Run sheet

THE FUTURE OF FRESHNESS · MONDAY, NOVEMBER 9, 2026 · DARWIN ROOM · FOR THE FLAVOR FACTORY TEAM · NOT FOR HANDING OUT

FROM 9:30: SET UP THE ROOM

- [ ] Connect the laptop to the TV as an extended display, not a mirror. Open the team link, then Present on the day (/host), drag that window to the TV and press F for full screen. Then press P: the presenter view opens in its own window. Keep it on the laptop's screen. It has the talking points, the time in Princeton against this sheet, and buttons that move the presentation. Only this laptop should open the presentation on the day, because it moves everyone's phones. (Church & Dwight's password can't open it.) If the TV will only mirror, skip the presenter view and use this sheet.
- [ ] Phones: people join by scanning the code on the first screen. Phones use their own data, so the room Wi-Fi only matters for the laptop. Ross offered to help us get on the network. If it fails, present from the backup PDF and the film file on the laptop, without the voting.
- [ ] Film backup: the day before, download THE FLAVOR RACE from the team page (flavor-race.mp4: 2:24, 2560 × 1440, with sound) and keep it on the laptop's desktop. Open it once to check it plays. If the site won't play it on the day, play the file from there, full screen, with the sound up. The opening film isn't shown in the room: we open with our own welcome.
- [ ] Sound and picture check, before anyone arrives and on the rehearsal session so nobody's phone moves: open /host?code=REHEARSE on the TV, press F for full screen, then Go to THE FLAVOR RACE (slide 11) in the presenter view, or open /host?code=REHEARSE#11. Check it fills the screen, play ten seconds through the speakers and set the volume, and press R to check it starts again. Then close that window and open Present on the day. Keep the film off the TV once people start arriving.
- [ ] Rehearse on /host?code=REHEARSE (the team page links to it), never on /host itself, so rehearsal votes stay out of the live session. Leave the live session FOF1109 alone the night before: it holds everyone's pre-brief answers, and the team page shows how many are in.
- [ ] Samples: A and B in the Kids base and C and D in the Fresh Breath base. During setup, pre-pour them into cups coded A to D on covered trays, out of sight, and bring the trays out as THE FLAVOR RACE ends. Set out water to rinse, cups to spit into and napkins.
- [ ] Join one loaner phone or tablet to the live session at setup (scan the code on the arrival screen), for anyone who arrives without a phone. Keep it charged and on the table.
- [ ] If we're running late, see If we run behind below. The presenter view shows how far over the current part is and whether the short version is on.
- [ ] Nothing gets typed on the day. On the vote slides, the presenter view has a button to add a hand vote for each option, and one to take it back. The concept cards and Now, Next, Later are filled in by tapping options.
- [ ] Paper scorecards are the last resort (print a few from /scorecard, with pens). On the tasting, tap +1 paper card in the presenter view for each one handed in, and -1 for a mistake. The cards are typed in after the morning.

AT A GLANCE: OWNERS, KIT AND WHAT EACH BLOCK SHOULD LEAVE US WITH

TIME	BLOCK	OWNER	TECHNOLOGY AND MATERIALS	OUTPUT
10:00 to 10:10	Welcome, who we are and your four objectives		Laptop on the TV as an extended display, the presenter view (P), the QR code on the arrival screen, Wi-Fi for the laptop, the loaner phone or tablet joined.	Phones joined, and the pre-brief answers on screen if any came in.
10:10 to 10:25	What's changing: your portfolio, the market and seven trends		Phones for the trend vote; hand votes in the presenter view for anyone without one.	The three trends that matter most, and what we missed.
10:25 to 10:40	Flavor School, then four directions		The presentation; speakers loud enough for THE FLAVOR RACE (checked before anyone arrives), the presenter view for its controls and the film saved on the laptop as a backup.	The room's first reactions to the four directions, before anything is tasted, and THE FLAVOR RACE at 10:37 (or skipped if we're late).
10:40 to 11:00	A blind tasting in your bases		The four samples pre-poured into coded cups (A to D) on covered trays, water, spit cups, napkins, phones and the loaner phone or tablet. A few paper scorecards and pens as a last resort.	Scores for all four samples, the fruit guesses, the names revealed, and five chips each on what gets a next round.
11:00	*Suggested transition: while the chips go in, clear the cups and pens so the table is free at 11:00.*			
11:00 to 11:20	From samples to concepts		The day-map cells on the TV, and the concept cards in the presenter view. All taps.	Up to three concepts, each with where it starts, who it's for, when, its role in the range, the format and what it grows.
11:20 to 11:40	White space, then Now, Next, Later		The presenter view for Now, Next, Later (all taps), or tap the board on the TV.	Each direction under Now, Next or Later with its consumer or occasion, flavor brief (drafted), next test, TFF owner, C&D reviewer, base, next sample date and agreed next step, or To confirm.
11:40 to 12:00	What we decided and what happens next		The presenter view for the read-back, and the results page ready to save as a PDF.	The plan read back with its owners, and the results page saved as a PDF.

