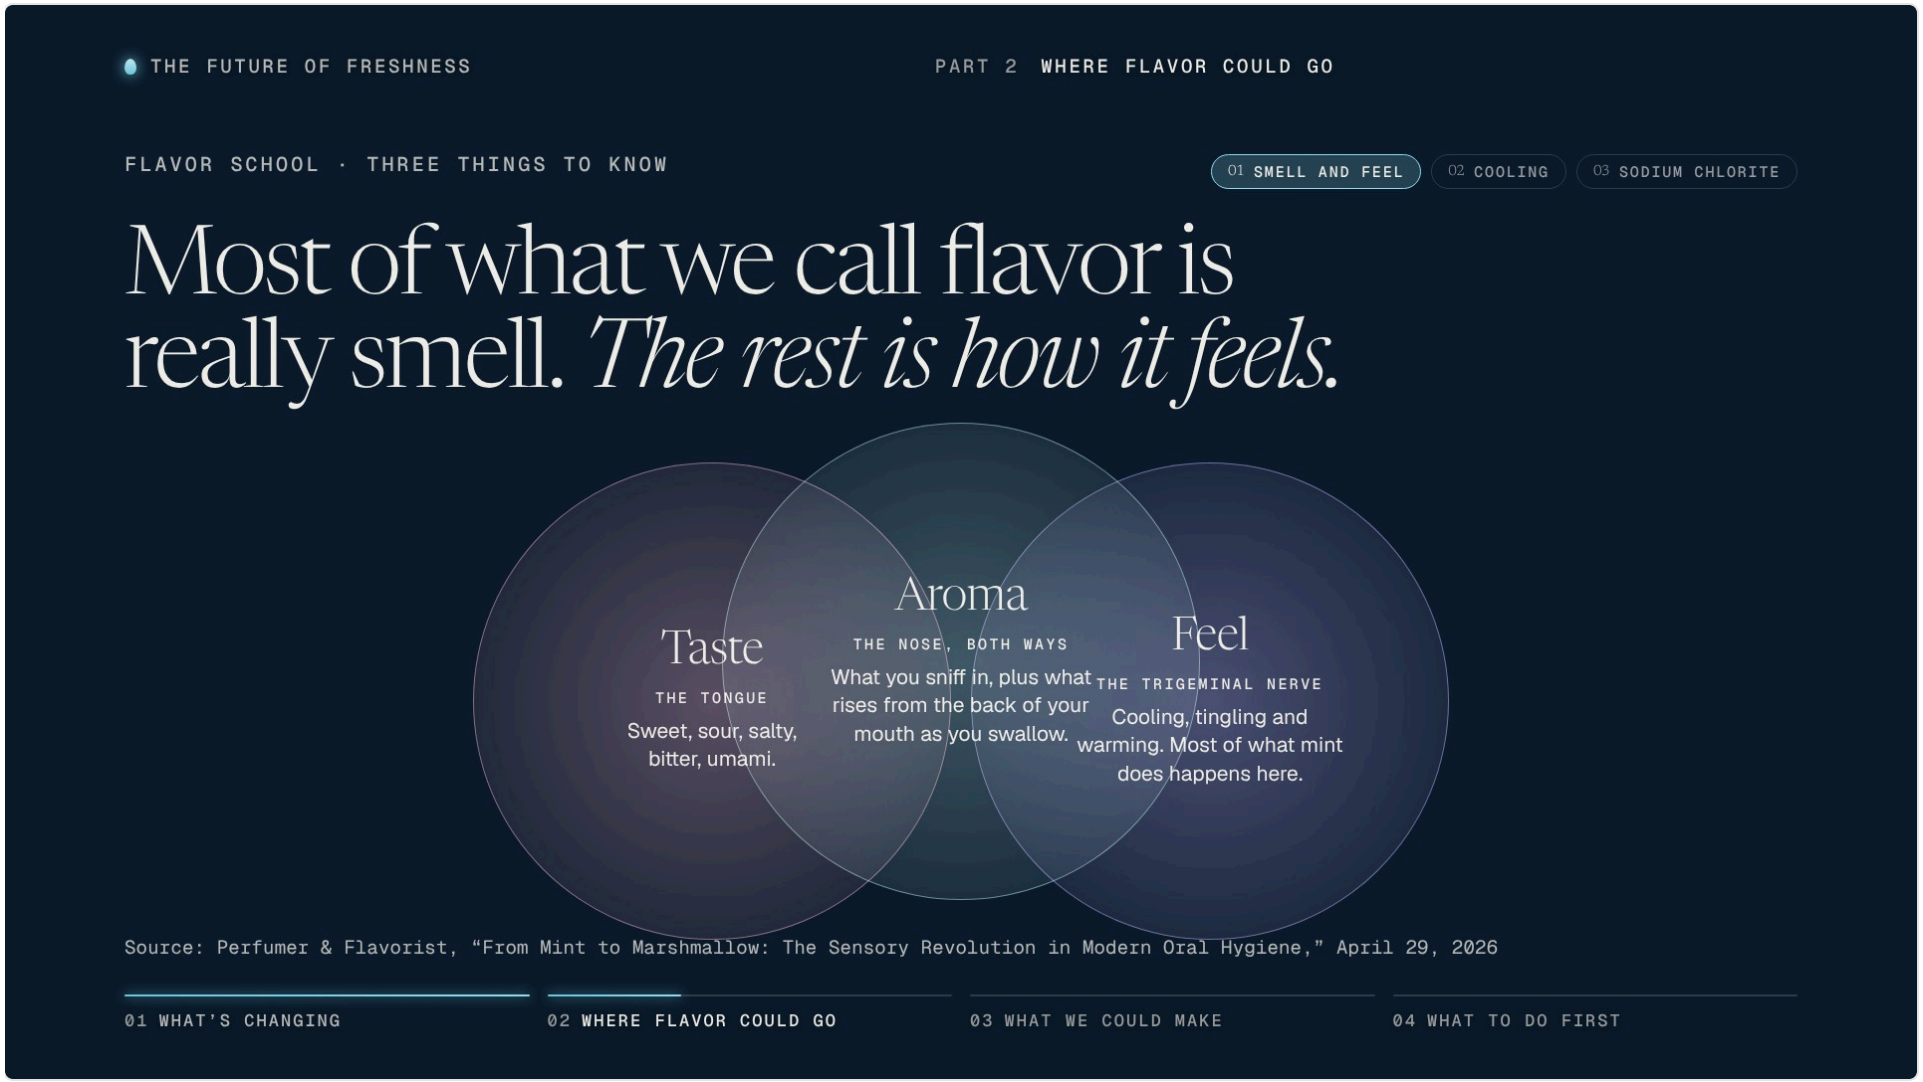

Let people choose how strong they want it.

FOR THE ROOM

Is "milder" a flavor job, a cooling job, or both?

- Part 2 of 4, 10:25 to 11:00. Ross's second objective: Exploring new flavor territories and sensory experiences that can differentiate TheraBreath from competitors and create memorable consumer experiences.
- This part is Flavor School, the four directions, the film and the blind tasting.

- One slide, three builds, about four minutes: three things to know about flavor in a TheraBreath rinse.
- It opens on what flavor is. Most of what we call flavor is really smell, and the rest is how it feels. Taste is the tongue: sweet, sour, salty, bitter, umami. Aroma is the nose, including what rises from the back of the mouth when you swallow. Feel is the trigeminal nerve. That's where cooling, tingle and warmth come from.
- Next build: cooling does two jobs. There's the hit when you first rinse, and
- Last build: sodium chlorite is tough on the bacteria behind bad breath, and that makes it tough on flavor too. We control three things: the pH, how we incorporate and protect the flavor and the materials we choose. A flavor only counts if it still tastes right after months on the shelf. A TheraBreath flavor can start anywhere, but it has to finish clean.
- Stick to public chemistry. No formula details.
- Then ask: Where has flavor been hardest to get right with sodium chlorite for you?

THE FUTURE OF FRESHNESS

PART 2 WHERE FLAVOR COULD GO

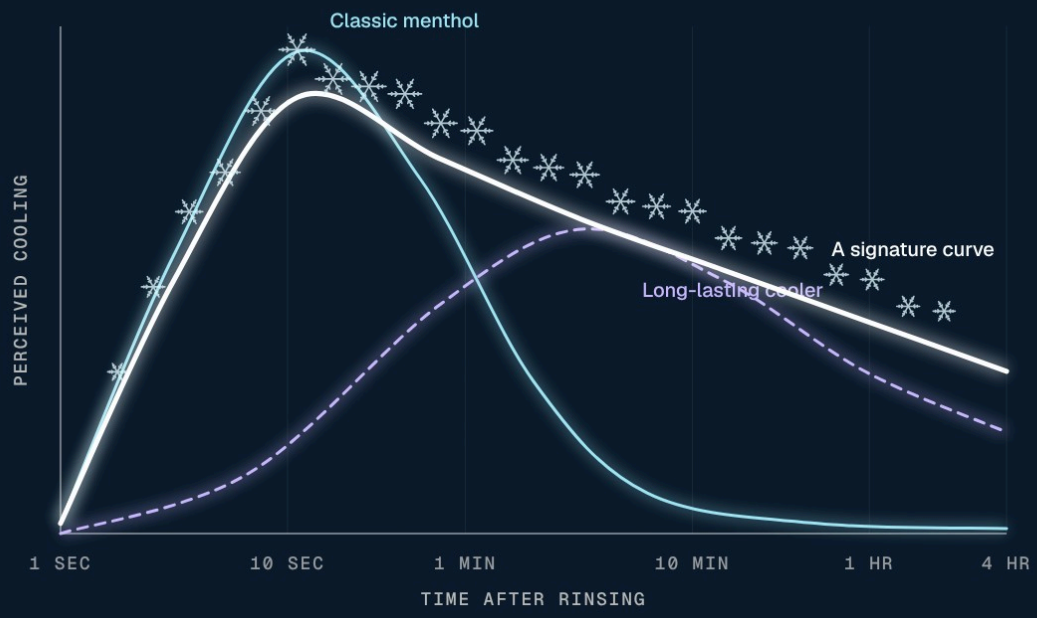

FLAVOR SCHOOL · THREE THINGS TO KNOW

01 SMELL AND FEEL | 02 COOLING | 03 SODIUM CHLORITE

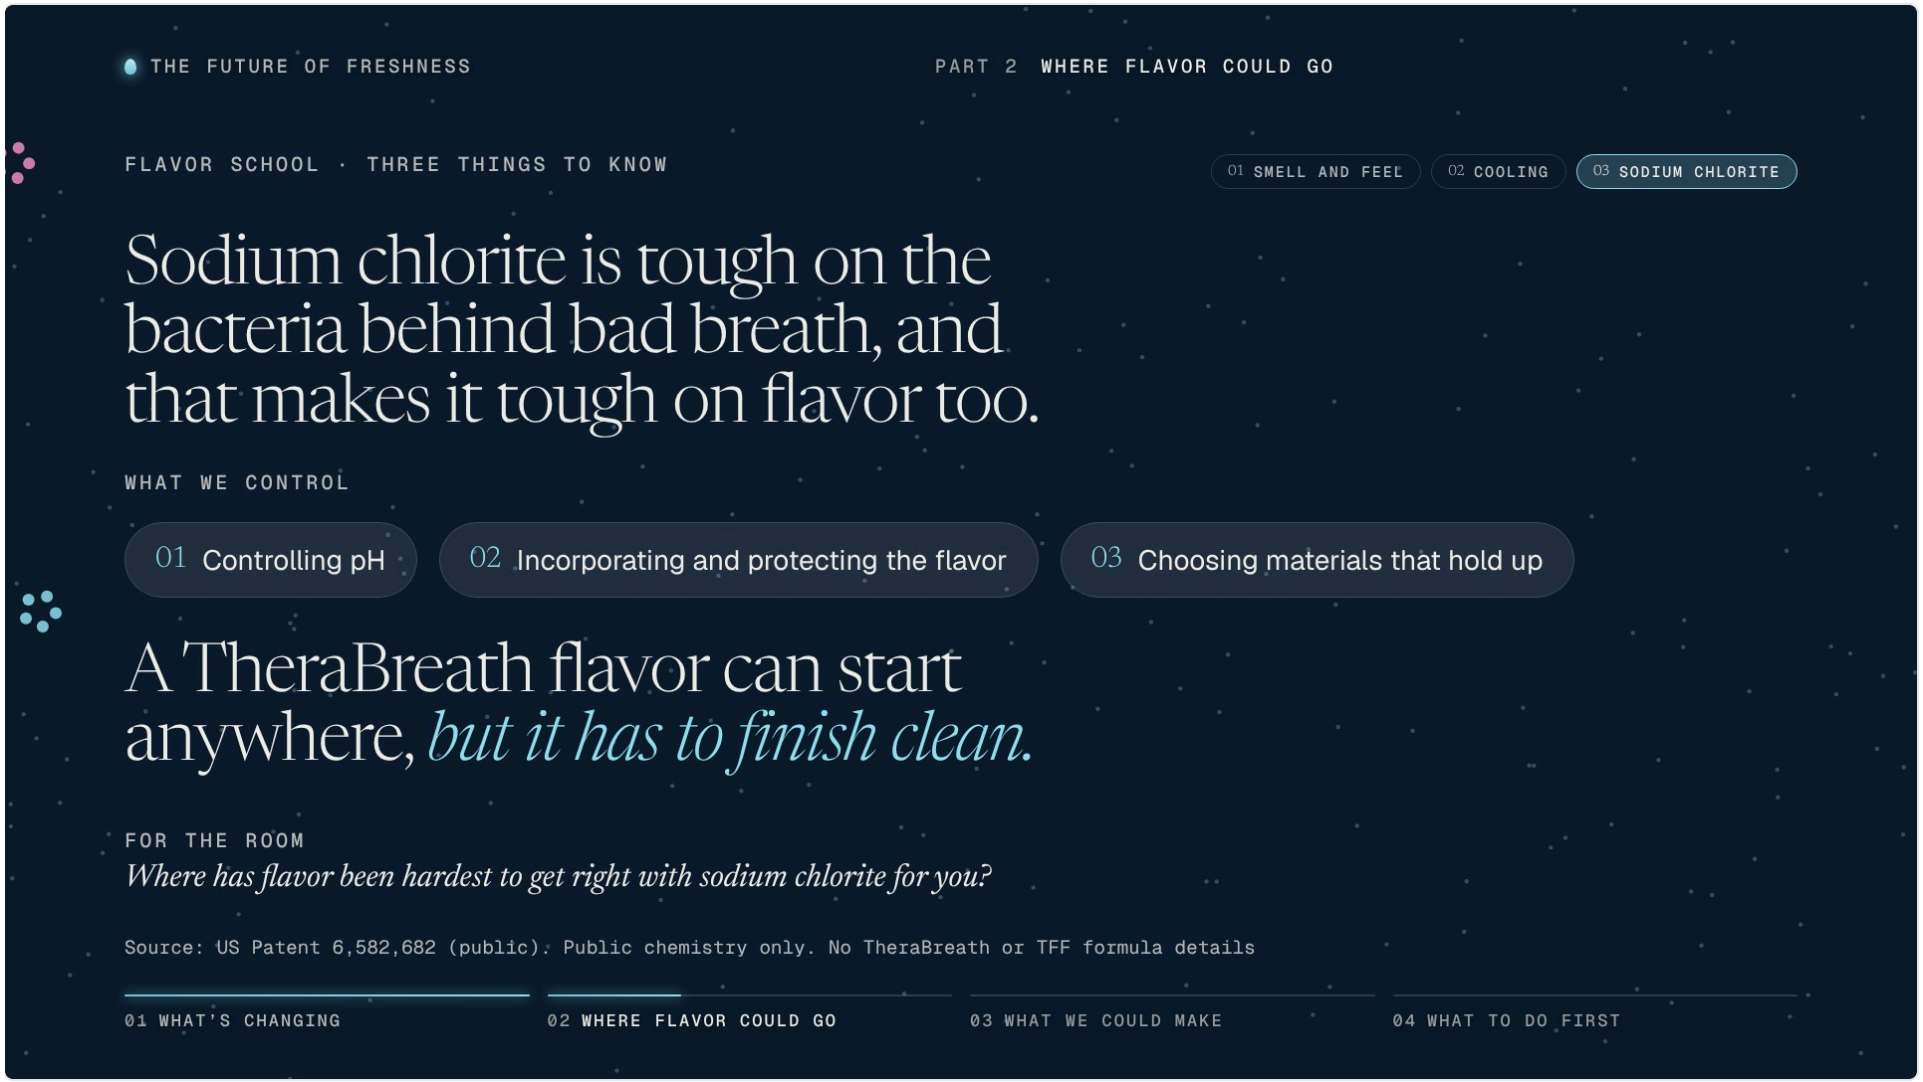

Cooling does two jobs.

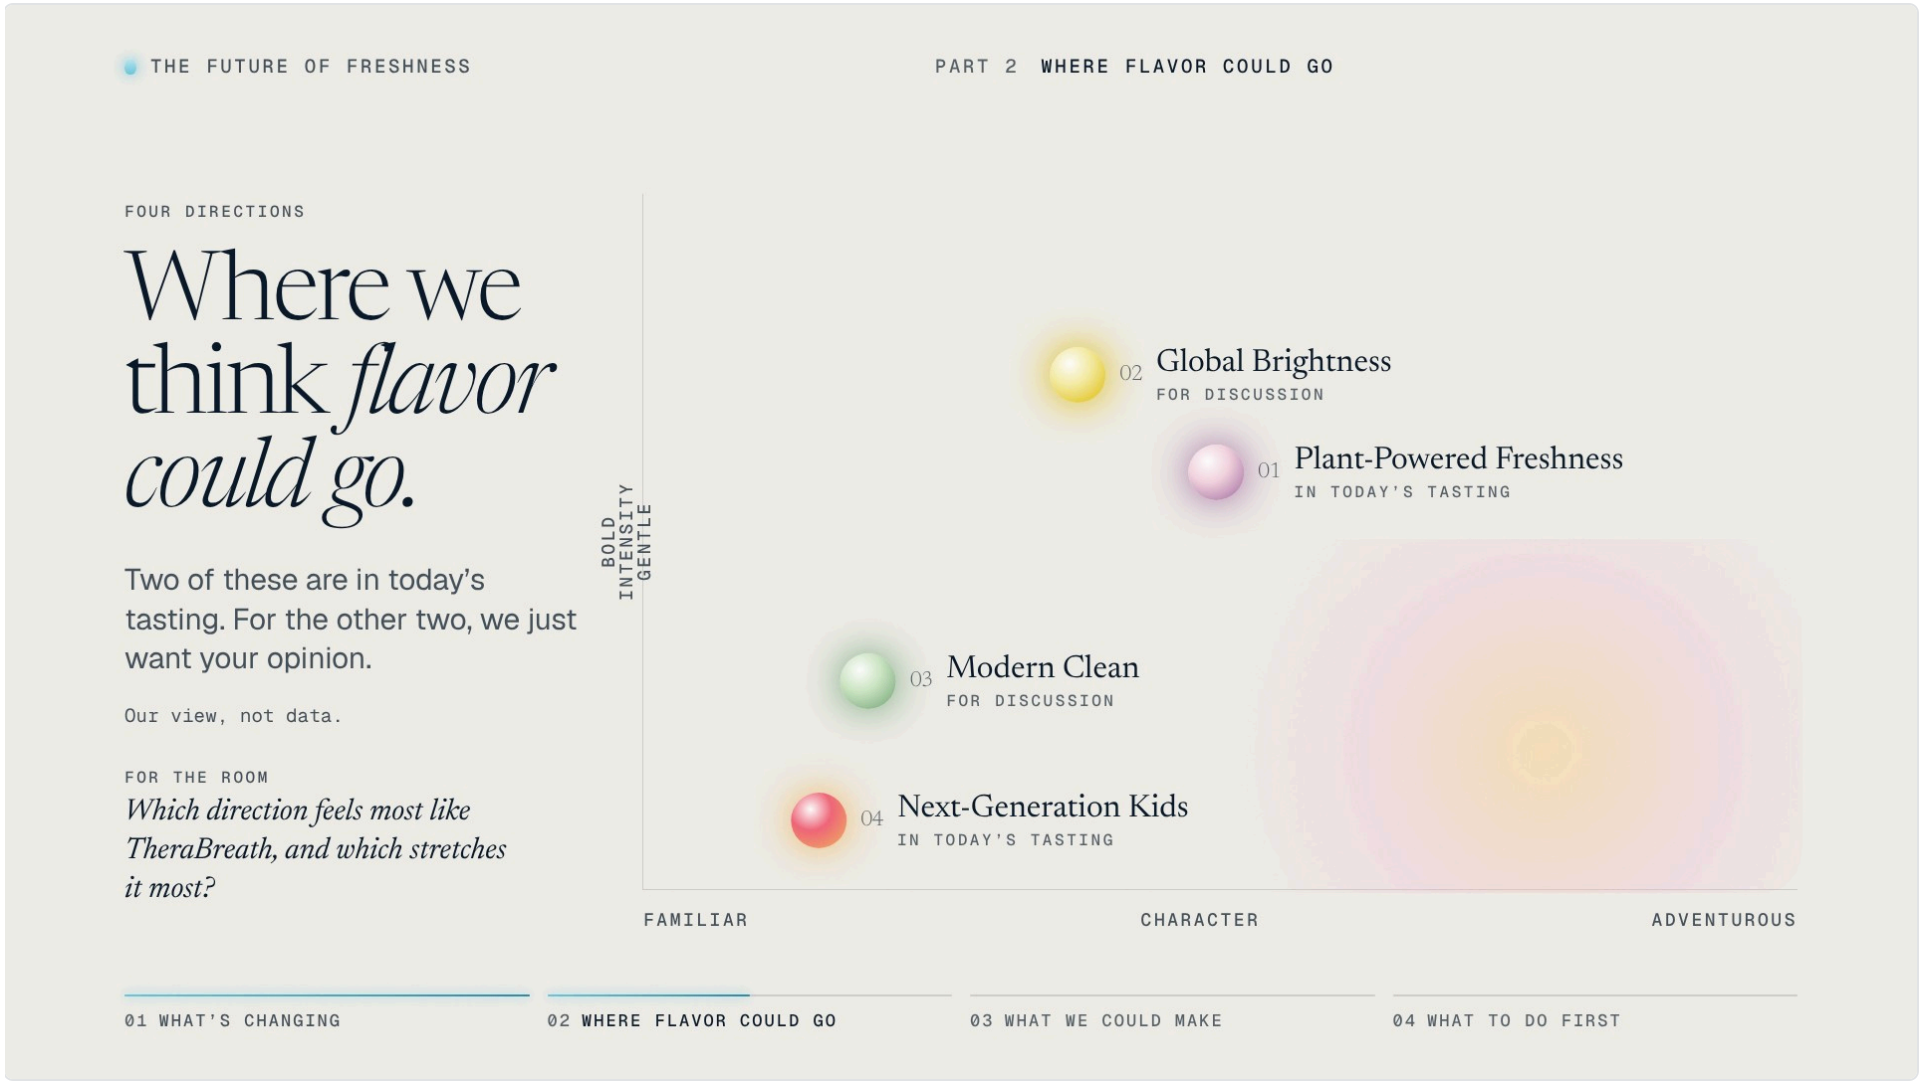

There's the hit when you first rinse, and there's how long it lasts. We tune both.

Drawn to explain, not measured.

01 WHAT'S CHANGING
02 WHERE FLAVOR COULD GO
03 WHAT WE COULD MAKE
04 WHAT TO DO FIRST

- Four directions on one map, from familiar to adventurous and from gentle to bold. It's our view, not data.
- The gentle, adventurous corner is where we think new users could come from. Two of these are in today's tasting.
- Ask: Which direction feels most like TheraBreath, and which stretches it most?
- Click a direction on the TV, or use the buttons in the presenter view, to open its profile card: the flavor era, what it tastes like and who it's for. Click it
- Plant-Powered Freshness: Citrus, herbs and a touch of floral, always finished with mint. Two of today's samples come from here. Don't name them yet.
- Global Brightness: Citrus people already know, taken somewhere new. Not in the tasting. We just want their opinion. Ask: Is there a citrus that could sit comfortably next to your mints?
- Modern Clean: Green, gentle freshness for people who find mouthwash too strong. Not in the tasting. We just want their opinion. Ask: Can a gentle

THE FUTURE OF FRESHNESS

PART 2 **WHERE FLAVOR COULD GO**

DIRECTION 1 OF 4 · IN TODAY'S TASTING

Plant-Powered Freshness

Citrus, herbs and a touch of floral, always finished with mint.