THE TASTING TABLE (CHECK BEFORE 10:40)

- [ ] Cups labeled A to D, nothing else on the label: no names, no fruits. Pour them during setup onto covered trays, and bring the trays out as THE FLAVOR RACE ends.
- [ ] Backup samples of each, in case of a spill or a second pour.
- [ ] Tasting cups, spit cups and napkins at every seat.
- [ ] Water to rinse between samples.
- [ ] The QR code on screen for phones, and the loaner phone or tablet joined at setup. A few paper scorecards and pens as a last resort.
- [ ] Reveal: the names flip on screen at the second build of the tasting. Reveal cards only if you're bringing printed ones.

THE RUN OF SHOW

TIME	BLOCK AND SCENES	WHAT HAPPENS
10:00 to 10:10	Welcome, who we are and your four objectives The Future of Freshness (1), Who we are, since July (2), Our flavors in your range (3), Your four objectives (4), Your pre-brief answers (5, only if answers came in)	As people sit down, the arrival screen shows the title, the QR code and the first names as phones join. At 10:00, thank Ross for having us. Introduce the four of us, with the July row if there's time. Then the TheraBreath products our flavors are in today. Read Ross's four objectives and his goal, and show the pre-brief answers if any came in.
10:10 to 10:25	What's changing: your portfolio, the market and seven trends OBJECTIVE 01 The other 86 (6), The shelf (7), Seven trends: vote, then discuss (8)	Open on why we're here, then the household gap and who the other 86 are, and ask which group a new flavor is for. Put the portfolio next to what competitors are launching, and ask what keeps TheraBreath ahead. Then all seven trends go up at once and everyone votes for three on their phone straight away; the presenter view adds a vote by hand for anyone without one. The next click closes the vote and the top three open one at a time for discussion. They go into the Playbook. Ask out loud what we missed.
10:25 to 10:40	Flavor School, then four directions OBJECTIVE 02 Flavor School: flavor and sodium chlorite (9), Four directions (10), THE FLAVOR RACE (11)	One slide on flavor, three things to know: smell and feel, cooling, then why sodium chlorite is tough on flavor and what we control, ending on the clean finish. Then the four directions on one map: click a direction to open its profile card. Two have samples in the tasting; the other two are optional cards that S skips. At 10:37, THE FLAVOR RACE: a surprise for the room, so don't announce it. Lights down, sound up, 2:24 of film. It starts only when you move onto it, and you can pause, restart or skip it from the presenter view or the keys. It ends on four glasses on a tray: lights up and bring out the covered trays. Its flavor montage shows the flight's own fruits, the Mystery Flavor's among them, so treat it as a hint. If we're running late, skip it: nothing is decided on it.
10:40 to 11:00	A blind tasting in your bases OBJECTIVE 02 The blind tasting (12), Where each sample landed, then what gets a next round (13)	At 10:40, uncover the trays poured during setup: A and B in the Kids base, C and D in the Fresh Breath base. Everyone scores each sample on their phone, and the scores fill the screen as they come in. The loaner phone or tablet is there for anyone without one; paper cards are the last resort. For each paper card handed in, tap +1 paper card in the presenter view; we type them in after the morning. B is the Mystery Flavor, so get everyone's fruit guesses before the names go up. Then the bubble chart from the scores stays up while everyone places five chips on what gets a next round, and the top three go up.
11:00 to 11:20	From samples to concepts OBJECTIVE 03 Where TheraBreath fits in a day (14), Concepts (15)	Walk through the day, moment by moment: where TheraBreath is today, the moment the pre-brief says is missing, and everything that's still open. The rows are the top three from the chips: click a cell to mark where each could fit. Then the concept cards start themselves from those three, with When from the marks. Change any field by tapping in the presenter view, or swap a card for one from our library (the two example concepts are in it). Up to three, and nothing to type.
11:20 to 11:40	White space, then Now, Next, Later OBJECTIVE 04 Now, Next, Later (16)	Tap a concept or direction in the tray, then tap Now, Next or Later to place it. Placing it is the vote. Tap a line to move it or take it back. In the presenter view, tap its fields: the consumer or occasion, the next test, a TFF owner, a C&D reviewer, the base, the date the next sample is due (the January review unless the room says otherwise) and the agreed next step. The flavor brief drafts itself from the direction's profile and is finished in the write-up. Tap To confirm where nobody can say yet.