THE FLAVOR ARC

FIRST	THEN	FINISH
Citrus	Herbs and florals	Mint

WHAT IT TASTES LIKE

It opens bright with citrus and herbs and finishes on mint.

We'll tell you which samples these are after the tasting.

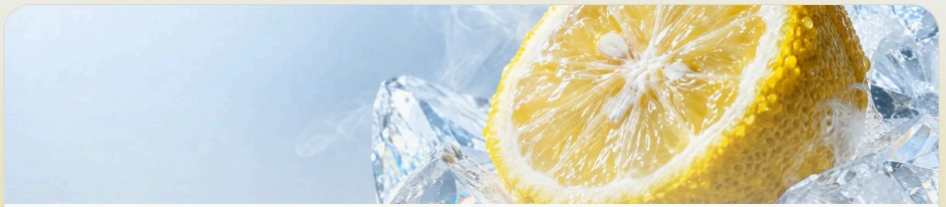

WHO IT'S FOR

Adults who'd like something besides straight mint.

THE FUTURE OF FRESHNESS

PART 2 **WHERE FLAVOR COULD GO**

DIRECTION 2 OF 4 · FOR DISCUSSION

Global Brightness

Citrus people already know, taken somewhere new.

THE FLAVOR ARC

FIRST	THEN	FINISH
Citrus	Yuzu	Cold and clean

WHAT IT TASTES LIKE

A burst of citrus, then a cold, clean finish.

WHO IT'S FOR

Morning rinsers, people heading out the door, and markets outside the US.

THE FUTURE OF FRESHNESS

PART 2 **WHERE FLAVOR COULD GO**

DIRECTION 3 OF 4 · FOR DISCUSSION

Modern Clean

Green, gentle freshness for people who find mouthwash too strong.

THE FLAVOR ARC

FIRST	THEN	FINISH
Cucumber	Green tea	Soft cooling

WHAT IT TASTES LIKE

Soft cooling, a few green notes and a calm finish.

WHO IT'S FOR

People who skip mouthwash because they find it too harsh.

THE FUTURE OF FRESHNESS

PART 2 **WHERE FLAVOR COULD GO**

DIRECTION 4 OF 4 · IN TODAY'S TASTING

Next-Generation Kids

Flavors that make kids actually want to rinse.

THE FLAVOR ARC

FIRST	THEN	FINISH
Fruit	Sweet	Clean

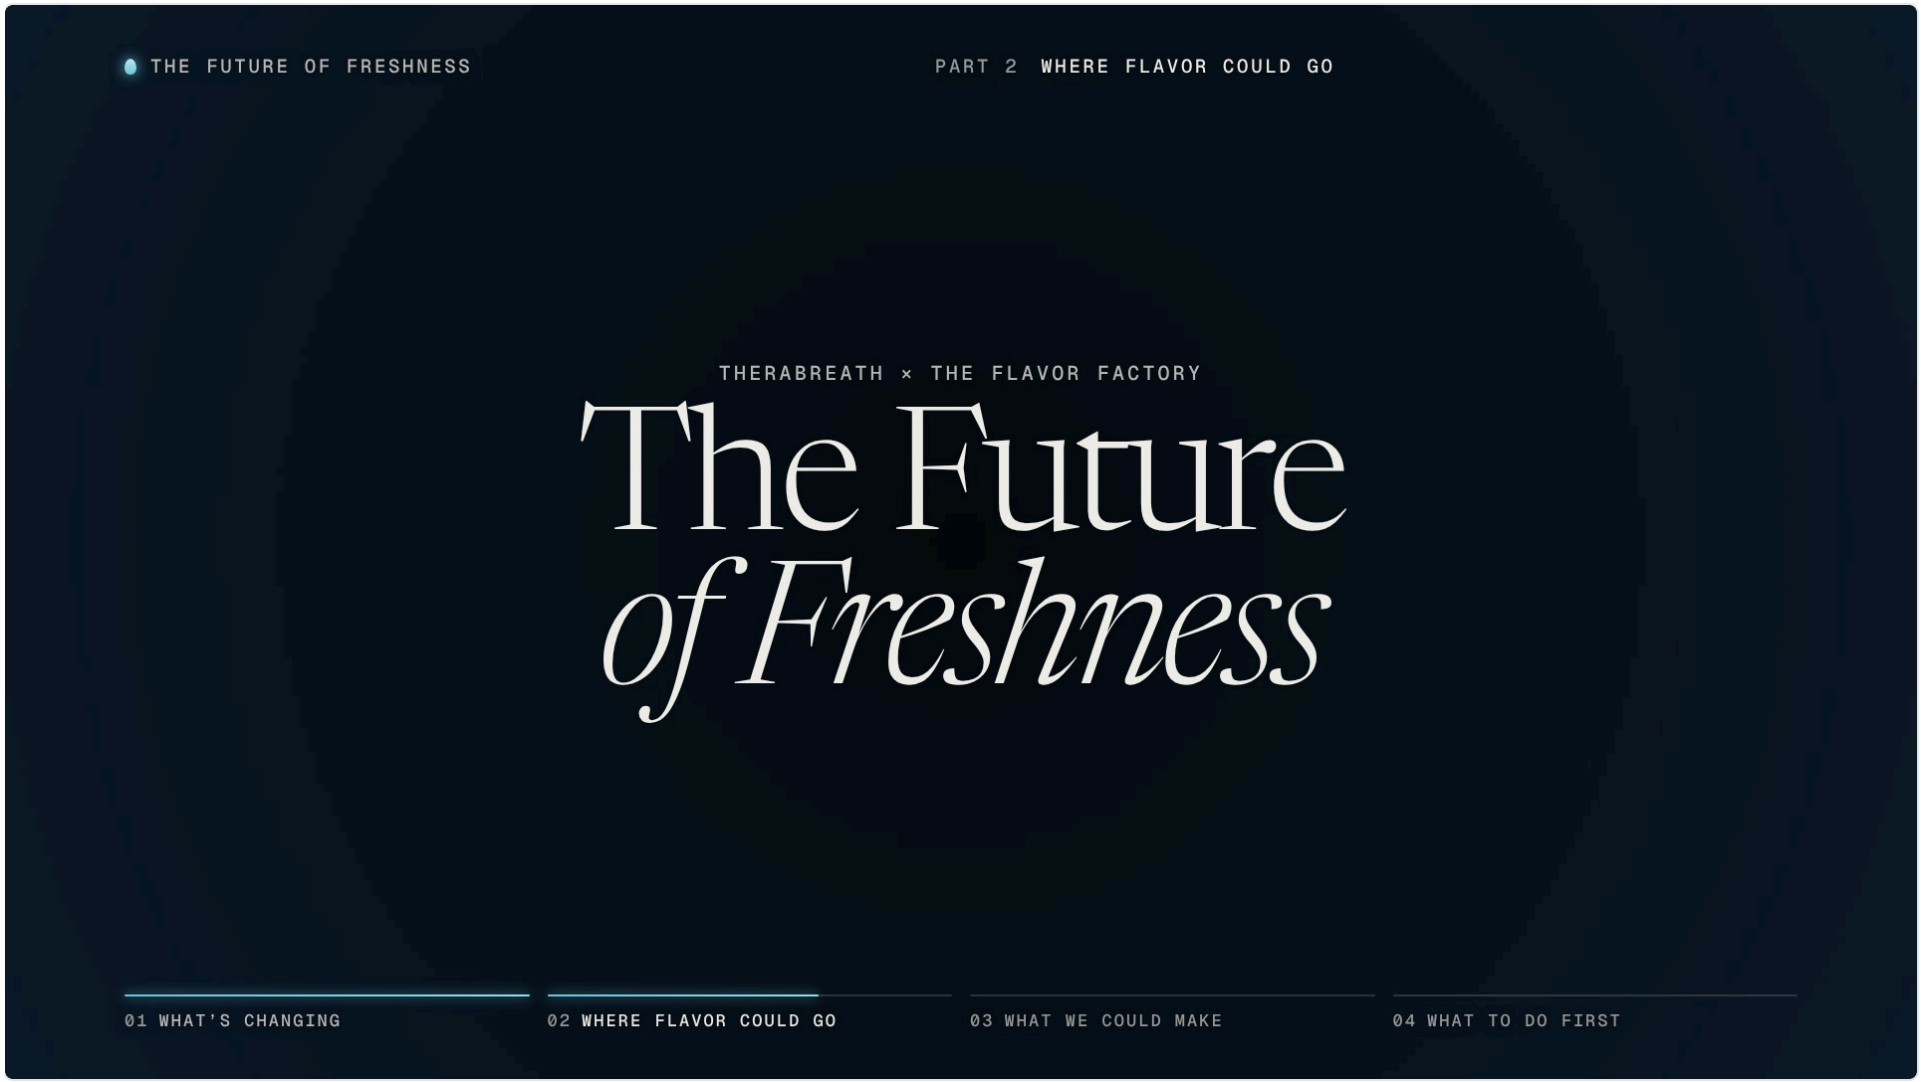

WHAT IT TASTES LIKE

Fruity and fun. We especially want your read on the sweetness and the finish.

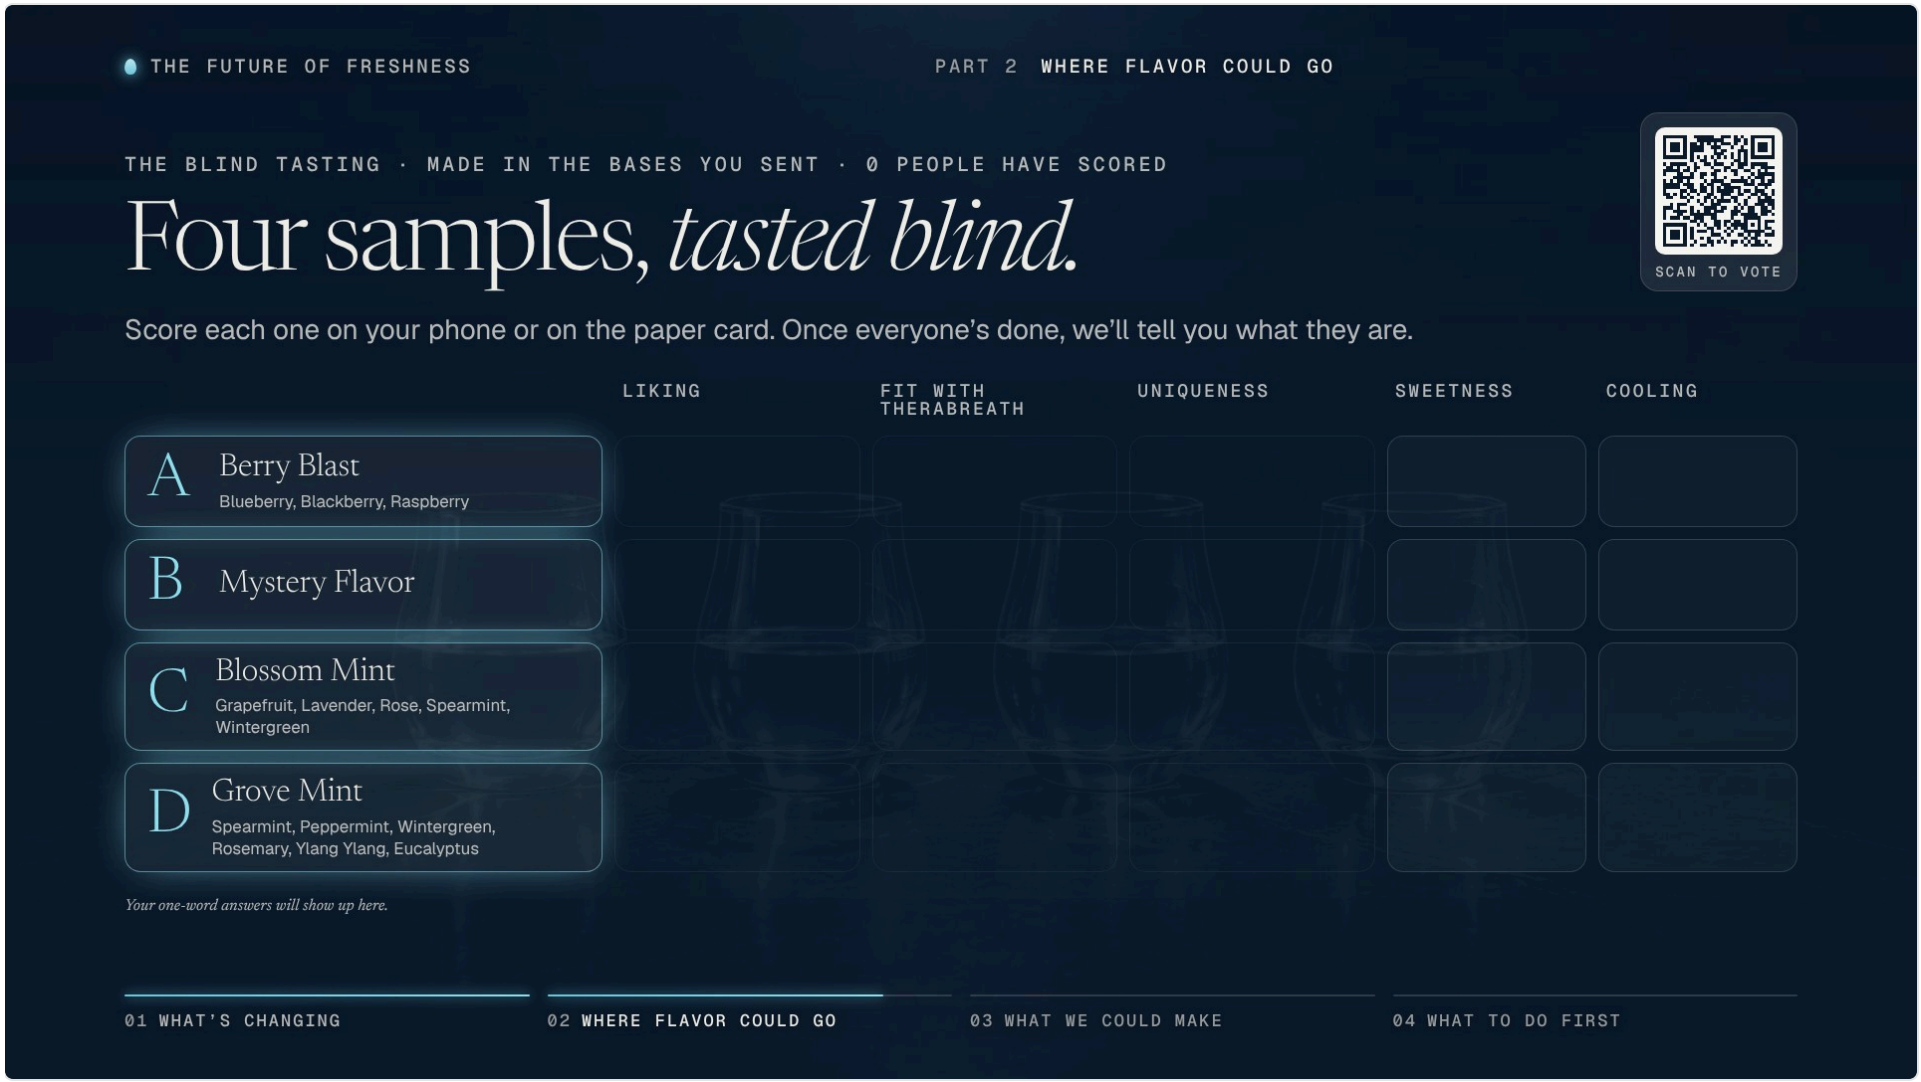

We'll tell you which samples these are after the tasting.

WHO IT'S FOR

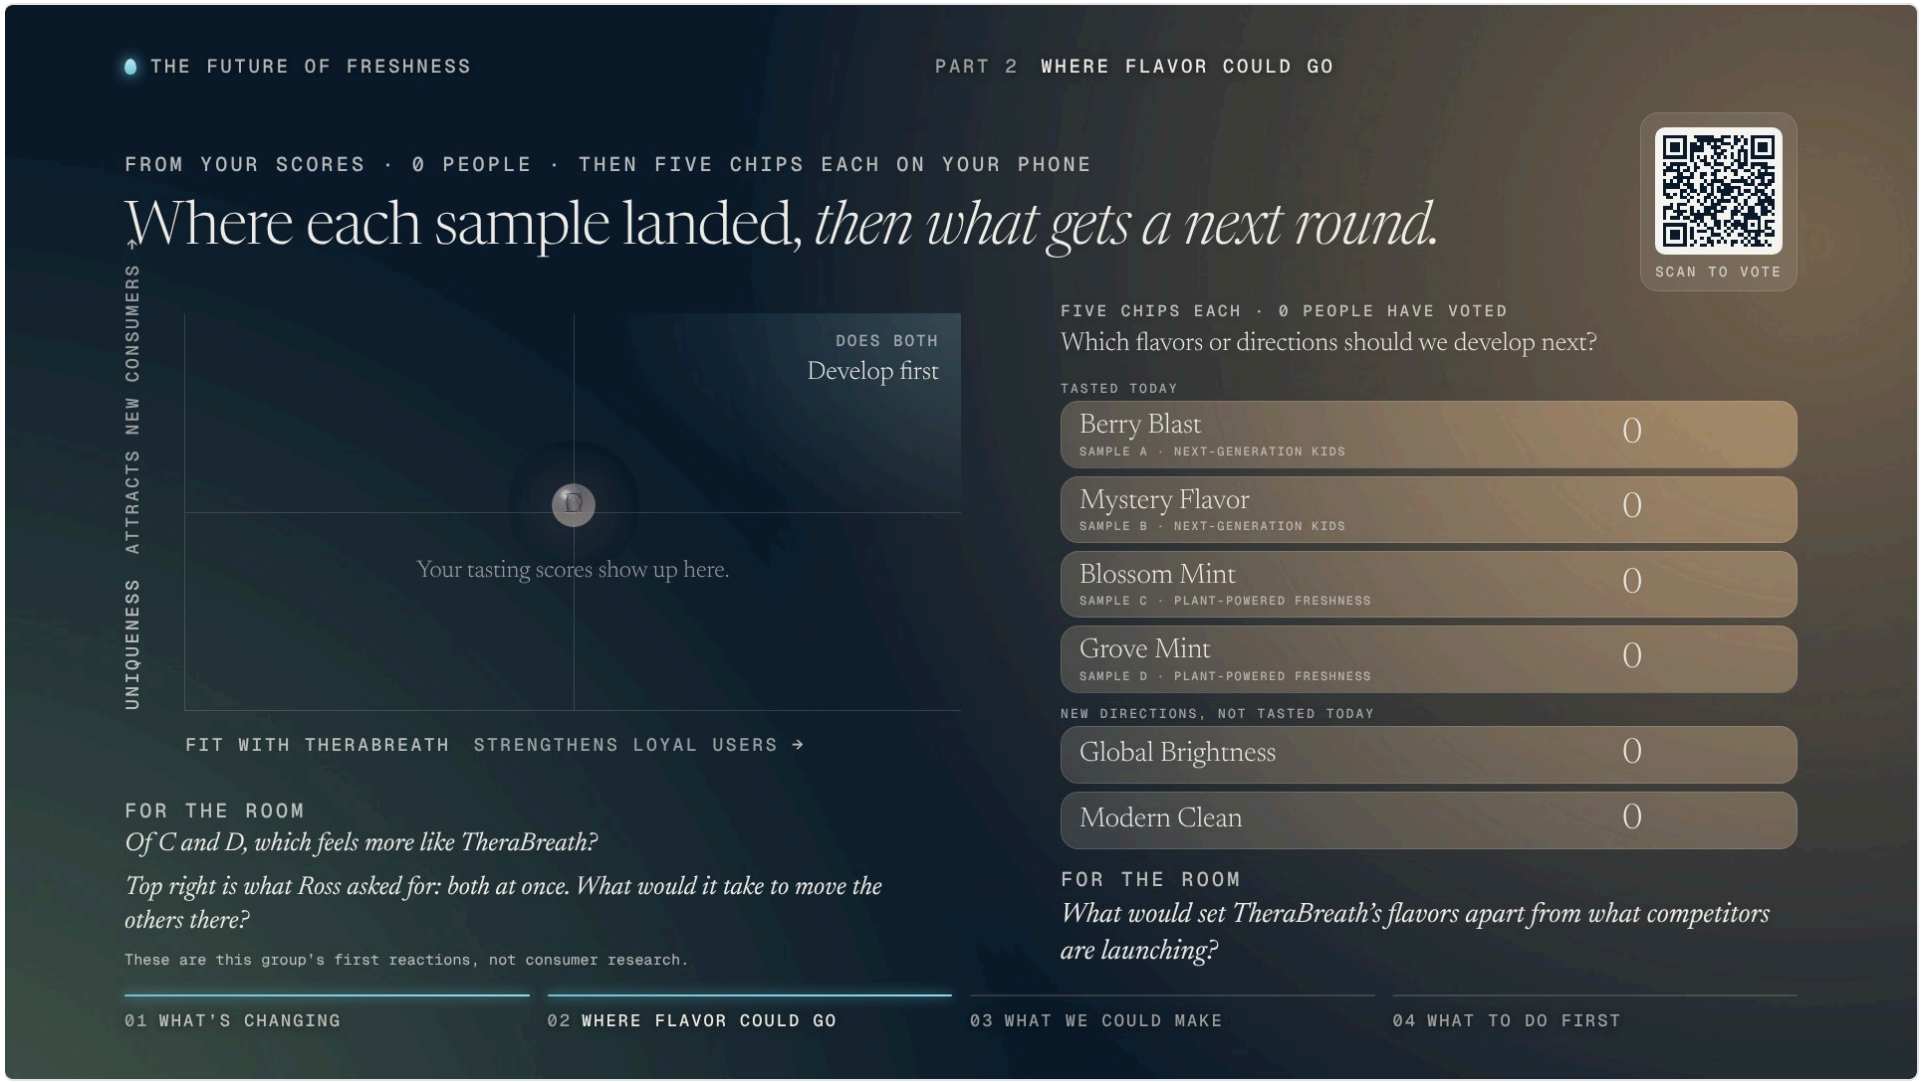

Kids and their parents. We haven't tested it with consumers yet.