TIME	BLOCK AND SCENES	WHAT HAPPENS
11:40 to 12:00	What we decided and what happens next What we decided and what happens next (17), Thank you (18)	The Playbook fills in from the votes and the board and opens one chapter at a time so it can be read back, the plan with its owners last. Then the three next steps, and thank you. The last slide is a thank-you card, and the time until 12:00 is for questions. Then lunch, hosted by Church & Dwight.

SLIDE BY SLIDE

Planned minutes, so each part ends on time; the presenter view shows each slide's planned window. Numbers match the presenter view's Go to list. Builds marked optional are the ones S skips. Your pre-brief answers (5) shows only once someone has answered; if nobody has, its four minutes are spare.

PLANNED	#	SLIDE	ON SCREEN, CLICK BY CLICK	ASK THE ROOM, AND THE PHONES
10:00 TO 10:10 · WELCOME, WHO WE ARE AND YOUR FOUR OBJECTIVES				
10:00 1 min	1	The Future of Freshness	The title, the QR code, the number of phones joined and their first names.	At 10:00: welcome, thank Ross, and set up the two hours: four objectives, four samples, a plan to leave with. *Phones: Scan the code and type a first name.*
10:01 2 min	2	Who we are, since July OPTIONAL BUILD	The four of us, what we test in the lab and what we bring in from outside oral care. 1 Optional (S skips it): the four July themes, and Growth, November, lights up.	
10:03 1 min	3	Our flavors in your range	The 14 TheraBreath rinses on shelf today with our flavors in them, each bottle with its flavor and product line.	
10:04 2 min	4	Your four objectives	"We've built the morning around your four objectives." 1 Objective 01 and its time, 10:10 to 10:25. 2 Objective 02, 10:25 to 11:00. 3 Objective 03, 11:00 to 11:20. 4 Objective 04, 11:20 to 11:40. 5 Ross's goal, in his words.	
10:06 4 min	5	Your pre-brief answers IF ANSWERED	Who the next flavor should be for, with any "Someone else" answers. 1 The moment TheraBreath is missing, and the group's freshness profile. 2 What would feel off-brand, without names.	What makes each off-brand answer feel wrong for the brand?
10:10 TO 10:25 · WHAT'S CHANGING: YOUR PORTFOLIO, THE MARKET AND SEVEN TRENDS · OBJECTIVE 01				
10:10 3 min	6	The other 86	Objective 01. "TheraBreath took the burn out of mouthwash. The next job is giving more people a reason to want it." 1 Two glasses fill: 65 for mouthwash, 14 for TheraBreath, with the record 26.8% share and its source (Church & Dwight's Q3 call). 2 "86 out of 100 households don't buy TheraBreath yet": 51 buy another mouthwash, 35 don't buy mouthwash at all. 3 "Flavor could give more of them a reason to try it."	Which group is a new flavor for?
10:13 3 min	7	The shelf	21 of 25 flavors are mint, across six formats, beside what competitors are launching. 1 "There's a lot of room around mint." 2 Where TheraBreath stands.	TheraBreath already has what they're chasing. What keeps it ahead?
10:16 9 min	8	Seven trends: vote, then discuss	All seven trends, one line each with where the evidence comes from. The bars fill as phones vote. 1 The vote closes. Number 1 opens: its evidence, what it could mean and its question. 2 Number 2. 3 Number 3. The top three go into the Playbook.	Each trend's own question on screen. Then, out loud only: what are you seeing that we missed? *Phones: Pick three trends straight away. Hand votes in the presenter view for anyone without a phone.*

PLANNED	#	SLIDE	ON SCREEN, CLICK BY CLICK	ASK THE ROOM, AND THE PHONES
10:25 TO 10:40 · FLAVOR SCHOOL, THEN FOUR DIRECTIONS · OBJECTIVE 02				
10:25 4 min	9	Flavor School: flavor and sodium chlorite	Objective 02. Flavor School, three things to know. Smell and feel: “Most of what we call flavor is really smell. The rest is how it feels.” Taste, aroma and feel. 1 Cooling does two jobs: three curves, drawn to explain, not measured. 2 Sodium chlorite is tough on flavor. What we control: pH, formulating and protecting the flavor, materials that hold up. “It has to finish clean.”	Where has flavor been hardest to get right with sodium chlorite for you?
10:29 8 min	10	Four directions OPTIONAL BUILDS	The map: familiar to adventurous, gentle to bold, all four directions. Our view, not data. 1 Plant-Powered Freshness: its profile card. 2 Optional (S skips it): Global Brightness. 3 Optional (S skips it): Modern Clean. 4 Next-Generation Kids.	Which direction feels most like TheraBreath, and which stretches it most? Click a direction to open its card.
10:37 3 min	11	THE FLAVOR RACE	THE FLAVOR RACE, 2:24, lights down and sound up. Don’t announce it. It ends on four glasses on a tray: lights up and bring out the samples.	Nothing: let it play. Its montage shows the flight’s fruits, so it doubles as a hint for the Mystery Flavor. *Phones: Phones show “Phones down for a couple of minutes.”*
10:40 TO 11:00 · A BLIND TASTING IN YOUR BASES · OBJECTIVE 02				
10:40 13 min	12	The blind tasting	Four coded samples and how many have scored. A and B first, then C and D, with water between. 1 Their one-word answers and fruit guesses. 2 The names, after everyone has scored. B shows its name only.	*Phones: Score each sample: appeal, fit with TheraBreath and newness from 1 to 5, who would buy it, which direction it comes from, whether to develop it, one word. Fruit guesses for the Mystery Flavor. Paper cards counted with +1 in the presenter view and typed in after the morning.*
10:53 7 min	13	Where each sample landed, then what gets a next round	Each sample placed by fit with TheraBreath (across) and newness (up), sized by appeal, beside the chips vote. 1 The top three from the chips.	Of C and D, which feels more like TheraBreath? Top right is what Ross asked for: both at once. What would it take to move the others there? Then: what would set TheraBreath’s flavors apart from what competitors are launching? *Phones: Five chips each on the four samples and the two directions not in the tasting, stacking allowed. Hand chips in the presenter view.*
11:00 TO 11:20 · FROM SAMPLES TO CONCEPTS · OBJECTIVE 03				
11:00 5 min	14	Where TheraBreath fits in a day	Objective 03. A day from wake-up to wind-down, plus on the go, with a row for each of the top three from the chips. 1 Where TheraBreath is today: rinse, and lozenges, gum and sachets on the go. 2 The moment the pre-briefs say is missing, and their most common answer for who the next flavor is for. 3 Everything still open. Click a cell to mark where each could fit: the first mark becomes its concept’s When.	Where have we got today wrong? Where could each one fit?
11:05 15 min	15	Concepts	Up to three concept cards, started from the top three chips: where it starts, who it’s for, when, role in the range, format, what it grows. Change any field by tapping in the presenter view, or swap a card from the library.	Which moment of the day is TheraBreath missing? Who could a new flavor bring in? If the room is stuck, swap in one of the two example concepts.
11:20 TO 11:40 · WHITE SPACE, THEN NOW, NEXT, LATER · OBJECTIVE 04				

PLANNED	#	SLIDE	ON SCREEN, CLICK BY CLICK	ASK THE ROOM, AND THE PHONES
11:20 20 min	16	Now, Next, Later	Objective 04. Now, Next, Later, with the concepts and the top chips in a tray. Tap one, then tap Now, Next or Later to place it.	What should go first, and what has to be true for it to work? For each line, tap in the presenter view: consumer or occasion, next test, TFF owner, C&D reviewer, base, next sample date, agreed next step. The flavor brief drafts itself and is finished in the write-up.
11:40 TO 12:00 · WHAT WE DECIDED AND WHAT HAPPENS NEXT				
11:40 8 min	17	What we decided and what happens next	The Playbook assembles from the morning. 1 Chapter 1, the trends. 2 Chapter 2, the directions and the tasting. 3 Chapter 3, the concepts. 4 Chapter 4, the plan: read it back, owners and all. 5 Next step 1: an owner for each direction. 6 Next step 2: the write-up within 8 business days. 7 Next step 3: the next round of samples, in January 2027.	
11:48 12 min	18	Thank you	The thank-you card.	Questions until 12:00, then lunch, hosted by Church & Dwight.