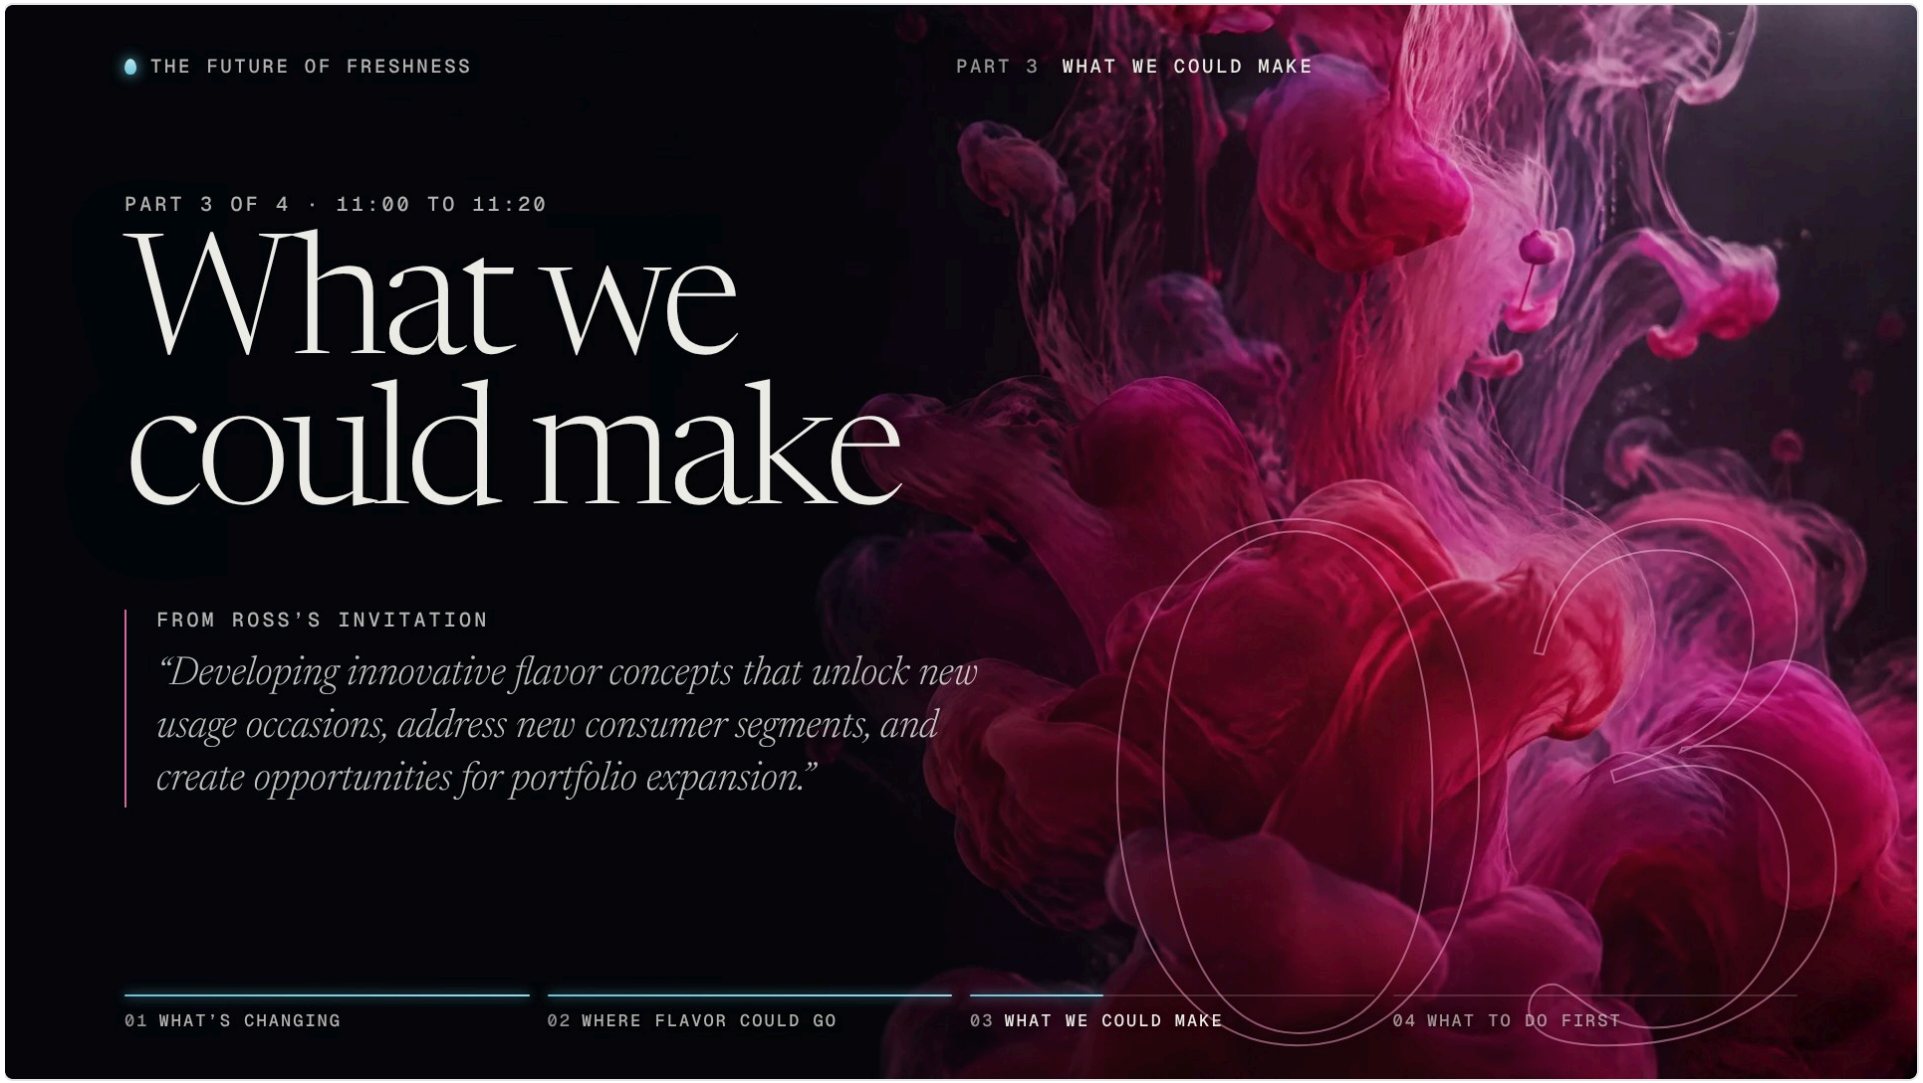

- At 10:37, right after the four directions: lights down and sound up. THE FLAVOR RACE runs 2:24. Don't announce it. The tasting starts at 10:40.
- Its flavor montage shows the flight's own fruits, the Mystery Flavor's among them, so the guesses won't be fully blind. Treat it as a hint and let the room have fun with it.
- Space or K pauses and plays, and R starts it again. The presenter view has the same buttons and the film's clock.
- Don't talk over it. When it ends, the closing card stays up: lights up, bring out the samples, and Next goes to the tasting. Running late? Skip it: the right arrow or] goes straight to the tasting.

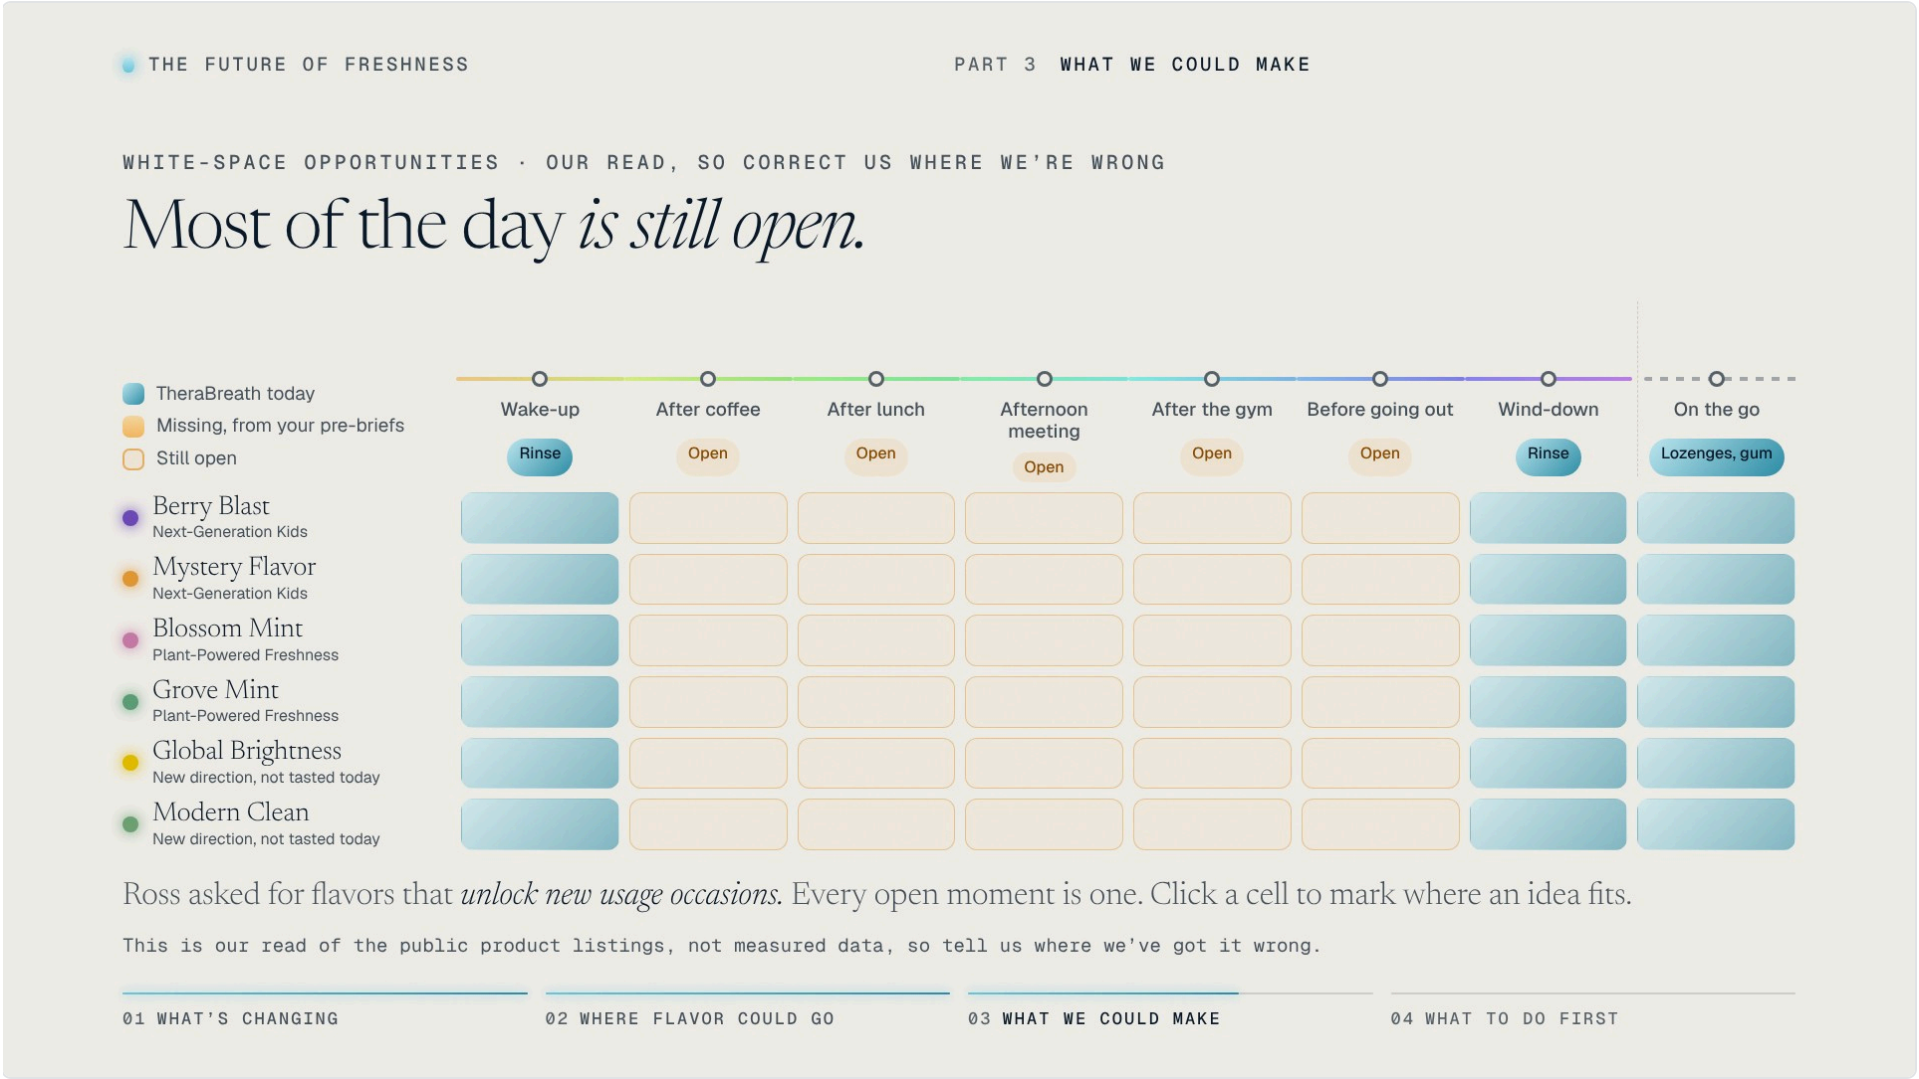

- Phones out, or paper cards for anyone who prefers them. Score each sample as you go: how much you like it, could it be a TheraBreath flavor, and how different it is from what's on the shelf, each from 1 to 5, then whether the sweetness and the cooling are not enough, just right or too much. One word is optional. As each paper card comes in, tap +1 paper card in the presenter view. We type the cards in after the morning.
- A and B are in the Kids base, and C and D are in the Fresh Breath base. We start with the Kids samples.
- B is the Mystery Flavor. Have everyone write down the fruits they get before we move on.
- Leave time for water and a pause between samples. Remind everyone these are first reactions, not consumer research.
- Build 1 shows their words and fruit guesses, and build 2 reveals the names.

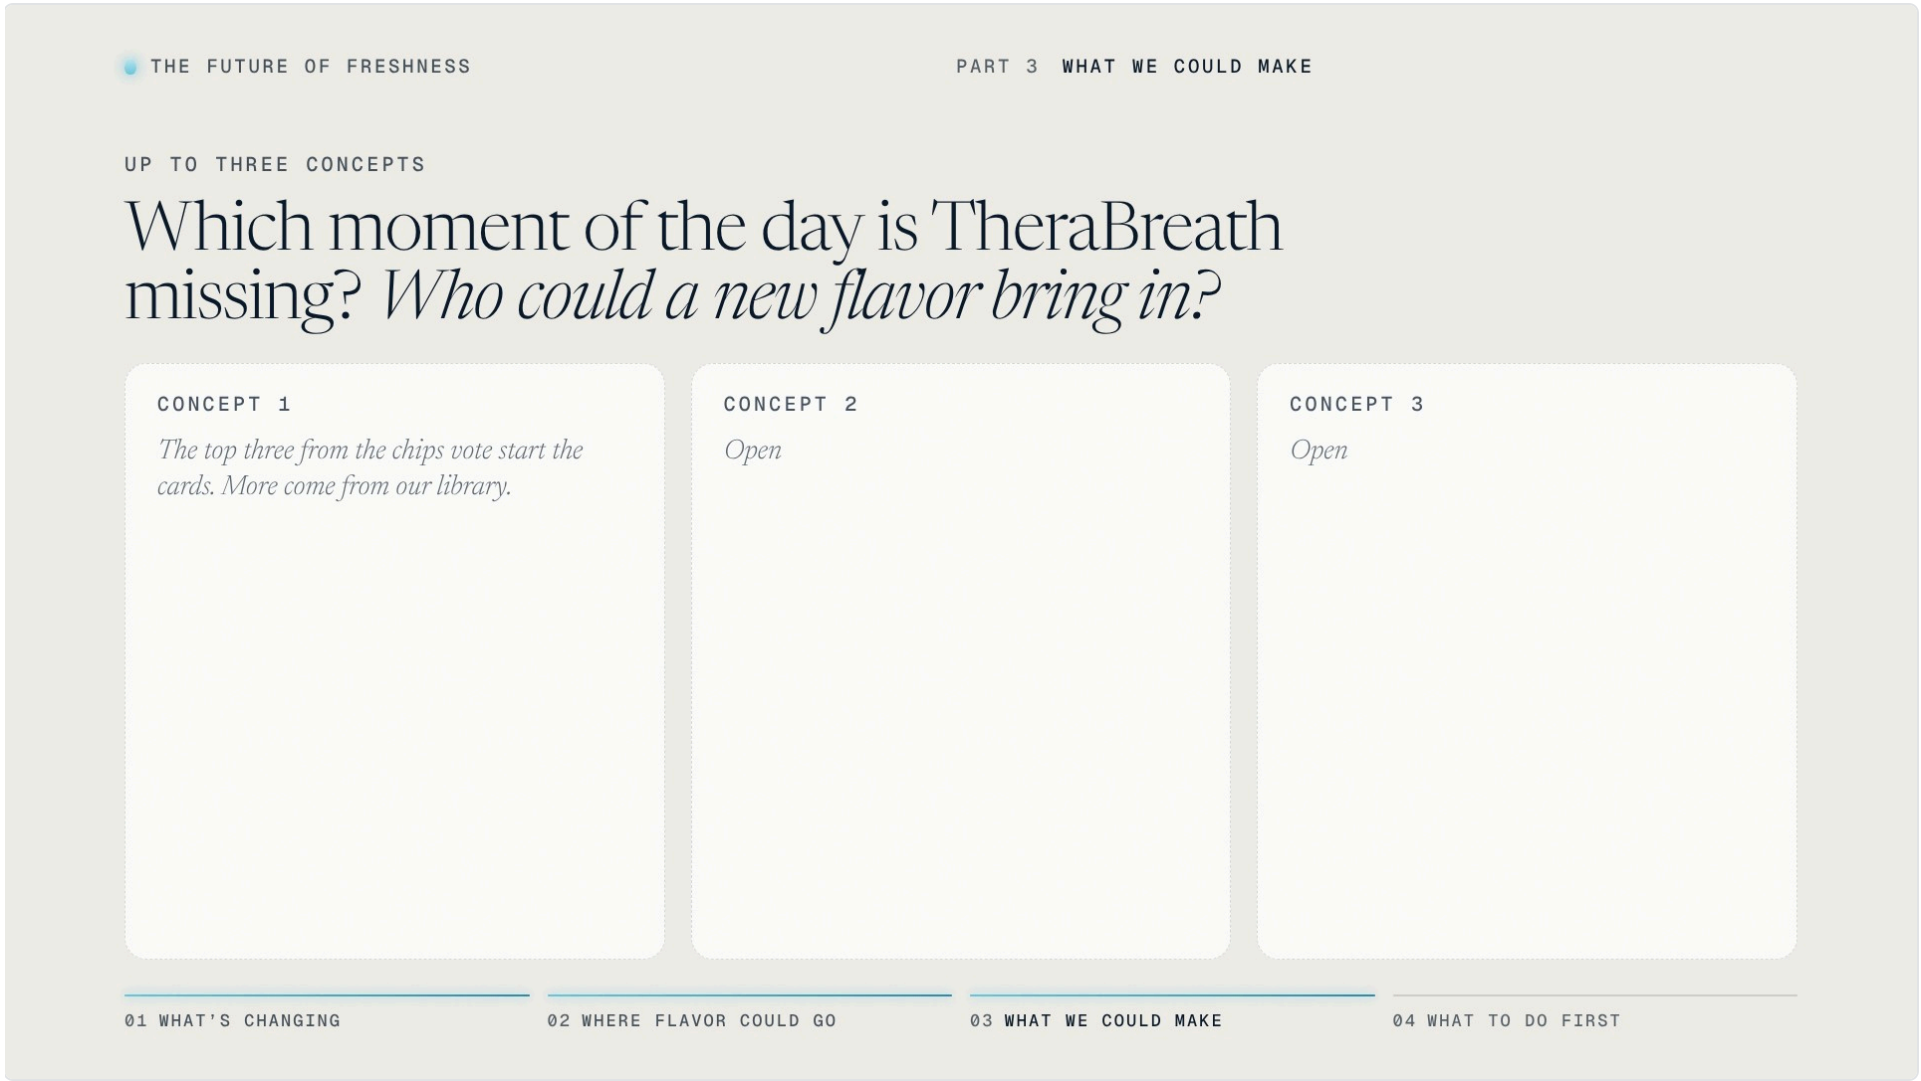

- The bubble chart comes straight from their scores. Across is could it be a TheraBreath flavor (loyal users), up is uniqueness, how different it is from what's on the shelf (new consumers), and the size of each bubble is how much they liked it.
- Ask: Of C and D, which feels more like TheraBreath?
- Ask: Top right is what Ross asked for: both at once. What would it take to move the others there?
- While they talk, phones are open for the chips. The question is: which flavors or directions should we develop next? Five chips each. The phone shows the four samples under Tasted today, and Global Brightness and Modern Clean under New directions, not tasted today. Stacking is fine. Hand chips go in from the presenter view.
- Build 1 shows the top three. They become the rows of the next slide.
- Then ask: What would set TheraBreath's flavors apart from what competitors are launching?