IF WE RUN BEHIND

1. A few minutes behind: press S. It skips the optional builds (the July row on Who we are, and the profile cards for Global Brightness and Modern Clean), and the presenter view shows the short version is on.
2. Further behind: skip THE FLAVOR RACE (the right arrow or] on it goes straight to the tasting, and the map's presenter view has a button for it), discuss two of the top three trends instead of three, and keep one concept card instead of three. Press] to jump to the next part.
3. Out of time: read back Now, Next, Later with its owners, then End goes straight to the thank-you card.
4. Never cut: the blind tasting, the chips on what gets a next round, and the owners and next steps on Now, Next, Later.

IF THE ROOM NEEDS A STARTING POINT: TWO EXAMPLE CONCEPTS

Both are cards in the concept library: swap one in from the presenter view only if the room is stuck, and let them change it. The assumptions are ours, not facts.

A calmer last rinse of the day

FOR	Loyal TheraBreath users
WHEN	Wind-down, the last rinse before bed
FLAVOR DIRECTION	A softer botanical mint, in the Fresh Breath base, next to what Overnight Chamomile Mint already does
HOW IT FEELS	Gentle cooling that fades rather than lingers, no sting, a calm aromatic finish
WHAT WE'D TEST	Does softer cooling still read as clean to a loyal user? Do the botanical notes hold up in the base over time?

- *Assumption: loyal users want a different feel at night than in the morning.*
- *Assumption: the botanical notes stay stable in the base. That needs a bench check.*

A guessing game at the sink

FOR	Families with kids and tweens
WHEN	The evening routine with the kids
FLAVOR DIRECTION	A fruit flavor sold as a mystery, in the Kids base, in the spirit of the Mystery Flavor sample
HOW IT FEELS	A fruit-forward start, mild cooling, a clean finish
WHAT WE'D TEST	Do kids enjoy guessing more than a named fruit? Do parents still see it as a real oral care product? How much cooling do kids accept?

- *Assumption: the guessing makes kids want to rinse.*
- *Assumption: a mystery name works for parents in store. Both need testing with families.*

AFTER THE MORNING

- [ ] Before you close the laptop, open /host?results=1 and print it to PDF: the votes, the scores, the concepts, the white-space marks and Now, Next, Later as we left them. The Playbook write-up (/host/writeup) fills in from the same session.
- [ ] Collect the paper scorecards and type them in on /host/cards (the team page links to it). Their scores join the results page and the write-up as each one is saved.
- [ ] In the write-up, press Edit what's to confirm: finish the drafted flavor briefs and fill in anything still To confirm. Both are highlighted until they're done.
- [ ] An owner for each direction: Before we leave today, every direction gets its consumer or occasion, a flavor brief, the next test, a TFF owner, a C&D reviewer, a base, a date for the next sample and an agreed next step.
- [ ] The write-up within 8 business days: We'll pull today's scores, choices, owners and dates into one document and send it to everyone here.
- [ ] The next round of samples: We'll make the next round in your bases and go through it with you in January 2027.

BEFORE NOVEMBER 9: STILL TO CONFIRM

- [ ] Ryan to review the Flavor School slide (slide 9): his wording, merged onto one slide in three builds, now naming sodium chlorite rather than OXYD-8, with formulating and protecting the flavor.
- [ ] Check the bottles and flavor names on Our flavors in your range (slide 3) against our portfolio record. Names only: no usage levels or flavor codes.
- [ ] Review the drafted concept cards and the option lists in src/lib/conceptLibrary.ts. Every starter card is marked DRAFT until we've checked it.
- [ ] The bases: Berry Blast and the Mystery Flavor in the Kids base, Blossom Mint and Grove Mint in the Fresh Breath base.
- [ ] The dates on What happens next, including the January 2027 review.
- [ ] A video call with Ross before the day. He asked to connect once or twice ahead of time.
- [ ] Whether to tell the room what's in the Mystery Flavor once the names go up. The presentation, the phones and the write-up show its name but not its contents, so the room can keep guessing.
- [ ] That the samples were made in the unflavored bases Church & Dwight sent, as the front door says.

Confidential. Keys in the presentation: right arrow, space or click to go on; left arrow to go back;] for the next part and [for the previous one; S for the short version, which skips the optional builds; Home for the start; End for the thank-you card; F for full screen; P for the presenter view; N for the talking points on the TV itself; B to blank the screen. On THE FLAVOR RACE, space or K pauses and plays and R starts it again. The same keys work in the presenter view. If the page reloads, it picks up where the session left off.