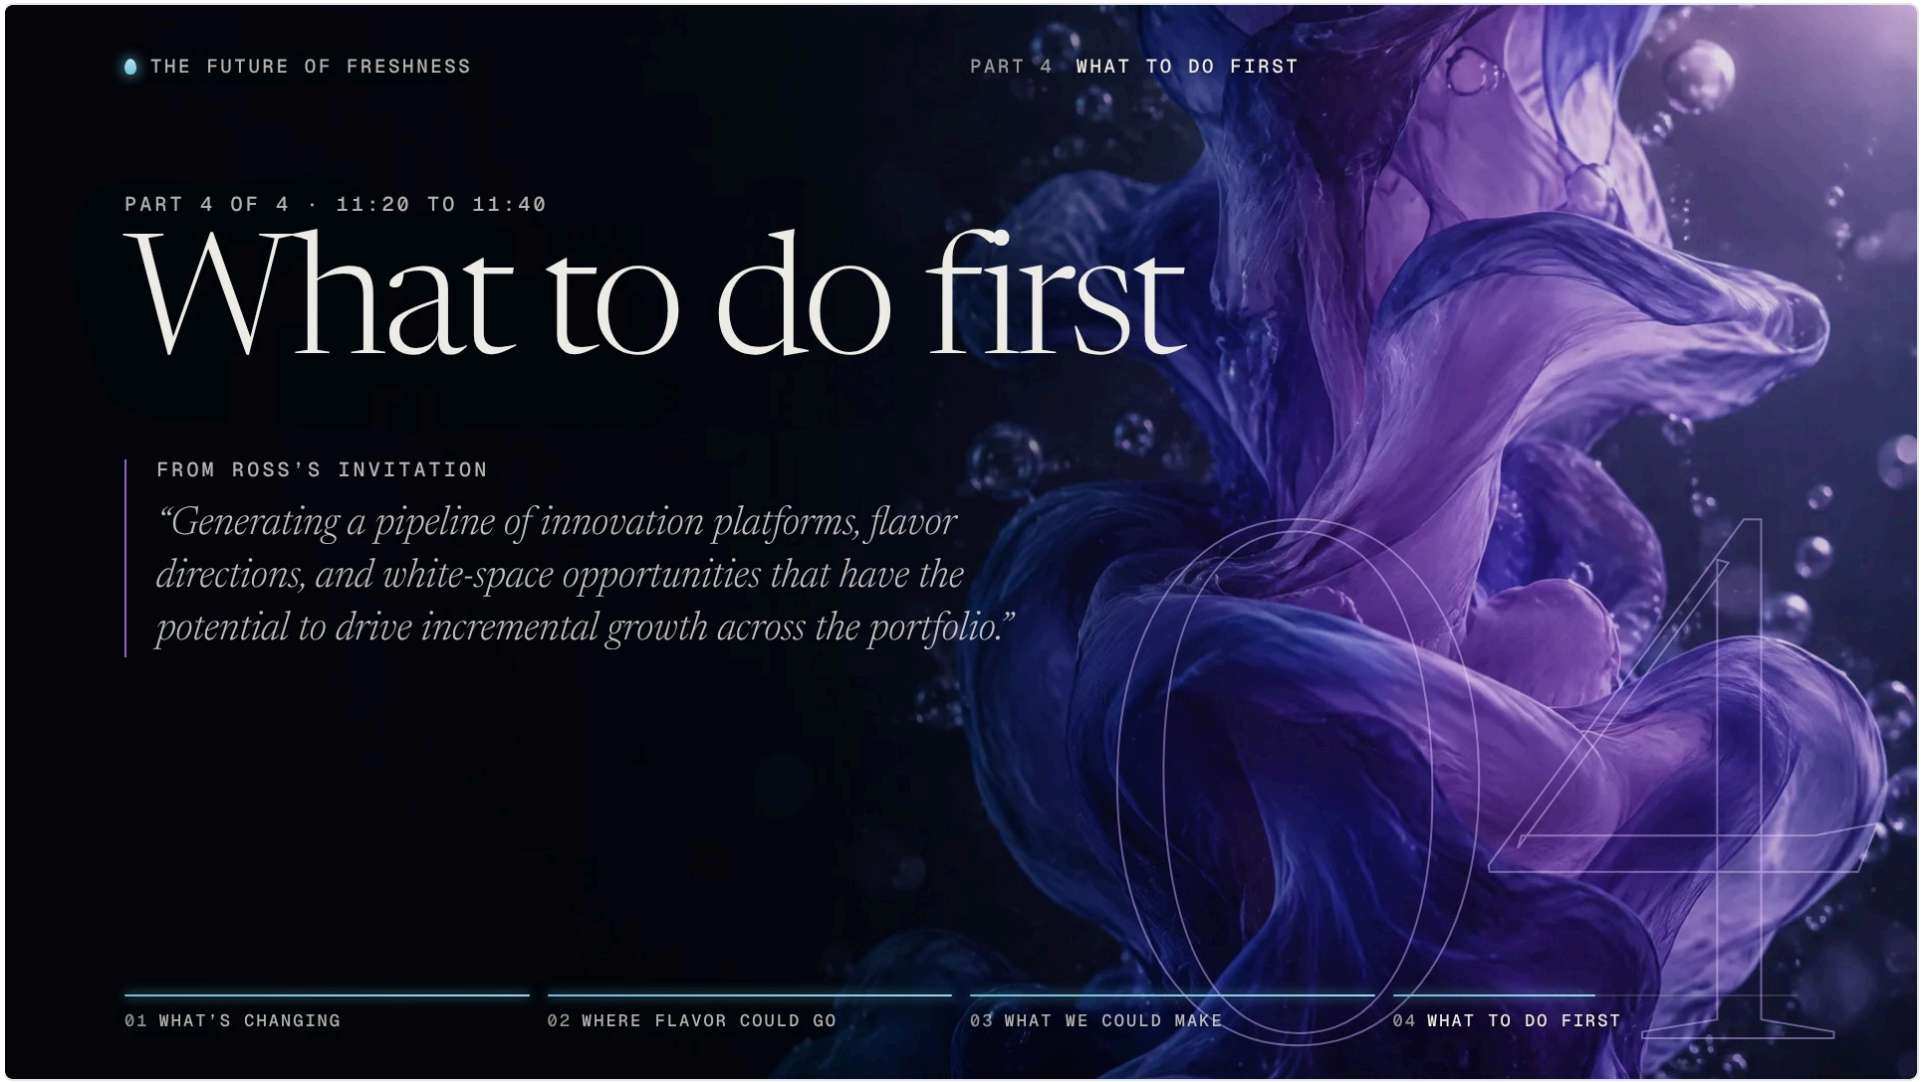

- Part 3 of 4, 11:00 to 11:20. Ross's third objective: Developing innovative flavor concepts that unlock new usage occasions, address new consumer segments, and create opportunities for portfolio expansion.
- This part is the day map and the concept cards, built from the top three chips.

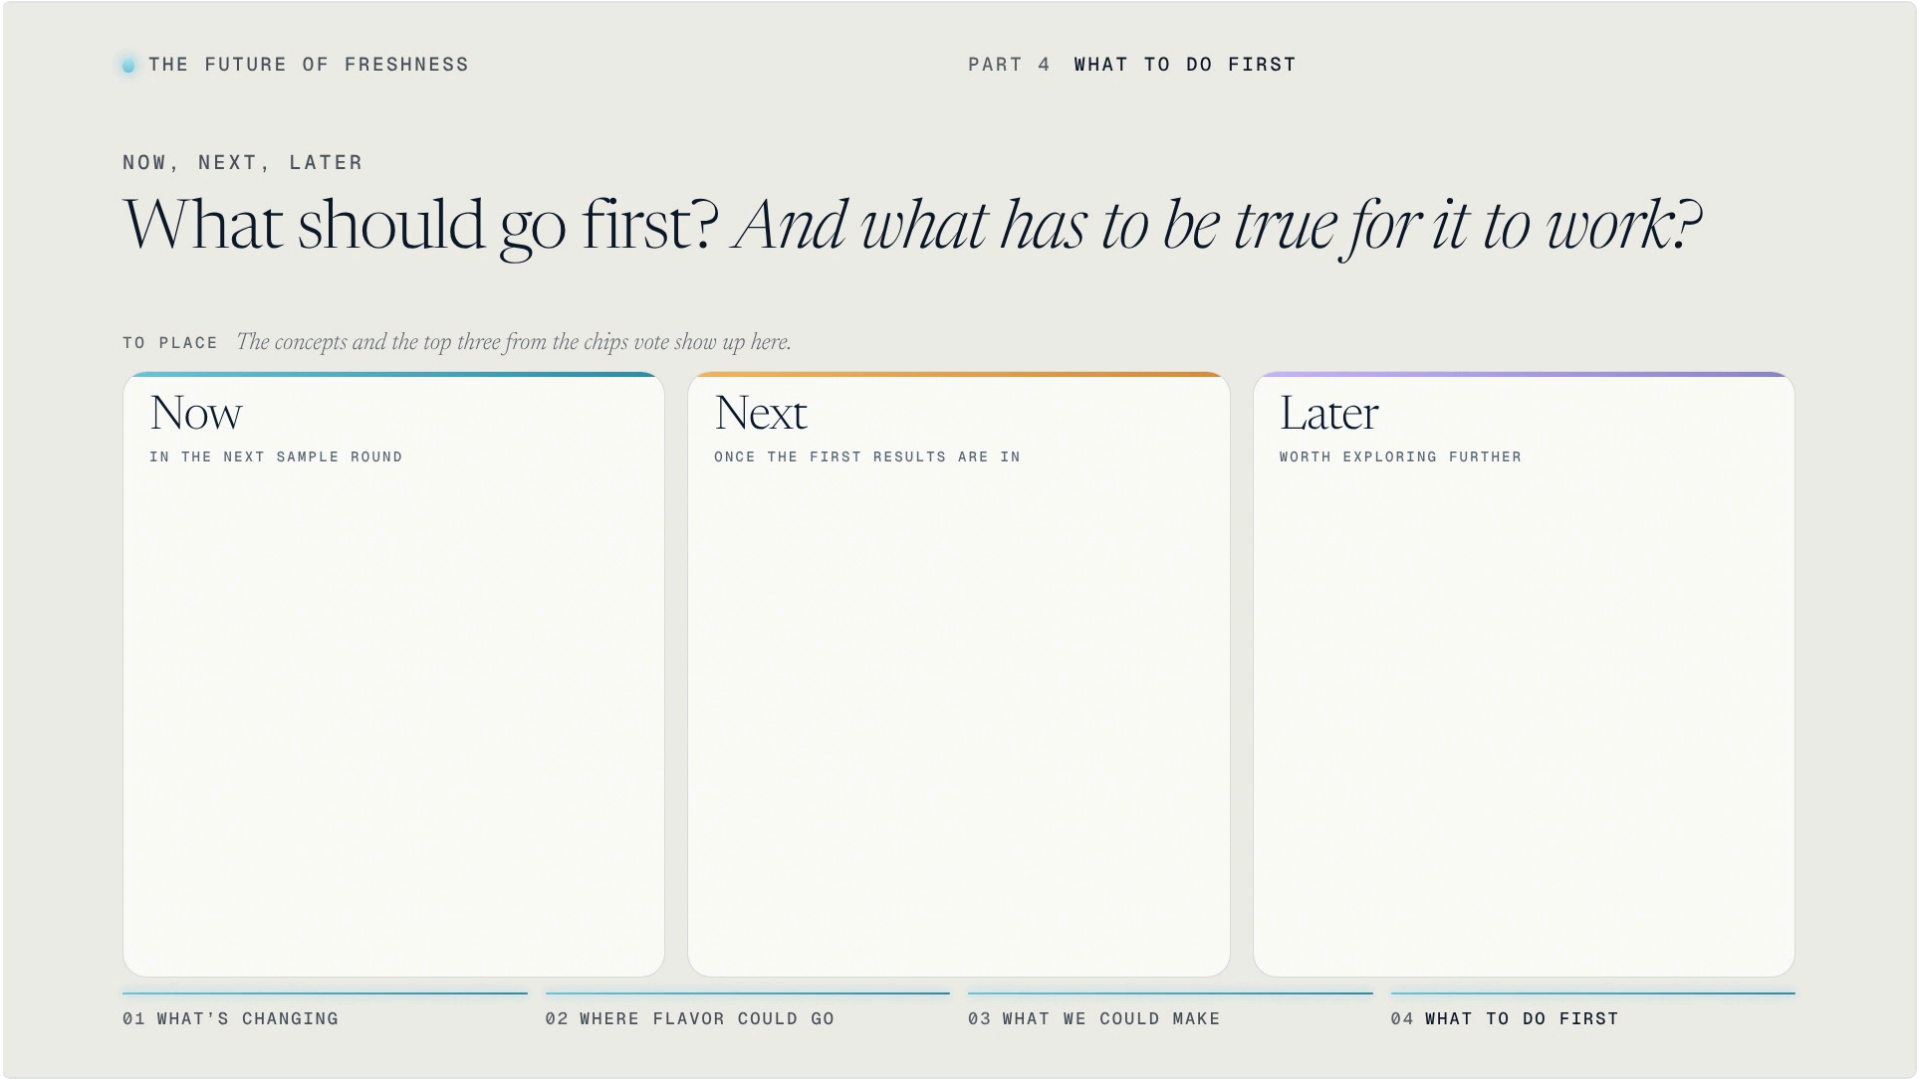

- This is a day from morning to night, with on the go set off to one side.
- Build 1 shows where we think TheraBreath is today: rinse in the morning and at night, plus lozenges and gum on the go. Ask them to correct us.
- Build 2 adds the moment their pre-brief answers say is missing, and build 3 shows everything that's still open.
- The rows are the top three from the chips vote, or all six if no chips came in. Click a cell to mark where each one could fit. The first mark for each one becomes the When on its concept card.

- The cards start themselves from the top three in the chips vote: where it starts is the pick, and the rest comes from its starter card and the day map. Treat every field as a first guess for the room to change.
- Aim for up to three. For each one, agree where it starts, who it's for, when they'd use it, its role in the range, the format and what it grows.
- Nothing to type. In the presenter view, tap an option to change a field, or swap the card for another from our library (the two example concepts on the run sheet are in it). Everything saves to the session as you tap.

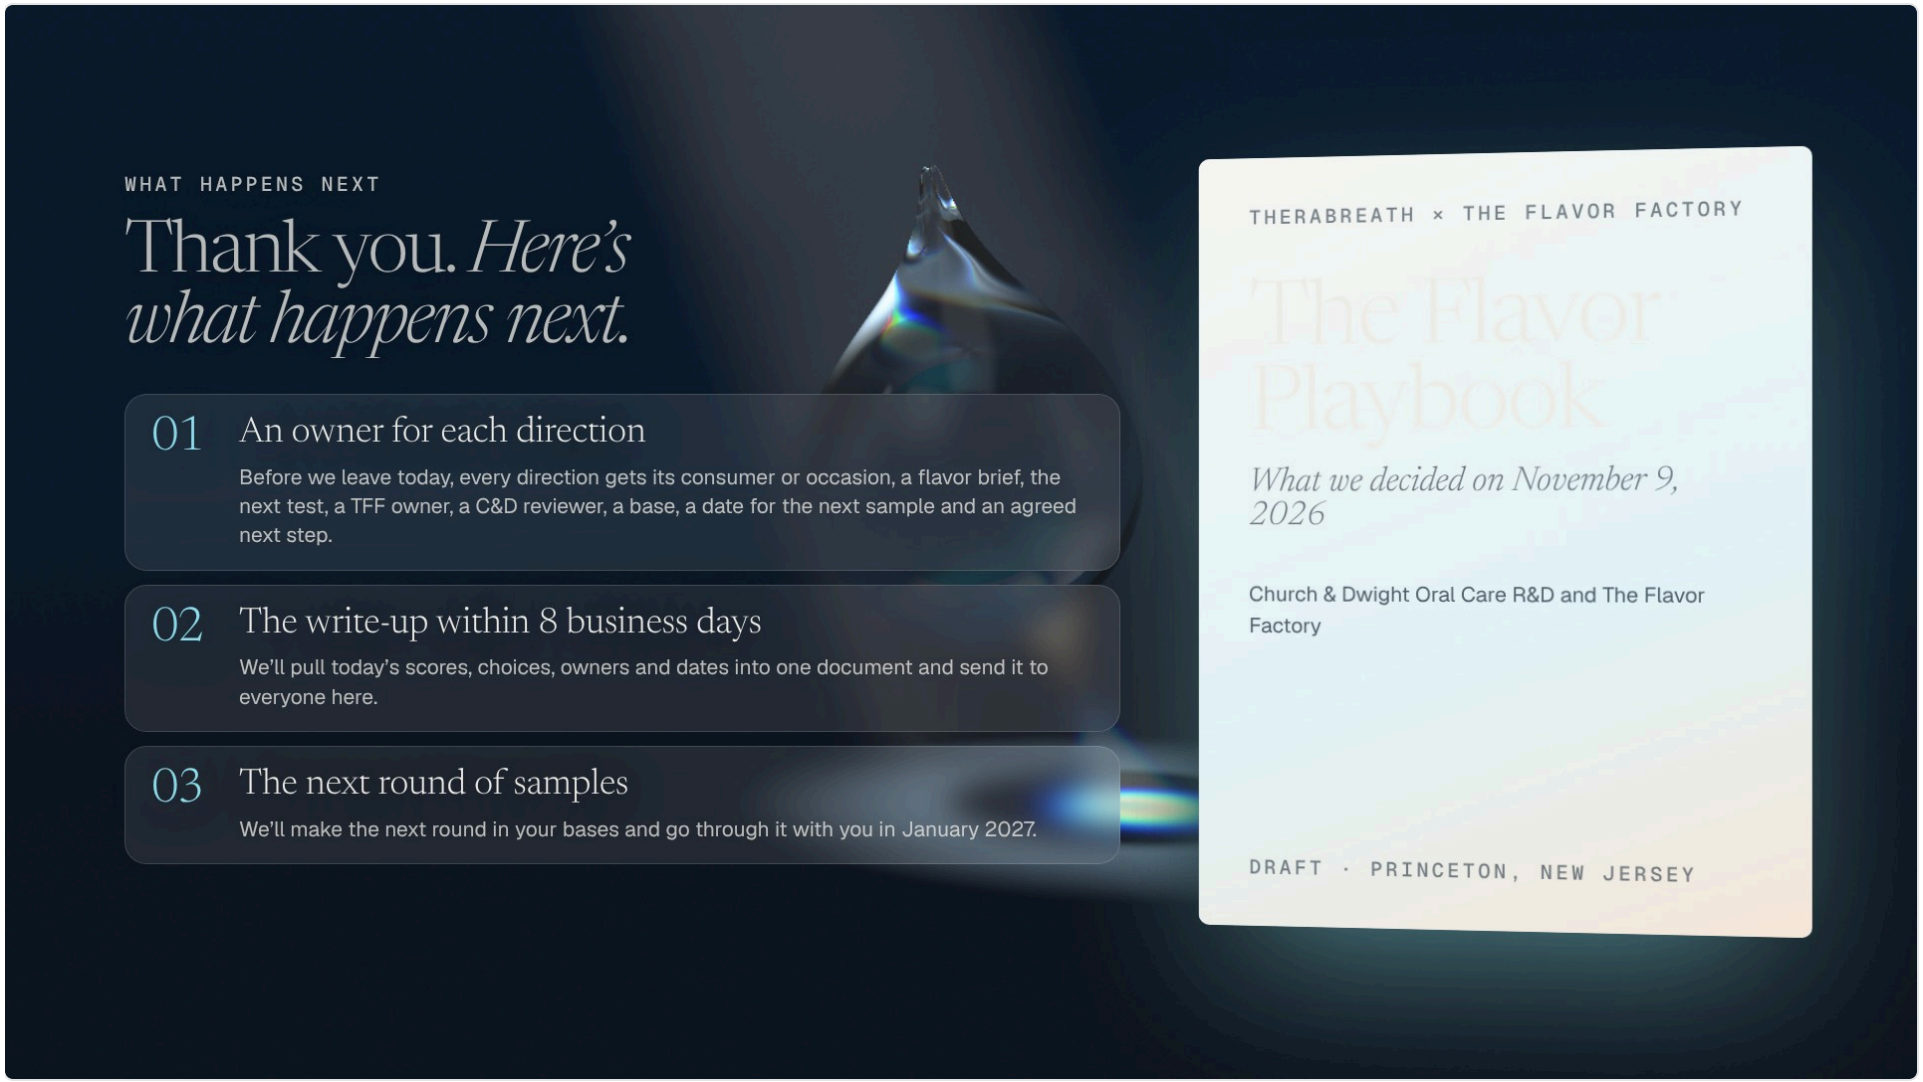

- Part 4 of 4, 11:20 to 11:40. Ross's fourth objective: Generating a pipeline of innovation platforms, flavor directions, and white-space opportunities that have the potential to drive incremental growth across the portfolio.
- This part is Now, Next, Later: what goes first, who owns it and the next step.

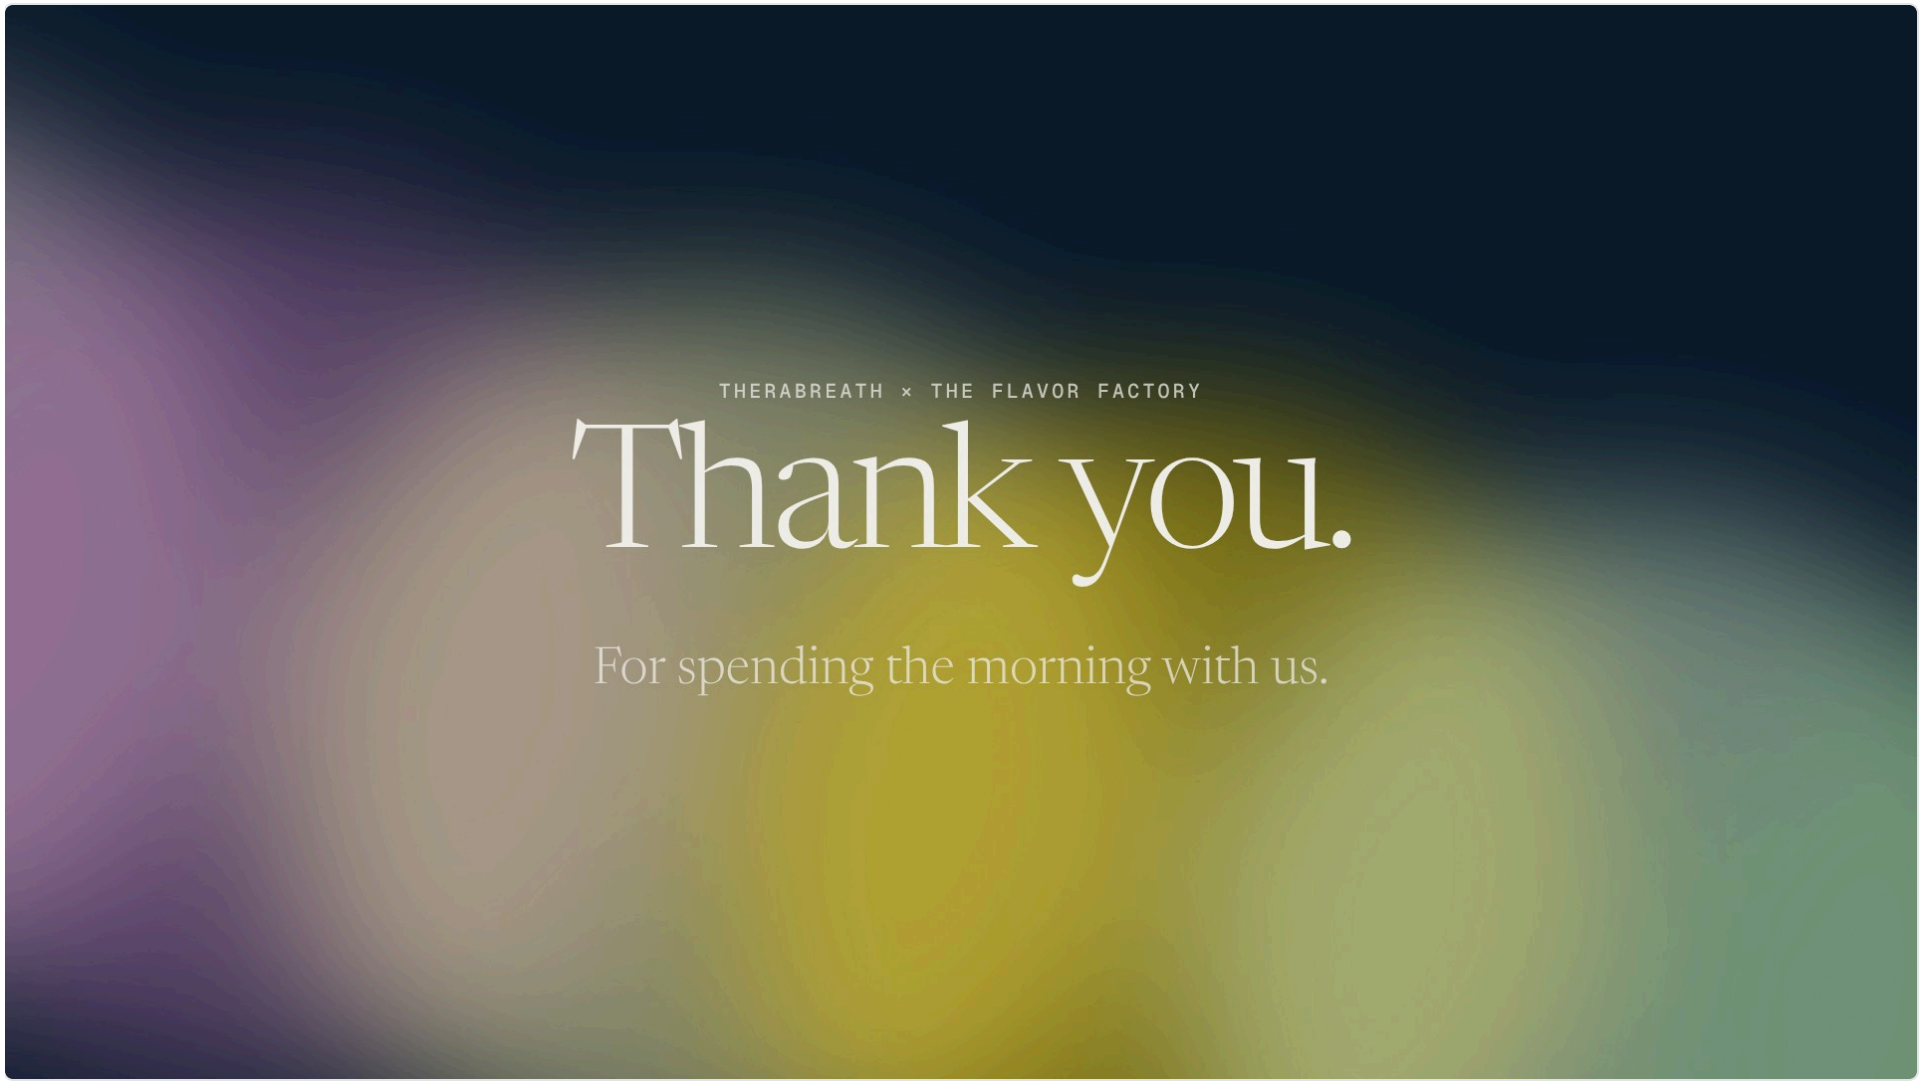

- The concepts and the top three from the chips sit in the tray. Tap one, then tap Now, Next or Later to place it. Placing it is the vote: there's no separate dot vote.
- Tap a line to move it or take it back. In the presenter view, tap its fields: the consumer and occasion, the next test, a TFF owner, a C&D reviewer, the base, the next sample date (the January review unless the room says otherwise) and the next step everyone agrees on.
- The flavor brief drafts itself from the direction's profile. We finish it in the write-up, so don't spend the room's time on it.
- If nobody can say yet, tap To confirm. The write-up highlights every one.
- What would you need to see in the next round of samples?

- This pulls together everything we decided this morning: the trends, the directions, the concepts and the plan.
- Builds 1 to 4 open one chapter each at full size: the trends, the directions with the tasting, the concepts and the plan. Read the plan back, owners and all.
- Builds 5 to 7 are the three next steps: an owner for each direction, the write-up within 8 business days and the next round of samples in January 2027. The dates still need confirming before November 9.
- Then thank everyone for their time.

WHAT HAPPENS NEXT
Thank you. Here's what happens next.
01
An owner for each direction
Before we leave today, every direction gets its consumer or occasion, a flavor brief, the next test, a TFF owner, a C&D reviewer, a base, a date for the next sample and an agreed next step.
02
The write-up within 8 business days
We'll pull today's scores, choices, owners and dates into one document and send it to everyone here.
03
The next round of samples
We'll make the next round in your bases and go through it with you in January 2027.
THERABREATH × THE FLAVOR FACTORY
The Flavor Playbook
What we decided on November 9, 2026
Church & Dwight Oral Care R&D and The Flavor Factory
DRAFT · PRINCETON, NEW JERSEY

- Thank everyone for the morning. Questions until 12:00, then lunch, hosted by Church & Dwight.
